Zoom-Zoom

All children instinctively know it.

A few adults still remember it.

One unique car company refuses to outgrow it.

In grown-up language, it means the exhilaration and liberation that come from experiencing sheer motion.

But as usual, children put it much better and simply call it "Go Zoom-Zoom."

We practice it every day.

It's why we build the kind of cars we do.

Zoom-Zoom.

Can we re-awaken it in you today?
A Word to Mazda Owners

Thank you for choosing a Mazda. We at Mazda design and build vehicles with complete customer satisfaction in mind.

To help ensure enjoyable and trouble-free operation of your Mazda, read this manual carefully and follow its recommendations.

An Authorized Mazda Dealer knows your vehicle best. So when maintenance or service is necessary, that's the place to go.

Our nationwide network of Mazda professionals is dedicated to providing you with the best possible service.

We assure you that all of us at Mazda have an ongoing interest in your motoring pleasure and in your full satisfaction with your Mazda product.

Mazda Motor Corporation
HIROSHIMA, JAPAN

Important Notes About This Manual
Keep this manual in the glove box as a handy reference for the safe and enjoyable use of your Mazda. Should you resell the vehicle, leave this manual with it for the next owner.

All specifications and descriptions are accurate at the time of printing. Because improvement is a constant goal at Mazda, we reserve the right to make changes in specifications at any time without notice and without obligation.

Event Data Recorder
This vehicle is equipped with an event data recorder. In the event of a crash, this device records data related to vehicle dynamics and safety systems for a short period of time. These data can help provide a better understanding of the circumstances in which crashes and injuries occur and lead to the designing of safer vehicles.

Air Conditioning and the Environment
Your Mazda's genuine air conditioner is filled with HFC134a (R134a), a refrigerant that has been found not to damage the earth's ozone layer. If the air conditioner does not operate properly, consult an Authorized Mazda Dealer.

Perchlorate
Certain components of this vehicle such as [air bag modules, seat belt pretensioners, lithium batteries, ...] may contain Perchlorate Material—Special handling may apply for service or vehicle end of life disposal. See www.dtsc.ca.gov/hazardouswaste/perchlorate.

Please be aware that this manual applies to all models, equipment and options. As a result, you may find some explanations for equipment not installed on your vehicle.

How to Use This Manual

We want to help you get the most driving pleasure from your vehicle. Your owner's manual, when read from cover to cover, can do that in many ways.

Illustrations complement the words of the manual to best explain how to enjoy your Mazda. By reading your manual, you can find out about the features, important safety information, and driving under various road conditions.

The symbol below in this manual means “Do not do this” or “Do not let this happen”.

Index: A good place to start is the Index, an alphabetical listing of all information in your manual.

You'll find several WARNINGs, CAUTIONs, and NOTEs in the manual.

**WARNING**

A WARNING indicates a situation in which serious injury or death could result if the warning is ignored.

**CAUTION**

A CAUTION indicates a situation in which bodily injury or damage to your vehicle, or both, could result if the caution is ignored.
# Table of Contents

**Your Vehicle at a Glance**  
Interior, exterior views and part identification of your Mazda.  

**Essential Safety Equipment**  
Use of safety equipment, including seats, seat belt system, child-restraint systems and SRS air bags.  

**Knowing Your Mazda**  
Explanation of basic operations and controls; opening/closing and adjustment of various parts.  

**Before Driving Your Mazda**  
Important information about driving your Mazda.  

**Driving Your Mazda**  
Explanation of instruments and controls.  

**Interior Comfort**  
Use of various features for drive comfort, including air-conditioning and audio system.  

**In Case of an Emergency**  
Helpful information on what to do in an emergency.  

**Maintenance and Care**  
How to keep your Mazda in top condition.  

**Customer Information and Reporting Safety Defects**  
Important consumer information including warranties and add-on equipment.

Essential Safety Equipment

Seats

Front Seats (Manually Operated Seats)

⚠️ WARNING

Do not modify or replace the front seats:
Modifying or replacing the front seats such as replacing the upholstery or loosening any bolts is dangerous. The front seats contain air bag components essential to the supplemental restraint system. Such modifications could damage the supplemental restraint system and result in serious injury. Consult an Authorized Mazda Dealer if there is any need to remove or reinstall the front seats.

Do not drive with damaged front seats:
Driving with damaged front seats is dangerous. A collision, even one not strong enough to inflate the air bags, could damage the front seats which contain essential air bag components. If there was a subsequent collision, an air bag may not deploy which could lead to injuries. Always have an Authorized Mazda Dealer inspect the front seats, front seat belt pretensioners and air bags after a collision.

Make sure the adjustable components of a seat are locked in place:
Adjustable seats and seatbacks that are not securely locked are dangerous. In a sudden stop or collision, the seat or seatback could move, causing injury. Make sure the adjustable components of the seat are locked in place by attempting to slide the seat forward and backward and rocking the seatback.

Adjust the driver's seat only when the vehicle is stopped:
Adjusting the driver's seat while the vehicle is moving is dangerous. The driver could lose control of the vehicle and have an accident.

⚠️ CAUTION

Be careful not to place your hands and fingers around moving parts of the front seat when adjusting the seat positions to prevent injury.

▲ Seat Slide

To move a seat forward or backward, raise the lever and slide the seat to the desired position and release the lever.
Make sure the lever returns to its original position and the seat is locked in place by attempting to push it forward and backward.

**Seat Recline**

**WARNING**

Do not drive with either front seat reclined:

Sitting in a reclined position while the vehicle is moving is dangerous because you do not get the full protection from seat belts. During sudden braking or a collision, you can slide under the lap belt and suffer serious internal injuries. For maximum protection, sit well back and upright.

Always sit in the passenger seat properly with the seatback upright and feet on the floor (With Driver and Front Passenger Occupant Classification System):

Your front passenger seat has weight sensors, sitting in the front passenger seat improperly out of position or with the seatback reclined too far while the vehicle is moving is dangerous as it can take off weight from the seat bottom and affect the weight determination of the front passenger sensing system. As a result the front passenger will not have the supplementary protection of the airbag and seat belt pretensioner, which could result in serious injury. Always sit upright against the seatback with your feet on the floor.

Do not drive with the seatback unlocked:

All of the seatbacks play an important role in your protection in a vehicle. Leaving the seatback unlocked is dangerous as it can allow passengers to be ejected or thrown around and baggage to strike occupants in a sudden stop or collision, resulting in severe injury. After adjusting the seatback at any time, even when there are no other passengers, rock the seatback to make sure it is locked in place.

To change the seatback angle, lean forward slightly while raising the lever. Then lean back to the desired position and release the lever.

Make sure the lever returns to its original position and the seatback is locked in place by attempting to push it forward and backward.
Essential Safety Equipment

Seats

⚠️ CAUTION
When returning a rear-reclined seatback to its upright position, make sure you hold onto the seatback with your other hand while operating the lever. If the seatback is not supported, it will flip forward suddenly and could cause injury.

▼ Height Adjustment (Driver's Seat)
To adjust the seat height, move the lever up or down.

▼ Lumbar Support Adjustment (Driver's Seat)
To increase the seat firmness, pull the lever forward. Push the lever backward to decrease firmness.

Front Seats (Electrically Operated Seats)

⚠️ WARNING
Do not modify or replace the front seats:
Modifying or replacing the front seats such as replacing the upholstery or loosening any bolts is dangerous. The front seats contain air bag components essential to the supplemental restraint system. Such modifications could damage the supplemental restraint system and result in serious injury. Consult an Authorized Mazda Dealer if there is any need to remove or reinstall the front seats.

Do not drive with damaged front seats:
Driving with damaged front seats is dangerous. A collision, even one not strong enough to inflate the air bags, could damage the front seats which contain essential air bag components. If there was a subsequent collision, an air bag may not deploy which could lead to injuries. Always have an Authorized Mazda Dealer inspect the front seats, front seat belt pretensioners and air bags after a collision.

Adjust the driver's seat only when the vehicle is stopped:
Adjusting the driver's seat while the vehicle is moving is dangerous. The driver could lose control of the vehicle and have an accident.
CAUTION

- The seat-bottom power adjustment is operated by motors. Avoid extended operation because excessive use can damage the motors.
- To prevent the battery from running down, avoid using the power adjustment when the engine is stopped. The adjuster uses a large amount of electrical power.
- Do not use the switch to make more than one adjustment at a time.
- Be careful not to place your hands and fingers around moving parts of the front seat when adjusting the seat positions to prevent injury.

▼ Seat Slide

To slide the seat, move the slide lifter switch on the outside of the seat to the front or back and hold it. Release the switch at the desired position.

▼ Seat Recline

WARNING

Do not drive with either front seat reclined:

- Sitting in a reclined position while the vehicle is moving is dangerous because you do not get the full protection from seat belts. During sudden braking or a collision, you can slide under the lap belt and suffer serious internal injuries. For maximum protection, sit well back and upright.

Always sit in the front passenger seat properly with the seatback upright and feet on the floor (With Driver and Front Passenger Occupant Classification System):

- Your front passenger seat has weight sensors, sitting in the front passenger seat improperly out of position or with the seatback reclined too far while the vehicle is moving is dangerous as it can take off weight from the seat bottom and affect the weight determination of the front passenger sensing system. As a result the front passenger will not have the supplementary protection of the air bag and seat belt pretensioner, which could result in serious injury. Always sit upright against the seatback with your feet on the floor.
Essential Safety Equipment

Seats

To change the seatback angle, press the front or rear side of the reclining switch. Release the switch at the desired position.

▼ Seat Position Memory *

The driver’s seat position memory function allows you to program a desired seat position. The personalized positions can be easily activated with the simple touch of a button. The programmed positions can also be activated when unlocking the doors using a programmed advanced key/retractable type key. Seat positions for up to three people can be programmed into the memory using the three available programming buttons.

⚠️ CAUTION

When activating the seat position, do not place your hands or fingers around the seat bottom. The seat moves to the desired position automatically, and if your hands or fingers are placed around the seat bottom, it could cause injury.

NOTE

- Only operate the seat memory function while the vehicle is parked.
- Vehicle maintenance or other reasons requiring the vehicle battery to be disconnected will result in the seat position memory being erased.
  In this case, re-program the seat positions.

Programming

1. Adjust the seat to the desired position.
   For each seat position adjustment method refer to the following pages:
   Seat Slide (page 2-5)
   Seat Recline (page 2-5)
   Height Adjustment (page 2-6)

* Some models.
2. Press the SET button followed by one of the programming buttons (1, 2, or 3) within about 5 seconds. A beep sound is heard after the programming is completed.

**NOTE**
*If the programming button (1, 2, or 3) you have selected is already programmed, it will be overwritten with the new setting.*

### Activating the seat to a pre-programmed position

1. Shift the selector lever to the P position.

2. Press the programming button (1, 2, or 3) that you selected when programming your seat position. A beep sound is heard after the adjustment to the programmed position is completed.

**NOTE**
*When the ignition is switched to ACC or off, a pre-programmed seat position can be activated regardless of the selector lever position.*

*If the seat is already adjusted to the position you are activating, the seat does not move, however, a beep sound is heard to confirm that the adjustment operation is completed.*

### Activating the seat position when unlocking with an advanced key/retractable type key

Your desired seat position can be activated when unlocking the doors. Perform the following procedure using the advanced key/retractable type key.

1. Adjust the seat to the desired position.

2. Switch the ignition off.

3. Press the SET button next to the programming buttons and then the unlock button on the advanced key/retractable type key you want to program within about 5 seconds. A beep sound is heard when the operation is completed.

When the driver's door is unlocked using a programmed advanced key/retractable type key, the seat is activated to a programmed position if the driver's door is opened within about 40 seconds. A beep sound is heard after the adjustment to the programmed position is completed.
Essential Safety Equipment

Seats

NOTE

- If the seat is already adjusted to the position you are activating, the seat does not move (a beep sound is not heard).
- The advanced key/retractable key cannot be programmed while the key is inserted in the key cylinder.
- If any of the following operations is performed while activating a seat, the activation will cancel (After pressing a programming button or unlocking the doors with a programmed advanced key/retractable type key, and while the positions are being adjusted).
  - The selector lever is shifted to a position other than P (The ignition is switched ON).
  - Any of the seat adjustment switches other than a lumbar support switch are operated.
  - The SET button is pressed.
  - A programming button (1, 2, or 3) is pressed.
  - Vehicle locking/unlocking is done using the transmitter.
  - The vehicle starts moving.
- (To cancel the seat activation when using a programmed advanced key/retractable type key to unlock the doors)
  Perform the following procedure.
  - Switch the ignition off.
  - Press the SET button next to the programming button (1, 2, or 3) and then the lock button on the advanced key/retractable type key within about 5 seconds. A beep sound is heard after the operation is completed.

▼Lumbar Support Adjustment (Driver's Seat)

Manually operated
To increase the seat firmness, pull the lever forward. Push the lever backward to decrease firmness.

Electrically operated
The amount of lumbar support can be adjusted by pressing the switch.
To increase the seat firmness, press and hold the front part of the switch to the desired position, then release it.
Press the rear part of the switch to decrease firmness.
Second-Row Seats

**WARNING**

Do not stack cargo higher than the seatbacks:

Stacking luggage or other cargo higher than the seatbacks is dangerous. During a sudden stop or collision, objects can fly around and become projectiles that could hit and injure passengers.

Make sure luggage and cargo are secured before driving:

Not securing cargo while driving is dangerous as it could move or be crushed during sudden braking or a collision and cause injury.

Make sure the adjustable components of a seat are locked in place by attempting to slide the seat forward and backward and rocking the seatback:

Adjustable seats that are not securely latched are dangerous. In a sudden stop or collision, the seat or seatback could move, causing injury.

Adjust the seat only when the vehicle is stopped:

Adjusting the seat while the vehicle is moving is dangerous. Sudden braking or a collision could cause serious injury.

Do not drive with the seatback unlocked:

All of the seatbacks play an important role in your protection in a vehicle. Leaving the seatback unlocked is dangerous as it can allow passengers to be ejected or thrown around and baggage to strike occupants in a sudden stop or collision, resulting in severe injury. After adjusting the seatback at any time, even when there are no other passengers, rock the seatback to make sure it is locked in place.

Never allow a passenger to sit or stand on the folded seatback while the vehicle is moving:

Driving with a passenger on the folded seatback is dangerous. Allowing a child to sit up on the folded seatback while the vehicle is moving is particularly dangerous. In a sudden stop or even a minor collision, a child not in a proper seat or child-restraint system and seat belt could be thrown forward, back or even out of the vehicle resulting in serious injuries or death. The child in the baggage area could be thrown into other occupants and cause serious injury.

**CAUTION**

Be careful not to place your hands and fingers around moving parts of the second-row seat when adjusting the seat positions to prevent injury.

**NOTE**

The second-row seats cannot be removed.
Essential Safety Equipment

Seats

▼ Seat Slide

To move the seat forward or backward, raise the bar and slide the seat to the desired position and release the bar.

Make sure the bar returns to its original position and the seat is locked in place by attempting to push it forward and backward.

▼ Seat Recline

⚠️ WARNING

**Do not drive with the seats reclined:** Sitting in a reclined position while the vehicle is moving is dangerous because you do not get the full protection from the seat belts. During sudden braking or a collision, you can slide under the lap belt and suffer serious internal injuries. For maximum protection, sit well back and upright.

**Do not recline a second-row seatback when the third row seat is occupied:** Reclining the second-row seatback when the third-row seat is occupied is dangerous. Because the clearance in the third-row seat is limited, occupants in the third-row seat could be hurt seriously on a reclined second-row seatback.

To change the seatback angle, lean forward slightly while pulling the lever. Then lean back to the desired position and release the lever.

Make sure the lever returns to its original position and the seatback is locked in place by attempting to push it forward and backward.
CAUTION

When returning a rear-reclined seatback to its upright position, make sure you hold onto the seatback with your other hand while operating the lever. If the seatback is not supported, it will flip forward suddenly and could cause injury.

Armrest

The armrest can be used (no occupant in the center seat) or placed upright.

Third-Row Seat Access

After folding the second-row seat back and sliding the seat forward, you can access the third-row seat easily.

Entering/exiting the third-row seat area

Raise the lever on the side of the second-row seat to fold the seatback forward and slide the seat forward.

After entering/exiting the third-row seat area

1. Return the second-row seatback to its upright position and lock it after sliding it backward. Make sure it is locked by attempting to lightly move it forward and backward.

2. Make sure that the center-rear seat belt is routed properly (not under the head restraint) and the seat belt guide is snapped to the head restraint.
Essential Safety Equipment

Seats

**CAUTION**

- When folding a seatback, always hold onto the seatback with your other hand while operating the lever. If the seatback is not supported, it will flip forward suddenly and could cause injury.
- After entering/exiting the third-row seat area, return the seatback to its upright position. Otherwise, it could move unexpectedly and cause injury.

▼ Folding the Second-Row Seats

To create a flat luggage compartment space, fold the seatbacks forward.

**Folding the seatbacks**

1. Unfasten the lap portion of the center-rear seat belt (page 2-30) and stow it into the ceiling recess (page 2-30).

**CAUTION**

Always unfasten the lap portion of the belt before folding the rear-left seatback. Leaving the lap portion of the belt fastened could cause damage to the seat belt, buckle and seatback.

2. Slide the seat all the way back toward the rear of the vehicle.

3. Lower the head restraints all the way down (page 2-15).

4. Pull the lever and fold the seatback forward.

**CAUTION**

When folding a seatback, always hold onto the seatback with your other hand while operating the lever. If the seatback is not supported, it will flip forward suddenly and could cause injury.

**NOTE**

To create a flat luggage compartment space from the rear of the vehicle to the back of the front seats, fold the second-row and third-row seats (page 2-14).
Returning seatbacks to their original positions

1. Lift the seatback to its original position. Make sure the seatback is secured by attempting to lightly move it forward and back.

2. Route the center-rear seat belt through the seat belt guide and fasten it. Check that all seat belts are routed properly for passenger use (page 2-28).

Third-Row Seat

WARNING

Do not stack cargo higher than the seatbacks:

Stacking luggage or other cargo higher than the seatbacks is dangerous. During a sudden stop or collision, objects can fly around and become projectiles that could hit and injure passengers.

Make sure luggage and cargo are secured before driving:

Not securing cargo while driving is dangerous as it could move or be crushed during sudden braking or a collision and cause injury.

Make sure the adjustable components of a seat are locked in place by attempting to rock the seatback:

Adjustable seats that are not securely latched are dangerous. In a sudden stop or collision, the seat or seatback could move, causing injury.

Do not drive with the seatback unlocked:

All of the seatbacks play an important role in your protection in a vehicle. Leaving the seatback unlocked is dangerous as it can allow passengers to be ejected or thrown around and baggage to strike occupants in a sudden stop or collision, resulting in severe injury. After returning the seatback at any time, even when there are no other passengers, rock the seatback to make sure it is locked in place.
Never allow a passenger to sit or stand on the folded seatback while the vehicle is moving:

Driving with a passenger on the folded seatback is dangerous. Allowing a child to sit up on the folded seatback while the vehicle is moving is particularly dangerous. In a sudden stop or even a minor collision, a child not in a proper seat or child-restraint system and seat belt could be thrown forward, back or even out of the vehicle resulting in serious injuries or death. The child in the baggage area could be thrown into other occupants and cause serious injury.

NOTE
The third-row seat cannot be removed.

▼ Split-Folding the Third-Row Seat

To create a flat luggage compartment space, fold the seatbacks forward.

To fold third-row seat

1. Lower the head restraints all the way down (page 2-15).

2. Pull the strap and fold the seatback forward.

3. Fasten the strap to its original position.

NOTE
To create a flat luggage compartment space from the rear of the vehicle to the back of the front seats, fold the second-row and third-row seats (page 2-12).

To return third-row seat to its original position

1. Return the seatback to its original position by pulling its strap. Make sure the seatback is secured by attempting to lightly move it forward and back.

2. Fasten the strap to its original position between the seatback and folding board.
Head Restraints

Your vehicle is equipped with head restraints on all outboard seats and the second-row center seat. The head restraints are intended to help protect you and the passengers from neck injury.

**WARNING**

*Always drive with the head restraints installed when seats are being used and make sure they are properly adjusted:*

Driving with the head restraints adjusted too low or removed is dangerous. With no support behind your head, your neck could be seriously injured in a collision.

**Height adjustment**

To raise a head restraint, pull it up to the desired position.

To lower the head restraint, press the stop-catch release, then push the head restraint down.

Adjust the head restraint so that the top is even with the top of the passenger's ears, never the passenger's neck to prevent injury.

**Front outboard seat**

**Second-Row outboard seat/Third-Row outboard seat**

**Second-Row center seat**

**Removal/Installation**

To remove the head restraint, pull it up while pressing the stop-catch.

To install the head restraint, press the uprights into the holes while pressing the stop-catch.

**WARNING**

*Always drive with the head restraints set up when seats are being used and make sure they are properly set up:*

Driving with the head restraints not set up is dangerous. With no support behind your head, your neck could be seriously injured in a collision.
Active Head Restraints

The front seats are equipped with active head restraints. In a rear-end collision, the active head restraints use the force applied by the occupant on the seatback to instantaneously move the head restraints in the forward direction, reducing excessive rearward tilting of the head and reducing the load on the neck. The active head restraints are also highly effective at reducing whip-lash injuries which commonly occur in rear-end collisions at low to mid-range vehicle speeds.

NOTE
- The active head restraints operate in a rear-end collision. The head restraints return to their original position after the collision.
- The method for adjusting the active head restraints is the same as non-active head restraint.

WARNING
- Always adjust the head restraints properly as specified in this section. Failure to do so can reduce the effectiveness of the active head restraint.
- Do not attach any accessories such as a TV screen to a front seatback and/or a front head restraint. Also do not place heavy items or thick items, or both in the seatback pocket. Doing so could reduce the effectiveness of the active head restraint in a rear-end collision.
The front seats are electrically heated. The ignition must be switched ON.

Press the seat warmer switch to illuminate the indicator light while the ignition is switched ON. The mode changes as follow each time the seat warmer switch is pressed.

**WARNING**

- Be careful when using the seat warmer. The heat from the seat warmer may be too hot for some people, as indicated below, and could cause a low-temperature burn.
- Infants, small babies, elderly people, and physically challenged people
- People with delicate skin
- People who are excessively fatigued
- People who are intoxicated
- People who have taken sleep-inducing medicine such as sleeping pills or cold medicine
- Do not use the seat warmer with anything having high moisture-retention ability such as a blanket or cushion on the seat. The seat may be heated excessively and cause a low-temperature burn.
- Do not use the seat warmer even when taking a short nap in the vehicle. The seat may be heated excessively and cause a low-temperature burn.
- Do not place heavy objects with sharp projections on the seat, or insert needles or pins into it. This could cause the seat to become excessively heated and result in injury from a minor burn.

**CAUTION**

Do not use organic solvents to clean the seat. It may damage the seat surface and the heater.

*Some models.*
NOTE

- If the ignition is switched off while the seat warmer is operating (High or Low) and then switched ON again, the seat warmer will automatically operate at the temperature set before switching off the ignition.
- Use the seat warmer when the engine is running, and do not continue to use it for a long period of time.
- The temperature of the seat warmer cannot be adjusted beyond High and Low because the seat warmer is controlled by a thermostat.
Seat Belt Precautions

Seat belts help to decrease the possibility of severe injury during accidents and sudden stops. Mazda recommends that the driver and all passengers always wear seat belts.

Your vehicle has the following types of seat belts.

<table>
<thead>
<tr>
<th>Seating Position</th>
<th>Types of seat belt</th>
</tr>
</thead>
<tbody>
<tr>
<td>Front seat</td>
<td>Driver side</td>
</tr>
<tr>
<td></td>
<td>3-point type seat belt with emergency locking mode retractor</td>
</tr>
<tr>
<td></td>
<td>Passenger side</td>
</tr>
<tr>

<tr>
<td>Second-row seat</td>
<td></td>
</tr>
<tr>
<td>Third-row seat</td>
<td></td>
</tr>
</tbody>
</table>

3-point type seat belt with emergency locking mode retractor

This belt has retractors with an inertia lock that keep the belt retracted when not in use. The lock allows the belt to remain comfortable on the user, but it will lock in position during a collision. Refer to Emergency Locking Mode on page 2-21.

3-point type seat belt with emergency locking mode retractor/automatic locking mode retractor

In addition to the emergency locking mode function, this belt has retractors that operate in another mode, the automatic locking mode, for the child-restraint system. Refer to Automatic Locking Mode on page 2-22. Refer to Installing Child-Restraint Systems on page 2-40.

We recommend you put all children in the rear seats, if you must use the front passenger seat for a child, slide the front passenger seat as far back as possible and make sure any child-restraint system is secured properly.

Essential Safety Equipment

Seat Belt Systems

⚠️ WARNING ⚠️

Always wear your seat belt and make sure all occupants are properly restrained:
Not wearing a seat belt is extremely dangerous. During a collision, occupants not wearing seat belts could hit someone or things inside the vehicle or even be thrown out of the vehicle. They could be seriously injured or even killed. In the same collision, occupants wearing seat belts would be much safer.

Do not wear twisted seat belts:
Twisted seat belts are dangerous. In a collision, the full width of the belt is not available to absorb the impact. This puts more force on the bones beneath the belt, which could cause serious injury or death. So, if your seat belt is twisted, you must straighten the seat belt to remove any twists and to allow the full width of the belt to be used.

Never use one seat belt on more than one person at a time:
Using one seat belt for more than one person at a time is dangerous. A seat belt used in this way cannot spread the impact forces properly and the two passengers could be crushed together and seriously injured or even killed. Never use one belt for more than one person at a time and always operate the vehicle with each occupant properly restrained.

Do not operate a vehicle with a damaged seat belt:
Using a damaged seat belt is dangerous. An accident could damage the belt webbing of the seat belt in use. A damaged seat belt cannot provide adequate protection in a collision. Have an Authorized Mazda Dealer inspect all seat belt systems in use during an accident before they are used again.

Have your seat belts changed immediately if the pretensioner or load limiter has been expended:
Always have an Authorized Mazda Dealer immediately inspect the front seat belt pretensioners and air bags after any collision. Like the air bags, the front seat belt pretensioners and load limiters will only function once and must be replaced after any collision that caused them to deploy. A seat belt with an expended pretensioner or load limiter is still better than wearing no seat belt at all; however, if the front seat belt pretensioners and load limiters are not replaced, the risk of injury in a collision will increase.

In a rollover crash, an unbelted person is significantly more likely to die than a person wearing a seat belt.
CAUTION

Belt retraction may become difficult if the belts and rings are soiled, so try to keep them clean. For more details about cleaning the seat belts, refer to “Cleaning the Lap/Shoulder Belt Webbing” (page 8-61).

Pregnant Women and Persons with Serious Medical Conditions

Pregnant women should always wear seat belts. Ask your doctor for specific recommendations. The lap belt should be worn SNUGLY AND AS LOW AS POSSIBLE OVER THE HIPS. The shoulder belt should be worn across your shoulder properly, but never across the stomach area. Persons with serious medical conditions also should wear seat belts. Check with your doctor for any special instructions regarding specific medical conditions.

Emergency Locking Mode

In the emergency locking mode, the belt remains comfortable on the occupant and the retractor will lock in position during a collision. When the seat belt is fastened, it will always be in the emergency locking mode until it is switched to automatic locking mode by pulling it all the way out to its full length. If the belt feels tight and hinders comfortable movement while the vehicle is stopped or in motion, it may be in the automatic locking mode because the belt has been pulled too far out. To return the belt to the more comfortable emergency locking mode, wait until the vehicle has stopped in a safe, level area, retract the belt fully to convert it back to emergency locking mode and then extend it around you again.

If the belt is locked and cannot be pulled out, retract the belt once, and then try pulling it out slowly. If this fails, pull the belt strongly one time and loosen, then pull it out again slowly.
Essential Safety Equipment

Seat Belt Systems

▼ Automatic Locking Mode

Always use the automatic locking mode to keep the child-restraint system from shifting to an unsafe position in the event of an accident. To enable seat belt automatic locking mode, pull it all the way out and connect it as instructed on the child-restraint system. It will retract down to the child-restraint system and stay locked on it. See the section on child restraint (page 2-35).
3-Point Type Seat Belt

Fastening the Seat Belt

1. Grasp the seat belt tongue.
2. Slowly pull out the lap/shoulder belt.
3. Insert the seat belt tongue into the seat belt buckle until you hear a click sound.

Positioning the Shoulder Portion of the Seat Belt:

- Improper positioning of the shoulder portion of the seat belt is dangerous. Always make sure the shoulder portion of the seat belt is positioned across your shoulder and near your neck, but never under your arm, on your neck, or on your upper arm.

4. Position the lap belt as low as possible, not on the abdominal area, then adjust the shoulder belt so that it fits snugly against your body.

Positioning the Lap Portion of the Seat Belt:

- The lap portion of the seat belt worn too high is dangerous. In a collision, this would concentrate the impact force directly on the abdominal area, causing serious injury. Wear the lap portion of the belt snugly and as low as possible.
Unfastening the Seat Belt

Depress the button on the seat belt buckle. If the belt does not fully retract, pull it out and check for kinks or twists. Then make sure it remains untwisted as it retracts.

NOTE
- When using the center-rear seat belt, refer to “Center-Rear Position Seat Belt” (page 2-28).
- If a belt does not fully retract, inspect it for kinks and twists. If it is still not retracting properly, have it inspected at an Authorized Mazda Dealer.

To secure the outboard-third row seat belts when not in use, insert the belts into their seat belt retainers.

Front Shoulder Belt Adjuster

Adjust the height of the shoulder belt if the seat belt touches your neck, or if it crosses your arm instead of your shoulder. To raise the shoulder belt adjuster, push the adjuster up. To lower the shoulder belt adjuster, pull the adjuster and slide it down. Make sure the adjuster is locked.

WARNING
Positioning the Shoulder Portion of the Seat Belt:

Improper positioning of the shoulder portion of the seat belt is dangerous. Always make sure the shoulder portion of the seat belt is positioned across your shoulder and near your neck, but never under your arm, on your neck, or on your upper arm.
Front Seat Belt Pretensioner and Load Limiting Systems

For optimum protection, the driver and front passenger seat belts are equipped with pretensioner and load limiting systems. For both these systems to work properly you must wear the seat belt properly.

**Pretensioners:**
The front seat belt retractors remove slack quickly as the air bags are expanding. Any time the air bags and seat belt pretensioners have fired they must be replaced.

For deployment details, refer to the SRS Air Bag Deployment Criteria (page 2-63).

**With Driver and Front Passenger Occupant Classification System**
In addition, the pretensioner system for the front passenger, like the front passenger air bag, is designed to only deploy in accordance with the total seated weight on the front passenger seat. For details, refer to the driver and front passenger occupant classification system (page 2-66).

**Load limiter:**
The load limiting system releases belt webbing in a controlled manner to reduce belt force on the occupant's chest. While the most severe load on a seat belt occurs in frontal collisions, the load limiter has an automatic mechanical function and can activate in any accident mode with sufficient occupant movement.

Even if the pretensioners have not fired, the load limiting function must be checked by an Authorized Mazda Dealer.

---

**WARNING**

**Wear seat belts only as recommended in this owner's manual:**
Incorrect positioning of the driver and front passenger seat belts is dangerous. Without proper positioning, the pretensioner and load limiting systems cannot provide adequate protection in an accident and this could result in serious injury.

