

ZOOM-ZOOM

Know where you are, and where you're going.

- Travel, journey, explore, *zoom-zoom*. You'll always know where you're headed, wherever you go.
- Never read an old-fashioned paper map again. With a DVD map database of the entire country and GPS satellites displaying your exact location at any given moment, you can go anywhere. And, with a 7-inch touch screen plus voice command recognition, this hi-tech navigation system is both safe and easy to use.
- Need to know where to exit for local attractions? No problem. The Mazda Navigation System can pinpoint millions of points of interest in over 40 different categories and get you there, providing both audible and visual guidance. When you're looking for entertainment, find restaurants, golf courses and other local attractions. Even in a strange city, you'll feel more secure with directions to everything from police stations to gas stations. As an added convenience, get instant directions to ATM's, airports, or even hotels and shopping.

Key Features

Automatic Rerouting

Your route will automatically recalculate if you miss a turn or depart from the original guidance

Turn List Mode

When selected, the navigation system displays turn-by-turn information on one half of the screen, and the map on the other

Voice Guidance

Audible directions given through the stereo speakers alert you of your next maneuver; press the Voice button and say "Repeat" to hear the last command given

Zoom

Choose from 13 scales/levels of magnification; a zoom magnification level of less than one mile is required to show icons on the map

Touch Screen

Control most aspects of the navigation system with your fingertips, using the 7-inch high-definition touch screen

Voice Commands

Your vehicle's navigation system is equipped with a Voice Recognition function for added safety and convenience. This feature allows you to control many aspects of the system using only your voice. To initiate voice recognition the VOICE button on the steering wheel must be pressed. Once engaged, the system will beep and wait for your response if additional information is necessary.

Navigation Related Commands

"Repeat"	"ATM"
"Zoom In / Out"	"I'm Hungry"
"Voice Guidance Off / On"	"Airport"
"Detour"	"Shopping Mall"
"Rest Area"	"POI Off"
"Gas Station"	"Cancel"
"Hotel"	"Enter Destination"
"Hospital"	"Go to Preset Destination [#]"
"Police Station"	"Go Home"
*"Display Day"	*"Display Night"
"Show Map"	"Turn List"

See owner's manual for a complete list of commands.

*These will change the "backlighting" of the system screen.

Frequently Asked Questions

I can't find my destination address?

Check that you have selected the correct search area for your destination address. Also ensure that you have selected the correct region to search on the "Destination Entry" screen. (see Search Area of this guide). Due to changes in the road network, i.e. expansion of home sub-divisions, it is possible the address is not contained on your map.

Why doesn't my system route me the way I expect to go?

Delete any old route points still stored as destinations or waypoints by selecting stored locations. Check that you do not have any avoid areas saved along your chosen route. Also check your Route Option settings.

Why can't I see the navigation display with my sunglasses on?

The display uses polarization technology, and may not be viewed with some polarized sunglasses. Try wearing non-polarized sunglasses while in your vehicle.

How many languages are available?

You can select from 3 languages - English, Spanish or French. Manage your language selection through the Navigation Set-Up menu.

How do I synchronize my information clock to the navigation clock?

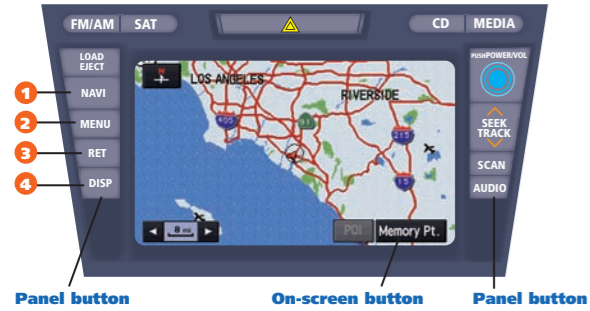

Ensure the vehicle is in an open area where GPS signal can be received. To verify GPS signal, turn the ignition on and look for the blue "GPS" icon in the top left corner of the navigation screen. If no "GPS" icon appears, the vehicle may need to be driven. Once a GPS signal has been established, verify that the information display clock time matches the navigation system clock.