For more details about wearing seat belts, refer to “Fastening the seat belts” (page 2-23).

**Have your seat belts changed immediately if the pretensioner or load limiter has been expended:**
Always have an Authorized Mazda Dealer immediately inspect the front seat belt pretensioners and air bags after any collision. Like the air bags, the front seat belt pretensioners and load limiters will only function once and must be replaced after any collision that caused them to deploy. A seat belt with an expended pretensioner or load limiter is still better than wearing no seat belt at all; however, if the front seat belt pretensioners and load limiters are not replaced, the risk of injury in a collision will increase.
Do not modify the components or wiring, or use electronic testing devices on the pretensioner system:

Modifying the components or wiring of the pretensioner system, including the use of electronic testing devices is dangerous. You could accidentally activate it or make it inoperable which would prevent it from activating in an accident. The occupants or repairers could be seriously injured.

Properly dispose of the pretensioner system:

Improper disposal of the pretensioner system or a vehicle with non-deactivated pretensioners is dangerous. Unless all safety procedures are followed, injury could result. Ask an Authorized Mazda Dealer how to safely dispose of the pretensioner system or how to scrap a pretensioner-equipped vehicle.

NOTE

- The pretensioner system will activate in a moderate or severe frontal, near-frontal collision or roll-over accident. It will not activate in most side or rear impacts.

*With Driver and Front Passenger Occupant Classification System*

The pretensioner system for the front passenger is designed to only deploy in accordance with the total seated weight on the front passenger seat.

- Some smoke (non-toxic gas) will be released when the air bags and pretensioners deploy. This does not indicate a fire. This gas normally has no effect on occupants, however, those with sensitive skin may experience light skin irritation. If residue from the deployment of the air bags or the front pretensioner system gets on the skin or in the eyes, wash it off as soon as possible.

Air Bag/Front Seat Belt Pretensioner System Warning Light

If the air bag/front seat belt pretensioner system is working properly, the warning light illuminates when the ignition is switched ON or after the engine is cranked. The warning light turns off after a specified period of time.
A system malfunction is indicated if the warning light constantly flashes, constantly illuminates or does not illuminate at all when the ignition is switched ON. If any of these occur, consult an Authorized Mazda Dealer as soon as possible. The system may not work in an accident.

**WARNING**

Never tamper with the air bag/pretensioner systems and always have an Authorized Mazda Dealer perform all servicing and repairs:

Self-servicing or tampering with the systems is dangerous. An air bag/pretensioner could accidentally activate or become disabled causing serious injury or death.

▼ Air Bag/Front Seat Belt Pretensioner System Warning Beep

If a malfunction is detected in the air bag/front seat belt pretensioner systems and the warning light, a warning beep sound will be heard for about 5 seconds every minute.

The air bag and seat belt pretensioner system warning beep sound will continue to be heard for approximately 35 minutes. Have your vehicle inspected at an Authorized Mazda Dealer as soon as possible.
Essential Safety Equipment

Seat Belt Systems

Center-Rear Position Seat Belt (Second-Row Seats)

Before using the center-rear lap/shoulder belt make sure tongue (A) and anchor buckle (B) are fastened.

WARNING

Using the Seat Belt Guide:
Not using the seat belt guide is dangerous. If the seat belt guide is not used, the shoulder portion of the center-rear seat belt could be mistakenly positioned under the head restraint; a position that cannot provide adequate protection in a collision and could result in the center-rear passenger being seriously injured or killed. Always make sure the shoulder portion of the center-rear seat belt is on the right side of the left-rear head restraint and guided correctly through the seat belt guide.

Fastening the Seat Belt
1. Grasp the seat belt tongue (C).
2. Slowly pull out the lap/shoulder belt.
3. Insert the seat belt tongue (C) into the seat belt buckle (D) until you hear a click sound.

![Diagram](image)

**WARNING**

**Fastening the Center-Rear Seat Belt with Only One Buckle:**

Fastening the center-rear seat belt with only one buckle is dangerous. If only one pair of seat belt tongues and buckles is fastened (either seat belt tongue (C) and seat belt anchor buckle (D) or seat belt tongue (A) and seat belt buckle (B)), then the seat belt cannot provide full protection. In a sudden stop or collision, the user could slide under the belt and suffer serious injuries. Always make sure that both pairs of seat belt tongues and buckles are fastened properly.

**Positioning the Shoulder Portion of the Seat Belt:**

Improper positioning of the shoulder portion of the seat belt is dangerous. Always make sure the shoulder portion of the seat belt is positioned across your shoulder and near your neck, but never under your arm, on your neck, or on your upper arm.

4. Position the lap belt as low as possible, not on the abdominal area, then adjust the shoulder belt so that it fits snugly against your body.

**WARNING**

**Positioning the Lap Portion of the Seat Belt:**

The lap portion of the seat belt worn too high is dangerous. In a collision, this would concentrate the impact force directly on the abdominal area, causing serious injury. Wear the lap portion of the belt snugly and as low as possible.

**Unfastening the Seat Belt**

Depress the button on the seat belt buckle. If the belt does not fully retract, pull it out and check for kinks or twists. Then make sure it remains untwisted as it retracts.

**NOTE**

If a belt does not fully retract, inspect it for kinks and twists. If it is still not retracting properly, have it inspected at an Authorized Mazda Dealer.
Retracting the Center Seat Belt (Middle Row) to Lower the Seatbacks for Carrying Cargo

To retract the center belt and lower the seatbacks for carrying cargo, insert a small object such as a key in the seat belt anchor buckle slot.

![Diagram of seat belt anchor buckle and seatback]

**CAUTION**

Always unfasten the lap portion of the belt before folding the left-rear seatback. Leaving the lap portion of the belt fastened could cause damage to the seat belt, seat belt buckle and seatback.

Stowing and pulling out the Center-Rear Position Seat Belt

The center-rear position seat belt can be stowed using the following procedure.

**CAUTION**

When stowing the seat belt, make sure the belt is locked securely into the recess. If the seat belt is not properly stowed, it might get caught in the seats and be damaged.

To stow the seat belt, retract the belt, put the seat belt tongues (A) and (C) together and insert each tongue into the respective ceiling recess. Insert the seat belt tongues until you hear a click sound.

![Diagram of seat belt tongues and ceiling recess]

To pull out the seat belt, press the area indicated in the figure upward with your finger and slide the belt forward. Then slowly pull out the seat belt from the ceiling recess.
NOTE
• To encourage rear seat passengers to wear their seat belts, we suggest leaving the center-rear lap position of the belt fastened at all times except when folding the rear seat forward.
• Pulling the seat belt all the way out will switch it to automatic locking mode. If automatic locking mode is not needed, retract the seat belt fully to convert it back to emergency locking mode.

Re-attaching the Seat Belt after the Middle Row Seatbacks are Returned to their Upright Positions
To re-attach the center seat belt after the middle row seats are returned to their upright positions, grasp the seat belt tongue (A) and insert it into the seat belt anchor buckle (B) until you hear a click sound. It is now secure for passenger use.

NOTE
After returning the left-rear seatback to its upright position, guide the shoulder portion of the belt correctly through the seat belt guide and fasten the lap portion of the belt.

Seat Belt Extender
If your seat belt is not long enough, even when fully extended, a seat belt extender may be available to you at no charge from your Authorized Mazda Dealer. This extender will be only for you and for the particular vehicle and seat. Even if it plugs into other seat belts, it may not hold in the critical moment of a crash.
When ordering an extender, only order one that provides the necessary additional length to fasten the seat belt properly. Please contact your Authorized Mazda Dealer for more information.

WARNING
Do not use a seat belt extender unless it is necessary:
Using a seat belt extender when not necessary is dangerous. The seat belt will be too long and not fit properly. In an accident, the seat belt will not provide adequate protection and you could be seriously injured. Only use the extender when it is required to fasten the seat belt properly.
Essential Safety Equipment

Seat Belt Systems

Do not use an improper extender:
Using a seat belt extender that is for another person or a different vehicle or seat is dangerous. The seat belt will not provide adequate protection and the user could be seriously injured in an accident. Only use the extender provided for you and for the particular vehicle and seat. NEVER use the extender in a different vehicle or seat. If you sell your Mazda, do not leave your seat belt extender in the vehicle. It could be used accidentally by the new owner of the vehicle. After removing the seat belt extender, discard it. Never use the seat belt extender in any other vehicle you may own in the future.

Do not use an extender that is too long:
Using an extender that is too long is dangerous. The seat belt will not fit properly. In an accident, the seat belt will not provide adequate protection and you could be seriously injured. Do not use the extender or choose one shorter in length if the distance between the extender’s buckle and the center of the user’s body is less than 15 cm (6 in).

Do not leave a seat belt extender connected to the buckle:
Leaving a seat belt extender connected to the buckle without using the seat belt is dangerous. When the seat belt extender is connected to the driver’s seat belt buckle (or front passenger) seat, the SRS driver’s (or front passenger’s) air bag system will determine that the driver (or front passenger) is wearing the seat belt even if the driver (or front passenger) is not wearing it. This condition could cause the driver’s (or front passenger’s) air bag to not activate correctly and result in death or serious injury in the event of collision. Always wear the seat belt with the seat belt extender.

Do not use the seat belt extender when installing a child-restraint system on the front or rear passenger seat:
Using a seat belt extender to fasten a child-restraint system on any seat is dangerous. Always follow the child-restraint system manufacturer’s installation instructions and never use a seat belt extender.

NOTE
When not in use, remove the seat belt extender and store it in the vehicle. If the seat belt extender is left connected, the seat belt extender might get damaged as it will not retract with the rest of the seat belt and can easily fall out of the door when not in use and be damaged. In addition, the seat belt warning light will not illuminate and function properly.
Seat Belt Warning Light/Beep

The seat belt warning light illuminates and a beep sound will be heard if the driver's seat belt is not fastened when the ignition is switched ON.

Conditions of operation

<table>
<thead>
<tr>
<th>Condition</th>
<th>Result</th>
</tr>
</thead>
<tbody>
<tr>
<td>The driver's seat belt is not fastened when the ignition is switched ON.</td>
<td>The warning light flashes and a beep sound will be heard for about 6 seconds.</td>
</tr>
<tr>
<td>The driver's seat belt is fastened while the warning light and the beep sound are activated.</td>
<td>The warning light turns off and the beep sound stops.</td>
</tr>
<tr>
<td>The driver's seat belt is fastened before the ignition is switched ON.</td>
<td>The warning light will not illuminate and the beep sound will not be heard.</td>
</tr>
</tbody>
</table>

▼ Belt Reminder

**NOTE**

Consult an Authorized Mazda Dealer to deactivate or restore the belt reminder. Though the belt reminder can be deactivated, doing so will defeat the purpose of the system to warn the driver and the front passenger in the event that their seat belts are not fastened. For the safety of the driver and front passenger, Mazda recommends not deactivating the belt reminder.

Driver seated/Front passenger not seated

The belt reminder is a supplemental warning to the seat belt warning function. If the driver's seat belt is not fastened when the ignition is switched ON, the warning light/beep operates to give you further reminders according to the chart below.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Vehicle speed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Seat belt</td>
<td>Between 0 — 20 km/h (0 — 12 mph)</td>
</tr>
<tr>
<td>Indicator</td>
<td>○</td>
</tr>
<tr>
<td>Beep</td>
<td>×</td>
</tr>
</tbody>
</table>

○ : Fastened
× : Unfastened
agogue: Illuminated
agogue: Flashing
agogue: Beep

Once the beep sound is heard, it continues sounding even if the vehicle speed lowers to 20 km/h (12 mph) or less until the seatbelt is fastened or the beep sound period has passed.
Driver seated/Front passenger seated

The seat belt warning function reminds the front passenger to fasten the seat belt according to the chart below.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Vehicle speed</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Between 0 — 20 km/h (0 — 12 mph)</td>
</tr>
<tr>
<td>Seat belt (Driver)</td>
<td>○ ○ X X ○ ○ X</td>
</tr>
<tr>
<td>Seat belt (Passenger)</td>
<td>○ X ○ X ○</td>
</tr>
<tr>

</tr>
<tr>
<td>Beep</td>
<td>● ● ●</td>
</tr>
</tbody>
</table>

○: Fastened  
X: Unfastened  
●: Illuminated  
●: Flashing  
●: Beep

Placing heavy items on the front passenger seat may cause the front passenger seat belt warning function to operate depending on the weight of the item.

Once the beep sound is heard, it continues sounding even if the vehicle speed lowers to 20 km/h (12 mph) or less until the seatbelt is fastened or the beep sound period has passed.

**NOTE**

- To allow the front passenger seat weight sensor to function properly, do not place and sit on an additional seat cushion on the front passenger seat. The sensor may not function properly because the additional seat cushion could cause sensor interference.
- When a small child sits on the front passenger seat, it is possible that neither the warning light nor the warning beep operate.
Child Restraint Precautions

Mazda strongly urges the use of child-restraint systems for children small enough to use them.

You are required by law to use a child-restraint system for children in the U.S. and Canada. Check your local and state or provincial laws for specific requirements regarding the safety of children riding in your vehicle.

Whatever child-restraint system you consider, please pick the appropriate one for the age and size of the child, obey the law and follow the instructions that come with the individual child-restraint system.

A child who has outgrown child-restraint systems should sit in the rear and use seat belts, both lap and shoulder. If the shoulder belt crosses the neck or face, move the child closer to the center of the vehicle in the outboard seats, and towards the buckle on the right if the child is seated on the center seat.

Statistics confirm that the rear seats are the best place for all children up to 12 years of age, and more so with a supplemental restraint system (air bags).

A rear-facing child-restraint system should NEVER be used on the front seat with the air bag system activated. The front passenger's seat is also the least preferred seat for other child-restraint systems.

(With Driver and Front Passenger Occupant Classification System)
To reduce the chance of injuries caused by deployment of the front passenger air bag, the front passenger seat weight sensors work as a part of the supplemental restraint system. This system deactivates the front passenger front and side air bags and also the front passenger seat belt pretensioner system when the front passenger air bag deactivation indicator light illuminates.

When an infant or small child sits on the front passenger seat, the system shuts off the front passenger front and side air bags and seat belt pretensioner system, so make sure the front passenger air bag deactivation indicator light illuminates.

Even if the front passenger air bag is shut off, Mazda strongly recommends that children be properly restrained and child-restraint systems of all kinds are properly secured on the rear seats which are the best place for children.

For more details, refer to “Front passenger seat weight sensors” (page 2-66).
Essential Safety Equipment

Child Restraint

⚠️ WARNING

Use the correct size child-restraint system:
For effective protection in vehicle accidents and sudden stops, a child must be properly restrained using a seat belt or child-restraint system depending on age and size. If not, the child could be seriously injured or even killed in an accident.

Follow the manufacturer's instructions and always keep the child-restraint system buckled down:
An unsecured child-restraint system is dangerous. In a sudden stop or a collision it could move causing serious injury or death to the child or other occupants. Make sure any child-restraint system is properly secured in place according to the child-restraint system manufacturer's instructions. When not in use, remove it from the vehicle or fasten it with a seat belt, or latch it down to BOTH LATCH lower anchors for LATCH child-restraint systems and the corresponding tether anchor.

Always secure a child in a proper child-restraint system:
Holding a child in your arms while the vehicle is moving is extremely dangerous. No matter how strong the person may be, he or she cannot hold onto a child in a sudden stop or collision and it could result in serious injury or death to the child or other occupants. Even in a moderate accident, the child may be exposed to air bag forces that could result in serious injury or death to the child, or the child may be slammed into an adult, causing injury to both child and adult.

Never use a rear-facing child-restraint system in the front seat with an air bag that could deploy:
Rear-facing child-restraint systems on the front seat are particularly dangerous even though you may feel assured that a front passenger air bag will not deploy based on the fact that the front passenger air bag deactivation indicator light illuminates. The child-restraint system can be hit by a deploying air bag and moved violently backward resulting in serious injury or death to the child.
Do not install a front-facing child-restraint system on the front passenger seat unless it is unavoidable:

In a collision, the force of a deploying air bag could cause serious injury or death to the child. If installing a front-facing child-restraint system on the front passenger seat is unavoidable, move the front passenger seat as far back as possible.

Seating a child in a child-restraint system on the front passenger seat is dangerous under certain conditions (With Driver and Front Passenger Occupant Classification System):

Your vehicle is equipped with front passenger seat weight sensors. Even with the front passenger seat weight sensors, if you must use the front passenger seat to seat a child, using a child-restraint system on the front passenger seat under the following conditions increases the danger of the front passenger air bag deploying and could result in serious injury or death to the child.

- The front passenger air bag deactivation indicator light does not illuminate when seating a child in the child-restraint system.
- Luggage or other items are placed on the seat with the child in the child-restraint system.
- A rear passenger or luggage pushing or pulling down on the front passenger seatback.
- A rear passenger puts their feet on the front seat rails.
- Luggage or other items are placed on the seatback or hung on the head restraint.
- Heavy items are placed in the seatback map pocket.
- The seat is washed.
- Liquids are spilled on the seat.
- The front passenger seat is moved backward, pushing into luggage or other items placed behind it.
- The front passenger seatback contacts the second-row seat.
- Luggage or other items are placed between the front passenger seat and driver seat.
- Any accessories, which might increase the total seated weight on the front passenger seat, are attached to the front passenger seat.

The designated positions with seat belts on the rear seats are the safest places for children. Always use seat belts and child restraints.
Do not allow a child or anyone to lean over or against the side window of a vehicle with side and curtain air bags:

It is dangerous to allow anyone to lean over or against the side window, the area of the front passenger seat, the front and rear window pillars and the roof edge along both sides from which the side and curtain air bags deploy, even if a child-restraint system is used. The impact of inflation from a side or curtain air bag could cause serious injury or death to an out of position child. Furthermore, leaning over or against the front door could block the side and curtain air bags and eliminate the advantages of supplemental protection. With the front air bag and the additional side air bag that comes out of the front seat, the rear seat is always a better location for children. Take special care not to allow a child to lean over or against the side window, even if the child is seated in a child-restraint system.

Never use one seat belt on more than one person at a time:

Using one seat belt for more than one person at a time is dangerous. A seat belt used in this way cannot spread the impact forces properly and the two passengers could be crushed together and seriously injured or even killed. Never use one belt for more than one person at a time and always operate the vehicle with each occupant properly restrained.

CAUTION

A seat belt or child-restraint system can become very hot in a closed vehicle during warm weather. To avoid burning yourself or a child, check them before you or your child touches them.

NOTE

Your Mazda is equipped with LATCH lower anchors for attachment of specially designed LATCH child-restraint systems in the rear seats. When using these anchors to secure a child-restraint system, refer to "LATCH Child-Restraint Systems" (page 2-48).
Child-Restraint System Installation Position

In this owner's manual, explanation of child-restraint systems is provided for the following three types of popular child-restraint systems: infant seat, child seat, booster seat.

**NOTE**
- Installation position is determined by the type of child-restraint system. Always read the manufacturer's instructions and this owner's manual carefully.
- Due to variations in the design of child-restraint systems, vehicle seats and seat belts, all child-restraint systems may not fit all seating positions. Before purchasing a child-restraint system, it should be tested in the specific vehicle seating position (or positions) where it is intended to be used. If a previously purchased child-restraint system does not fit, you may need to purchase a different one that will.

**Infant seat**
An infant seat provides restraint by bracing the infant's head, neck and back against the seating surface.

**Child seat**
A child seat restrains a child's body using the harness.

**Booster seat**
A booster seat is a child restraint accessory designed to improve the fit of the seat belt system around the child's body.
Installing Child-Restraint Systems

Accident statistics reveal that a child is safer in the rear seats. The front passenger's seat is clearly the worst choice for any child under 12, and with rear-facing child-restraint systems it is clearly unsafe due to air bags.

NOTE
Even if your vehicle is equipped with front passenger seat weight sensors (page 2-66), which automatically deactivates the front passenger air bag, a rear seat is the safest place for a child of any age or size.

Some child-restraint systems now come with tethers and therefore must be installed on the seats that take tethers to be effective. In your Mazda, tethered child-restraint systems can only be accommodated in the three positions on the second-row seats.

Some child-restraint systems also employ specially designed LATCH attachments; refer to “LATCH Child-Restraint Systems” (page 2-48).

WARNING

Tethered Child-Restraint Systems Work Only on Tether-Equipped Rear Seats:
Installation of a tether equipped child-restraint system in the front passenger's seat or the third-row seats defeats the safety design of the system and will result in an increased chance of serious injury if the child-restraint system goes forward without benefit of being tethered. Place tether equipped child-restraint systems where there are tether anchors.

Second-Row Seats Child-Restraint System Installation

Follow these instructions when using a child-restraint system, unless you are attaching a LATCH-equipped child-restraint system to the rear LATCH lower anchors. Refer to “LATCH Child-Restraint Systems” (page 2-48).

NOTE
Follow the child-restraint system manufacturer's instructions carefully. If you are not sure whether you have a LATCH system or tether, check in the child-restraint system manufacturer's instructions and follow them accordingly. Depending on the type of child-restraint system, it may use LATCH system instead of seat belts or if the belt goes across the child's chest, may recommend against using automatic locking mode.

1. When installing the child-restraint system on the second-row seat, make sure that the center-rear seat belt is routed through the seat belt guide.
2. If the seat in which you install a child-restraint system has a seat slide function, slide the seat as far back as possible.

3. Make sure the seatback is securely latched by pushing it back until it is fully locked.

4. Raise the head restraint to the top locked position. Refer to Head Restraints on page 2-15.

5. Secure the child-restraint system with the lap portion of the lap/shoulder belt. See the manufacturer's instructions on the child-restraint system for belt routing instructions.

6. To get the retractor into the automatic locking mode, pull the shoulder belt portion of the seat belt until the entire length of the belt is out of the retractor.

7. Push the child-restraint system firmly into the vehicle seat. Be sure the belt retracts as snugly as possible. A clicking noise from the retractor will be heard during retraction if the system is in the automatic locking mode. If the belt does not lock the seat down tight, repeat this step.

---

**NOTE**

Inspect this function before each use of the child-restraint system. You should not be able to pull the shoulder belt out of the retractor while the system is in the automatic locking mode. When you remove the child-restraint system, be sure the belt fully retracts to return the system to emergency locking mode before occupants use the seat belts.

8. If your child-restraint system requires the use of a tether strap, refer to the manufacturer's instructions to hook and tighten the tether strap after raising the head restraint.
WARNING

Use the tether and tether anchor only for a child-restraint system:
Using the tether or tether anchor to secure anything but a child-restraint system is dangerous. This could weaken or damage the tether or tether anchor and result in injury.

Always route the tether strap between the head restraint and the seatback:
Routing the tether strap on top of the head restraint is dangerous. In a collision the tether strap could slide off the head restraint and loosen the child-restraint system. The child-restraint system could move which may result in death or injury to the child.

Always attach the tether strap to the correct tether anchor position:
Attaching the tether strap to the incorrect tether anchor position is dangerous. In a collision, the tether strap could come off and loosen the child-restraint system. If the child-restraint system moves it could result in death or injury to the child.
Third-Row Seats Child-Restraint System Installation

The third-row seats cannot accommodate LATCH-type child-restraint systems or tethers, therefore these systems must be installed on the other seat positions such as the second-row seat. If this not possible, LATCH-type child-restraint systems should be installed to a third-row seat using the seat belt depending on whether the child-restraint manufacturer allows their use without LATCH attachments and tether anchors.

Follow these manufacturer's instructions when using a child-restraint system.

**NOTE**
Follow the child-restraint system manufacturer's instructions carefully. Depending on the type of child-restraint system, it may not employ seat belts which are in automatic locking mode.

1. Raise the head restraint to the top locked position. Refer to Head Restraints on page 2-15.

2. Secure the child-restraint system with the lap portion of the lap/shoulder belt. See the manufacturer's instructions on the child-restraint system for belt routing instructions.

3. To get the retractor into the automatic locking mode, pull the shoulder belt portion of the seat belt until the entire length of the belt is out of the retractor.

4. Push the child-restraint system firmly into the vehicle seat. Be sure the belt retracts as snugly as possible. Clicking from the retractor will be heard during retraction if the system is in the automatic locking mode. If the belt does not lock the seat down tight, repeat this step.
NOTE
Inspect this function before each use of the child-restraint system. You should not be able to pull the shoulder belt out of the retractor while the system is in the automatic locking mode. When you remove the child-restraint system, be sure the belt fully retracts to return the system to emergency locking mode before occupants use the seat belts.

▼ If You Must Use the Front Seat for Children
If you cannot put all children in the rear seats, at least put the smallest children in the rear and be sure the largest child up front uses the shoulder belt over the shoulder.
NEVER put a rear-facing child-restraint system on the front passenger seat whether your vehicle is equipped with a seat weight sensor or not.
This seat is also not set up for tethered child-restraint systems, put them in one of the rear seat positions set up with tether anchors.
Likewise the LATCH child-restraint system cannot be secured in the front passenger's seat and should be used in the second-row seats.
Do not allow anyone to sleep against the side window if you have an optional side and curtain air bags, it could cause serious injuries to an out of position occupant. As children more often sleep in cars, it is better to put them in the rear seat. If installing the child-restraint system on the front seat is unavoidable, follow these instructions when using a front-facing child-restraint system in the front passenger's seat.

NOTE
• To check if your front seats have side air bags:
  Mazda vehicles equipped with side air bag will have a “SRS AIRBAG” tag on the outboard shoulder of the front seats.
• To check if your vehicle has curtain air bags:
  Mazda vehicles equipped with curtain air bag will have an “SRS AIRBAG” marking on the window pillars along the roof edge.

WARNING
Always move the front passenger seat as far back as possible if installing a front-facing child-restraint system on it is unavoidable:
As your vehicle has front air bags and doubly so because your vehicle has side air bags, a front-facing child-restraint system should be put on the front passenger seat only when it is unavoidable.
Even if the front passenger air bag deactivation indicator light illuminates, always move the seat as far back as possible, because the force of a deploying air bag could cause serious injury or death to the child.
Never use a rear-facing child-restraint system in the front seat with an air bag that could deploy:

Rear-facing child-restraint systems on the front seat are particularly dangerous.

Even in a moderate collision, the child-restraint system can be hit by a deploying air bag and moved violently backward resulting in serious injury or death to the child.

Even though you may feel assured that the front passenger air bag will not deploy based on the fact that the front passenger air bag deactivation indicator light illuminates, you should not use a rear-facing child-restraint system in the front seat.

Do not allow a child or anyone to lean over or against the side window of a vehicle with side and curtain air bags:

It is dangerous to allow anyone to lean over or against the side window, the area of the front passenger seat, the front and rear window pillars and the roof edge along both sides from which the side and curtain air bags deploy, even if a child-restraint system is used. The impact of inflation from a side or curtain air bag could cause serious injury or death to an out of position child.

Furthermore, leaning over or against the front door could block the side and curtain air bags and eliminate the advantages of supplemental protection. With the front air bag and the additional side air bag that comes out of the front seat, the rear seat is always a better location for children. Take special care not to allow a child to lean over or against the side window, even if the child is seated in a child-restraint system.

▼Front Passenger's Seat Child-Restraint System Installation

1. Switch the ignition ON.

2. Slide the seat as far back as possible.
3. Place the child-restraint system on the seat without putting your weight on the seat and fasten the seat belt. See the manufacturer's instructions on the child-restraint system for belt routing instructions.

4. To get the retractor into the automatic locking mode, pull the shoulder belt portion of the seat belt until the entire length of the belt is out of the retractor.

5. Push the child-restraint system firmly into the vehicle seat. Be sure the belt retracts as snugly as possible. A clicking noise from the retractor will be heard during retraction if the system is in automatic locking mode. If the belt does not lock the seat down tight, repeat the previous step and also this one.

**NOTE**
- *Inspect this function before each use of the child-restraint system. You should not be able to pull the shoulder belt out of the retractor while the system is in the automatic locking mode. When you remove the child-restraint system, be sure the belt fully retracts to return the system to emergency locking mode before occupants use the seat belts.*
- *Follow the child-restraint system manufacturer's instructions carefully. Depending on the type of child-restraint system, it may not employ seat belts which are in automatic locking mode.*

6. Seat your child safely in the child-restraint system and secure the child according to the instructions from the child-restraint system manufacturer.

7. **(With Driver and Front Passenger Occupant Classification System)**
   Make sure the front passenger air bag deactivation indicator light illuminates after installing a child-restraint system on the front passenger seat.

   If the front passenger air bag deactivation indicator light does not illuminate, remove the child-restraint system, switch the ignition to OFF or ACC, and then re-install the child-restraint system.

   Refer to Front passenger air bag deactivation indicator light on page 2-66.
WARNING

Do not seat a child in a child-restraint system on the front passenger seat if the front passenger air bag deactivation indicator light does not illuminate (With Driver and Front Passenger Occupant Classification System):

While it is always better to install any child-restraint system on the rear seat, it is imperative that a child-restraint system ONLY be used on the front passenger seat if the deactivation indicator light illuminates when the child is seated in the child-restraint system (page 2-66). Seating a child in a child-restraint system installed on the front passenger seat with the front passenger air bag deactivation indicator light not illuminated is dangerous. If this indicator light does not illuminate, this means that the front passenger front and side air bags, and seat belt pretensioner are ready for deployment. If an accident were to deploy an air bag, a child in a child-restraint system sitting in the front passenger seat could be seriously injured or killed. If the indicator light does not illuminate after seating a child in a child-restraint system on the front passenger seat, seat a child in a child-restraint system on the rear seat and consult an Authorized Mazda Dealer as soon as possible.
Essential Safety Equipment

Child Restraint

LATCH Child-Restraint Systems

Your Mazda is equipped with LATCH lower anchors for attachment of specially designed LATCH child-restraint systems the second-row seats. Both anchors must be used, otherwise the seat will bounce around and put the child in danger. Most LATCH child-restraint systems must also be used in conjunction with a tether to be effective. If they have a tether you must use it to better assure your child's safety.

**WARNING**

Follow the manufacturer's instructions for the use of the child-restraint system:

An unsecured child-restraint system is dangerous. In a sudden stop or a collision it could move causing serious injury or death to the child or other occupants. Make sure the child-restraint system is properly secured in place according to the child-restraint system manufacturer's instructions.

Never attach two child-restraint systems to the same LATCH lower anchor:

Attaching two child-restraint systems to the same LATCH lower anchor is dangerous. In a collision, one anchor may not be strong enough to hold two child-restraint system attachments, and it may break, causing serious injury or death. If you use the seat position for another child-restraint system when an outboard LATCH position is occupied, use the center seat belts instead, and the tether if tether-equipped.

Make sure the child-restraint system is properly secured:

An unsecured child-restraint system is dangerous. In a sudden stop or a collision it could move causing serious injury or death to the child or other occupants. Follow the child-restraint system manufacturer's instructions on belt routing to secure the seat just as you would with a child in it so that nobody is tempted to put a child in an improperly secured seat later on. When not in use, remove it from the vehicle or fasten it with a seat belt, or latch it down to BOTH LATCH lower anchors for LATCH child-restraint systems.

Make sure there are no seat belts or foreign objects near or around the LATCH child-restraint system:

Not following the child-restraint system manufacturer's instructions when installing the child-restraint system is dangerous. If seat belts or a foreign object prevent the child-restraint system from being securely attached to the LATCH lower anchors and the child-restraint system is installed improperly, the child-restraint system could move in a sudden stop or collision causing serious injury or death to the child or other occupants. When installing the child-restraint system, make sure there are no seat belts or foreign objects near or around the LATCH lower anchors. Always follow the child-restraint system manufacturer's instructions.
LATCH Child-Restraint System
Installation Procedure (Second-Row Outboard Seats)

1. Slide the second-row seat as far back as possible.

2. Make sure the seatback is securely latched by pushing it back until it is fully locked.

3. Expand the area between the seat bottom and the seatback slightly to verify the locations of the LATCH lower anchors.

NOTE
The markings above the LATCH lower anchors indicate the locations of LATCH lower anchors for the attachment of a child-restraint system.

4. Raise the head restraint to the top locked position.
   Refer to Head Restraints on page 2-15.

5. Secure the child-restraint system using BOTH LATCH lower anchors, following the child-restraint system manufacturer's instruction. Pull on the child-restraint to be sure both anchors are engaged.

6. If your child-restraint system came equipped with a tether, that means it is very important to properly secure the tether for child safety. Please carefully follow the child-restraint system manufacturer's instructions when installing tethers.

Anchor bracket location

Tether strap position

For rear left seat

For rear right seat

Tether strap

Forward
**WARNING**

Use the tether and tether anchor only for a child-restraint system:
Using the tether or tether anchor to secure anything but a child-restraint system is dangerous. This could weaken or damage the tether or tether anchor and result in injury.

Always route the tether strap between the head restraint and the seatback:
Routing the tether strap on top of the head restraint is dangerous. In a collision the tether strap could slide off the head restraint and loosen the child-restraint system. The child-restraint system could move which may result in death or injury to the child.

Always attach the tether strap to the correct tether anchor position:
Attaching the tether strap to the incorrect tether anchor position is dangerous. In a collision, the tether strap could come off and loosen the child-restraint system. If the child-restraint system moves it could result in death or injury to the child.

▼LATCH Child-Restraint System Installation Procedure (Second-Row Center Seat)

The LATCH lower anchors at the center of the rear seat are much further apart than the sets of LATCH lower anchors for child-restraint system installation at other seating positions. Child-restraint systems with rigid LATCH attachments cannot be installed on the center seating position. Some LATCH equipped child-restraint systems can be placed in the center position and will reach the nearest LATCH lower anchors which are 500 mm (19.7 in) apart. LATCH compatible child-restraint systems (with attachments on belt webbing) can be used at this seating position only if the child-restraint system manufacturer's instructions state that the child-restraint system can be installed to LATCH lower anchors that are 500 mm (19.7 in) apart. Do not attach two child-restraint systems to the same LATCH lower anchor. If your child-restraint system has a tether, it must also be used for your child's optimum safety.
**WARNING**

*Use the tether and tether anchor only for a child-restraint system:*

Using the tether or tether anchor to secure anything but a child-restraint system is dangerous. This could weaken or damage the tether or tether anchor and result in injury.

*Always route the tether strap between the head restraint and the seatback:*

Routing the tether strap on top of the head restraint is dangerous. In a collision the tether strap could slide off the head restraint and loosen the child-restraint system. The child-restraint system could move which may result in death or injury to the child.

*Always attach the tether strap to the correct tether anchor position:*

Attaching the tether strap to the incorrect tether anchor position is dangerous. In a collision, the tether strap could come off and loosen the child-restraint system. If the child-restraint system moves it could result in death or injury to the child.

1. Slide the second-row seat as far back as possible.
2. Make sure the seatback is securely latched by pushing it back until it is fully locked.

3. Expand the area between the seat bottom and the seatback slightly to verify the locations of the LATCH lower anchors.

4. Raise the head restraint to the top locked position. Refer to Head Restraints on page 2-15.

5. Secure the child-restraint system using BOTH LATCH lower anchors, following the child-restraint system manufacturer's instructions. Pull on the child-restraint to be sure both anchors are engaged.

6. If your child-restraint system came equipped with a tether, that means it is very important to properly secure the tether for child safety. Please carefully follow the child-restraint system manufacturer's instructions when installing tethers.

Supplemental Restraint System (SRS) Precautions

The front and side supplemental restraint systems (SRS) include 6 air bags. Please verify the air bags equipped on your vehicle by locating the “SRS AIRBAG” location indicators. These indicators are visible in the area where the air bags are installed. The air bags are installed in the following locations:

- The steering wheel hub (driver air bag)
- The front passenger dashboard (front passenger air bag)
- The outboard sides of the front seatbacks (side air bags)
- The front and rear window pillars, and the roof edge along both sides (curtain air bags)

The air bag supplemental restraint systems are designed to provide supplemental protection in certain situations, so seat belts are always important in the following ways:

Without seat belt usage, the air bags cannot provide adequate protection during an accident. Seat belt usage is necessary to:

- Keep the occupant from being thrown into an inflating air bag.
- Reduce the possibility of injuries during an accident that is not designed for air bag inflation, such as rear impact.
- Reduce the possibility of injuries in frontal, near frontal, side collisions or roll-over accidents that are not severe enough to activate the air bags.
- Reduce the possibility of being thrown from your vehicle.
- Reduce the possibility of injuries to lower body and legs during an accident because the air bags provide no protection to these parts of the body.
- Hold the driver in a position which allows better control of the vehicle.
Essential Safety Equipment

SRS Air Bags

If your vehicle is also equipped with a driver and front passenger occupant classification system, refer to the Driver and Front Passenger Occupant Classification System (page 2-66) for details.

If your vehicle is equipped with a driver and front passenger occupant classification system, the front passenger air bag deactivation indicator light illuminates for a specified time after the ignition is switched ON.

Small children must be protected by a child-restraint system as stipulated by law in every state and province. In certain states and provinces, larger children must use a child-restraint system (page 2-35).

Carefully consider which child-restraint system is necessary for your child and follow the installation directions in this Owner's Manual as well as the child-restraint system manufacturer's instructions.

⚠️ WARNING

Seat belts must be worn in air bag equipped vehicles:
Depending only on the air bags for protection during an accident is dangerous. Alone, air bags may not prevent serious injuries. The appropriate air bags can be expected to inflate only in the first accident, such as frontal, near frontal, side collisions or roll-over accident that are at least moderate. Vehicle occupants should always wear seat belts.

Children should not ride in the front passenger seat:
Placing a child, 12 years or under, in the front seat is dangerous. The child could be hit by a deploying air bag and be seriously injured or even killed. Even if the front passenger air bag deactivation indicator light illuminates, always move the front passenger seat as far back as possible. A sleeping child is more likely to lean against the door and be hit by the side air bag in a moderate collision to the front-passenger side of the vehicle. Whenever possible, always secure a child 12 years and under on the rear seats with an appropriate child-restraint system for the child's age and size.
Never use a rear-facing child-restraint system in the front seat with an air bag that could deploy:

Rear-facing child-restraint systems on the front seat are particularly dangerous even though you may feel assured that a front passenger air bag will not deploy based on the fact that the front passenger air bag deactivation indicator light illuminates. The child-restraint system can be hit by a deploying air bag and moved violently backward resulting in serious injury or death to the child.

Do not sit too close to the driver and front passenger air bags:

Sitting too close to the driver and front passenger air bag modules or placing hands or feet on them is extremely dangerous. The driver and front passenger air bags inflate with great force and speed. Serious injuries could occur if someone is too close. The driver should always hold onto only the rim of the steering wheel. The front seat passenger should keep both feet on the floor. Front seat occupants should adjust their seats as far back as possible and always sit upright against the seatbacks with seat belts worn properly.

Sit in the center of the seat and wear seat belts properly:

Sitting too close to the side air bag modules or placing hands on them, or sleeping up against the door or hanging out the windows is extremely dangerous. The side and curtain air bags inflate with great force and speed directly expanding along the door on the side the car is hit. Serious injury could occur if someone is sitting too close to the door or leaning against a window, or if rear seat occupants grab the sides of the front seatbacks. Give the side and curtain air bags room to work by sitting in the center of the seat while the vehicle is moving with seat belts worn properly.

Do not attach objects on or around the area where driver and front passenger air bags deploy:

Attaching an object to the driver and front passenger air bag modules or placing something in front of them is dangerous. In an accident, an object could interfere with air bag inflation and injure the occupants.
Essential Safety Equipment

SRS Air Bags

Do not attach objects on or around the area where a side air bag deploys:
Attaching objects to the front seat in such a way as to cover the outboard side of the seat in any way is dangerous. In an accident the object could interfere with the side air bag, which inflates from the outboard side of the front seats, impeding the added protection of the side air bag system or redirecting the air bag in a way that is dangerous. Furthermore, the bag could be cut open releasing the gas.
Do not hang net bags, map pouches or backpacks with side straps on the front seats. Never use seat covers on the front seats. Always keep the side air bag modules in your front seats free to deploy in the event of a side collision.

Do not attach objects on or around the area where a curtain air bag deploys:
Attaching objects to the areas where the curtain air bag activates such as on the windshield glass, side door glass, front and rear window pillars and along the roof edge and assist grips is dangerous. In an accident the object could interfere with the curtain air bag, which inflates from the front and rear window pillars and along the roof edge, impeding the added protection of the curtain air bag system or redirecting the air bag in a way that is dangerous. Furthermore, the bag could be cut open releasing the gas.
Do not place hangers or any other objects on the assist grips. When hanging clothes, hang them on the coat hook directly. Always keep the curtain air bag modules free to deploy in the event of a side collision or roll-over accident.

Do not place luggage or other objects under the front seats:
Placing luggage or other objects under the front seats is dangerous. The components essential to the supplemental restraint system could be damaged, and in the event of a side collision, the appropriate air bags may not deploy, which could result in death or serious injury. To prevent damage to the components essential to the supplemental restraint system, do not place luggage or other objects under the front seats.

Do not touch the components of the supplemental restraint system after the air bags have inflated:
Touching the components of the supplemental restraint system after the air bags have inflated is dangerous. Immediately after inflation, they are very hot. You could get burned.

Never install any front-end equipment to your vehicle:
Installation of front-end equipment, such as frontal protection bar (kangaroo bar, bull bar, push bar, or other similar devices), snowplow, or winches, is dangerous. The air bag crash sensor system could be affected. This could cause air bags to inflate unexpectedly, or it could prevent the air bags from inflating during an accident. Front occupants could be seriously injured.
Do not modify the suspension:
Modifying the vehicle suspension is dangerous. If the vehicle's height or the suspension is modified, the vehicle will be unable to accurately detect a collision or roll-over accident resulting in incorrect or unexpected air bag deployment and the possibility of serious injuries.

To prevent false detection by the air bag sensor system, heed the following:
- Do not use tires or wheels other than those specified for your Mazda:
  Use of any tire or wheel other than those specified for your Mazda (page 10-6) is dangerous. Use of such wheels will prevent the vehicle's accident detection system from accurately detecting a collision or roll-over accident resulting in incorrect or unexpected air bag deployment and the possibility of serious injuries.
- Do not overload your vehicle:
  Overloading your vehicle is dangerous as it could prevent the air bag crash sensor system from accurately detecting a collision or roll-over accident resulting in incorrect or unexpected air bag deployment and the possibility of serious injuries. The gross axle weight rating (GAWR) and the gross vehicle weight rating (GVWR) for your vehicle are on the Motor Vehicle Safety Standard Label on the driver's door frame. Do not exceed these ratings.
- Do not drive the vehicle off-road:
  Driving your Mazda off-road is dangerous because the vehicle has not been designed to do so. Driving the vehicle off-road could prevent the air bag crash sensor system from accurately detecting a collision or roll-over accident resulting in incorrect or unexpected air bag deployment and the possibility of serious injuries.

Do not modify the supplemental restraint system:
Modifying the components or wiring of the supplemental restraint system is dangerous. You could accidentally activate it or make it inoperable. Do not make any modifications to the supplemental restraint system. This includes installing trim, badges, or anything else over the air bag modules. It also includes installing extra electrical equipment on or near system components or wiring. An Authorized Mazda Dealer can provide the special care needed in the removal and installation of front seats. It is important to protect the air bag wiring and connections to assure that the bags do not accidentally deploy, the driver seat slide position sensor and front passenger seat weight sensors are not damaged and that the seats retain an undamaged air bag connection.

NOTE
- When an air bag deploys, a loud inflation noise can be heard and some smoke will be released. Neither is likely to cause injury, however, the texture of the air bags may cause light skin injuries on body parts not covered with clothing through friction.
- Should you sell your Mazda, we urge you to tell the new owner of its air bag systems and that familiarization with all instructions about them, from the Owner's Manual, is important.
Supplemental Restraint System Components

1. Driver/Front passenger inflators and air bags
2. Crash and roll-over sensor, and diagnostic module (SAS unit)
3. Front seat belt pretensioner and load limiting systems (page 2-25)
4. Front air bag sensor
5. Side crash sensors
6. Air bag/front seat belt pretensioner system warning light (page 2-62)
7. Side and curtain inflators and air bags
8. Front passenger air bag deactivation indicator light (page 2-66)
9. Front passenger seat weight sensors (page 2-66)
10. Front passenger seat weight sensor control module
11. Driver and front passenger seat belt buckle switches (page 2-70)
12. Driver seat slide position sensor (page 2-66)

NOTE
- ③ - ⑩ are equipped only on models with the driver and front passenger occupant classification system.

Form No.8BH2-EA-10H
How the SRS Air Bags Work

Your Mazda is equipped with the following types of SRS air bags. SRS air bags are designed to work together with the seat belts to help to reduce injuries during an accident. The SRS air bags are designed to provide further protection for passengers in addition to the seat belt functions. Be sure to wear seat belts properly.

▼ Front Seat Belt Pretensioners
The front seat belt pretensioners are designed to deploy in moderate or severe frontal, near frontal collisions or roll-over accidents.

▼ Driver Air Bag
The driver's air bag is mounted in the steering wheel. When air bag crash sensors detect a frontal impact of greater than moderate force, the driver's air bag inflates quickly helping to reduce injury mainly to the driver's head or chest caused by directly hitting the steering wheel. For more details about air bag deployment, refer to “SRS Air Bag Deployment Criteria” (page 2-63).

(With Driver and Front Passenger Occupant Classification System)
The driver's dual-stage air bag controls air bag inflation in two energy stages. During an impact of moderate severity the driver's air bag deploys with lesser energy, whereas during more severe impacts, it deploys with more energy.

▼ Front Passenger Air Bag
The front passenger air bag is mounted in the front passenger dashboard. The inflation mechanism for the front passenger air bag is the same as the driver's air bag, as mentioned above. For more details about air bag deployment, refer to “SRS Air Bag Deployment Criteria” (page 2-63).
Essential Safety Equipment

SRS Air Bags

(With Driver and Front Passenger Occupant Classification System)
In addition, the front passenger air bag is designed to only deploy in accordance with the total seated weight on the front passenger seat. For details, refer to the driver and front passenger occupant classification system (page 2-66).

▼ Side Air Bags

The side air bags are mounted in the outboard sides of the front seatbacks. When the air bag crash sensors detect a side impact of greater than moderate force, the system inflates the side air bag only on the side in which the vehicle was hit. The side air bag inflates quickly to reduce injury to the driver or front passenger’s chest caused by directly hitting interior parts such as a door or window. For more details about air bag deployment, refer to “SRS Air Bag Deployment Criteria” (page 2-63).

(With Driver and Front Passenger Occupant Classification System)
In addition, the front passenger side air bag is designed to only deploy in accordance with the total seated weight on the front passenger seat. For details, refer to the driver and front passenger occupant classification system (page 2-66).
The curtain air bags are mounted in the front and rear window pillars, and the roof edge along both sides. When the air bag crash sensors detect a side impact of greater than moderate force, the curtain air bag inflates quickly and helps to reduce injury mainly to the rear outboard passenger's head caused by directly hitting interior parts such as a door or window. For more details about air bag deployment, refer to “SRS Air Bag Deployment Criteria” (page 2-63).

**In a side impact:**
Greater than moderate impact to one side of the vehicle will cause the curtain air bag on that side only to inflate.

**In a roll-over:**
In response to a vehicle roll-over, both curtain air bags inflate.

SRS Air Bags

▼ Air Bag/Front Seat Belt Pretensioner System Warning Light

If the air bag/front seat belt pretensioner system is working properly, the warning light illuminates when the ignition is switched ON or after the engine is cranked. The warning light turns off after a specified period of time.

A system malfunction is indicated if the warning light constantly flashes, constantly illuminates or does not illuminate at all when the ignition is switched ON. If any of these occur, consult an Authorized Mazda Dealer as soon as possible. The system may not work in an accident.

⚠️ WARNING

Never tamper with the air bag/pretensioner systems and always have an Authorized Mazda Dealer perform all servicing and repairs:

Self-servicing or tampering with the systems is dangerous. An air bag/pretensioner could accidentally activate or become disabled causing serious injury or death.

▼ Air Bag/Front Seat Belt Pretensioner System Warning Beep

If a malfunction is detected in the air bag/front seat belt pretensioner systems and the warning light, a warning beep sound will be heard for about 5 seconds every minute.

The air bag and seat belt pretensioner system warning beep sound will continue to be heard for approximately 35 minutes.

Have your vehicle inspected at an Authorized Mazda Dealer as soon as possible.

⚠️ WARNING

Do not drive the vehicle with the air bag/front seat belt pretensioner system warning beep sounding:

Driving the vehicle with the air bag/front seat belt pretensioner system warning beep sounding is dangerous. In a collision, the air bags and the front seat belt pretensioner system will not deploy and this could result in death or serious injury. Contact an Authorized Mazda Dealer to have the vehicle inspected as soon as possible.
## SRS Air Bag Deployment Criteria

This chart indicates the applicable SRS equipment that will deploy depending on the type of collision. (The illustrations are the representative cases of collisions.)

<table>
<thead>
<tr>

X: The SRS air bag equipment is designed to deploy in a collision.

*1: [(With Driver and Front Passenger Occupant Classification System)]

The front passenger front and side air bags and the seat belt pretensioner are designed to deploy depending on the condition of the total seated weight on the front passenger seat.
Limitations to SRS Air Bag

In severe collisions or roll-overs such as those described previously in “SRS Air Bag Deployment Criteria”, the applicable SRS air bag equipment will deploy. However, in some accidents, the equipment may not deploy depending on the type of collision and its severity.

Limitations to front/near front collision detection:
The following illustrations are examples of front/near front collisions that may not be detected as severe enough to deploy the SRS air bag equipment.

- Impacts involving trees or poles
- Rear-ending or running under a truck’s tail gate
- Frontal offset impact to the vehicle

Limitations to side collision detection:
The following illustrations are examples of side collisions that may not be detected as severe enough to deploy the SRS air bag equipment.

- Side impacts involving trees or poles
- Side impacts with two-wheeled vehicles
Limitations to roll-over detection:
The following illustration is an example of an accident that may not be detected as a roll-over accident. Therefore, the front seat belt pretensioners and curtain air bags may not deploy.
Driver and Front Passenger Occupant Classification System*

First, please read “Supplemental Restraint System (SRS) Precautions” (page 2-53) carefully.

NOTE
This system is equipped on models for the U.S., Canadian and Puerto Rican markets.

▼ Driver Seat Slide Position Sensor

Your vehicle is equipped with a driver seat slide position sensor as a part of the supplemental restraint system. The sensor is located under the driver seat. The sensor determines whether the driver seat is fore or aft of a reference position and sends the seat position to the diagnostic module (SAS unit). The SAS unit is designed to control the deployment of the driver air bag depending on how close the driver seat is to the steering wheel. The air bag/front seat belt pretensioner system warning light flashes if the sensor has a possible malfunction (page 2-62).

▼ Front Passenger Seat Weight Sensors

Your vehicle is equipped with a front passenger seat weight sensors as a part of the supplemental restraint system. These sensors are located under both of the front passenger seat rails. These sensors determine the total seated weight on the front passenger seat and monitor the seat belt buckle for the front passenger seat. The SAS unit is designed to prevent the front passenger front and side air bags and seat belt pretensioner system from deploying if the front passenger air bag deactivation indicator light illuminates. To reduce the chance of injuries caused by deployment of the front passenger air bag, the system deactivates the front passenger front and side air bags and also the seat belt pretensioner system when the front passenger air bag deactivation indicator light illuminates. Refer to the following table for the front passenger air bag deactivation indicator light illumination conditions.

This system shuts off the front passenger front and side air bags and seat belt pretensioner system, so make sure the front passenger air bag deactivation indicator light illuminates according to the following table.

The air bag/front seat belt pretensioner system warning light flashes and the front passenger air bag deactivation indicator light illuminates if the sensors have a possible malfunction. If this happens, the front passenger front and side air bags and seat belt pretensioner system will not deploy.

2-66  * Some models.
Front passenger air bag deactivation indicator light
This indicator light illuminates to remind you that the front passenger front and side air bags and seat belt pretensioner will not deploy during a collision.

If the front passenger weight sensors are normal, the indicator light illuminates when the ignition is switched ON. The light turns off after a few seconds.

The front passenger air bag deactivation indicator light illuminates or is off under the following conditions:

<table>
<thead>
<tr>
<th>Condition detected by the front passenger occupant classification system</th>
<th>Front passenger air bag deactivation indicator light</th>
<th>Front passenger front and side air bags</th>
<th>Front passenger seat belt pretensioner system</th>
</tr>
</thead>
<tbody>

<tr>
<td>Child or child-restraint system*2</td>
<td>On</td>
<td>Deactivated</td>
<td>Deactivated</td>
</tr>
<tr>
<td>Adult*3</td>
<td>Off</td>
<td>Ready</td>
<td>Ready</td>
</tr>
</tbody>
</table>

*1: If the front passenger seat belt is buckled, the front passenger air bag deactivation indicator light illuminates, however this does not indicate a malfunction.

*2: If a larger child sits on the front passenger seat, the sensors might detect the child as being an adult depending on the child's physique.

*3: If a smaller adult sits on the front passenger seat, the sensors might detect the person as being a child depending on the person's physique.

The curtain air bag is ready for inflating despite the chart above.

If the front passenger air bag deactivation indicator light does not illuminate when the ignition is switched ON and does not illuminate as indicated in the above chart, do not allow a child to sit in the front passenger seat and consult an Authorized Mazda Dealer as soon as possible. The system may not work properly in an accident.
WARNING

Do not decrease the total seated weight on the front passenger seat:
When an adult or large child sits on the front passenger seat, decreasing the total seated weight on the front passenger seat required for air bag deployment is dangerous. The front passenger seat weight sensors will detect the reduced total seated weight condition and the front passenger front and side air bags and seat belt pretensioner system will not deploy during an accident. The front passenger will not have the supplementary protection of the air bag, which could result in serious injury. Decreasing the total seated weight on the front passenger seat could result in an air bag not deploying under the following conditions, for example:

- A rear passenger pushes up on the front passenger seat with their feet.
- Luggage or other items placed under the front passenger seat or between the front passenger seat and driver seat that push up the front passenger seat bottom.
- The front passenger seat occupant sits in a manner that does not place the entire weight of the occupant on the seat such as by sitting too close to the door, grasping the assist grip or the rim of the moonroof and sitting with the seatback reclined too far.
- Any accessories which might decrease the total seated weight on the front passenger seat are attached to the front passenger seat.

The front passenger front and side air bags and seat belt pretensioner systems will deactivate if the front passenger air bag deactivation indicator light illuminates.
Do not increase the total seated weight on the front passenger seat:
When an infant or small child sits on the front passenger seat, increasing the total seated weight on the front passenger seat is dangerous. The front passenger seat weight sensors will detect the increased total seated weight, which could result in the unexpected deployment of the front passenger front and side air bags and seat belt pretensioner system in an accident and may cause serious injury. Increasing the total seated weight on the front passenger seat could result in the front passenger front and side air bags and seat belt pretensioner system deployment in an accident under the following conditions, for example:
- Luggage or other items are placed on the seat with the child in the child-restraint system.
- A rear passenger or luggage push or pull down on the front passenger seatback.
- A rear passenger steps on the front passenger seat rails with their feet.
- Luggage or other items are placed on the seatback or hung on the head restraint.
- Heavy items are placed in the seatback map pocket.
- The seat is washed.
- Liquids are spilled on the seat.
- The front passenger seat is moved backward, pushing into luggage or other items placed behind it.
- The front passenger seatback contacts the second-row seat.
- Luggage or other items are placed between the front passenger seat and driver seat.
- Any accessories which might increase the total seated weight on the front passenger seat are attached to the front passenger seat.

The front passenger front and side air bags and seat belt pretensioner systems will deactivate if the front passenger air bag deactivation indicator light illuminates.

**CAUTION**

- To assure proper deployment of the front air bag and to prevent damage to the sensors in the front seat bottoms:
  - Do not place sharp objects on the front seat bottoms or leave heavy luggage on them.
  - Do not spill any liquids on the front seats or under the front seats.
- To allow the sensors to function properly, always perform the following:
  - Adjust the front seats as far back as possible and always sit upright against the seatbacks with seat belts worn properly.
  - If you place your child on the front passenger seat, secure the child-restraint system properly and slide the front passenger seat as far back as possible (page 2-45).
NOTE

- The system requires about 10 seconds to alternate between turning the front passenger front and side air bags and seat belt pretensioner system on or off.
- The front passenger air bag deactivation indicator light may illuminate repeatedly if luggage or other items are put on the front passenger seat, or if the temperature of the vehicle’s interior changes suddenly.
- The front passenger air bag deactivation indicator light may illuminate for 10 seconds if the total seated weight on the front passenger seat changes.
- The air bag/front seat belt pretensioner system warning light might illuminate if the front passenger seat receives a severe impact.
- If the front passenger air bag deactivation indicator light does not illuminate after installing a child-restraint system on the front passenger seat, first, re-install your child-restraint system according to the procedure in this owner’s manual. Then, if the front passenger air bag deactivation indicator light still does not illuminate, install the child-restraint system on the rear seat and consult an Authorized Mazda Dealer as soon as possible.
- If the front passenger air bag deactivation indicator light illuminates when an adult is seated in the front passenger seat, have the passenger re-adjust their posture by sitting with their feet on the floor, and then re-fastening the seat belt. If the front passenger air bag deactivation indicator light still illuminates, move the passenger to the rear seat. If sitting in the rear seat is not possible, slide the front passenger seat as far back as possible.

▼ Driver and Front Passenger Buckle Switches

The buckle switches on the front seat belts detect whether or not the front seat belts are securely fastened and further control the deployment of the air bags.
Monitoring and Maintenance

▼ Constant Monitoring

The following components of the air bag systems are monitored by a diagnostic system:

- Crash sensors, and diagnostic module (SAS unit)
- Front air bag sensor
- Air bag modules
- Side crash sensors
- Air bag/ Front seat belt pretensioner system warning light
- Front seat belt pretensioners
- Related wiring

(With Driver and Front Passenger Occupant Classification System)

- Front passenger air bag deactivation indicator light
- Driver seat slide position sensor
- Front passenger seat weight sensors
- Front passenger seat weight sensor control module

The diagnostic module continuously monitors the system's readiness. This begins when the ignition is switched ON and continues while the vehicle is being driven.

▼ Maintenance

The air bag systems do not require regular maintenance. But if any of the following occurs, take your vehicle to an Authorized Mazda Dealer as soon as possible:

- The air bag system warning light flashes.
- The air bag system warning light remains illuminated.
- The air bag system warning light does not illuminate when the ignition is switched ON.
- The air bag system warning beep sound is heard.
- The air bags have deployed.

(With Driver and Front Passenger Occupant Classification System)

Front passenger air bag deactivation indicator light does not illuminate when the ignition is switched ON or does not illuminate as indicated in the chart. For more details about this indicator light and this chart, refer to “Front passenger seat weight sensors” (page 2-66).
Essential Safety Equipment

SRS Air Bags

⚠️ WARNING

Do not operate a vehicle with damaged air bag/seat belt pretensioner system components:

Expended or damaged air bag/seat belt pretensioner system components must be replaced after any collision which caused them to deploy or damage them. Only a trained Authorized Mazda Dealer can fully evaluate these systems to see that they will work in any subsequent accident. Driving with an expended or damaged air bag or pretensioner unit will not afford you the necessary protection in the event of any subsequent accident which could result in serious injury or death.

Do not remove interior air bag parts:

Removing any components such as the front seats, front dashboard, the steering wheel or parts on the front and rear window pillars and along the roof edge, containing air bag parts or sensors is dangerous. These parts contain essential air bag components. The air bag could accidentally activate and cause serious injuries. Always have an Authorized Mazda Dealer remove these parts.

Dispose of the air bag properly:

Improper disposal of an air bag or a vehicle with live air bags in it can be extremely dangerous. Unless all safety procedures are followed, injury can result. Ask an Authorized Mazda Dealer how to safely dispose of an air bag or how to scrap an air bag equipped vehicle.

NOTE

If it becomes necessary to have the components or wiring system for the supplementary restraint system modified to accommodate a person with certain medical conditions in accordance with a certified physician, contact an Authorized Mazda Dealer, refer to “Customer Assistance (U.S.A.)” (page 9-2).

Advanced Keyless Entry and Start System

Advanced Keys*

The advanced keyless functions (advanced keyless entry and start system) enable the following operations while the advanced key is being carried (page 3-7).
- Locking/unlocking the doors and the liftgate without operating the key.
- Starting the engine without operating the key.

Additional functions are available using the buttons on the advanced key.
Refer to Operation Using Advanced Key Functions on page 3-13.
- The following operations are possible using the transmitter of the keyless entry system from a distance (Lock/Unlock/Panic/Liftgate button):
  - Locking/unlocking the doors and the liftgate.
  - Opening/closing the power liftgate*.
  - Opening the power windows and the moonroof*.
  - Operating the theft-deterrent system*.
  - Turning on the alarm.
- Locking/unlocking the doors or starting the engine using the auxiliary key.

⚠️ WARNING ⚠️

Do not leave the key in your vehicle with children and keep them in a place where your children will not find or play with them:

Leaving children in a vehicle with the key is dangerous. This could result in someone being badly injured or even killed. Children may find these new kinds of keys to be an interesting toy to play with and could cause the power windows or other controls to operate, or even make the vehicle move.

Radio waves from the advanced key may affect medical equipment such as pacemakers:

Before using the advanced key near people who use medical equipment, ask the medical equipment manufacturer or your physician if radio waves from the advanced key will affect the equipment.

NOTE
- The driver must carry the advanced key to ensure the system functions properly.
- Refer to Immobilizer System (page 3-53) for information regarding keys and engine starting.
- (With theft-deterrent system)
  Refer to Theft-Deterrent System (page 3-61) for information regarding keys and the prevention of vehicle and vehicle contents theft.
Advanced Keyless Entry and Start System

With power liftgate button

![Diagram of keyless entry and start system with power liftgate button]

Without power liftgate button

![Diagram of keyless entry and start system without power liftgate button]

A code number is stamped on the plate attached to the key set; detach this plate and store it in a safe place (not in the vehicle) for use if you need to make a replacement key.

Also write down the code number and keep it in another safe and handy place, but not in the vehicle.