Map Database Facts

- The Map Data DVD contains navigable road data for all of the continental United States and parts of Canada. This road data includes information such as city names, street names, and over 150 attributes associated with each road segment. One-way streets, turn restrictions, and medians are all included attributes in your Map Data DVD.
- The Map Database is continually updated by NAVTEQ to provide additional coverage, and account for changes in both the road network and points of interest. Purchasing map updates when available is recommended to ensure your system operates using the most current information.
- Map and software version numbers can be found by entering the Navigation Set Up menu, then selecting Calibration and Map Version. To get more information about the Map Data and/or updates, contact the Mazda Customer Assistance Center at 800.222.5500.

Names and Functions

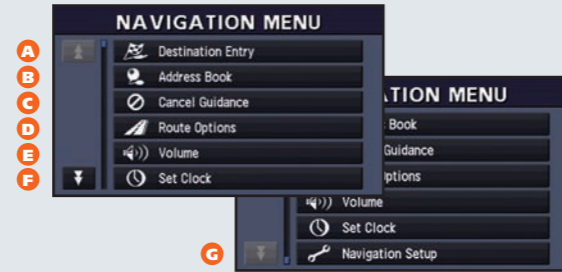

- 1 NAVI** – Displays the navigation screen and the vehicle's present location
 - 2 MENU** – Brings up the Navigation Menu
 - 3 RTN** – Returns to the previous screen
 - 4 DISP** – Adjust the screen display
- On-Screen Buttons** – Operable buttons are illuminated

When the system powers on, the Caution screen is displayed. Please read and press Agree to continue using the Mazda Navigation System.

Quick Start Guide

(For complete operating instructions, see your owner's manual)

Navigation Menu

- A (Destination Entry)** – Set a destination using various entry methods
- B (Address Book)** – Store up to 106 addresses (100 Memory Points, 5 Pre-Set Destinations, 1 Home)
- C (Cancel Guidance)** – Cancel the calculated route guidance to a destination
- D (Route Options)** – During guidance you can specify preferences, add a way point, or view the turn list
- E (Volume)** – Adjust the volume of the system's voice guidance
- F (Set Clock)** – Adjust the vehicle and navigation clock
- G (Navigation Set Up)** – Customize the system to your liking

Route Options

- A (Route Preference)** – Edit your route calculation preferences. Choose to avoid toll and/or major roads, restricted roads, and ferries
- B (Destination & Way Point)** – Delete or edit your destination and up to 5 Way Points
- C (Display Route)** – Preview a simulation of your route on the map screen
- D (Detour)** – Recalculate your route by detouring 1, 3, 5 miles or even the entire route
- E (Turn List)** – Displays all turns required to reach your final destination

Destination Entry (Part 1)

- A (Change)** – Set your region (Search Area) for quicker searches
- B (Address)** – Select destination by address
- C (Point of Interest)** – Search and route to POIs several different ways
- D (Emergency)** – Provides quick access to police stations and hospitals nearest to your location
- E (Memory Point)** – Save and customize up to 100 destinations
- F (Home)** – Once set, you can navigate home from anywhere at the touch of a button
- G (Preset Destinations)** – Save up to 5 frequently used destinations

Destination Entry (Part 2)

- A (Preset Destinations)**
- B (Previous Destinations)** – Select from the last 100 destinations entered
- C (Intersection)** – Locate a specific intersection
- D (Freeway On Ramp / Off Ramp)** – Route to freeway entrances or exits
- E (Coordinates)** – Select a destination using specific coordinates
- F (Select from Map)** – Choose a destination using crosshairs on the map screen

Search Area

- Under Destination Entry, select Change
- Select the desired search area and press OK

Address Entry

- From the Destination Entry menu, select Address
- Select City – this will narrow your search and enable predictive text
- Select Street and enter the street name. Do not include prefix, suffix, or street types (for S. Main Ave, enter Main)
- Enter the house number and press OK

Point of Interest

- From the Destination Entry Menu, select Point of Interest
- A (Name)** – Enter the name of the place your searching for
 - B (City)** – Search for a POI in a specific city.
 - C (Category)** – Select from millions of POIs in approximately 40 different categories
 - D (Nearest)** – Find the POIs closest to you
 - E (Phone Number)** – Find a business using their phone number