If your key is lost, consult your Authorized Mazda Dealer with the code number ready.
CAUTION

- Because the advanced key uses low-intensity radio waves, it may not function correctly under the following conditions:
  - The advanced key is carried with communication devices such as cellular phones.
  - The advanced key contacts or is covered by a metal object.
  - The advanced key is near electronic devices such as personal computers or cell phones.
  - Non-Mazda genuine electronic equipment is installed in the vehicle.
  - There is equipment which discharges radio waves near the vehicle.
  - If the vehicle is near equipment such as wireless pay devices installed at certain gas stations.
- The advanced key may consume battery power excessively if it receives high-intensity radio waves. Do not place the advanced key near electronic devices such as televisions or personal computers.
- To avoid damage to the advanced key, DO NOT:
  - Drop the advanced key.
  - Get the advanced key wet.
  - Disassemble the advanced key.
  - Expose the advanced key to high temperatures on places such as the dashboard or hood, under direct sunlight.
  - Place heavy objects on the advanced key.
  - Put the advanced key in an ultrasonic cleaner.
  - Put any magnetized objects close to the advanced key.

NOTE

- Battery life is about one year. Be sure to replace the battery as soon as you see the green KEY indicator light in the instrument cluster begin flashing for 30 seconds after turning off the engine, otherwise, you will not be able to start the engine using the advanced keyless start system once the battery is completely dead. Refer to KEY warning light (red) on page 5-55. If this occurs, you will have to use the auxiliary key if you need to start the engine immediately. Refer to Advanced Key Battery Dead Warning on page 3-19.

KEY

- Additional advanced keys can be obtained at an Authorized Mazda Dealer. Up to 6 advanced keys can be used with the advanced keyless functions per vehicle.
Advanced Key Maintenance

**CAUTION**

- Make sure the battery is installed with the correct pole facing upward. Battery leakage could occur if it is not installed correctly.
- When replacing the battery, be careful not to touch any of the internal circuitry and electrical terminals, bend the electrical terminals, or get dirt in the transmitter as the transmitter could be damaged.
- There is the danger of explosion if the battery is not correctly replaced.
- Replace only with the same type battery (CR2025 or equivalent).
- Dispose of used batteries according to the following instructions.
  - Insulate the plus and minus terminals of the battery using cellophane or equivalent tape.
  - Never disassemble.
  - Never throw the battery into fire or water.
  - Never deform or crush.

The following conditions indicate that the battery power is low:

- The KEY indicator light (green) flashes in the instrument cluster for about 30 seconds after the engine is turned off.
- The system does not operate and the operation indicator light on the transmitter does not flash when the buttons are pressed.
- The system's operational range is reduced.

Replacing the battery at an Authorized Mazda Dealer is recommended to prevent damage to the advanced key. If replacing the battery by yourself, follow the instruction below.

**Replacing the advanced key battery**

1. Pull out the auxiliary key.
2. Insert a flathead screwdriver into the groove shown in the figure and rotate the screwdriver to open the cover slightly.
3. Insert the flathead screwdriver into the gap between the cover and the transmitter, and then rotate the screwdriver to detach the cover.

4. Remove the battery cap, then remove the battery.

5. Insert a new battery with the positive pole facing up, and then cover the battery with the battery cap.

6. Close the cover.

7. Reinsert the auxiliary key.
Advanced Keyless Entry and Start System

**Operation Using Advanced Keyless Functions**

**Operational Range**

The system operates only when the driver is in the vehicle or within operational range while the advanced key is being carried.

*NOTE*
*When the battery power is low, or in places where there are high-intensity radio waves or noise, the operational range may become narrower or the system may not operate.*

**Locking, unlocking the doors and the liftgate**

The operational range for locking/unlocking the doors is an area of up to 80 cm (31 in) from the center of the front door handles.

The operational range for locking/unlocking the liftgate is an area of up to 80 cm (31 in) from the center of the liftgate.

**Service**

If you have a problem with the advanced keyless functions, consult an Authorized Mazda Dealer.

If your advanced key is lost or stolen, bring all remaining advanced keys to an Authorized Mazda Dealer as soon as possible for a replacement and to make the lost or stolen advanced key inoperative.

**CAUTION**

*Radio equipment like this is governed by laws in the United States. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.*

---

**CAUTION**

- Be careful not to allow the rubber ring shown in the figure to be scratched or damaged.
- If the rubber ring detaches, reattach it before inserting a new battery.

---

Knowing Your Mazda
Starting the engine
The operational range for starting the engine includes nearly the entire cabin area except for the luggage compartment.

![Interior transmitter](image)

**NOTE**
- The luggage compartment is out of the operational range, however, starting the engine may be possible.
- The engine may not start if the advanced key is placed in the following areas:
  - Around the dashboard
  - In the storage compartments such as the glove box
- Starting the engine may be possible even if the advanced key is outside of the vehicle and extremely close to a door and window, however, always start the engine from the driver's seat.
- If the vehicle is started and driven away while the advanced key is not in the vehicle, the vehicle will not restart after it is turned off and the ignition is switched off.
- If the advanced key is detected within operational range, the operation indicator light on the transmitter flashes momentarily.

▼ Locking, Unlocking with Request Switch
All doors and the liftgate can be locked/unlocked by pressing the request switch on the front doors or the lifgate while the advanced key is being carried.

**Front doors**

![Request switch on front door](image)

**Liftgate**

![Request switch on liftgate](image)

**To lock**
To lock the doors and the liftgate, press the request switch. A beep sound will be heard once and the hazard warning lights will flash once.
NOTE
(Without theft-deterrent system)
The hazard warning lights will flash once to indicate that the doors and the liftgate are locked.

(With theft-deterrent system)
The hazard warning lights flash when the theft deterrent system is armed.
The hazard warning lights do not flash if all the doors and the liftgate are locked before the theft-deterrent system is properly armed.
When the doors are locked by pressing the request switch on the front doors while the theft-deterrent system is armed, the hazard warning lights will flash once to indicate that the system is armed.
Refer to the theft-deterrent system on page 3-61.

To unlock
Driver's door request switch
To unlock the driver's door, press the request switch. A beep sound will be heard twice and the hazard warning lights will flash twice.
To unlock all doors and the liftgate, press the request switch again within 3 seconds and two more beep sounds will be heard.

NOTE
(Without theft-deterrent system)
The hazard warning lights will flash twice to indicate that the doors and the liftgate are unlocked.

(With theft-deterrent system)
The hazard warning lights flash when the theft deterrent system is turned off.
The hazard warning lights do not flash unless the theft deterrent system has been properly turned off.
When the doors are unlocked by pressing the request switch on the front doors while the theft-deterrent system is turned off, the hazard warning lights will flash twice to indicate that the system is turned off.
Refer to the theft-deterrent system on page 3-61.

Front passenger door/liftgate request switch
To unlock the doors and the liftgate, press the request switch. A beep sound will be heard twice and the hazard warning lights will flash twice.

NOTE
• The request switch on the driver's door can be used to close the power windows and the moonroof. Refer to Opening/Closing the Power Windows on page 3-44. Refer to Opening/Closing the Sunroof on page 3-51.
• Confirm that all doors and the liftgate are securely locked.
• All doors and the liftgate cannot be locked when any door or the liftgate is open.
• A beep sound is heard for confirmation when the doors and the liftgate are locked/unlocked using the request switch. If you prefer, the beep sound can be turned off (page 10-8).
The setting can be changed so that the doors and the liftgate are locked automatically without pressing the request switch (page 10-8).

*(Auto-lock function)*

A beep sound is heard when all doors and the liftgate are closed while the advanced key is being carried. All doors and the liftgate are locked automatically after about 3 seconds when the advanced key is out of the operational range. Also, the hazard warning lights flash once. (Even if the driver is in the operational range, all doors and the liftgate are locked automatically after about 30 seconds.) If you are out of the operational range before the doors and the liftgate are completely closed or another advanced key is left in the vehicle, the auto-lock function will not work. Always make sure that all doors and the liftgate are closed and locked before leaving the vehicle.

*(Auto re-lock function)*

After unlocking doors and the liftgate by pressing the request switch, all doors and the liftgate will automatically lock if any of the following operations are not performed within about 30 seconds. If your vehicle has a theft-deterrent system, the hazard warning lights will flash for confirmation.

- A door or the liftgate is opened.
- The auxiliary key is inserted into the ignition switch.
- The start knob is pushed.

**Starting the Engine**

**Ignition switch positions**

As there is no traditional key, some of the ignition switch functions are different.

![Diagram of Start Knob](image)

The engraved mark (LOCK) indicated in the illustration may differ from that indicated on the actual vehicle (it may read OFF).

**OFF/LOCK—Knob Released**

The power supply to electrical devices is turned off.

**OFF/LOCK—Knob Depressed**

The ignition can be switched to ACC when the KEY indicator light (green) illuminates in the instrument cluster.
WARNING
Before leaving the driver’s seat, always switch the ignition to OFF/LOCK, set the parking brake and make sure the shift lever is in P:

It is important to switch the ignition to OFF/LOCK even if you are not removing the key from the ignition or leaving the vehicle. Leaving the key in other positions will disable some of the vehicle security systems and run the battery down.

Leaving the driver’s seat without switching the ignition to OFF/LOCK, setting the parking brake and shifting the shift lever to P is dangerous. Unexpected vehicle movement could occur. This could cause an accident.

NOTE
- If turning the ignition switch is difficult, jiggle the steering wheel from side to side.
- The ignition cannot be switched from ACC to OFF/LOCK when the shift lever is not in P.

ACC (Accessory)
In this position, some electrical accessories will operate.

NOTE
The Advanced Keyless Entry System does not function in the ACC position, and the doors will not lock/unlock using the transmitter or request switches even if the advanced key is carried away from the vehicle.

ON
This is the normal running position after the engine is started. The warning lights (except brakes) should be inspected before the engine is started (page 5-44).

NOTE
When the ignition is switched ON, the sound of the fuel pump motor operating near the fuel tank can be heard. This does not indicate an abnormality.

START
The engine is started in this position. It will crank until you release the start knob; then it returns to the ON position. The brake warning light can be checked after the engine is started (page 5-44).

Starting the engine

NOTE
- Engine-starting is controlled by the spark ignition system. This system meets all Canadian Interference-Causing Equipment Standard requirements regulating the impulse electrical field strength of radio noise.
- The advanced key must be carried because the advanced key carries an immobilizer chip that must communicate with the engine controls at short range.
- When starting the engine, be sure the start knob is securely attached before trying to operate it. If the knob becomes detached from the ignition switch, re-attach it by pushing it on to the ignition switch.
Knowing Your Mazda

Advanced Keyless Entry and Start System

1. Make sure the advanced key is being carried.
2. Occupants should fasten their seat belts.
3. Make sure the parking brake is on.
4. Depress the brake pedal.
5. Put the vehicle in park (P). If you must restart the engine while the vehicle is moving, shift into neutral (N).

**NOTE**
The starter will not operate if the shift lever is not in P or N.

6. Push the start knob slowly all the way in.

7. Verify that the KEY indicator light (green) illuminates in the instrument cluster. The KEY warning light (red) means you cannot continue to start the engine using the Advanced Keyless System. You may have to use the auxiliary key instead (page 3-20).

8. Switch the ignition to ACC while pushing the start knob in.

9. Switch the ignition from ACC to START and hold (up to 10 seconds at a time) until the engine starts.

**CAUTION**
Do not try the starter for more than 10 seconds at a time. If the engine stalls or fails to start, wait 10 seconds before trying again. Otherwise, you may damage the starter and drain the battery.

10. After starting the engine, let it idle for about 10 seconds.
NOTE
• In extremely cold weather or after the vehicle has not been driven in several days, let the engine warm up without operating the accelerator.
• Whether the engine is cold or warm, it should be started without use of the accelerator.

Turning the engine off
1. Move the shift lever to the P position.
2. Switch the ignition from ON to ACC.

NOTE
When the engine is turned off and the ignition is switched from ACC to OFF/LOCK, the KEY indicator light (green) flashes in the instrument cluster for about 30 seconds if the battery power of the advanced key is low. Replace the battery with a new one.
Refer to Battery Replacement (page 3-7).

3. Push in the start knob from the ACC position and turn it to the OFF/LOCK.

CAUTION
When leaving the vehicle, make sure the ignition is switched to OFF/LOCK.

NOTE
• When switching the ignition to OFF/LOCK, the ignition switch has to be pushed in from the ACC position and turned. Without being pushed in, the ignition switch stops at the ACC position and the vehicle battery may be discharged if the ignition switch is left in the ACC position. When leaving the vehicle, make sure the ignition is switched to OFF/LOCK.
• If the vehicle is left with the ignition not switched to OFF/LOCK, a beep sound is heard and the indicator light flashes to notify the driver.
Refer to Warning Beep (page 3-18).

Operation Using Advanced Key Functions

Keyless Entry System
This system uses the more traditional keyless entry buttons to remotely lock and unlock the doors and the liftgate, and opens the power windows and the moonroof.
It can also help you signal for attention. Press the buttons slowly and carefully.

NOTE
• The keyless entry system is designed to operate up to about 2.5 m (8 ft) from the center of the vehicle, but this may vary due to local conditions.
• The system does not operate when the auxiliary key is in the ignition switch.
• With the start knob installed in the OFF/LOCK position, the system is fully operational. If the ignition is not switched off or the start knob is pushed in, the system does not operate.
• All doors and the liftgate cannot be locked by pressing the lock button while any door or the liftgate is open. The hazard warning lights will also not flash.
• If the transmitter does not operate when pressing a button or the operational range becomes too small, the battery may be dead. To install a new battery, refer to Maintenance (page 3-5).
Advanced Keyless Entry and Start System

Transmitter

with power liftgate

```
+-------------------+-------------------+
| Operation indicator light | Lock button       |
| Unlock button        | Power liftgate button |
| Panic button         |                   |
```

without power liftgate

```
+-------------------+-------------------+
| Lock button       | Operation indicator light |
| Unlock button     |                      |
| Panic button      |                      |
```

NOTE
The unlock button can be used to open the power windows and the moonroof, but the lock button cannot be used to close the power windows and the moonroof. Refer to the following pages:
Opening/Closing the Power Windows (page 3-44)
Opening/Closing the moonroof (page 3-51)

The operation indicator light flashes when the buttons are pressed.

Lock button

To lock the doors and the liftgate, press the lock button. A beep sound will be heard once and the hazard warning lights will flash once.

To confirm that all doors and the liftgate have been locked, press the lock button again within 5 seconds. If they are closed and locked, the horn will sound.

NOTE
- A beep sound can be heard for confirmation when the doors are locked using the advanced keyless transmitter. If you prefer, the beep sound can be turned off. Refer to Personalization Features on page 10-8.
- **(Without theft-deterrent system)**
  The hazard warning lights will flash once to indicate that all doors and the liftgate are locked.
- **(With theft-deterrent system)**
  The hazard warning lights flash when the theft deterrent system is armed. The hazard warning lights do not flash if all the doors and the liftgate are locked before the theft-deterrent system is properly armed.
  When the doors are locked by pressing the lock button on the transmitter while the theft-deterrent system is armed, the hazard warning lights will flash once to indicate that the system is armed. Refer to the theft-deterrent system on page 3-61.

NOTE
- All doors and the liftgate cannot be locked when any door or the liftgate is open.
- Confirm that all doors and the liftgate are locked visually or audibly by use of the double click.
Unlock button
To unlock the driver’s door, press the unlock button. A beep will be heard twice and the hazard warning lights will flash twice.

To unlock all doors and the liftgate, press the unlock button again within 3 seconds and two more beep sounds will be heard.

NOTE
• A beep sound can be heard for confirmation when the doors are unlocked using the advanced keyless transmitter. If you prefer, the beep sound can be turned off. Refer to Personalization Features on page 10-8.
• (Without theft-deterrent system) The hazard warning lights will flash twice to indicate that all doors and the liftgate are unlocked.
• (With theft-deterrent system) The hazard warning lights flash when the theft deterrent system is turned off. The hazard warning lights do not flash unless the theft deterrent system has been properly turned off.

When the doors are unlocked by pressing the unlock button on the transmitter while the theft-deterrent system is turned off, the hazard warning lights will flash twice to indicate that the system is turned off. Refer to the theft-deterrent system on page 3-61.

NOTE (Auto re-lock function)
After unlocking with the transmitter, all doors and the liftgate will automatically lock if any of the following operations are not performed within about 30 seconds. If your vehicle has a theft-deterrent system, the hazard warning lights will flash for confirmation.
• A door or the liftgate is opened.
• The auxiliary key is inserted into the ignition switch.
• The start knob is pressed.

Power liftgate button
If your Mazda has a power liftgate (page 3-35), the transmitter can open/close the liftgate.

Panic button
If you witness from a distance someone attempting to break into or damage your vehicle, pressing the panic button will activate the vehicle's alarm.

NOTE
The panic button will work whether any door or the liftgate is open or closed.

(Turning on the alarm) Pressing the panic button for 1 second or more will trigger the alarm for about 2 minutes and 30 seconds, and the following will occur:
• The horn sounds intermittently.
• The hazard warning lights flash.

(Turning off the alarm) The alarm stops by pressing any button on the transmitter.

Advanced Keyless Entry and Start System

▼ Auxiliary Key Function
Use the auxiliary key stored in the advanced key in the event of a dead transmitter battery or malfunction.

Removing the auxiliary key
Pull out the auxiliary key from the advanced key.

Locking, unlocking the doors
The doors can be locked/unlocked using the auxiliary key, refer to Locking, Unlocking with Key (page 3-28).

Starting the engine
The engine can be started with the auxiliary key, refer to Ignition Switch (page 5-2).

Locking, unlocking the glove box
The glove box can be locked/unlocked using the auxiliary key, refer to Glove Box (page 6-198).

Advanced Key Suspend Function
If one advanced key is left in the vehicle and a second advanced key is used to lock it, the functions of the advanced key left in the vehicle are temporarily suspended to prevent theft of the vehicle.
The following are inoperable:
• Starting the engine using the start knob.
• Operating the request switches.
To restore these functions, perform any one of the following:
• Press the lock or unlock button on the advanced key which has had its functions temporarily suspended.
• While carrying another advanced key, push in the start knob until the KEY indicator light (green) illuminates.
• Insert the auxiliary key and switch the ignition ON.
Advanced Keyless Entry and Start System

Warning and Beep Sounds

▼ System Malfunction Warning Beep

If any malfunction occurs in the advanced keyless function, the KEY warning light (red) in the instrument cluster illuminates continuously and beep sounds will be heard.

⚠️ CAUTION

If the KEY warning light (red) remains illuminated, do not continue to drive the vehicle with the advanced keyless function. Park the vehicle in a safe place and use the auxiliary key to continue driving the vehicle. Have the vehicle inspected at an Authorized Mazda Dealer as soon as possible. Refer to Ignition Switch (page 5-2).

▼ Start Knob Not in LOCK Warning Beep

If the ignition is switched to ACC and the driver's door is opened, a continuous beep sound will be heard to notify the driver that the ignition has not been switched off. In this case, the keyless entry system does not operate, the car cannot be locked, and the battery will run down.

▼ Advanced Key Removed from Vehicle Warning Beep

Under the following conditions, a beep sound will be heard and the KEY warning light (red) will flash continuously when the ignition has not been switched off to notify the driver that the advanced key has been removed. The KEY warning light (red) will stop flashing when the advanced key is back inside the vehicle:

- The ignition has not been switched off, the driver's door is open, and the advanced key is removed from the vehicle. (A beep sound will be heard 3 times.)
- However the beep sound will be heard continuously when the ignition is switched to ACC and the door is open due to the activation of the warning beep sound indicating that the ignition is not switched off.
- The ignition has not been switched off and all the doors are closed after removing the advanced key from the vehicle. (A beep sound will be heard 6 times.)

NOTE
Because the advanced key utilizes low-intensity radio waves, the Advanced Key Removed From Vehicle Warning may activate if the advanced key is carried together with a metal object or it is placed in a poor signal reception area within the vehicle.
Advanced Keyless Entry and Start System

▼Request Switch Inoperable Warning Beep

If the request switch for a front door or the liftgate is pressed under the following conditions while the advanced key is being carried, a beep will be heard 6 times to indicate that the front doors and the liftgate cannot be locked.

- A door or the liftgate is open (door ajar included).
- The ignition has not been switched off.
- The auxiliary key is inserted into the ignition switch.

▼Advanced Key Battery Dead Warning

When the ignition is switched to ACC or switched off from ON, the KEY indicator light (green) flashes for approximately 30 seconds indicating that the remaining battery power is low. Replace with a new battery before the advanced key becomes unusable. Refer to Advanced Key Maintenance (page 3-5).

NOTE
The advanced key can be set so that the KEY indicator light (green) does not flash even if the battery power is low. Refer to Personalization Features on page 10-8.

▼Engine Start Not Permitted Warning

Under the following conditions, the KEY warning light (red) flashes to inform the driver that the ignition will not switch to ACC even if the ignition is switched off.

- The advanced key battery is dead.
- The advanced key is not within operational range.

- The advanced key is placed in areas where it is difficult for the system to detect the signal (page 3-7).
- A key from another manufacturer similar to the advanced key is in the operational range.

▼Advanced Key Left-in-vehicle Warning Beep

If an advanced key is left in the vehicle cabin and all the doors and the liftgate are locked using a separate advanced key, a beep sound is heard for about 10 seconds to remind the driver that the advanced key has been left in the vehicle cabin. If this happens, the doors and the liftgate lock but the functions of the advanced key left in the vehicle cabin may be temporarily suspended. Perform the following procedure to restore the functions of the advanced key (page 3-17).
When Warning Indicator/Beep is Activated

Under the following conditions, warning beeps are heard and a warning/indicator light in the instrument cluster illuminates to notify the driver of improper operation of the advanced key to prevent theft of the vehicle (page 3-18).

<table>

</tbody>
</table>
Keys

**WARNING**

*Do not leave the key in your vehicle with children and keep them in a place where your children will not find or play with them:*

Leaving children in a vehicle with the key is dangerous. This could result in someone being badly injured or even killed. Children may find these new kinds of keys to be an interesting toy to play with and could cause the power windows or other controls to operate, or even make the vehicle move.

**NOTE**

- Refer to Immobilizer System (page 3-57) for information regarding keys and engine starting.
- *(With theft-deterrent system)*
  
  Refer to Theft-Deterrent System (page 3-61) for information regarding keys and the prevention of vehicle and vehicle contents theft.

The keys operate all locks.

A code number is stamped on the plate attached to the key set; detach this plate and store it in a safe place (not in the vehicle) for use if you need to make a replacement key.

**NOTE**

- Write down the code number and keep it in a separate, safe and convenient place, but not in the vehicle.

If your key is lost, consult your Authorized Mazda Dealer and have your code number ready.

- Some types of key chains cannot be attached to the retractable type key. In this case, use the key ring provided with the transmitter which has the key code number plate attached.

The key code number plate

Retractable type key

Key ring
Black plate (106,1)

Doors and Locks

Key extend/retract method (Retractable type key)
To extend the key, press the release button.

To retract the key, rotate it into the holder while pressing the release button.

Keyless Entry System *
This system remotely locks and unlocks the doors and the liftgate, and opens the power windows and the moonroof. It can also help you signal for attention. Press the buttons slowly and carefully.

CAUTION
To avoid damage to the transmitter, do not:
- Drop the transmitter.
- Get the transmitter wet.
- Disassemble the transmitter.
- Expose the transmitter to any kind of magnetic field.
- Expose the transmitter to high temperatures on places such as the dashboard or hood, under direct sunlight.

NOTE
- The keyless entry system is designed to operate up to about 2.5 m (8 ft) from the center of the vehicle, but this may vary due to local conditions.
- The system does not operate when the key is in the ignition switch.
- If the transmitter does not operate when pressing a button or the operation range becomes too small, the battery may be dead. To install a new battery, refer to Maintenance (page 3-25).
- Additional transmitters can be obtained at an Authorized Mazda Dealer. Up to 3 transmitters can be used with the keyless entry system per vehicle. Bring all transmitters to an Authorized Mazda Dealer when additional transmitters are required.

* Some models.
Knowing Your Mazda

Doors and Locks

Transmitter

- Lock button
- Unlock button
- Operation indicator light
- Panic button

NOTE
The unlock button can be used to open the power windows and the moonroof, but the lock button cannot be used to close the power windows and the moonroof. Refer to Opening/Closing the Power Windows and the moonroof from Outside (page 3-44).

The operation indicator light flashes when the buttons are pressed.

Lock button
To lock the doors and the liftgate, press the lock button and the hazard warning lights will flash once.

To confirm that all doors and the liftgate have been locked, press the lock button again within 5 seconds. If they are closed and locked, the horn will sound and the hazard warning lights will flash once.

NOTE
- Doors and the liftgate can be locked by pressing the lock button while any other door or the liftgate is open. Also, the hazard warning lights will not flash and the horn will not sound.
- (Without theft-deterrent system)
The hazard warning lights will flash once to indicate that all doors and the liftgate are locked.
- (With theft-deterrent system)
The hazard warning lights flash when the theft deterrent system is armed.
The hazard warning lights do not flash if all the doors and the liftgate are locked before the theft-deterrent system is properly armed.
When the doors are locked by pressing the lock button on the transmitter while the theft-deterrent system is armed, the hazard warning lights will flash once to indicate that the system is armed. Refer to the theft-deterrent system on page 3-61.
- All doors and the liftgate cannot be locked when the key is in the ignition switch.
- Confirm that all doors and the liftgate are locked visually or audibly by use of the double click.

Unlock button
To unlock the driver's door, press the unlock button and the hazard warning lights will flash twice.

To unlock all doors and the liftgate, press the unlock button again within 3 seconds and the hazard warning lights will flash twice.
NOTE
(Without theft-deterrent system)
The hazard warning lights will flash twice to indicate that all doors and the liftgate are unlocked.

(With theft-deterrent system)
The hazard warning lights flash when the theft deterrent system is turned off.
The hazard warning lights do not flash unless the theft deterrent system has been properly turned off.
When the doors are unlocked by pressing the unlock button on the transmitter while the theft-deterrent system is turned off, the hazard warning lights will flash twice to indicate that the system is turned off.
Refer to the theft-deterrent system on page 3-61.

NOTE
Auto re-lock function
After unlocking with the transmitter, all doors and the liftgate will automatically lock if one of the doors or the liftgate is not opened within about 30 seconds.

Panic button
If you witness from a distance someone attempting to break into or damage your vehicle, pressing the panic button will activate the vehicle's alarm.

NOTE
The panic button will work whether any door or the liftgate is open or closed.

Turning on the alarm
Pressing the panic button once will trigger the alarm for about 2 minutes and 30 seconds, and the following will occur:
- The horn sounds intermittently.
- The hazard warning lights flash.

Turning off the alarm
Press any button on the transmitter.
Transmitter Maintenance
If the buttons on the transmitter are inoperable and the operation indicator light does not flash, the battery may be dead. Replace with a new battery before the transmitter becomes unusable.

⚠️ CAUTION
- Install the battery with the positive pole (+) facing down. Battery leakage could occur if it is not installed correctly.
- When replacing the battery, be careful not to touch any of the internal circuitry and electrical terminals, bend the electrical terminals, or get dirt in the transmitter as the transmitter could be damaged.
- There is the danger of explosion if the battery is not correctly replaced.
- Replace only with the same type battery (CR1620 or equivalent).
- Dispose of used batteries according to the following instructions.
  - Insulate the plus and minus terminals of the battery using cellophane or equivalent tape.
  - Never disassemble.
  - Never throw the battery into fire and/or water.
  - Never deform or crush.

Replacing the transmitter battery
1. Unfold the key (page 3-21).
2. Insert a screwdriver into the slot and push the tab to remove the key from the transmitter.
3. Insert a screwdriver into the slot and gently pry open the transmitter.
4. Remove the battery.
5. Put in the new battery (CR1620 or equivalent) with the positive pole (⁺) facing down.

6. Align the front and back covers and snap the transmitter shut.

7. Align the key with the transmitter as shown in the figure, and insert the key until a click sound is heard.

CAUTION

Insert the key into the transmitter securely until a click sound is heard. If it is not inserted securely, it could detach from the transmitter.

Service

If you have a problem with the keyless entry system, consult an Authorized Mazda Dealer.

If your transmitter is lost or stolen, bring all remaining transmitters to an Authorized Mazda Dealer as soon as possible for a replacement and to make the lost or stolen transmitter inoperative.

CAUTION

Radio equipment like this is governed by laws in the United States. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Door Locks

WARNING
Always take all children and pets with you or leave a responsible person with them:
Leaving a child or a pet unattended in a parked vehicle is dangerous. In hot weather, temperatures inside a vehicle can become high enough to cause brain damage or even death.

Do not leave the key in your vehicle with children and keep them in a place where your children will not find or play with them:
Leaving children in a vehicle with the key is dangerous. This could result in someone being badly injured or even killed.

Keep all doors locked when driving:
Unlocked doors in a moving vehicle are dangerous. Passengers can fall out if a door is accidentally opened and can more easily be thrown out in an accident.

Always close all the windows and the moonroof, lock the doors and take the key with you when leaving your vehicle unattended:
Leaving your vehicle unlocked is dangerous as children could lock themselves in a hot vehicle, which could result in death. Also, a vehicle left unlocked becomes an easy target for thieves and intruders.

After closing the doors, always verify that they are securely closed:
Doors not securely closed are dangerous, if the vehicle is driven with a door not securely closed, the door could open unexpectedly resulting in an accident.

Always confirm the safety around the vehicle before opening a door:
Suddenly opening a door is dangerous. A passing vehicle or a pedestrian could be hit and cause an accident.

▼ Locking, Unlocking with Key
The driver’s door can be locked/unlocked with the key.
Turn the key toward the front to unlock, toward the back to lock.

▼ Locking, Unlocking with Request Switch (with Advanced Key)
The doors can be locked/unlocked by operating the request switch while carrying the advanced key outside the vehicle, refer to Operations Using Advanced Keyless Functions (page 3-7).
Knowing Your Mazda

Doors and Locks

▼ Locking, Unlocking with Transmitter (with Advanced Key)

The doors can be locked/unlocked by operating the keyless entry system transmitter, refer to Keyless Entry System (page 3-13).

▼ Locking, Unlocking with Transmitter (with Retractable Type Key)

The doors can be locked/unlocked by operating the keyless entry system transmitter, refer to Keyless Entry System (page 3-22).

▼ Locking, Unlocking with Door-Lock Knob

To lock any door from the inside, press the door-lock knob.
To unlock, pull it outward.
This does not operate the other door locks.

To lock any door with the door-lock knob from the outside, press the door-lock knob to the lock position and close the door. This does not operate the other door locks.

**NOTE**
- When locking the doors this way, be careful not to leave the key inside the vehicle.
- *(With advanced key)*
  The driver's door cannot be locked using the door-lock knob from the outside.
- *(With retractable type key)*
  The driver's door cannot be locked using the door-lock knob from the outside if the key is in the ignition switch.

▼ Power Door Locks

Vehicle lock-out prevention
*(With advanced key)*

The vehicle lock-out prevention feature prevents you from locking yourself out of the vehicle. All doors and the liftgate will automatically unlock if they are locked using the power door locks with any door or the liftgate open.
(With retractable type key)
The vehicle lock-out prevention feature prevents you from locking yourself out of the vehicle. With the key in the ignition switch, all doors and the liftgate will automatically unlock if they are locked using the power door locks with any door or the liftgate open.

**Locking, unlocking with key**
All doors and the liftgate lock automatically when the driver's door is locked with the key.
All doors and the liftgate unlock when the driver's door is unlocked and the key is held in the unlock position for one second or longer.

**NOTE**
*Holding the key in the unlocked position in the driver's door lock for about a second unlocks all doors and the liftgate. To unlock only the driver's door, insert the key into the driver's door lock and turn the key briefly to the unlock position and then immediately return it to the center position.*

**Locking, unlocking with door-lock switch**
All doors and the liftgate lock automatically when lock side is pressed. They all unlock when unlock side is pressed.

**Locking, unlocking with request switch (with advanced key)**
All doors and the liftgate can be locked/unlocked by operating the request switch on the front doors and the liftgate while carrying the advanced key outside the vehicle, refer to Operations Using Advanced Keyless Functions (page 3-7).

**Locking, unlocking with transmitter (with advanced key)**
All doors and the liftgate can be locked/unlocked by operating the keyless entry system transmitter, refer to Keyless Entry System (page 3-13).

**Locking, unlocking with transmitter (with retractable type key)**
All doors and the liftgate can be locked/unlocked by operating the keyless entry system transmitter, refer to Keyless Entry System (page 3-22).
Auto lock/unlock function

**WARNING**

*Do not pull the inner handle on a front door:*

Pulling an inner handle on a front door while the vehicle is moving is dangerous. Passengers can fall out of the vehicle if a front door accidentally opens, which could result in death or serious injury.

- When the vehicle speed exceeds 20 km/h (12 mph), all doors and the liftgate lock automatically.
- When the ignition is switched off, all doors and the liftgate unlock automatically.

These functions can also be disabled so that they do not operate.

Auto lock/unlock function setting change using door-lock switch

The doors and the liftgate can set to lock or unlock automatically by selecting any one of the functions from the following table and using the driver's door-lock switch on the interior to perform the setting change as indicated in the procedure which follows.

<table>
<thead>
<tr>
<th>Function number</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>The auto door-lock function is disabled.</td>
</tr>
<tr>
<td>2</td>
<td>All the doors and the liftgate lock automatically when the vehicle speed is about 20 km/h (12 mph) or more.</td>
</tr>
<tr>
<td>3</td>
<td>All the doors and the liftgate lock automatically when the vehicle speed is about 20 km/h (12 mph) or more. All the doors and the liftgate unlock when the ignition is switched from ON to ACC or Off.</td>
</tr>
<tr>
<td>4</td>
<td>When the ignition is switched ON and the shift lever is shifted from park (P) to any other gear position, all the doors and the liftgate lock automatically.</td>
</tr>
<tr>
<td>5</td>
<td>When the ignition is switched ON and the shift lever is shifted from park (P) to any other gear position, all the doors and the liftgate lock automatically. When the shift lever is shifted to park (P) while the ignition is switched ON, all the doors and the liftgate unlock automatically.</td>
</tr>
</tbody>
</table>

1. Stop the vehicle and close all the doors.
2. Switch the ignition ON.
3. Press and hold the lock side of the driver's door-lock switch within 10 seconds of switching the ignition ON, and make sure a beep sound is heard about eight seconds afterwards.
4. Referring to the auto lock/unlock function setting table, determine the function number for the desired setting and press the unlock side of the driver's door-lock switch only in the amount of the selected function number (Ex. If you select function 2, press the unlock side of the switch only 2 times).
**NOTE**
There are only a total of five auto lock/unlock settings available. Be sure to press the unlock side of the driver's door-lock switch the correct number of times according to the selected function number. If the switch is mistakenly pressed six times, the procedure will be invalidated. If this occurs, start the procedure from the beginning.

5. Three seconds after the function setting has been changed, a beep sound will beep in the amount of the selected function number.

**NOTE**
- The doors cannot be locked or unlocked while the setting function is being performed.
- The procedure can be cancelled by pressing the lock side of the driver's door-lock switch.

▼**Rear Door Child Safety Locks**
These locks are intended to help prevent children from accidentally opening the rear doors. Use them both whenever a child rides in the vehicle.

If you slide the child safety lock to the lock position before closing that door, the door cannot be opened from the inside. The door can be opened only by pulling the outside handle.

**Liftgate**

**WARNING**

Never allow a person to ride in the luggage compartment:
Allowing a person to ride in the luggage compartment is dangerous. The person in the luggage compartment could be seriously injured or killed during sudden braking or a collision.

Do not drive with the liftgate open:
Exhaust gas in the cabin of a vehicle is dangerous. An open liftgate in a moving vehicle will cause exhaust gas to be drawn into the cabin. This gas contains CO (carbon monoxide), which is colorless, odorless, and highly poisonous, and it can cause loss of consciousness and death. Moreover, an open liftgate could cause occupants to fall out in an accident.

**CAUTION**

Be careful not to apply excessive force to the damper stay on the liftgate such as by putting your hand on the stay. Otherwise, the damper stay may bend and affect the liftgate operation.

locking, Unlocking with Request Switch (with Advanced Key)

The liftgate can be locked/unlocked by operating the request switch while carrying the advanced key outside the vehicle, refer to Operations Using Advanced Keyless Functions (page 3-7).

locking, Unlocking with Transmitter (with Advanced Key)

The liftgate can be locked/unlocked by operating the keyless entry system transmitter, refer to Keyless Entry System (page 3-13).

locking, Unlocking with Transmitter (with Retractable Type Key)

The liftgate can be locked/unlocked by operating the keyless entry system transmitter, refer to Keyless Entry System (page 3-22).

3-33
Locking, Unlocking with Door-Lock Switch

The liftgate can be locked/unlocked by operating the door-lock switch, refer to Power Door Locks (page 3-29).

Opening and Closing the Liftgate

Manually opening the liftgate

### WARNING

Always fully open the liftgate when opening it:

- Raising the liftgate only partially is dangerous as it could drop unexpectedly resulting in injury.

Pull up on the handle.

---

**NOTE**

If the vehicle battery is dead or there is a malfunction in the electrical system and the liftgate cannot be unlocked, perform the following procedure as an emergency measure to unlock it:

1. Remove the cap on the interior surface of the liftgate with a flathead screwdriver.
2. **(With power liftgate)**
   Push the lifgate while pressing the lever down.

**Without power liftgate**
Turn the lever to the right to unlock the liftgate.

> **WARNING**
> Be sure to watch the power liftgate as it opens or closes, and make sure that it closes completely:
> Opening or closing the power liftgate while not watching it move is dangerous. Because of unseen obstacles and the jam-safe feature, a liftgate may not close completely and, if left unnoticed, could result in serious injury or death if an occupant were to fall out of the vehicle. Always be sure that the area around the liftgate is clear before activating it.

Always confirm the safety of the area around the power liftgate before operating it electrically.
Not checking the area around the liftgate for people before operating it using the power liftgate switch or the button on the keyless entry system is dangerous. A person could become caught between the liftgate and an obstruction while it is opening electrically or between the liftgate and vehicle while it is closing electrically, resulting in an accident and serious injury.

Always be sure the power liftgate completely closes before shifting into gear and driving the vehicle:
Shifting out of Park (P) while the liftgate is moving is dangerous. The liftgate will not close completely and this could result in serious injury or death if an occupant were to fall out of the vehicle. Occupants in the vehicle will also not have full protection in a collision.

---

**Manually closing the liftgate**
Use both hands to push the liftgate down until the lock snaps shut. Do not slam it. Pull up on the liftgate to make sure it is securely latched.

**Power Liftgate**

The power liftgate opens/closes electrically by operating switches in the vehicle or the buttons on the keyless entry system transmitter. Refer to Keyless Entry System on page 3-13.

---

*Some models.*
Never allow children to operate the power liftgate system:
Allowing children to operate the power liftgate switch and the keyless entry system is dangerous. Children are not aware of the dangers of people getting fingers and hands caught in a moving liftgate. If someone's neck, head or hands get caught in a closing door, it could result in death or serious injury.

CAUTION
- When closing the power liftgate, make sure there are no foreign objects around the striker. If foreign objects are obstructing the striker, the liftgate may not close properly.

- Do not install accessories to the power liftgate other than specified accessories. Otherwise, it cannot be opened/closed automatically and could result in a malfunction.

- Be careful when switching the power liftgate from electrical to manual operation. The power liftgate may open/close unexpectedly depending on its position which could result in injury.

NOTE
- Do not apply unnecessary force to the power liftgate when it is opening/closing electrically. Unnecessary force on the liftgate may cause it to reverse direction of movement automatically. Also, it could result in a malfunction.

- The power liftgate may not open/close electrically if the vehicle is parked on an incline, or there is strong wind, or the liftgate is laden with snow.

- The power liftgate will not operate unless it is unlocked. The power liftgate does not operate unless it is unlocked using the power door lock function. Refer to the Power Door Locks on page 3-29.

- If a power liftgate system fuse has blown, the liftgate cannot be opened using the power liftgate switch or the outer handle (liftgate). Use the emergency lever to open the liftgate.

- Fully close the power liftgate before disconnecting the vehicle battery. If the battery is disconnected with the liftgate open, it cannot be opened or closed automatically after the battery is reconnected.

- To restore the power liftgate functions, perform the following:
  1. Park on level ground.
  2. Fully close the liftgate manually.
  3. Unlock the liftgate and all the doors.
  4. Press the power liftgate switch or the power liftgate button on the keyless entry system transmitter to fully open the liftgate.
  5. Press the power liftgate switch or the power liftgate button on the keyless entry system transmitter again to fully close the liftgate.
Opening/Closing the power liftgate
If the vehicle has satisfied all the following operation conditions, the power liftgate can be opened using the power function.

Operation conditions
(1) The power liftgate is unlocked.
(2) The shift lever is in park (P) when the ignition is switched ON.

NOTE
- If condition (2) is not satisfied while the power liftgate is opening electrically, the beep sound will be heard and the liftgate will move in the reverse direction automatically.
- If condition (2) is not satisfied while the power liftgate is closing electrically, the beep sound will be heard and the liftgate continues closing.
- When condition (2) is satisfied, you can resume power liftgate open/close operation with the switches.
- When the ignition is switched ON, the transmitter does not operate.

Operation using the transmitter
Press the power liftgate button for one second or more with the power liftgate in the fully closed/open position. The hazard warning lights flash twice and the liftgate opens/closes after the beep sound is heard. Refer to Keyless Entry System on page 3-13.

Operation from the driver's seat (To open/close)
Press the power liftgate switch for about one second or more while the liftgate is in the fully closed/open position. The hazard warning lights flash twice and the liftgate opens/closes fully after the beep sound is heard.

Operation from outside (To close only)
Press the power liftgate close switch while the liftgate is fully opened. The hazard warning lights flash twice and the liftgate closes automatically after the beep sound is heard.
NOTE
If the power liftgate switch/power liftgate close switch/power liftgate button on the transmitter is pressed or the outside handle is operated while the liftgate is opening/closing electrically, the beep sound is heard and the liftgate moves in the reverse direction automatically. If this operation is repeated the system switches to manual operation.

Jam-safe equipment
While the power liftgate is opening/closing electrically and the system detects a person or an object in the liftgate's path, the liftgate will move in the reverse direction automatically.

WARNING
Always check the area around the power liftgate before opening/closing it:

- Not checking for occupants and objects around the power liftgate before opening/closing it is dangerous. The jam-safe equipment is designed to prevent jamming in the event an obstruction is in the liftgate's path. The system may not detect certain objects obstructing the liftgate depending on the way they are positioned and their shape. However, if the jam-safe function detects an obstruction and moves the liftgate in the reverse direction, an occupant in the liftgate's path could be seriously injured.

CAUTION
Sensors are installed on both ends of the power liftgate. Be careful not to allow the sensors to be scratched or damaged by sharp objects, otherwise the liftgate may no longer open/close automatically. In addition, if the sensor is damaged while the liftgate is closing automatically, the system changes to manual operation.

NOTE
The jam-safe equipment does not activate during easy closure operation when the power liftgate is between the near-shut position and fully closed position.

When the power liftgate is moving in the open/close direction and an obstruction is detected, the beep sound will be heard and the liftgate moves in the reverse direction.

NOTE
If the system repeatedly detects an object obstructing the power liftgate in the open/close direction several times, the beep sound will be heard and the system changes to manual operation.
Power liftgate drop prevention mechanism

The power liftgate drop prevention mechanism activates if the system detects weight such as that caused by a snow-laden liftgate when it is opened electrically. After the liftgate is fully opened, the beep sound will be heard and the liftgate closes automatically.

NOTE

• If the power liftgate is snow-laden, remove the snow before operating the liftgate.
• Trying to force the power liftgate closed manually immediately after it has fully opened automatically may activate the liftgate drop prevention mechanism. However, this does not indicate a malfunction.

Liftgate easy closure

The Easy Closure system automatically closes the liftgate completely from the near-shut position. This system also operates when the liftgate is closed manually.

WARNING

When closing a liftgate, always keep hands and fingers away from the liftgate:

Placing hands or fingers around a liftgate is dangerous because the liftgate closes automatically from the near-shut position, which could cause hands and fingers to be pinched and injured.

NOTE

• If the liftgate handle is pulled while the easy closure function is operating, the liftgate can be opened.
• If the liftgate is opened/closed repeatedly in a short period of time, the easy closure function may not operate. Wait for a while and then try again.
Power Windows

The ignition must be switched ON for the power windows to operate.

⚠️ WARNING

Make sure the opening is clear before closing a window:
Closing power windows are dangerous. A person’s hands, head, or even neck could be caught by the window and result in serious injury or even death.
This warning applies especially to children.

Always lock all passenger power windows with the power window lock switch on the driver’s side while children are in the vehicle, and never allow children to play with power window switches:
Leaving the power window switches unlocked while children are in the vehicle is dangerous. Power window switches that are not locked with the power window lock switch would allow children to operate power windows unintentionally which could result in serious injury if a child’s hands, head or neck becomes caught by the window.

▼ Operating the Front Power Windows

NOTE
- Each passenger power window can be operated with each door switch when the power window lock switch on the driver’s door is in the unlocked position (page 3-44).
- Each passenger power window can also be operated using the master control switches on the driver’s door.

Master control switches

![Diagram of Master control switches]

- The following functions can be performed for the front power windows using the power window master control switches on the driver’s door or front passenger's door switch.
  - Manual opening/closing
  - Auto-opening/closing
  - Two-step down function
**Normal opening/closing**
To open a power window to the desired position, lightly hold down the switch. To close the power window to the desired position, lightly pull up the switch.

**Master control switches**

**Auto-opening/closing**
To fully open a power window automatically, press the switch completely down. To fully close the power window automatically, pull the switch completely up.

To stop the power window partway, pull or press the switch in the opposite direction and then release it.

**Power window system initialization procedure**
If the battery was disconnected during vehicle maintenance, or for other reasons (such as a switch continues to be operated after the window is fully open/closed), the power windows will not fully open and close automatically. Resetting of the automatic function can be performed using the master control switches or the front passenger door switch. The power window auto function reset procedure can be done on one or both door switches. The power window auto function will only resume on the side that has been reset.

1. Switch the ignition ON.
2. Make sure that the power window lock switch located on the driver's door is not depressed.
3. Press the switch and fully open the power window.
4. Pull up the switch to fully close the power window and continue holding the switch for about 2 seconds after the window fully closes.
5. Repeat Steps 3-4 for each front power window.
6. Make sure that the power windows operate correctly using the door switches.

**Two-step down function**
With the power window completely closed, press the switch lightly and it will open and stop about 3 cm (1 in) from the top. If you continue to press and hold the switch, the window will resume opening all the way.
NOTE
Pressing the power window switch once when the window is fully closed will only open it about 3 cm (1 in) to allow convenient ventilation of the cabin.

Canceling the two-step down function
To cancel the two-step down function for the front power windows, carry out the following procedure using the master control switches.

1. Switch the ignition ON and complete the following procedure within 5 seconds:
   Press the power window switch 2 times firmly, then pull it 2 times firmly.

2. Switch the ignition off.

3. With the ignition off, and within 40 seconds, switch the ignition ON and complete the following procedure within 5 seconds:
   Press the power window switch 2 times firmly, then pull it 2 times firmly.

NOTE
- The two-step down function cannot be canceled if the procedure is not completed within the specified times, or the procedure is changed along the way. To redo the procedure, first switch the ignition off and proceed from the beginning.
- If you are unable to cancel the function despite carrying out the cancellation procedure, consult an Authorized Mazda Dealer.

Restoring the two-step down function
With the two-step down function in the canceled state, repeat the previous procedure for canceling the function on each door switch and it will be restored.

NOTE
If you are unable to restore the function despite doing the restore procedure, consult an Authorized Mazda Dealer.

Jam-safe window
If a person's hands, head or an object blocks the window during the manual closing operation or the auto-closing operation, the window will stop and open halfway.

WARNING
Make sure nothing blocks the window just before it reaches the fully closed position or while fully holding up the power window switch:
Blocking the power window just before it reaches the fully closed position or while fully holding up the power window switch is dangerous. In this case, the jam-safe function cannot prevent the window from closing all the way. If fingers are caught, serious injuries could occur.
NOTE
• Depending on driving conditions, a closing power window could stop and start opening when the window feels a shock that is similar to something blocking it. In the event the jam-safe function activates and the power window cannot be closed automatically, pull and hold the switch fully and the window will close.
• The jam-safe window function does not operate until the system is re-initialized.

Engine-off power window operation
The power window can be operated for about 40 seconds after the ignition is switched from ON to ACC or OFF with all doors closed. If any door is opened, the power window will stop operating.

NOTE
• For engine-off operation of the power window, the switch must be held up firmly throughout window closure because the auto-closing function will be inoperable.
• The two-step down function is inoperable during engine-off operation.

Operating the Rear Power Windows
The power windows may be operated when the power window lock switch on the driver's door is in the unlocked position.

The rear power windows may be opened or closed using the power window master control switches on the driver's door.

Master control switches

To open the power window to the desired position, hold down the switch.
To close the power window to the desired position, pull up the switch.
Knowing Your Mazda

Doors and Locks

**Engine-off power window operation**
The power windows can be operated for about 40 seconds after the ignition is switched from ON to ACC or OFF with all doors closed. If any door is opened, the power windows will be inoperable.

**Power Window Lock Switch**
With the lock switch in the unlocked position (button not depressed), all power windows on each door can be operated.

With the lock switch in the locked position (button depressed), only the driver's side power window can be operated.

**WARNING**
Unless a passenger needs to operate a power window, keep the power window lock switch in the locked position: Unintentional power window operation is dangerous. A person's hands, head, or neck could be caught by the window and result in serious injury.

**Opening/Closing the Power Windows and the Moonroof from Outside**
The front power windows and the moonroof can be opened or closed from outside the vehicle after the doors and the liftgate are closed.

The front power windows may be operated remotely when the power window lock switch on the driver's door is in the lock or unlocked position.

**WARNING**
Make sure the opening is clear before closing a window and the moonroof: Closing power windows and the moonroof are dangerous. A person's hands, head, or even neck could be caught by the window or the moonroof and result in serious injury or even death. This warning applies especially to children.

**NOTE**
- The power windows and the moonroof cannot be opened or closed from outside the vehicle under the following condition:
  - A door or the liftgate is opened.
  - The key is inserted into the ignition switch.
  - The ignition is in any position except OFF. (With advanced key)
- The power windows and the moonroof may not close completely. Make sure all the windows and the moonroof are closed.

If the power windows and the moonroof cannot be closed completely, operate each power window switch or the tilt/slide switch from inside the vehicle. After closing the windows and the moonroof from outside the vehicle, verify that they are completely closed.
Opening
Because nobody likes getting into a very hot car, Mazda has introduced a way to open the two front windows and the moonroof as you approach the vehicle to get the air moving before you get in.

⚠️ WARNING ⚠️
Use the remote auto-window and the auto-moonroof function only when you can see the vehicle and it is in a secure area:

Do not let children play with your keys. If they open the window and moonroof without your knowing, the open windows and moonroof are an even bigger invitation to a thief than leaving the doors unlocked.

The windows and moonroof can be opened for ventilating the cabin before getting in the vehicle.

With unlock button (Keyless entry system)
Press the unlock button on the transmitter once, then press again immediately and hold.
After the doors and the liftgate are unlocked, the two front windows and the moonroof open while the unlock button is pressed.
To stop the windows and the moonroof while opening, release the button.
If the operation is performed from the beginning again, the windows and the moonroof open.

Advanced key

Retractable type key

NOTE
- The unlock button does not operate unless it is pressed twice sequentially.
- The lock button cannot be used to close the power windows and the moonroof.

With key
1. Insert the key in the driver's door key cylinder.
Doors and Locks

2. Turn the key counterclockwise and hold until the windows and the moonroof are completely open. After the doors and the liftgate are unlocked, the windows and the moonroof fully open automatically.

To stop this operation, turn the key to the center position, then turn it counterclockwise again.

NOTE
The window and the moonroof opening operation also can be stopped by turning the key clockwise. However, the doors and the liftgate will lock.

Closing
The windows and the moonroof can be closed in case they are left open after getting out of the vehicle.

NOTE
(With advanced key)
If the auto-lock function (page 3-8) has been activated, the doors and the liftgate automatically lock as you walk away from the vehicle, however, the power windows and the moonroof cannot be closed. When leaving the vehicle, close the windows and the moonroof using the power window switch or the tilt or slide switch inside the vehicle, the key, or a request switch on the front door handles.

With key
1. Insert the key in the driver's door key cylinder.
2. Turn the key clockwise and hold until the windows and the moonroof are completely closed. After the doors and the liftgate are locked, the windows and the moonroof close as long as the key is turned.

With request switch on the driver's door (Advanced key)
1. If the doors and the liftgate are locked, unlock them.
2. Press and hold the request switch on the driver's door. After the doors and the liftgate are locked, the windows and the moonroof close as long as the request switch is pressed.

To stop the windows and the moonroof from closing, release the request switch. If the operation is performed from the beginning again, the windows and the moonroof close.

**Fuel-Filler Lid and Cap**

**WARNING**

When removing the fuel-filler cap, loosen the cap slightly and wait for any hissing to stop. Then remove it:
- Fuel spray is dangerous. Fuel can burn skin and eyes and cause illness if ingested. Fuel spray is released when there is pressure in the fuel tank and the fuel-filler cap is removed too quickly.

Before refueling, stop the engine, and always keep sparks and flames away from the filler neck:
- Fuel vapor is dangerous. It could be ignited by sparks or flames causing serious burns and injuries. Additionally, use of the incorrect fuel-filler cap or not using a fuel-filler cap may result in fuel leak, which could result in serious burns or death in an accident.

**CAUTION**

Always use only a genuine Mazda fuel-filler cap or an approved equivalent, available at an Authorized Mazda Dealer. The wrong cap can result in a serious malfunction of the fuel and emission control systems. It may also cause the check engine light in the instrument cluster to illuminate.
**Fuel-Filler Lid**

To open, pull the remote fuel-filler lid release.

**Fuel-Filler Cap**

To remove the fuel-filler cap, turn it counterclockwise.

To close the fuel-filler cap, turn it clockwise until two or more clicks are heard.

---

**CAUTION**

If the check fuel cap warning light illuminates, the fuel-filler cap may not be properly installed. If the warning light illuminates, park your vehicle safely off the right-of-way, remove the fuel-filler cap and reinstall it correctly. After the cap has been correctly installed, the fuel cap warning light may continue to illuminate until a number of driving cycles have been completed. A drive cycle consists of starting the engine (after four or more hours with the engine off) and driving the vehicle on city and highway roads. Continuing to drive with the check fuel cap warning light illuminated could cause the check engine light to illuminate as well.

**NOTE**

The removed cap can be attached to the inner side of the lid during refueling to prevent fuel on the cap from dripping onto the vehicle.
Hood

**WARNING**

Always check that the hood is closed and securely locked:

A hood that is not closed and securely locked is dangerous as it could fly open while the vehicle is moving and block the driver's vision which could result in a serious accident.

**Opening the Hood**

1. With the vehicle parked, pull the release handle to unlock the hood.

2. Insert your hand into the hood opening, slide the hood latch lever to the right, and lift the hood.

**Closing the Hood**

**WARNING**

Do not leave items in the engine compartment:

After you have finished checking or doing servicing in the engine compartment, do not forget and leave items such as tools or rags in the engine compartment. Tools or other items left in the engine compartment could cause engine damage or a fire leading to an unexpected accident.

1. Check under the hood area to make certain all filler caps are in place and all loose items (e.g. tools, oil containers, etc.) have been removed.

2. Insert the support rod into its clip while holding up the hood. Verify that the support rod is secured in the clip before closing the hood.

3. Close the hood so that it locks securely.
Knowing Your Mazda

Doors and Locks

Moonroof*

The moonroof can be opened or closed electrically only when the ignition is switched ON.

WARNING

Do not let passengers stand up or extend part of their body through the open moonroof while the vehicle is moving:

Extending the head, arms, or other parts of the body through the moonroof is dangerous. The head or arms could hit something while the vehicle is moving. This could cause serious injury or death.

Make sure the opening is clear before closing the moonroof:

A closing moonroof is dangerous. The hands, head, or even neck of a person—especially a child—could be caught in it as it closes, causing serious injury or death.

NOTE

Before washing your Mazda, make sure the moonroof is completely closed so that water does not get inside the cabin area. After washing your Mazda or after it rains, wipe the water off the moonroof before operating it to avoid water penetration which could cause rust and water damage to your headliner.

Operating the Moonroof

Tilt Operation

The rear of the moonroof can be tilted open to provide more ventilation.

To fully tilt automatically, momentarily press the tilt switch.

To fully close automatically, momentarily pull the tilt switch or press the front of the slide switch.

To stop tilting partway, press any part of the tilt or slide switch.

Slide Operation

To fully open automatically, momentarily press the rear of the slide switch.

To fully close automatically, momentarily press the front of the slide switch or pull the tilt switch.

Some models.
To stop sliding partway, press any part of the tilt or slide switch.

**Power moonroof re-set procedure**

If the battery had been disconnected during vehicle maintenance or for other reasons, the moonroof may not fully open or close. The moonroof's jam-safe function does not function while the moonroof is re-setting. Carry out the following procedure to resume operation:

1. Switch the ignition ON.
2. Press the tilt switch, to partially tilt open the rear of the moonroof.

**NOTE**

If the re-set procedure is performed while the moonroof is in the slide position (partially open) it closes before the rear tilts opens.

3. Repeat the procedure in Step 2. The rear of the moonroof tilts open to the fully open position, then closes a little.

**Engine-off Moonroof Operation**

The moonroof can be operated for about 40 seconds after the ignition is switched from ON to ACC or OFF with all doors closed. If any door is opened, the moonroof will be inoperable.

**Opening/Closing the Moonroof from Outside**

The moonroof can be opened or closed from outside the vehicle after the doors and the liftgate are closed. Refer to Opening/Closing the Power Windows and the Moonroof from the Outside on page 3-44.

**Jam-safe Moonroof**

If a person's hands, head or an object blocks the moonroof during closing operation, the moonroof will stop and open halfway.

**WARNING**

- Make sure nothing blocks the moonroof just before it reaches the fully closed position:
  - Blocking the moonroof just before it reaches the closed position is dangerous.
  - In this case, the jam-safe function cannot prevent the moonroof from stopping. If fingers are caught, serious injuries could occur.

**NOTE**

- Depending on driving conditions, a closing moonroof could stop and start opening when the moonroof feels a shock that is similar to something blocking it.
- The moonroof's jam-safe function does not function while the moonroof is initializing.
Knowing Your Mazda

Doors and Locks

▼ Sunshade

The sunshade can be opened and closed by hand.

The sunshade opens automatically when the moonroof is opened, but must be closed by hand.

![Sunshade](image)

**CAUTION**

- The sunshade does not tilt. To avoid damaging the sunshade, do not push up on it.
- Do not close the sunshade while the moonroof is opening. Trying to force the sunshade closed could damage it.
Immobilizer System (with Advanced Key)

The immobilizer system allows the engine to start only with an advanced key the system recognizes.

If someone attempts to start the engine with an unrecognized advanced key, the engine will not start, thereby helping to prevent the theft of your vehicle. If you have a problem with the immobilizer system or the advanced key (including auxiliary key), consult an Authorized Mazda Dealer.

**CAUTION**

- Radio equipment like this is governed by laws in the United States. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- To avoid damage to the key, do not:
  - Drop the key.
  - Get the key wet.
  - Expose the key to any kind of magnetic field.
  - Expose the key to high temperatures on places such as the dashboard or hood, under direct sunlight.

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not allow the following when starting the engine with the auxiliary key due to an advanced key dead battery or other malfunction. Otherwise the signal from the auxiliary key will not be received correctly and the engine may not start.</td>
</tr>
<tr>
<td>➢ A key ring rests on the key grip.</td>
</tr>
<tr>
<td>➢ Metal parts of other keys or metal objects touch the auxiliary key grip.</td>
</tr>
<tr>
<td>➢ Spare auxiliary keys or keys for other vehicles equipped with an immobilizer system touch or come near the auxiliary key.</td>
</tr>
<tr>
<td>➢ Devices for electronic purchases, or security passage which touch or come near the auxiliary key.</td>
</tr>
</tbody>
</table>
NOTE

- The advanced keys (including auxiliary key) carry a unique electronic code. For this reason, and to assure your safety, obtaining a replacement advanced key (including auxiliary key) requires some waiting time. They are only available through an Authorized Mazda Dealer.
- Always keep a spare advanced key in case one is lost. If an advanced key is lost, consult an Authorized Mazda Dealer as soon as possible.
- If you lose an advanced key (including auxiliary key), an Authorized Mazda Dealer will reset the electronic codes of your remaining advanced keys (including auxiliary keys) and immobilizer system. Bring all the remaining advanced keys (including auxiliary keys) to an Authorized Mazda Dealer to reset. Starting the vehicle with a key that has not been reset is not possible.

Security System

▼ Operation

Arming
The system is armed when the ignition is switched from ON to ACC or OFF. The security indicator light in the instrument cluster flashes every 2 seconds until the system is disarmed.

Disarming
The system is disarmed when the ignition is switched ON with the registered advanced key. The security indicator light illuminates for about 3 seconds and goes out.

If the engine does not start with the correct advanced key, and the security indicator light keeps illuminating or flashing, the system may have a malfunction. Consult an Authorized Mazda Dealer.

NOTE
• The engine may not start and the security indicator light may illuminate or flash if the advanced key is placed in an area where it is difficult for the system to detect the signal, such as on the dashboard, or in the glove box. Move the advanced key to another place, switch the ignition off, and then restart the engine.
• Signals from a TV or radio station, or from a transceiver or a mobile telephone could interfere with your immobilizer system. If you are using the proper advanced key and the engine fails to start, check the security indicator light. If the indicator light is flashing, switch the ignition to ACC or switch the ignition off and wait for a while, then restart the engine. If it does not start after 3 or more tries, contact an Authorized Mazda Dealer.
• If the security indicator light flashes continuously while you are driving, do not shut off the engine. Go to an Authorized Mazda Dealer and have it checked. If the engine is shut off while the indicator light is flashing, you will not be able to restart it.
• Since the electronic codes are reset when repairing the immobilizer system, the advanced key (including auxiliary key) are needed. Bring all the advanced keys (including auxiliary keys) to an Authorized Mazda Dealer.
Modification and Add-On Equipment

Mazda cannot guarantee the immobilizer system's operation if the system has been modified or if any add-on equipment has been installed.

⚠️ CAUTION

To avoid damage to your vehicle, do not modify the system or install any add-on equipment to the immobilizer system or the vehicle.

Immobilizer System (without Advanced Key)

The immobilizer system allows the engine to start only with a key the system recognizes.

If someone attempts to start the engine with an unrecognized key, the engine will not start, thereby helping to prevent the theft of your vehicle.

If you have a problem with the immobilizer system or the key, consult an Authorized Mazda Dealer.

⚠️ CAUTION

- Radio equipment like this is governed by laws in the United States. Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
- To avoid damage to the key, do not:
  - Drop the key.
  - Get the key wet.
  - Expose the key to any kind of magnetic field.
  - Expose the key to high temperatures on places such as the dashboard or hood, under direct sunlight.
CAUTION

When starting the engine do not allow the following, as the engine may not start due to the electronic signal from the ignition key not being transmitted correctly.

- A key ring rests on the key grip.

- Metal parts of other keys or metal objects touch the key grip.

- Spare keys or keys for other vehicles equipped with an immobilizer system touch or come near the key grip.

- Devices for electronic purchases, or security passage which touch or come near the key.

NOTE

- The keys carry a unique electronic code. For this reason, and to assure your safety, obtaining a replacement key requires some waiting time. They are only available through an Authorized Mazda Dealer.

- Always keep a spare key, in case one is lost. If a key is lost, contact an Authorized Mazda Dealer as soon as possible.

- If you lose a key, an Authorized Mazda Dealer will reset the electronic codes of your remaining keys and immobilizer system. Bring all the remaining keys to an Authorized Mazda Dealer to reset. Starting the vehicle with a key that has not been reset is not possible.
Declaration of Conformity

Immobilizer system

(U.S.A)

FCC WARNING

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Note

*This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

(CANADA)

This device complies with RSS-210 of Industry CANADA. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

(MEXICO)

Este equipo opera a título secundario, consecuentemente, debe aceptar interferencias perjudiciales incluyendo equipos de la misma clase y puede no causar interferencias a sistemas operando a título primario

Knowing Your Mazda

Security System

▼Operation

Arming
The system is armed when the ignition is switched from ON to ACC or OFF. The security indicator light in the instrument cluster flashes every two seconds until the system is disarmed.

Disarming
The system is disarmed when the ignition is switched ON with the correct ignition key. The security indicator light illuminates for about three seconds and goes out.

If the engine does not start with the correct ignition key, and the security indicator light keeps illuminating or flashing, the system may have a malfunction. Consult an Authorized Mazda Dealer.

NOTE
• If the security indicator light illuminates and stays on or flashes when the ignition is switched ON, the engine will not start.
• Signals from a TV or radio station, or from a transceiver or a mobile telephone, could interfere with your immobilizer system. If you are using the proper key and your engine fails to start, check the security indicator light. If it is flashing, remove the ignition key and wait 2 seconds or more, then reinsert it and try starting the engine again. If it does not start after 3 or more tries, contact an Authorized Mazda Dealer.
• If the security indicator light flashes continuously while you are driving, do not shut off the engine. Go to an Authorized Mazda Dealer and have it checked. If you shut off the engine while the light is flashing you will not be able to restart it.
• Since the electronic codes are reset when repairing the immobilizer system, the keys are needed. Bring all the existing keys to an Authorized Mazda Dealer.

▼Modification and Add-On Equipment

Mazda cannot guarantee the immobilizer system's operation if the system has been modified or if any add-on equipment has been installed.

CAUTION
To avoid damage to your vehicle, do not modify the system or install any add-on equipment to the immobilizer system or the vehicle.
Theft-Deterrent System

If the theft deterrent system detects an inappropriate entry into the vehicle, which could result in the vehicle or its contents being stolen, the alarm alerts the surrounding area of an abnormality by sounding the horn and flashing the hazard warning lights.

Refer to Operation on page 3-61.

NOTE
- The theft-deterrent system operates with the advanced keyless function, keyless entry system or the auxiliary key. The system operates only when the driver is in the vehicle or within operational range while the advanced key is being carried.
- The system will not function unless it is properly armed. To properly secure the vehicle, always make sure all windows are completely closed and all doors and the liftgate are locked before leaving the vehicle. Remember to take your advanced key.

▼ Operation

What turns it on:
- Forcing open a door, the hood or the liftgate.
- Opening a door or the hood by operating an inside door-lock knob or the hood release handle.

What it does:
- The horn sounds intermittently and the hazard warning lights flash.
- The alarm continues for about 30 seconds, then stops.

If the system is triggered again, the lights and horn will activate until a door or the liftgate is unlocked with the key or with the transmitter.

NOTE
If the battery goes dead while the theft-deterrent system is armed, the horn will activate and the hazard warning lights will flash when the battery is charged or replaced.

▼ How to Arm the System

1. Close the windows and the moonroof* securely.
2. Remove the key from the ignition switch.
   (With advanced key) Switch the ignition off with the start knob.
3. Make sure all windows, the moonroof*, the hood are closed. Close and lock all doors and the liftgate from the outside using the key or press the lock button on your keyless entry system transmitter.
   The hazard warning lights will flash once to indicate that the system is armed.
   The following method will also arm the theft-deterrent system:
   (With advanced key) Press a request switch or the lock button on the transmitter.
   (Without advanced key) Close the hood and the liftgate. Press the area on the door-lock switch marked “ ” once. Close all doors.

The theft deterrent system can also be armed by activating the auto re-lock function with all the doors, the liftgate and the hood closed.

4. After 20 seconds, the system is fully armed.

*Some models.
Knowing Your Mazda

Security System

NOTE

- **Auto re-lock function**

  After unlocking with the transmitter or the request switch, all doors and the liftgate will automatically lock and the hazard warning lights will flash if any of the following operations are not performed within about 30 seconds.
  - A door or the liftgate is opened.
  - The auxiliary key inserted into the ignition switch (with advanced key).
  - The key is inserted in the ignition switch.
  - The start knob is pushed (with advanced key).

- The system will disarm if one of the following operations takes place within 20 seconds after closing the hood and locking all the doors and the liftgate:
  - Pressing the unlock button on the transmitter.
  - Any door or the liftgate is opened.
  - Unlocking a door with the inside door-lock knob.
  - Unlocking a door with the door lock switch.
  - Unlocking the driver’s door with the key.
  - The hood is opened.
  - The key is inserted in the ignition switch.
  - The auxiliary key inserted into the ignition switch (With advanced key).
  - The start knob is pressed into the ignition switch or a request switch is pressed (With advanced key).
  - The ignition is switched ON.

To rearm the system, do the arming procedure again.

- **When the doors are locked by pressing the lock button on the transmitter or request switch on the front doors or using the key while the theft-deterrent system is armed, the hazard warning lights will flash once to indicate that the system is armed.**

▼ **To Turn off an Armed System**

An armed system can be turned off by any one of the following methods:
- Unlock a door with the key.
- Press the unlock button on the keyless entry system transmitter.
- Insert the key into the ignition switch and switch the ignition ON.
- **(With advanced key)**
  - Press a request switch or the unlock button on the transmitter.
  - Switch the ignition ON with the start knob.

The hazard warning lights will flash twice to indicate that the system is turned off.

**NOTE**

When the doors are unlocked by pressing the unlock button on the transmitter or request switch on the front doors or using the key while the theft-deterrent system is turned off, the hazard warning lights will flash twice to indicate that the system is turned off.

▼ **To Stop an Alarm**

A triggered alarm can be turned off by any one of the following methods:
- Unlock a door or the liftgate with the key.
- Press the unlock button on the keyless entry system transmitter.
- The engine is started with the ignition key.
- **(With advanced key)**
  - Press a request switch.
  - Press the unlock button on the transmitter.
  - The engine is started with the start knob.
NOTE
If you have any problem with the theft-deterrent system, consult an Authorized Mazda Dealer.

▼Theft-Deterrent Labels

A label indicating that your vehicle is equipped with a Theft-Deterrent System is in the glove compartment.

Mazda recommends that you affix it to the lower rear corner of a front door window.
Steering Wheel and Mirrors

Steering Wheel

**WARNING**

*Never adjust the steering wheel while the vehicle is moving:*

*Adjusting the steering wheel while the vehicle is moving is dangerous. Moving it can very easily cause the driver to abruptly turn to the left or right. This can lead to loss of control or an accident.*

**Steering Wheel Adjustment**

To change the angle or length of the steering wheel:

1. Stop the vehicle, pull down the lock release lever under the steering column.

2. Tilt the steering wheel and/or adjust the steering column length to the desired positions, push the lever up to lock the column.

3. Push the wheel up and down to be certain it's locked before driving.

Mirrors

**Outside Mirrors**

Check the mirror angles before driving.

**Mirror type**

The mirror combination (flat or convex) installed on the driver and front passenger sides varies depending on the vehicle models.

- **Flat type**
  - Flat surface mirror.
- **Convex type**
  - The mirror has single curvature on its surface.

**WARNING**

*Be sure to look over your shoulder before changing lanes:*

*Changing lanes without taking into account the actual distance of the vehicle in the convex mirror is dangerous. You could have a serious accident. What you see in the convex mirror is closer than it appears.*

**Power mirror**

The ignition must be switched to ACC or ON.

To adjust:

1. Press the left or right side of the selector switch to choose the left or right side mirror.
2. Depress the mirror switch in the appropriate direction.

After adjusting the mirror, lock the control by placing the selector switch in the center position.

**Folding the mirror**

Fold the outside mirror rearward until it is flush with the vehicle.

**WARNING**

Always return the outside mirrors to the driving position before you start driving:

Driving with the outside mirrors folded in is dangerous. Your rear view will be restricted, and you could have an accident.

### Rearview Mirror

**WARNING**

Do not stack cargo or objects higher than the seatbacks:

Cargo stacked higher than the seatbacks is dangerous. It can block your view in the rearview mirror, which might cause you to hit another car when changing lanes.

**Rearview mirror adjustment**

Before driving, adjust the rearview mirror to center on the scene through the rear window.

**Manual day/night mirror**

**Auto-dimming mirror**
Knowing Your Mazda

Steering Wheel and Mirrors

**NOTE**
For the manual day/night mirror, perform the adjustment with the day/night lever in the day position.

**Reducing glare from headlights**

**Manual day/night mirror**
Push the day/night lever forward for day driving. Pull it back to reduce glare of headlights from cars at the rear.

![Day/Night lever](Day_Night_lever.png)

**Auto-dimming mirror**
The auto-dimming mirror automatically reduces glare of headlights from cars at the rear when the ignition is switched ON.

Press the OFF button (○) to cancel the automatic dimming function. The indicator light will turn off.
To reactivate the automatic dimming function, press the ON button (1). The indicator light will illuminate.

![Auto-dimming mirror](Auto_dimming_mirror.png)
**NOTE**

- Do not use glass cleaner or suspend objects on or around the light sensor. Otherwise, light sensor sensitivity will be affected and may not operate normally.

- For information regarding the 3 buttons (↑, ↓, ◀️) on the auto-dimming mirror, refer to HomeLink Wireless Control System (page 5-76).
- The auto-dimmer function is canceled when the ignition is switched ON and the shift lever/selector lever is in reverse (R).

Fuel Requirements

Vehicles with catalytic converters or oxygen sensors must use ONLY UNLEADED FUEL, which will reduce exhaust emissions and keep spark plug fouling to a minimum.

Fuel with a lower rating could cause the emission control system to lose effectiveness. It could also cause engine knocking and serious engine damage.

Your Mazda will perform best with fuel listed in the table.

<table>
<thead>
<tr>
<th>Fuel</th>
<th>Octane Rating <em>(Anti-knock index)</em></th>
</tr>
</thead>
<tbody>
<tr>
<td>Regular unleaded fuel</td>
<td>87 [(R+M)/2 method] or above (91 RON or above)</td>
</tr>
</tbody>
</table>

* U.S. federal law requires that octane ratings be posted on gasoline station pumps.

Fuel with a rating lower than 87 octane (91 RON) could cause the emission control system to lose effectiveness. It could also cause engine knocking and serious engine damage.

**CAUTION**

- **USE ONLY UNLEADED FUEL.** Lead fuel is harmful to the catalytic converter and oxygen sensors and will lead to deterioration of the emission control system and or failures.
- **Your vehicle can only use oxygenated fuels containing no more than 10% ethanol by volume.** Damage to your vehicle may occur when ethanol exceeds this recommendation, or if the gasoline contains any methanol. Stop using gasohol of any kind if your vehicle engine is performing poorly.
- **Never add fuel system additives. Otherwise, the emission control system could be damaged. Consult an Authorized Mazda Dealer for details.**

Gasoline blended with oxygenates such as alcohol or ether compounds are generally referred to as oxygenated fuels. The common gasoline blend that can be used with your vehicle is ethanol blended at no more than 10%. Gasoline containing alcohol, such as ethanol or methanol, may be marketed under the name “Gasohol”.

Vehicle damage and drivability problems resulting from the use of the following may not be covered by the Mazda warranty.
- Gasohol containing more than 10% ethanol.
- Gasoline or gasohol containing methanol.
- Leaded fuel or leaded gasohol.
Emission Control System

Your vehicle is equipped with an emission control system (the catalytic converter is part of this system) that enables your vehicle to comply with existing exhaust emissions requirements.

⚠️ WARNING

Never park over or near anything flammable:

Parking over or near anything flammable, such as dry grass, is dangerous. Even with the engine turned off, the exhaust system remains very hot after normal use and could ignite anything flammable. A resulting fire could cause serious injury or death.

⚠️ CAUTION

Ignoring the following precautions could cause lead to accumulate on the catalyst inside the converter or cause the converter to get very hot. Either condition will damage the converter and cause poor performance.

- Use only unleaded fuel.
- Do not drive your Mazda with any sign of engine malfunction.
- Do not coast with the ignition switched off.
- Do not descend steep grades in gear with the ignition switched off.
- Do not operate the engine at high idle for more than 5 minutes.
- Do not tamper with the emission control system. All inspections and adjustments must be made by a qualified technician.
- Do not push-start or pull-start your vehicle.

NOTE

Under U.S. federal law, any modification to the original-equipment emission control system before the first sale and registration of a vehicle is subject to penalties. In some states, such modification made on a used vehicle is also subject to penalties.
Fuel and Engine Exhaust Precautions

**Engine Exhaust (Carbon Monoxide)**

**WARNING**

**Do not drive your vehicle if you smell exhaust gas inside the vehicle:**
Engine exhaust gas is dangerous. This gas contains carbon monoxide (CO), which is colorless, odorless, and poisonous. When inhaled, it can cause loss of consciousness and death. If you smell exhaust gas inside your vehicle, keep all windows fully open and contact an Authorized Mazda Dealer immediately.

**Do not run the engine when inside an enclosed area:**
Running the engine inside an enclosed area, such as a garage, is dangerous. Exhaust gas, which contains poisonous carbon monoxide, could easily enter the cabin. Loss of consciousness or even death could occur.

**Open the windows or adjust the heating or cooling system to draw fresh air when idling the engine:**
Exhaust gas is dangerous. When your vehicle is stopped with the windows closed and the engine running for a long time even in an open area, exhaust gas, which contains poisonous carbon monoxide, could enter the cabin. Loss of consciousness or even death could occur.

**Clear snow from underneath and around your vehicle, particularly the tail pipe, before starting the engine:**
Running the engine when a vehicle is stopped in deep snow is dangerous. The exhaust pipe could be blocked by the snow, allowing exhaust gas to enter the cabin. Because exhaust gas contains poisonous carbon monoxide, it could cause loss of consciousness or even death to occupants in the cabin.
### Before Getting In

- Be sure the windows, outside mirrors, and outside lights are clean.
- Inspect inflation pressures and condition of tires.
- Look under the vehicle for any sign of fluid leaks.
- If you plan to back up, make sure nothing is in your way.

**NOTE**

*Engine oil, engine coolant, brake fluid, washer fluid, and other fluid levels should be inspected. See Maintenance, Section 8.*

### After Getting In

- Are all doors closed and locked?
- Is the seat adjusted properly?
- Are the inside and outside mirrors adjusted?
- Is the steering wheel adjusted properly?
- Is everyone's seat belt fastened?
- Check all gauges.
- Check all warning lights when the ignition is switched ON.
- Release the parking brake and make sure the brake warning light goes off.

Always be thoroughly familiar with your Mazda.
### Break-In Period

No special break-in is necessary, but a few precautions in the first 1,000 km (600 miles) may add to the performance, economy, and life of your Mazda.

- Do not race the engine.
- Do not maintain one constant speed, either slow or fast, for a long period of time.
- Do not drive constantly at full-throttle or high engine rpm for extended periods of time.
- Avoid unnecessary hard stops.
- Avoid full-throttle starts.
- Do not tow a trailer.

### Money-Saving Suggestions

How you operate your Mazda determines how far it will travel on a tank of fuel. Use these suggestions to help save money on fuel and repairs.

- Avoid long warm-ups. Once the engine runs smoothly, begin driving.
- Avoid fast starts.
- Keep the engine tuned. Follow the maintenance schedule (page 8-3) and have an Authorized Mazda Dealer perform inspections and servicing.
- Use the air conditioner only when necessary.
- Slow down on rough roads.
- Keep the tires properly inflated.
- Do not carry unnecessary weight.
- Do not rest your foot on the brake pedal while driving.
- Keep the wheels in correct alignment.
- Keep windows closed at high speeds.
- Slow down when driving in crosswinds and headwinds.

#### **WARNING**

*Never stop the engine when going down a hill:*

> Stopping the engine when going down a hill is dangerous. This causes the loss of power steering and power brake control, and may cause damage to the drivetrain. Any loss of steering or braking control could cause an accident.*
Hazardous Driving

Driving on Slippery Surface

WARNING

Be extremely careful if it is necessary to downshift on slippery surfaces:
Downshifting into lower gear while driving on slippery surfaces is dangerous. The sudden change in tire speed could cause the tires to skid. This could lead to loss of vehicle control and an accident.

Do not rely on ABS or RSC as a substitute for safe driving:
The ABS and RSC cannot compensate for unsafe and reckless driving, excessive speed, tailgating (following another vehicle too closely), driving on ice and snow, and hydroplaning (reduced tire friction and road contact because of water on the road surface). You can still have an accident.

When driving on ice or in water, snow, mud, sand, or similar hazards:
• Be cautious and allow extra distance for braking.
• Avoid sudden braking and sudden maneuvering.
• Do not pump the brakes. Continue to press down on the brake pedal.
• If you get stuck, select a lower gear and accelerate slowly. Do not spin the front wheels.
• Do not perform abrupt maneuvers when the road surface changes (such as from a paved road to gravel) because the reaction of the vehicle against the driving operation changes.

• For more traction in starting on slippery surfaces such as ice or packed snow, use sand, rock salt, chains, carpeting, or other nonslip material under the front wheels.

NOTE
Use snow chains only on the front wheels.
Before Driving Your Mazda

Driving Tips

▼ Roll-over

⚠️ WARNING

Avoid sharp turns, excessive speed and abrupt maneuvers when driving this vehicle:

Sharp turns, excessive speed and abrupt maneuvering of this vehicle is dangerous as it could result in the increased risk of loss of vehicle control, vehicle roll-over, personal injury or death.

This vehicle has a higher center of gravity. Vehicles with a higher center of gravity such as utility and AWD vehicles handle differently than vehicles with a lower center of gravity.

Utility and AWD vehicles are not designed for cornering at high speeds any more than low profile sports cars are designed to perform satisfactorily under off-road conditions. In addition, utility vehicles have a significantly higher rollover rate than other types of vehicles.

RSC might help if you get into trouble, but then it might not be able to allow you to fully recover, always drive carefully with the vehicle's height in mind.

Drive carefully when the vehicle is loaded by lowering vehicle speed and applying the brakes earlier:

Abrupt maneuvering and sudden braking when driving a loaded vehicle is dangerous as the driving behavior of a vehicle with a high center of gravity is different when it is loaded compared to when it is not, and could result in the loss of vehicle control and an accident.

▼ Emergency Maneuvering

⚠️ WARNING

Do not perform abrupt maneuvers when driving the vehicle in an emergency situation:

Performing abrupt maneuvers even when driving in an emergency situation is dangerous as it could reduce vehicle stability and operability resulting in an accident.

Operate the accelerator pedal, brake pedal, and the steering wheel smoothly.
**Floor Mat**

**WARNING**

Make sure the floor mats are hooked on the retention pins to prevent them from bunching up under the foot pedals:

Using a floor mat that is not secured is dangerous as it will interfere with the accelerator and brake pedal operation, which could result in an accident.

Do not install two floor mats, one on top of the other, on the driver's side:

Installing two floor mats, one on top of the other, on the driver's side is dangerous as the retention pins can only keep one floor mat from sliding forward.

In using a heavy duty floor mat for winter use always remove the original floor mat.

Loose floor mat(s) will interfere with the foot pedal and could result in an accident.

When setting a floor mat, position the floor mat so that its eyelets are inserted over the pointed end of the retention posts.

**Rocking the Vehicle**

**WARNING**

Do not spin the wheels at more than 56 km/h (35 mph), and do not allow anyone to stand behind a wheel when pushing the vehicle:

When the vehicle is stuck, spinning the wheels at high speed is dangerous. The spinning tire could overheat and explode. This could cause serious injuries.

**CAUTION**

Too much rocking may cause engine overheating, transaxle failure, and tire damage.

If you must rock the vehicle to free it from snow, sand or mud, depress the accelerator slightly and slowly move the shift lever from D to R.
Winter Driving

- Carry emergency gear, including tire chains, window scraper, a small shovel, jumper cables, and a small bag of sand or salt.

Ask an Authorized Mazda Dealer to perform the following precautions:
- Have the proper ratio of antifreeze in the radiator. Refer to Engine Coolant on page 8-21.
- Inspect the battery and its cables. Cold reduces battery capacity.
- Inspect the ignition system for damage and loose connections.
- Use washer fluid made with antifreeze—but do not use engine coolant antifreeze for washer fluid (page 8-24).
- Do not apply excessive force to a window scraper when removing ice or frozen snow on the mirror glass and windshield.
- Never use warm or hot water for removing snow or ice from windows and mirrors as it could result in the glass cracking.
- Braking performance can be adversely affected if snow or ice adheres to the brake equipment. If this situation occurs, drive the vehicle slowly, releasing the accelerator pedal and lightly applying the brakes several times until the brake performance returns to normal.

Snow Tires

Use snow tires on all four wheels

Do not go faster than 120 km/h (75 mph) while driving with snow tires. Inflate snow tires 30 kPa (0.3 kgf/cm², 4.3 psi) more than recommended on the tire pressure label (driver's door frame), but never more than the maximum cold-tire pressure shown on the tires.

Except 18-inch tires

Your vehicle is originally equipped with all season radials designed to be used all year around. In some extreme climates you may find it necessary to replace them with snow tires during the winter months to further improve traction on snow and ice covered roads.

WARNING

Use only the same size and type tires (snow, radial, or non-radial) on all four wheels:

Using tires different in size or type is dangerous. Your vehicle’s handling could be greatly affected and result in an accident.

CAUTION

Check local regulations before using studded tires.

NOTE

If your vehicle is equipped with the tire pressure monitoring system, the system may not function correctly when using tires with steel wire reinforcement in the sidewalls (page 5-32).
\section{Tire Chains}

Check local regulations before using tire chains.

\begin{itemize}
  \item \textbf{CAUTION}
  \begin{itemize}
    \item Chains may affect handling.
    \item Do not go faster than 50 km/h (30 mph) or the chain manufacturer’s recommended limit, whichever is lower.
    \item Drive carefully and avoid bumps, holes, and sharp turns.
    \item Avoid locked-wheel braking.
    \item Do not use chains on a temporary spare tire; it may result in damage to the vehicle and to the tire.
    \item Do not use chains on roads that are free of snow or ice. The tires and chains could be damaged.
    \item Chains may scratch or chip aluminum wheels.
  \end{itemize}
\end{itemize}

\begin{itemize}
  \item \textbf{NOTE}
    \begin{itemize}
      \item Use of tire chains on a vehicle equipped with P245/50R20 specification tires could cause interference with the vehicle body and scratching. If tire chains are to be used, replace both front and rear tires with P245/60R18 tires. Please consult an Authorized Mazda Dealer.
      \item If your vehicle is equipped with the tire pressure monitoring system, the system may not function correctly when using tire chains.
    \end{itemize}
\end{itemize}

Install the chains on the front tires.
Do not use chains on the rear tires.
Please consult an Authorized Mazda Dealer.
Driving In Flooded Area

**WARNING**

Dry wet brakes by driving very slowly and applying the brakes lightly until brake performance returns to normal:

- Driving with wet brakes is dangerous. Increased stopping distance or the vehicle pulling to one side when braking could result in a serious accident. Light braking will indicate whether the brakes have been affected.

**CAUTION**

Do not drive the vehicle on flooded roads as it could cause short circuiting of electrical/electronic parts, or engine damage or stalling from water absorption. If the vehicle has been immersed in water, consult an Authorized Mazda Dealer.

Overloading

**WARNING**

Be careful not to overload your vehicle:

- The gross axle weight rating (GAWR) and the gross vehicle weight rating (GVWR) of your vehicle are on the Motor Vehicle Safety Standard Label on the driver's door frame. Exceeding these ratings can cause an accident or vehicle damage. You can estimate the weight of your load by weighing the items (or people) before putting them in the vehicle.
Driving on Uneven Road

Your vehicle's suspension and underbody can be damaged if driven on rough/uneven roads or over speed bumps at excessive speeds. Use care and reduce speed when traveling on rough/uneven roads or over speed bumps.

Use care not to damage the vehicle's underbody, bumpers or muffler(s) when driving under the following conditions:
- Ascending or descending a slope with a sharp transition angle
- Ascending or descending a driveway or trailer ramp with a sharp transition angle

Your vehicle is equipped with low profile tires allowing class-leading performance and handling. As a result, the sidewall of the tires are very thin and the tires and wheels can be damaged if driven through potholes or on rough/uneven roads at excessive speeds. Use care and reduce speed when traveling on rough/uneven roads or through potholes.
Towing

Before Driving Your Mazda

Trailer Towing (Except Mexico)

Your Mazda was designed and built primarily to carry passengers and cargo. If you tow a trailer, follow these instructions because driver and passenger safety depends on proper equipment and safe driving habits. Towing a trailer will affect handling, braking, durability, performance, and economy. Never overload vehicle or trailer. Consult an Authorized Mazda Dealer if you need further details.

⚠️ CAUTION

Do not tow a trailer during the first 1,000 km (600 miles) of your new Mazda. If you do, you may damage the engine, transaxle, differential, wheel bearings, and other power train components.

▼ Weight Limits

TTW and GCWR

The total trailer weight (TTW), gross combination weight rating (GCWR), gross axle weight rating (GAWR), trailer load, and trailer tongue load must be within the prescribed limits.

- The total trailer weight (TTW) is the sum of the weights of the trailer load (trailer weight plus cargo), trailer hitch, vehicle passengers, and vehicle load. Never allow the total trailer weight (TTW) to exceed specifications in the Trailer Towing-Load Table.
- The maximum GCWR is the combination weight of the trailer and load plus the towing vehicle (including trailer hitch, vehicle passengers, and load). It must not exceed specifications in the load table.

GAWR and GVWR

Do not exceed front and rear GAWR (gross axle weight rating) and GVWR (gross vehicle weight rating). If you do, vehicle handling, braking, and performance will be affected. These values are also on the Motor Vehicle Safety Certification Label posted on the driver's door frame.
High-altitude operation

In a high-altitude operating environment, a gasoline engine loses power at a rate of 3% to 4% per 304 m (1,000 ft) of elevation. In these conditions, a reduction in gross vehicle weight and gross combination weight is recommended.

TRAILER TOWING-LOAD TABLE

Because vehicle weights vary, adjustments must be made to meet the requirements in this table.

<table>
<thead>
<tr>
<th>Item</th>
<th>Without Towing Package</th>
<th>With Towing Package</th>
</tr>
</thead>
<tbody>
<tr>

*2 2WD

*3 AWD

---

**WARNING**

Always keep tow loads within specified limits as indicated in the Trailer Towing-Load Table:

Attempting to tow loads greater than those specified is dangerous as it may cause serious handling and performance problems that could result in personal injury or vehicle damage, or both.

Load your trailer with the weight about 60 % toward the front and 40 % toward the rear:

Loading the trailer with more weight in the rear than in the front is dangerous. Doing so could cause you to lose control. The trailer tongue load must be 10 %—15 % of the total trailer load (sum of the weights of the trailer and cargo).

Always have the total trailer weight and tongue load determined prior to departure:

Attempting to tow loads without determining the total trailer weight and tongue load is dangerous. Trailer sway from crosswinds, rough roads or other causes could result in loss of control and a serious accident.

---

**CAUTION**

The total trailer weight and tongue load can be determined by weighing the trailer on platform scales at a highway weight station or a trucking company.

**Trailer Hitch**

Use only a hitch ball recommended by the trailer manufacturer that conforms to the gross trailer weight requirement.

When not towing a trailer, remove the trailer hitch (if detachable) to reduce the possibility of damage as a result of the vehicle being rear-ended.
WARNING

Always make sure the trailer hitch is securely attached before departure:
An unsecured trailer hitch is dangerous as it causes greater trailer sway from crosswinds, rough roads or other causes, resulting in loss of control and a serious accident.
Examine all trailer-hitch mounting bolts regularly and tighten any that are loose. If the hitch is removed, seal any open mounting holes to prevent exhaust, dust, water, dirt and other foreign elements from filtering in, possibly endangering personal safety and damaging your vehicle.
Do not install a hitch that stiffens the bumper as it will reduce the bumper’s performance.

Make sure there are no exhaust gas leaks into the passenger compartment if any mounting bolts are connected to the body:
Modifying your vehicle exhaust system is dangerous. Exhaust gas entering the vehicle could cause loss of consciousness or even death.
When mounting the trailer hitch, make no modifications to the vehicle exhaust system.

CAUTION

➢ Make all hitch adjustments with actual loads. Do not load and unload vehicle while adjusting hitch. This action will change the vehicle height.
➢ Do not use an axle-mounted hitch. This may damage the axle and related parts.

▼ Tires

When towing a trailer, make sure all tires are inflated to the recommended cold-tire pressure, as indicated on the tire pressure chart on the driver’s door frame. Trailer tire size, load rating, and inflation pressures should conform to tire manufacturer specifications.

WARNING

Never use the temporary spare tire when towing:
Using the temporary spare tire on your vehicle when towing a trailer is dangerous as it could result in tire failure, loss of control, and injury to vehicle occupants.
Before Driving Your Mazda

Towing

▼ Safety Chains

Safety chains must be used as a precautionary measure should the trailer become unintentionally unhitched. They should cross under the trailer tongue and attach to the hitch. Leave enough slack to allow full turns. Consult literature published by your trailer or hitch manufacturer for more details.

⚠️ WARNING

Make sure the safety chain is securely attached to both the trailer and the vehicle prior to departure:

Towing a trailer without using a safety chain securely attached to both the trailer and the vehicle is dangerous. If damage occurs to the coupling unit or hitch ball, the trailer could wander into another lane and cause a collision.

▼ Trailer Lights

Trailer lights must comply with all federal, state, and local regulations. Equip your trailer as required before towing it day or night.

⚠️ CAUTION

Do not connect a trailer lighting system directly to the lighting system of your Mazda. This may damage your vehicle’s electrical system and lighting systems. Have a recreational vehicle dealer or trailer rental agency connect the system, and inspect the brake lights and turn signals yourself before each trip.

▼ Trailer Brakes

If the total trailer weight exceeds 450 kg (1,000 lb), trailer brakes are required. If your trailer has brakes, make sure they comply with all federal, state, and local regulations.

⚠️ WARNING

Do not connect a hydraulic trailer-brake system to your vehicle’s brake system:

Connecting a hydraulic trailer-brake system directly to the vehicle brake system is dangerous and will result in inadequate braking and possible injury.

▼ Trailer Towing Tips

- Verify that your Mazda maintains a near-normal attitude when a loaded or unloaded trailer is connected. Do not drive if it has an abnormal front-up or front-down position. Inspect for incorrect tongue load, worn suspension parts, and trailer overloading.
- Make sure the trailer is properly loaded and the cargo is secure to prevent it from shifting.
- Make sure the mirrors conform to all government regulations. If they do not, install required rear view mirrors appropriate for towing purposes.

4-18
The three main causes of vehicle-trailer accidents are driver error, excessive speed, and improper trailer loading.

**Before driving**
- Have your cooling and braking system checked by an Authorized Mazda Dealer.
- Before starting out, inspect the operation of all vehicle and trailer lights and all vehicle-to-trailer connections. Stop and re-inspect all lights and connections after driving a short distance.

**Driving**
- Your Mazda will handle differently with a trailer in tow, so practice turning, backing, and stopping in a traffic-free area.
- Take time to get accustomed to the extra weight and length.
- Allow more room between your vehicle and the one in front because braking distance increases with a trailer. For each 16 km/h (10 mph) of speed, allow at least one vehicle and trailer length between your Mazda and the vehicle ahead.
- Avoid jerky starts or sudden acceleration.
- Avoid sudden braking. It may cause loss of control and result in jackknifing, especially so on wet or slippery roads.
- Shift the shift lever to the D position when towing a trailer in hilly terrain or when heavily loaded.

The D position will allow operating the vehicle without frequent shifting.

**Lane changes and turning**
Avoid quick lane changes, sudden turns, and tight turns. Slow down before turning to avoid the need of sudden braking.
A turning trailer will make a tighter arc than the tow vehicle. Compensate with turns that are larger than normal.

**Passing**
Plan well ahead to pass other vehicles, and provide plenty of room before changing lanes. Crosswinds from passing vehicles, especially larger ones, and the effects of rough roads will affect handling.
If swaying occurs, firmly grip the steering wheel and reduce speed immediately, but gradually.
Steer straight ahead. If no extreme correction of steering or braking is made, the combination of less speed and firm steering will result in stability.

**Backing up**
Backing a vehicle with a trailer requires practice and patience. Back slowly, and have a helper outside at the rear of the trailer to reduce the risk of an accident.
To turn the trailer, place your hand at the bottom of the steering wheel and turn it in the direction you want the trailer to go. Make only slight movements to prevent sharp or prolonged turning.
**Towing**

**Ascending a hill**
Shift into a lower gear to reduce the possibility of overloading or overheating the engine, or both.

**Descending a hill**
Shift into a lower gear and use engine compression as a braking effect.

**WARNING**

*Always use lower gears to reduce speed:*

_Holding the brake pedal down too long or too frequently is dangerous as it could cause the brakes to overheat and lose power, resulting in loss of control and a serious accident. Use lower gears to help reduce speed. Pull off the road and allow brakes to cool down whenever braking performance feels reduced._

**Overheated engine**
The extra weight of the trailer may strain the engine on hot days and on long or steep upgrades.
If the temperature gauge indicates overheating, turn off the air conditioner, drive safely to the side of the road, park off the right-of-way and wait for engine to cool. Refer to Overheating (page 7-16).

**Parking**
Always make sure the tires of the trailer and the tow vehicle are blocked while parked. Apply the parking brake firmly and put the transaxle in P.

_Avoid parking on an incline, but if you must, follow these instructions:_

1. Depress and hold down the brake pedal.
2. Have a helper put wheel blocks against the downhill side of all vehicle and trailer tires.
3. Then release the brake pedal slowly until the blocks bear the load.
   - If the grade is downhill, turn the steering wheel so that the front of the front tires face the curb.
   - If it is uphill, face the rear of the front tires against the curb.
4. Firmly apply the parking brake.
5. Shift the transaxle into P, and stop the engine.

_To restart after parking on an incline:_

1. With the transaxle in P, start the engine. (Be sure to depress and hold the brake pedal.)
2. Shift into gear.
Before Driving Your Mazda

**Towing**

3. Release the parking brake (also the foot brake) and pull away from the wheel blocks. Stop; apply the parking brake and shift into P.

4. Have a helper retrieve the wheel blocks.

**Fuel consumption**

Trailering causes higher fuel consumption.

**Maintenance**

If you tow a trailer frequently, have your vehicle serviced as shown in Scheduled Maintenance (page 8-3).

Driving Your Mazda

Starting and Driving

Ignition Switch

Auxiliary key (with advanced key)

**NOTE**
When starting the engine using the advanced key, refer to Starting the Engine (page 3-10).

When starting the engine with the auxiliary key, perform the following procedure.

1. Remove the auxiliary key from the advanced key (page 3-17).
2. Make sure the start knob is in OFF/LOCK position.
3. Remove the start knob by pulling it outward while pressing the buttons on both the left and right sides.
4. Insert the auxiliary key in the ignition switch.

**Ignition Switch Positions**

The engraved mark (LOCK) indicated in the illustration may differ from that indicated on the actual vehicle (it may read OFF).

**OFF/LOCK**
The power supply to electrical devices is turned off. Only in this position can the key be removed.
WARNING

Remove the key only when the vehicle is parked (with steering lock mechanism):

Removing the key from the ignition switch while the vehicle is moving is dangerous. Removing the key allows the steering wheel to lock. You will lose steering control and a serious accident could occur. (For vehicles equipped with the advanced key, the steering wheel locks when the starter knob is turned to the OFF/LOCK position.)

Before leaving the driver’s seat, always switch the ignition to OFF/LOCK, set the parking brake and make sure the shift lever is in P:

It is important to switch the ignition to OFF/LOCK even if you are not removing the key from the ignition or leaving the vehicle. Leaving the key in other positions will disable some of the vehicle security systems and run the battery down. Leaving the driver’s seat without switching the ignition to OFF/LOCK, setting the parking brake and shifting the shift lever to P is dangerous. Unexpected vehicle movement could occur. This could cause an accident.

NOTE

If turning the key is difficult, jiggle the steering wheel from side to side. Leaving the key or start knob in any position but the OFF/LOCK position also disables some of the security features and may run the battery down.

ACC (Accessory)

In this position, some electrical accessories will operate.

ON

This is the normal running position after the engine is started. Some indicator lights/warning lights should be inspected before the engine is started (page 5-44).

NOTE

When the ignition is switched ON, the sound of the fuel pump motor operating near the fuel tank can be heard. This does not indicate an abnormality.

NOTE

Vibration of the brake pedal may be felt when the ignition is switched ON, however, this is a normal operation of the DSC/RSC and does not indicate an abnormality.

START

The engine is started in this position. It will crank until you release the key. It then returns to the ON position.

▼ Ignition Key Reminder

If the ignition is switched off or the ignition is switched to ACC with the key inserted, a continuous beep sound will be heard when the driver’s door is opened.
Starting the Engine

NOTE
Engine-starting is controlled by the spark ignition system. This system meets all Canadian Interference-Causing Equipment Standard requirements regulating the impulse electrical field strength of radio noise.

1. Occupants should fasten their seat belts.
2. Make sure the parking brake is on.
3. Depress the brake pedal.
4. Put the vehicle in park (P). If you must restart the engine while the vehicle is moving, shift into neutral (N).

NOTE
The starter will not operate if the shift lever is not in P or N.

5. Switch the ignition to START and hold (up to 10 seconds at a time) until the engine starts.

CAUTION
Do not try the starter for more than 10 seconds at a time. If the engine stalls or fails to start, wait 10 seconds before trying again. Otherwise, you may damage the starter and drain the battery.

6. After starting the engine, let it idle for about 10 seconds.

NOTE
- In extremely cold weather or after the vehicle has not been driven in several days, let the engine warm up without operating the accelerator.
- Whether the engine is cold or warm, it should be started without use of the accelerator.
Turning the Engine Off

1. Stop the vehicle completely.
2. Shift the shift lever to the P position.
3. Switch the ignition from ON to OFF/LOCK.

⚠️ WARNING
Do not stop the engine while the vehicle is moving:

Stopping the engine while the vehicle is moving for any reason other than in an emergency is dangerous. Stopping the engine while the vehicle is moving will result in reduced maneuverability and braking ability due to the loss of power steering and power braking, which could cause an accident and serious injury.

⚠️ CAUTION
When leaving the vehicle, make sure the ignition is switched off.

Brake System

▼ Foot Brake

Your Mazda has power-assisted brakes that adjust automatically through normal use.

Should power-assist fail, you can stop by applying greater force than normal to the brake pedal. But the distance required to stop will be greater than usual.
WARNING
Do not coast with the engine stalled or turned off, find a safe place to stop:
Coasting with the engine stalled or turned off is dangerous. Braking will require more effort, and the brake's power-assist could be depleted if you pump the brake. This will cause longer stopping distances or even an accident.

Shift to a lower gear when going down steep hills:
Driving with your foot continuously on the brake pedal or steadily applying the brakes for long distances is dangerous. This causes overheated brakes, resulting in longer stopping distances or even total brake failure. This could cause loss of vehicle control and a serious accident. Avoid continuous application of the brakes.

Dry off brakes that have become wet by driving slowly, releasing the accelerator pedal and lightly applying the brakes several times until the brake performance returns to normal:
Driving with wet brakes is dangerous. Increased stopping distance or the vehicle pulling to one side when braking could result in a serious accident. Light braking will indicate whether the brakes have been affected.

CAUTION
➢ Do not drive with your foot held on the clutch pedal or brake pedal, or hold the clutch pedal depressed halfway unnecessarily. Doing so could result in the following:
➢ The clutch and brake parts will wear out more quickly.
➢ The brakes can overheat and adversely affect brake performance.
➢ Always depress the brake pedal with the right foot. Applying the brakes with the unaccustomed left foot could slow your reaction time to an emergency situation resulting in insufficient braking operation.

➢ Wear shoes appropriate for driving in order to avoid your shoe contacting the brake pedal when depressing the accelerator pedal.
\section*{Parking Brake}

\begin{itemize}
  \item \textbf{WARNING}
  
  \textit{Before leaving the driver’s seat, always switch the ignition to OFF/LOCK, set the parking brake and make sure the shift lever is in P:}
  
  It is important to switch the ignition to OFF/LOCK even if you are not removing the key from the ignition or leaving the vehicle. Leaving the key in other positions will disable some of the vehicle security systems and run the battery down. Leaving the driver’s seat without switching the ignition to OFF/LOCK, setting the parking brake and shifting the shift lever to P is dangerous. Unexpected vehicle movement could occur. This could cause an accident.

  \item \textbf{CAUTION}
  
  \textit{Driving with the parking brake on will cause excessive wear of the brake linings or pads.}

\end{itemize}

\textbf{NOTE}

For parking in snow, refer to Winter Driving (page 4-10) regarding parking brake use.

\begin{itemize}
  \item \textbf{Setting the parking brake}
  
  Depress the brake pedal, then depress the parking brake pedal fully.

  \item \textbf{Releasing the parking brake}
  
  Depress the brake pedal, then depress the parking brake pedal until it releases. Gradually let up on the parking brake pedal.

\end{itemize}

\textbf{NOTE}

Release the parking brake pedal once before trying to reapply it.
Brake System Warning Light

This warning has the following functions:

Parking brake warning
The light illuminates when the parking brake is applied with the ignition switched to START or ON. It turns off when the parking brake is fully released.

Low brake fluid level warning
If the light stays on after the parking brake is fully released, you may have a brake problem.

Drive to the side of the road and park off the right-of-way.

You may notice that the pedal is harder to depress or that it may go closer to the floor. In either case, it will take longer to stop the vehicle.

1. With the engine stopped, open the hood and check the brake fluid level immediately, and then add fluid if required (page 8-23).

2. After adding fluid, check the light again.

If the warning light remains on, or if the brakes do not operate properly, do not drive the vehicle. Have it towed to an Authorized Mazda Dealer.

Even if the light turns off have your brake system inspected as soon as possible by an Authorized Mazda Dealer.

NOTE
Having to add brake fluid is sometimes an indicator of leakage. Consult an Authorized Mazda Dealer as soon as possible even if the brake light is no longer illuminated.

WARNING
Do not drive with the brake system warning light illuminated. Contact an Authorized Mazda Dealer to have the brakes inspected as soon as possible:

Driving with the brake system warning light illuminated is dangerous. It indicates that your brakes may not work at all or that they could completely fail at any time. If this light remains illuminated, after checking that the parking brake is fully released, have the brakes inspected immediately.

Parking Brake Reminder
If the parking brake has not been completely released and the vehicle is driven at about 5 km/h (3 mph) or faster, a continuous beep sound will be heard to notify the driver that the parking brake has not been released.

Anti-Lock Brake System (ABS)
The ABS control unit continuously monitors the speed of each wheel. If one is about to lock up, the ABS responds by automatically releasing and reapplying that wheel's brake.

The driver will feel a slight vibration in the brake pedal and may hear a chattering noise from the brake system. This is normal when the ABS operates. Continue to depress the brake pedal without pumping the brakes.
WARNING
Do not rely on ABS or RSC as a substitute for safe driving:
The ABS and RSC cannot compensate for unsafe and reckless driving, excessive speed, tailgating (following another vehicle too closely), driving on ice and snow, and hydroplaning (reduced tire friction and road contact because of water on the road surface). You can still have an accident.

NOTE
- Braking distances may be longer on loose surfaces (snow or gravel, for example) which usually have a hard foundation. A vehicle with a normal braking system may require less distance to stop under these conditions because the tires will build up a wedge of surface layer when the wheels skid.
- The sound of the ABS operating may be heard when starting the engine or immediately after starting the vehicle. However, it does not indicate a malfunction.

ABS Warning Light

The warning light stays on for a few seconds when the ignition is switched ON.

Driving Your Mazda
Starting and Driving

If the ABS warning light stays on while you're driving, the ABS control unit has detected a system malfunction. If this occurs, your brakes will function normally as if the vehicle had no ABS. Should this happen, consult an Authorized Mazda Dealer as soon as possible.

NOTE
When the engine is jump-started to charge the battery, uneven rpm occurs and the ABS warning light may illuminate. If this occurs, it is the result of the weak battery and does not indicate an ABS malfunction. Recharge the battery.

Electronic Brake Force Distribution System Warning

If the electronic brake force distribution control unit determines that some components are operating incorrectly, the control unit may illuminate the brake system warning light and the ABS warning light on simultaneously. The problem is likely to be the electronic brake force distribution system.
Driving Your Mazda
Starting and Driving

⚠️ WARNING
Do not drive with both the ABS warning light and brake warning light illuminated. Have the vehicle towed to an Authorized Mazda Dealer to have the brakes inspected as soon as possible:

Driving when the brake system warning light and ABS warning light are illuminated simultaneously is dangerous. When both lights are illuminated, the rear wheels could lock more quickly in an emergency stop than under normal circumstances.

▼ Brake Assist
During emergency braking situations when it is necessary to depress the brake pedal with greater force, the brake assist system provides braking assistance, thus enhancing braking performance.

When the brake pedal is depressed hard or depressed more quickly, the brakes apply more firmly.

NOTE
- When the brake pedal is depressed hard or depressed more quickly, the pedal will feel softer but the brakes will apply more firmly. This is a normal effect of the brake assist operation and does not indicate an abnormality.
- When the brake pedal is depressed hard or depressed more quickly, a motor/pump operation noise may be heard. This is a normal effect of the brake assist and does not indicate an abnormality.
- The brake assist equipment does not supersede the functionality of the vehicle's main braking system.

▼ Brake Pad Wear Indicator
When the disc brake pads become worn, the built-in wear indicators contact the disc plates. This causes a loud screeching noise to warn that the pads should be replaced.

When you hear this noise, consult an Authorized Mazda Dealer as soon as possible.

⚠️ WARNING
Do not drive with worn disc pads: Driving with worn disc pads is dangerous. The brakes could fail and cause a serious accident. As soon as you hear a screeching noise consult an Authorized Mazda Dealer.
Various Lockouts:

- Indicates that you must depress the brake pedal to shift (The ignition must be switched to ACC or ON).
- Indicates the shift lever can be shifted freely into any position.

**NOTE**

The Sport AT has an option that is not included in the traditional automatic transaxle giving the driver the option of selecting each gear instead of leaving it to the transaxle to shift gears. Even if you intend to use the automatic transaxle functions as a traditional automatic, you should also be aware that you can inadvertently shift into manual shift mode and an inappropriate gear may be retained as the vehicle speed increases. If you notice the engine speed going higher or hear the engine racing, confirm you have not accidentally slipped into manual shift mode (page 5-13).
Driving Your Mazda

Starting and Driving

Transaxle Ranges

The shift lever must be in P or N to operate the starter.

P (Park)

P locks the transaxle and prevents the front wheels from rotating.

**WARNING**

Always set the shift lever to P and set the parking brake:

- Only setting the shift lever to the P position without using the parking brake to hold the vehicle is dangerous. If P fails to hold, the vehicle could move and cause an accident.

**CAUTION**

- Shifting into P, N or R while the vehicle is moving can damage your transaxle.
- Shifting into a driving gear or reverse when the engine is running faster than idle can damage the transaxle.

R (Reverse)

In position R, the vehicle moves only backward. You must be at a complete stop before shifting to or from R, except under rare circumstances as explained in Rocking the Vehicle (page 4-9).

N (Neutral)

In N, the wheels and transaxle are not locked. The vehicle will roll freely even on the slightest incline unless the parking brake or brakes are on.

**WARNING**

If the engine is running faster than idle, do not shift from N or P into a driving gear:

- It’s dangerous to shift from N or P into a driving gear when the engine is running faster than idle. If this is done, the vehicle could move suddenly, causing an accident or serious injury.

Do not shift into N when driving the vehicle:

- Shifting into N while driving is dangerous. Engine braking cannot be applied when decelerating which could lead to an accident or serious injury.

**CAUTION**

Do not shift into N when driving the vehicle. Doing so can cause transaxle damage.

NOTE

Apply the parking brake or depress the brake pedal before moving the shift lever from N to prevent the vehicle from moving unexpectedly.

D (Drive)

D is the normal driving position. From a stop, the transaxle will automatically shift through a 6-gear sequence.

M (Manual)

M is the manual shift mode position. Gears can be shifted up or down by operating the shift lever. Refer to Manual Shift Mode (page 5-13).
Active Adaptive Shift (AAS)

Active Adaptive Shift (AAS) automatically controls the transaxle shift points to best suit the road conditions and driver input. This optimizes engine performance and improves driving comfort. When cornering the vehicle, AAS mode will hold the transaxle in the gear the vehicle was in before entering the curve, allowing the vehicle to be accelerated from the same gear after exiting the curve.

If the driver accelerates rapidly, or accelerates and decelerates rapidly by operating the accelerator and brake pedal for a certain period of time while the selector lever is in the D position, AAS mode could activate. When this occurs, AAS mode will maintain the transaxle in the optimum gear and the driver may sense that the transaxle is not shifting, however this does not indicate an abnormality.

Shift-Lock System

The shift-lock system prevents shifting out of P unless the brake pedal is depressed.

To shift from P:

1. Depress and hold the brake pedal.
2. Start the engine.
3. Move the shift lever.

Manual Shift Mode

This mode gives you the feel of driving a manual transaxle vehicle by operating the shift lever and allows you to control engine rpm and torque to the drive wheels much like a manual transaxle when more control is desired.

To change to manual shift mode, shift the lever from D to M.

NOTE
Changing to manual shift mode while driving will not damage the transaxle.

To return to automatic shift mode, shift the lever from M to D.
Starting and Driving

**NOTE**
- If you change to manual shift mode when the vehicle is stopped, the gear will shift to M1.
- If you change to manual shift mode without depressing the accelerator pedal when driving in D range, 5th gear, the gear will shift to M4.
- If you change to manual shift mode without depressing the accelerator pedal when driving in D range, 6th gear, the gear will shift to M5.

**Indicators**

**Shift position indicator**
In manual shift mode, the “M” of the shift position indicator in the instrument panel illuminates.

**Gear position indicator**
The numeral for the selected gear illuminates.

**NOTE**
- When driving slowly, the gears may not shift up.
- In manual shift mode, gears do not shift up automatically. Do not run the engine with the tachometer needle in the RED ZONE. If the tachometer needle enters the RED ZONE, you may feel engine-braking because the fuel delivery will be stopped to protect the engine. However, this does not indicate an abnormality.
- When depressing the accelerator fully, the transaxle will shift to a lower gear, depending on vehicle speed.

**Shifting**

**Manually Shifting up**
(M1 → M2 → M3 → M4 → M5 → M6)
To shift up to a higher gear, tap the shift lever back (+) once.

**NOTE**
- If the gears cannot be shifted down when driving at higher speeds, the gear position indicator will flash twice to signal that the gears cannot be shifted down (to protect the transaxle).
Manually Shifting down
(M6 → M5 → M4 → M3 → M2 → M1)
To shift down to a lower gear, tap the shift lever forward (←) once.

WARNING
Do not use engine braking on slippery road surfaces or at high speeds:
Shifting down while driving on wet, snowy, or frozen roads, or while driving at high speeds causes sudden engine braking, which is dangerous. The sudden change in tire speed could cause the tires to skid. This could lead to loss of vehicle control and an accident.

NOTE
- When driving at high speeds, the gear may not shift down depending on vehicle speed.
- During deceleration, the gear may automatically shift down depending on vehicle speed.
- When depressing the accelerator fully, the transaxle will shift to a lower gear, depending on vehicle speed.

Second gear fixed mode
When the shift lever is tapped back (↑) while the vehicle is stopped, the transaxle is set in the second gear fixed mode. The gear is fixed in second while in this mode for easier starting and driving on slippery roads. If the shift lever is tapped back (↑) or forward (←) while in the second gear fixed mode, the mode will be canceled.

Shifting specification

Shifting up
If the vehicle speed is lower than the speed specified for each gear, the gear cannot be shifted up to a higher gear.

<table>
<thead>
<tr>
<th>Gear</th>
<th>Vehicle speed</th>
</tr>
</thead>
<tbody>
<tr>
<td>M1 → M2</td>
<td>You can shift up to M2 whether the vehicle is stopped or moving.</td>
</tr>
<tr>
<td>M2 → M3</td>
<td>15 km/h (10 mph)</td>
</tr>
<tr>
<td>M3 → M4</td>
<td>29 km/h (19 mph)</td>
</tr>
<tr>
<td>M4 → M5</td>
<td>40 km/h (25 mph)</td>
</tr>
<tr>
<td>M5 → M6</td>
<td>50 km/h (32 mph)</td>
</tr>
</tbody>
</table>

Shifting down
If the vehicle speed is higher than the speed specified for each gear, the gear cannot be shifted to a lower gear so as to protect the transaxle.

<table>
<thead>
<tr>
<th>Gear</th>
<th>Vehicle speed</th>
</tr>
</thead>
<tbody>
<tr>
<td>M6 → M5</td>
<td>230 km/h (142 mph)</td>
</tr>
<tr>
<td>M5 → M4</td>
<td>201 km/h (124 mph)</td>
</tr>
<tr>
<td>M4 → M3</td>
<td>150 km/h (93 mph)</td>
</tr>
<tr>
<td>M3 → M2</td>
<td>96 km/h (59 mph)</td>
</tr>
<tr>
<td>M2 → M1</td>
<td>49 km/h (30 mph)</td>
</tr>
</tbody>
</table>

NOTE
Regarding the vehicle speed at the highest gear indicated above, achieving this speed may not actually be possible depending on various driving conditions such as the wind, upslope, and road surface.
Starting and Driving

During deceleration, the gears shift down automatically when speed is reduced to the following:

<table>
<thead>
<tr>
<th>Gear</th>
<th>Vehicle speed</th>
</tr>
</thead>
<tbody>
<tr>
<td>M6 → M5</td>
<td>47 km/h (29 mph)</td>
</tr>
<tr>
<td>M5 → M4</td>
<td>37 km/h (22 mph)</td>
</tr>
<tr>
<td>M4 → M3</td>
<td>26 km/h (16 mph)</td>
</tr>
<tr>
<td>M3 or M2 → M1</td>
<td>7 km/h (4 mph)</td>
</tr>
</tbody>
</table>

**NOTE**
The gear does not shift down to M1 automatically while in the second gear fixed mode.

If the vehicle is kicked down at the following speeds or lower, the gears shift down automatically:

<table>
<thead>
<tr>
<th>Gear</th>
<th>Vehicle speed</th>
</tr>
</thead>
<tbody>
<tr>
<td>M6 → M5</td>
<td>230 km/h (142 mph)</td>
</tr>
<tr>
<td>M5 → M4</td>
<td>90 km/h (55 mph)</td>
</tr>
<tr>
<td>M4 → M3</td>
<td>65 km/h (40 mph)</td>
</tr>
<tr>
<td>M3 → M2</td>
<td>40 km/h (24 mph)</td>
</tr>
</tbody>
</table>

**Recommended for shifting**

**Upshifting**

For normal acceleration and cruising, we recommend these shift points.

<table>
<thead>
<tr>
<th>Gear</th>
<th>Vehicle speed</th>
</tr>
</thead>
<tbody>
<tr>
<td>M1 to M2</td>
<td>24 km/h (15 mph)</td>
</tr>
<tr>
<td>M2 to M3</td>
<td>40 km/h (25 mph)</td>
</tr>
<tr>
<td>M3 to M4</td>
<td>65 km/h (40 mph)</td>
</tr>
<tr>
<td>M4 to M5</td>
<td>73 km/h (45 mph)</td>
</tr>
<tr>
<td>M5 to M6</td>
<td>80 km/h (50 mph)</td>
</tr>
</tbody>
</table>

**Downshifting**

When you must slow down in heavy traffic or on a steep upgrade, downshift before the engine starts to overwork. This gives better acceleration when you need more speed.

On a steep **downgrade**, downshifting helps maintain safe speed and prolongs brake life.

**Driving Tips**

**WARNING**

Do not allow the vehicle to move in reverse on an up-slope while the selector lever is in a forward gear position, or move forward on a down-slope while the selector lever is in the reverse position.

Otherwise, the engine will stop, causing the loss of the power brake and power steering functions, and make it difficult to control the vehicle which could result in an accident.

**Passing**

For extra power when passing another vehicle or climbing steep grades, depress the accelerator fully. The transaxle will shift to a lower gear, depending on vehicle speed.

**Climbing steep grades from a stop**

To climb a steep grade from a stopped position:

1. Depress the brake pedal.
2. Shift to D or M1, depending on the load weight and grade steepness.
3. Release the brake pedal while gradually accelerating.

**Descending steep grades**

When descending a steep grade, shift to lower gears, depending on load weight and grade steepness. Descend slowly, using the brakes only occasionally to prevent them from overheating.
Power Steering

Power steering is only operable when the engine is running. If the engine is off or if the power steering system is inoperable, you can still steer, but it requires more physical effort.

If the steering feels stiffer than usual during normal driving, consult an Authorized Mazda Dealer.

⚠️ CAUTION

*Never hold the steering wheel to the extreme left or right for more than 5 seconds with the engine running. This could damage the power steering system.*

All-Wheel Drive (AWD) Operation*

AWD provides excellent driveability on snow-covered and ice-packed roads, sand and mud, as well as on steep slopes and other slippery surfaces.

*Some models.*
Driving Your Mazda

Starting and Driving

▼ AWD Driving

\textbf{WARNING}

Avoid sharp turns, excessive speed and abrupt maneuvers when driving this vehicle:

Sharp turns, excessive speed and abrupt maneuvering of this vehicle is dangerous as it could result in the increased risk of loss of vehicle control, vehicle roll-over, personal injury or death.

This vehicle has a higher center of gravity. Vehicles with a higher center of gravity such as utility and AWD vehicles handle differently than vehicles with a lower center of gravity.

Utility and AWD vehicles are not designed for cornering at high speeds any more than low profile sports cars are designed to perform satisfactorily under off-road conditions. In addition, utility vehicles have a significantly higher rollover rate than other types of vehicles.

RSC might help if you get into trouble, but then it might not be able to allow you to fully recover, always drive carefully with the vehicle's height in mind.

Drive carefully when the vehicle is loaded by lowering vehicle speed and applying the brakes earlier:

Abrupt maneuvering and sudden braking when driving a loaded vehicle is dangerous as the driving behavior of a vehicle with a high center of gravity is different when it is loaded compared to when it is not, and could result in the loss of vehicle control and an accident.

▼ AWD Warning Light

This warning light stays on for a few seconds when the ignition is switched ON.

Thereafter, the warning light will illuminate or flash under the following conditions:

- Illuminates when there is an abnormality with the AWD system.
- Flashes when the differential oil temperature is abnormally high.
- Flashes when there are continually large differences between front and rear wheel rotation, such as when trying to pull away from an icy surface, or when trying to extricate the vehicle from mud, sand or similar conditions.

\textbf{If the AWD warning light illuminates:}

If the AWD warning light illuminates, contact an Authorized Mazda Dealer.

\textbf{If the AWD warning light flashes:}

Park the vehicle in a safe place. After a few moments, if the warning light stops flashing, you can resume driving. If the light does not stop flashing, contact an Authorized Mazda Dealer.
WARNING

Never spin a wheel that is off the ground:
Spinning a wheel that is off the ground as a result of the vehicle being stuck or in a ditch is dangerous. The drive assembly could be seriously damaged which could lead to an accident or could even lead to overheating, oil leakage, and a fire.

▼ Tires and Tire Chains

The condition of the tires plays a large role in the performance of the vehicle. Moreover, to prevent adverse effects to the drive assembly, please note the following:

Tires
• When replacing tires, always replace all front and rear tires at the same time.
• All tires must be of the same size, manufacture, brand and tread pattern. Pay particular attention when equipping snow or other types of winter tires.
• Do not mix tread-worn tires with normal tires.
• Inspect tire inflation pressures at the specified periods and adjust to the specified pressures.

NOTE
Check the tire inflation pressure label attached to driver’s door frame for the correct tire inflation pressure.

• Make sure to equip the vehicle with genuine wheels of the specified size, on all wheels. With AWD, the system is calibrated for all four wheels being of the same dimensions.

Tire chains
• Install tire chains to the front tires.
• Do not use tire chains on the rear wheels.
• Do not drive the vehicle faster than 30 km/h (19 mph) with the tire chains installed.
• Do not drive the vehicle with tire chains on road conditions other than snow or ice.

▼ Towing

If the vehicle requires towing, have it towed with all four wheels completely off the ground (page 7-21).
Cruise Control

With cruise control, you can set and automatically maintain any speed of more than about 30 km/h (19 mph).

**WARNING**

*Do not use the cruise control under the following conditions:*
- Hilly terrain
- Steep inclines
- Heavy or unsteady traffic
- Slippery or winding roads
- Similar restrictions that require inconsistent speed

**Cruise Main Indicator Light (Amber)/Cruise Set Indicator Light (Green)**

**CRUISE**

The indicator light has two colors.

**Cruise Main Indicator Light (Amber)**

The indicator light illuminates amber when the ON switch is pressed and the cruise control system is activated.

**Cruise Set Indicator Light (Green)**

The indicator light illuminates green when a cruising speed has been set.

**Activation/Deactivation**

To activate the system, press the ON switch.
The cruise main indicator light illuminates.

To deactivate the system, press the OFF switch.
The cruise main indicator light turns off.

**WARNING**

Always turn off the cruise control system when it is not in use:

*Leaving the cruise control system in an activation-ready state while the cruise control is not in use is dangerous as the cruise control could unexpectedly activate if the activation button is accidentally pressed, and result in loss of vehicle control and an accident.*

**To Set Speed**

1. Activate the cruise control system by pressing the ON switch.
2. Accelerate to the desired speed, which must be more than 30 km/h (19 mph).
3. Set the cruise control by pressing the cruise control SET + /SET - switch up or down at the desired speed. The cruise control is set at the moment the cruise control SET + /SET - switch is pressed up or down. Release the accelerator pedal simultaneously.

**NOTE**
- Release the cruise control switch at the desired speed, otherwise the speed will continue increasing while the switch is pressed up, and continue decreasing while it is pressed down (except when the accelerator pedal is depressed).
- On a steep grade, the vehicle may momentarily slow down while ascending, or speed up while descending.
- Cruise control will turn off if the vehicle speed decreases below 30 km/h (19 mph) when cruise is activated, such as when climbing a steep grade.

**To Increase Cruising Speed**

Follow either of these procedures.

**To increase speed using cruise control switch**

Press up the cruise control SET + switch and hold it. Your vehicle will accelerate. Release the switch at the speed you want.

Your vehicle has a tap-up feature that allows you to increase your current speed in increments of 1.6 km/h (1 mph) by a momentary tap of the cruise control SET + switch. Multiple taps will increase your vehicle speed 1.6 km/h (1 mph) for each tap.
Driving Your Mazda

Starting and Driving

To increase speed using accelerator pedal
Depress the accelerator pedal to accelerate to the desired speed. Press down or press up on the cruise control SET + /SET - switch and release it immediately.

NOTE
Accelerate if you want to speed up temporarily when the cruise control is on. Greater speed will not interfere with or change the set speed. Take your foot off the accelerator to return to the set speed.

To Decrease Cruising Speed
Press down the cruise control SET - switch and hold it. The vehicle will gradually slow. Release the switch at the speed you want.

To Resume Cruising Speed at More Than 30 km/h (19 mph)
If some other method besides the OFF switch was used to cancel cruising speed (such as applying the brake pedal) and the system is still activated, the most recent set speed will automatically resume when the RES switch is pressed. If vehicle speed is below 30 km/h (19 mph), increase the vehicle speed up to 30 km/h (19 mph) or more and press the RES switch.

To Cancel
To cancel the system, use one of these methods:
• Press the OFF switch.
• Slightly depress the brake pedal.
Press the CANCEL switch.

The system turns off when the ignition is switched off.

**NOTE**

*Cruise control will cancel at about 15 km/h (9 mph) below the preset speed (such as may happen when climbing a long, steep grade).*

---

**Traction Control System (TCS)**

The Traction Control System (TCS) enhances traction and safety by controlling engine torque and braking. When the TCS detects driving wheel slippage, it lowers engine torque and operates the brakes to prevent loss of traction.

This means that on a slick surface, the engine adjusts automatically to provide optimum power to the drive wheels, limiting wheel spin and loss of traction.

**WARNING**

*Do not rely on the traction control system as a substitute for safe driving:*

The traction control system (TCS) cannot compensate for unsafe and reckless driving, excessive speed, tailgating (following another vehicle too closely), and hydroplaning (reduced tire friction and road contact because of water on the road surface). You can still have an accident.

*Use snow tires or tire chains and drive at reduced speeds when roads are covered with ice and/or snow:*

Driving without proper traction devices on snow and/or ice-covered roads is dangerous. The traction control system (TCS) alone cannot provide adequate traction and you could still have an accident.
Driving Your Mazda

Starting and Driving

**CAUTION**

Do not rely on the TCS to maintain constant control of the vehicle under severe or maximum handling conditions. If the TCS operates frequently due to severe driving conditions, the TCS may stop operating to protect the brakes from overheating. After the brakes have cooled down, the TCS resumes normal operation.

**TCS/DSC/RSC Indicator Light**

This indicator light stays on for a few seconds when the ignition is switched ON. If the TCS or DSC/RSC is operating, the indicator light flashes.

If the light stays on, the TCS, DSC/RSC or the brake assist system may have a malfunction and they may not operate correctly. Take your vehicle to an Authorized Mazda Dealer.

**NOTE**

- In addition to the indicator light flashing, a slight lugging sound will come from the engine. This indicates that the TCS is operating properly.
- On slippery surfaces, such as fresh snow, it will be impossible to achieve high rpm when the TCS is on.

**TCS OFF Indicator Light**

This indicator light stays on for a few seconds when the ignition is switched ON. It also illuminates when the TCS OFF switch is pressed and TCS is switched off. Refer to TCS OFF Switch on page 5-25. If the light remains illuminated and the TCS is not switched off, take your vehicle to an Authorized Mazda Dealer. The dynamic stability control may have a malfunction.

**NOTE**

If the TCS/DSC indicator light and the TCS OFF indicator light remain illuminated even after switching the ignition from ON to OFF, and back to ON, attempt the procedure again. If this still does not resolve the issue, consult an Authorized Mazda Dealer.
\textbf{TCS OFF Switch}

If the vehicle speed is less than 15 km/h (9 mph), press the TCS OFF switch to turn off the TCS. The TCS OFF indicator light will illuminate.

Press the switch again to turn the TCS back on. The TCS OFF indicator light will turn off. If the vehicle speed is more than 15 km/h (9 mph), the TCS OFF indicator light will not illuminate even if the switch is pressed.

\textbf{NOTE}

- When TCS is on and you attempt to free the vehicle when it is stuck, or drive it out of freshly fallen snow, the TCS will activate. Depressing the accelerator will not increase engine power and freeing the vehicle may be difficult. When this happens, turn off the TCS.
- If the TCS is off when the engine is turned off, it automatically activates when the ignition is switched ON.
- Leaving the TCS on will provide the best traction.
- If the TCS is OFF when the vehicle speed is more than 15 km/h (9 mph), it automatically activates and the TCS OFF indicator light will turn off.
- If the TCS OFF switch is pressed and held for 10 seconds or more, the TCS OFF switch malfunction detection function operates and the TCS and DSC/RSC system activates automatically. The TCS OFF indicator light turns off while the TCS system is operative.
Dynamic Stability Control (DSC)/Roll Stability Control (RSC)

The Dynamic Stability Control (DSC) automatically controls braking and engine torque in conjunction with systems such as ABS and TCS to help control side slip when driving on slippery surfaces or during sudden or evasive maneuvering, enhancing vehicle safety.

The Roll Stability Control (RSC) automatically controls braking and engine torque in conjunction with systems such as ABS and TCS to help control rolling when cornering at a higher speed or during sudden or evasive maneuvering, enhancing vehicle safety.

Refer to ABS (page 5-8) and TCS (page 5-23).

DSC/RSC operation is possible at speeds greater than 15 km/h (9 mph).

⚠️ WARNING

Do not rely on the dynamic stability control as a substitute for safe driving:

The dynamic stability control (DSC)/Roll Stability Control (RSC) cannot compensate for unsafe and reckless driving, excessive speed, tailgating (following another vehicle too closely), and hydroplaning (reduced tire friction and road contact because of water on the road surface). You can still have an accident.

When driving under bad road conditions, lower the vehicle speed and drive carefully:

Reckless driving and excessive speed under any road conditions is dangerous as it reduces vehicle stability and operability which could result in an accident.
Driving Your Mazda

Starting and Driving

CAUTION

- The DSC/RSC may not operate correctly unless the following are observed:
  - Use tires of the correct size specified for your Mazda on all four wheels.
  - Use tires of the same manufacturer, brand and tread pattern on all four wheels.
  - Do not mix worn tires.
  - The DSC/RSC may not operate correctly when tire chains are used or a temporary spare tire is installed because the tire diameter changes.
  - Do not modify the suspension, steering wheel, and tires. It may affect the DSC/RSC.
  - Do not install non-genuine speakers since their vibration may affect the Dynamic Stability Control (DSC)/Roll Stability Control (RSC) sensors.

▼ TCS/DSC/RSC Indicator Light

This indicator light stays on for a few seconds when the ignition is switched ON. If the TCS or DSC/RSC is operating, the indicator light flashes.

If the light stays on, the TCS, DSC/RSC or the brake assist system may have a malfunction and they may not operate correctly. Take your vehicle to an Authorized Mazda Dealer.
Tire Pressure Monitoring System*

The tire pressure monitoring system (TPMS) monitors the pressure for each tire. If tire pressure is too low in one or more tires, the system will inform the driver via the warning light in the instrument panel and by the warning beep sound.

The tire pressure sensors installed on each wheel send tire pressure data by radio signal to the receiver unit in the vehicle.

**NOTE**

When the ambient temperature is low due to seasonal changes, tire temperatures are also lower. When the tire temperature decreases, the air pressure decreases as well. The TPMS warning light may illuminate more frequently. Visually inspect the tires daily before driving, and check tire pressures monthly with a tire pressure gauge. When checking tire pressures, use of a digital tire pressure gauge is recommended.

TPMS does not alleviate your need to check the pressure and condition of all four tires regularly.

*Some models.
**CAUTION**

- Each tire, including the spare (if provided), should be checked monthly when cold and inflated to the inflation pressure recommended by the vehicle manufacturer on the vehicle placard or tire inflation pressure label. (If your vehicle has tires of a different size than the size indicated on the vehicle placard or tire inflation pressure label, you should determine the proper tire inflation pressure for those tires.)

As an added safety feature, your vehicle has been equipped with a tire pressure monitoring system (TPMS) that illuminates a low tire pressure telltale when one or more of your tires is significantly under-inflated. Accordingly, when the low tire pressure telltale illuminates, you should stop and check your tires as soon as possible, and inflate them to the proper pressure. Driving on a significantly under-inflated tire causes the tire to overheat and can lead to tire failure. Under-inflation also reduces fuel efficiency and tire tread life, and may affect the vehicle's handling and stopping ability.

Please note that the TPMS is not a substitute for proper tire maintenance, and it is the driver’s responsibility to maintain correct tire pressure, even if under-inflation has not reached the level to trigger illumination of the TPMS low tire pressure telltale.

- Your vehicle has also been equipped with a TPMS malfunction indicator to indicate when the system is not operating properly. The TPMS malfunction indicator is combined with the low tire pressure telltale. When the system detects a malfunction, the telltale will flash for approximately one minute and then remain continuously illuminated. This sequence will continue upon subsequent vehicle start-ups as long as the malfunction exists. When the malfunction indicator is illuminated, the system may not be able to detect or signal low tire pressure as intended. TPMS malfunctions may occur for a variety of reasons, including the installation of replacement or alternate tires or wheels on the vehicle that prevent the TPMS from functioning properly. Always check the TPMS malfunction telltale after replacing one or more tires or wheels on your vehicle to ensure that the replacement or alternate tires and wheels allow the TPMS to continue to function properly.

- To avoid false readings, the system samples for a little while before indicating a problem. As a result it will not instantaneously register a rapid tire deflation or blow out.

**NOTE**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Driving Your Mazda

Starting and Driving

▼Tire Pressure Monitoring System Warning Light

This warning light illuminates for a few seconds when the ignition is switched ON.

Thereafter, the warning light illuminates and a beep is heard when tire pressure is too low in one or more tires, and flashes when there is a system malfunction.

⚠️ WARNING

If the tire pressure monitoring system warning light illuminates or flashes, or the tire pressure warning beep sound is heard, decrease vehicle speed immediately and avoid sudden maneuvering and braking:

If the tire pressure monitoring system warning light illuminates or flashes, or the tire pressure warning beep sound is heard, it is dangerous to drive the vehicle at high speeds, or perform sudden maneuvering or braking. Vehicle drivability could worsen and result in an accident. To determine if you have a slow leak or a flat, pull over to a safe position where you can check the visual condition of the tire and determine if you have enough air to proceed to a place where air may be added and the system monitored again by an Authorized Mazda Dealer or a tire repair station.

Do not ignore the TPMS Warning Light:

Ignoring the TPMS warning light is dangerous, even if you know why it is illuminated. Have the problem taken care of as soon as possible before it develops into a more serious situation that could lead to tire failure and a dangerous accident.

Warning light illuminates/Warning beep sounds

When the warning light illuminates, and the warning beep sound is heard (about 3 seconds), tire pressure is too low in one or more tires.
Adjust the tire pressure to the correct tire pressure. Refer to the specification charts (page 10-6).

**CAUTION**

When replacing/repairing the tires or wheels or both, have the work done by an Authorized Mazda Dealer, or the tire pressure sensors may be damaged.

**NOTE**

- Perform tire pressure adjustment when the tires are cold. Tire pressure will vary according to the tire temperature, therefore let the vehicle stand for 1 hour or only drive it 1.6 km (1 mile) or less before adjusting the tire pressures. When pressure is adjusted on hot tires to the cold inflation pressure, the TPMS warning light/beep may turn on after the tires cool and pressure drops below specification.
- Also, an illuminated TPMS warning light, resulting from the tire air pressure dropping due to cold ambient temperature, may turn off if the ambient temperature rises. In this case, it will also be necessary to adjust the tire air pressures. If the TPMS warning light illuminates due to a drop in tire air pressure, make sure to check and adjust the tire air pressures.
- After adjusting the tire air pressures, it may require some time for the TPMS warning light to turn off. If the TPMS warning light remains illuminated, drive the vehicle at a speed of at least 25 km/h (16 mph) for 10 minutes, and then verify that it turns off.
- Tires lose air naturally over time and the TPMS cannot tell if the tires are getting too soft over time or you have a flat. However, when you find one low tire in a set of four—that is an indication of trouble; you should have someone drive the vehicle slowly forward so you can inspect any low tire for cuts and any metal objects sticking through tread or sidewall. Put a few drops of water in the valve stem to see if it bubbles indicating a bad valve. Leaks need to be addressed by more than simply refilling the trouble tire as leaks are dangerous - take it to an Authorized Mazda Dealer which has all the equipment to fix tires. TPMS systems and order the best replacement tire for your vehicle.
If the warning light illuminates again even after the tire pressures are adjusted, there may be a tire puncture. Replace the punctured tire with the temporary spare tire (page 7-8).

**NOTE**
A tire pressure sensor is not installed to the temporary spare tire. The warning light will flash continuously while the temporary spare tire is being used.

**Warning light flashes**
When the warning light flashes, there may be a system malfunction. Consult an Authorized Mazda Dealer.

**System Error Activation**
When the TPMS warning light flashes, there may be a system malfunction. Consult an Authorized Mazda Dealer. A system error activation may occur in the following cases:
- When there is equipment or a device near the vehicle using the same radio frequency as that of the tire pressure sensors.
- When using the following devices in the vehicle that may cause radio interference with the receiver unit.
  - A digital device such as a personal computer.
  - A current converter device such as a DC-AC converter.
- When excess snow or ice adheres to the vehicle, especially around the wheels.
- When the tire pressure sensor batteries are exhausted.
- When using a wheel with no tire pressure sensor installed.
- When using tires with steel wire reinforcement in the side walls.
- When using tire chains.

**CAUTION**
When inspecting or adjusting the tire air pressures, do not apply excessive force to the stem part of the wheel unit. The stem part could be damaged.

**Changing tires and wheels**
The following procedure allows the TPMS to recognize a tire pressure sensor's unique ID signal code whenever tires or wheels are changed, such as changing to and from winter tires.

**NOTE**
Each tire pressure sensor has a unique ID signal code. The signal code must be registered with the TPMS before it can work. The easiest way to do it is to have an Authorized Mazda Dealer change your tire and complete ID signal code registration.

**When having tires changed at an Authorized Mazda Dealer**
When an Authorized Mazda Dealer changes your vehicle's tires, they will complete the tire pressure sensor ID signal code registration.

**When changing tires yourself**
If you or someone else changes tires, you or someone else can also undertake the steps for the TPMS to complete the ID signal code registration.

1. After tires have been changed, switch the ignition ON, then back to ACC or OFF.
2. Wait for about 15 minutes.
3. After about 15 minutes, drive the vehicle at a speed of at least 25 km/h (16 mph) for 10 minutes and the tire pressure sensor ID signal code will be registered automatically.

**NOTE**

If the vehicle is driven within about 15 minutes of changing tires, the tire pressure monitoring system warning light will flash because the sensor ID signal code would not have been registered. If this happens, park the vehicle for about 15 minutes, after which the sensor ID signal code will register upon driving the vehicle for 10 minutes.

### Replacing tires and wheels

**CAUTION**

- When replacing/repairing the tires or wheels or both, have the work done by an Authorized Mazda Dealer, or the tire pressure sensors may be damaged.
- The wheels equipped on your Mazda are specially designed for installation of the tire pressure sensors. Do not use non-genuine wheels, otherwise it may not be possible to install the tire pressure sensors.

Be sure to have the tire pressure sensors installed whenever tires or wheels are replaced.

When having a tire or wheel or both replaced, the following types of tire pressure sensor installations are possible.

- The tire pressure sensor is removed from the old wheel and installed to the new one.
- The same tire pressure sensor is used with the same wheel. Only the tire is replaced.

- A new tire pressure sensor is installed to a new wheel.

**NOTE**

- The tire pressure sensor ID signal code must be registered when a new tire pressure sensor is purchased. For purchase of a tire pressure sensor and registration of the tire pressure sensor ID signal code, consult an Authorized Mazda Dealer.
- When reinstalling a previously removed tire pressure sensor to a wheel, replace the grommet (seal between valve body/sensor and wheel) for the tire pressure sensor.
Blind Spot Monitoring (BSM) System

The Blind Spot Monitoring (BSM) system is designed to assist the driver by monitoring blind spots on both sides of the vehicle to the rear in certain situations such as when changing lanes on roads and freeways.

The BSM system monitors the detection areas on both sides of the vehicle to the rear when the vehicle speed is about 32 km/h (20 mph) or more, and notifies the driver of vehicles in the detection area by illuminating the BSM warning light.

If the turn signal lever is operated in the direction the BSM warning light is illuminated, the system warns the driver of the vehicle in the detection area with a beep sound.

**WARNING**

Do not rely completely on the BSM system and be sure to look over your shoulder before changing lanes:

The BSM system can assist the driver in confirming the safety of the surroundings but is not a complete substitute. The driver is responsible for assuring lane changes and other maneuvers. Always pay attention to the direction in which the vehicle is traveling and the vehicle's surroundings.

**NOTE**

- The BSM system does not operate when the vehicle speed is lower than about 32 km/h (20 mph).
- The radar sensors are equipped inside the rear bumper. (page 5-37)
- The system may not operate normally when towing a trailer. Turn off the system by operating the BSM OFF switch when towing a trailer.
- The radar sensors do not detect human, animal, or static objects such as fences. In addition, the system pauses when the selector lever is shifted to the R position. (The system resumes automatically when the selector lever is shifted from the R position.)

5-34 *Some models.*
The detectability of the radar sensors has its limitations. The BSM system may not operate properly under the following conditions:

- Ice, snow, or soil adheres to the rear bumper surface around the radar sensors.
- During adverse weather conditions such as rain or snow, or under conditions where water is sprayed.
- The rear bumper area around the radar sensors is blocked by foreign material (such as stickers or a bicycle carrier).

The radar sensors may not detect all types of vehicles around your vehicle, especially the following types of vehicles:

- Motorcycles
- Vehicles with body shapes that radar may not reflect such as a flatbed trailer with no cargo.
- Vehicles with lower body height such as sports cars.

Have the radar sensors inspected at an Authorized Mazda Dealer if any shock is applied to the rear bumper, even in a minor accident. If the vehicle is driven with a damaged radar sensor, the system may not operate properly resulting in an accident.

For repairs or paintwork around the radar sensors, or replacement of the bumper, consult an Authorized Mazda Dealer.

The radar sensors of the BSM system may be regulated under the radio wave related laws of the country where the vehicle is driven. The sensors in this system are approved for use in the U.S.A. (including territories), Canada, and Mexico. If a vehicle with a BSM system is driven in a country other than the U.S.A., Canada, or Mexico, the system has to be turned off using the BSM OFF switch.

The detection area of the system has been determined based on the lane width of general freeways. Therefore on a road with a narrower lane width, the system may detect vehicles on a lane next to the adjacent lane and operate the warning light/beep. On a road with wider lane width, the system may not detect vehicles on the adjacent lane and may not operate the warning light/beep.

Operation of the warning light/beep may be delayed or the system may not operate the warning light/beep under the following conditions:

- The vehicle accelerates from a standing-start with a vehicle alongside.
- A vehicle moves from a lane two lanes over to the adjacent lane.
- The difference in vehicle speed between your vehicle and another vehicle is larger when passing or being passed, and the vehicle passes the detection area within a short period of time.
- On a steep incline, or when there is a difference in height between lanes.
- Immediately after the system has been activated by pressing the BSM OFF switch again after it has been turned off (BSM OFF indicator light in instrument panel illuminates) by pressing the switch.

Although the system may detect objects on the road side such as parked vehicles or guardrails and operate the warning light/beep, it does not indicate a malfunction.

If the vehicle is driven on a road with less traffic and few vehicles that the radar sensors can detect, the system may pause (The BSM OFF indicator light in the instrument panel flashes). However, it does not indicate a malfunction.
Driving Your Mazda

Starting and Driving

- The following conditions may affect the visibility of the BSM warning lights on the outside mirror, making it difficult to confirm the illumination of the lights:
  - Ice or snow adheres to the surface of the outside mirrors.
  - The door window glass is tinted.

▼ BSM Warning Light/Beep

**BSM warning light**
Equipped on the left and right door mirrors.

BSM warning beep
The warning beep operates when the turn signal lever is operated to the side where the BSM warning light is illuminated.

**NOTE**
The system can be customized so that the BSM warning beep does not operate. Consult an Authorized Mazda Dealer.

▼ BSM OFF Indicator Light

This indicator light illuminates for a few seconds when the ignition is switched ON.

The BSM OFF indicator light illuminates when the BSM system is turned off by pressing the BSM OFF switch. The indicator light flashes if the BSM system has a malfunction. Consult an Authorized Mazda Dealer.

**NOTE**
If the vehicle is driven on a road with less traffic and few vehicles that the radar sensors can detect, the system may pause (The BSM OFF indicator light in the instrument panel flashes). However, it does not indicate a malfunction.
BSM OFF Switch

When the BSM switch is pressed, the BSM system turns off and the BSM OFF indicator light illuminates.

Press the BSM OFF switch again to turn on the BSM system. The BSM OFF indicator light turns off.

NOTE
- The system may not operate normally when towing a trailer. Turn off the system by operating the BSM OFF switch when towing a trailer.
- If the ignition is switched off with the BSM system turned off, the system becomes operable automatically when the ignition is switched ON.

Care of Radar Sensors

The radar sensors are equipped inside the rear bumper.

Always keep the bumper surface near the radar sensor area clean so that the BSM system operates normally. Refer to the Exterior Care (page 8-56).

NOTE
- The BSM OFF indicator light flashes if the radar sensors cannot operate normally. If the light remains flashing after cleaning the bumper surface near the radar sensor area, consult an Authorized Mazda Dealer.
- For repairs or paintwork around the radar sensors, or replacement of the bumper, consult an Authorized Mazda Dealer.
Safety Certification

Radiation Hazard

This BSM (blind spot monitoring) device emits intentional electromagnetic radiation in the 24 GHz to 25 GHz frequency range. The total radiated average power over the entire bandwidth is below $-14 \text{ dBm}$ (40 $\mu\text{W}$). The active emitting antenna surface is 72 $\text{cm}^2$; therefore the radiated power density in front of the BSM device is 0.55 $\mu\text{W/cm}^2$. This value is far below the legal human exposure protection limit of 1 mW/cm$^2$ (MPE) in Europe and US.

Declaration of compliance for 24 GHz blind spot radar

(U.S.A)

FCC ID: KR5SV2008BSD
FCC ID: OAYBSDTX

This vehicle is equipped with a 24 GHz blind spot monitoring (BSM) radar system, which complies with part 15 of the FCC rules. Operation is subject to the following conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

3. This device may only work when the vehicle is in operation pursuant to §15.252 (a) (4).

(CANADA)

ICDCE2008075 (temporary permission until RSS-220 is in force)
IC:4135A-BSDTX

This vehicle is equipped with a 24 GHz blind spot monitoring (BSM) radar system, which complies with the radio standards specification RSS-220 of Industry Canada. Operation is subject to the following conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

NOTE

During printing time of this user manual the approvals listed below are granted. Further countries may become available or actual certification identifiers may be subject to change or update.

WARNING

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Meters and Gauges

1. Speedometer ........................................................................................................ page 5-40
2. Odometer, Trip Meter and Trip Meter Selector .................................................. page 5-40
3. Tachometer ........................................................................................................ page 5-41
4. Engine Coolant Temperature Gauge ................................................................ page 5-41
5. Fuel Gauge ........................................................................................................ page 5-41
6. Dashboard Illumination ..................................................................................... page 5-42

**NOTE**
When the ignition is switched ON, the dashboard gauges illuminate.
Driving Your Mazda

Instrument Cluster and Indicators

**Speedometer**
The speedometer indicates the speed of the vehicle.

**Odometer, Trip Meter and Trip Meter Selector**
The display mode can be changed between trip meter A and trip meter B by pressing the selector while one of them is displayed. The selected mode will be displayed.

**Odometer**
The odometer records the total distance the vehicle has been driven.

**Trip meter**
The trip meter can record the total distance of two trips. One is recorded in trip meter A, and the other is recorded in trip meter B.

For instance, trip meter A can record the distance from the point of origin, and trip meter B can record the distance from where the fuel tank is filled.

When trip meter A is selected, pressing the selector again within one second will change to trip meter B mode.

When trip meter A is selected, TRIP A will be displayed. When trip meter B is selected, TRIP B will be displayed.
The trip meter records the total distance the vehicle is driven until the meter is again reset. Return it to “0.0” by holding the selector depressed for 1 second or more. Use this meter to measure trip distances and to compute fuel consumption.

**NOTE**
- Only the trip meters record tenths of kilometers (miles).
- The trip record will be erased when:
  - The power supply is interrupted (blown fuse or the battery is disconnected).
  - The vehicle is driven over 999.9 km (mile).

**Tachometer**

The tachometer shows engine speed in thousands of revolutions per minute (rpm).

**Engine Coolant Temperature Gauge**

The engine coolant temperature gauge shows the temperature of the engine coolant.

If the needle is near H, it indicates overheating.

**CAUTION**

*Driving with an overheated engine can cause serious engine damage (page 7-16).*

**CAUTION**

Do not run the engine with the tachometer needle in the RED ZONE. This may cause severe engine damage.
Fuel Gauge

The fuel gauge shows approximately how much fuel is remaining in the tank when the ignition is switched ON. We recommend keeping the tank over 1/4 full. When the low fuel warning light illuminates or when the needle is near E, refuel as soon as possible.

NOTE

- After refueling, it may require some time for the needle to stabilize. In addition, the needle may deviate while driving on a slope or curve since the fuel moves in the tank.
- The direction of the arrow (↑) next to the low fuel warning light indicates that the fuel-filler lid is on the left side of the vehicle.

Dashboard Illumination

Rotate the knob to adjust the brightness of the instrument cluster and other illuminations in the dashboard.

NOTE

- The brightness of dashboard illuminations can be adjusted when the headlight switch is in the "ON" or "Fog" position.
- When the dashboard illumination brightness cannot be adjusted any more, a beep sound will be heard.
- (Black-out meter) The brightness of the instrument cluster illumination can be adjusted when the headlight switch is in any position.

Canceling the illumination dimmer

(Black-out meter and dashboard illuminations)

When the headlight switch is in the "ON" or "Fog" position, the illumination of the instrument cluster and the information display dims.

When driving on snowy or foggy roads, or in other situations when the instrument cluster or information display's visibility is reduced due to glare from surrounding brightness, cancel the illumination dimmer and increase the illumination intensity.
To cancel the illumination dimmer, press the dashboard illumination knob.

**NOTE**
- *This symbol (اظ) indicates the knob to adjust the brightness of the dashboard illumination.*
- *If the illumination dimmer is cancelled, the instrument cluster and the information display will not dim when the headlight switch is turned to the ☼ or ☽ position again. Press the dashboard illumination knob to activate the illumination dimmer.*

▼Brake System Warning Light

This warning has the following functions:

**Parking brake warning**

The light illuminates when the parking brake is applied with the ignition switched to START or ON. It turns off when the parking brake is fully released.

**Low brake fluid level warning**

If the light stays on after the parking brake is fully released, you may have a brake problem.

Drive to the side of the road and park off the right-of-way.

You may notice that the pedal is harder to depress or that it may go closer to the floor. In either case, it will take longer to stop the vehicle.

1. With the engine stopped, open the hood and check the brake fluid level immediately, and then add fluid if required (page 8-23).

2. After adding fluid, check the light again.

If the warning light remains on, or if the brakes do not operate properly, do not drive the vehicle. Have it towed to an Authorized Mazda Dealer.

Even if the light turns off have your brake system inspected as soon as possible by an Authorized Mazda Dealer.

**NOTE**

Having to add brake fluid is sometimes an indicator of leakage. Consult an Authorized Mazda Dealer as soon as possible even if the brake light is no longer illuminated.

**WARNING**

Do not drive with the brake system warning light illuminated. Contact an Authorized Mazda Dealer to have the brakes inspected as soon as possible:

Driving with the brake system warning light illuminated is dangerous. It indicates that your brakes may not work at all or that they could completely fail at any time. If this light remains illuminated, after checking that the parking brake is fully released, have the brakes inspected immediately.

5-46
ABS Warning Light

The warning light stays on for a few seconds when the ignition is switched ON.

If the ABS warning light stays on while you’re driving, the ABS control unit has detected a system malfunction. If this occurs, your brakes will function normally as if the vehicle had no ABS. Should this happen, consult an Authorized Mazda Dealer as soon as possible.

NOTE
When the engine is jump-started to charge the battery, uneven rpm occurs and the ABS warning light may illuminate. If this occurs, it is the result of the weak battery and does not indicate an ABS malfunction. Recharge the battery.

Electronic Brake Force Distribution System Warning

If the electronic brake force distribution control unit determines that some components are operating incorrectly, the control unit may illuminate the brake system warning light and the ABS warning light on simultaneously. The problem is likely to be the electronic brake force distribution system.

WARNING
Do not drive with both the ABS warning light and brake warning light illuminated. Have the vehicle towed to an Authorized Mazda Dealer to have the brakes inspected as soon as possible:

Driving when the brake system warning light and ABS warning light are illuminated simultaneously is dangerous.
When both lights are illuminated, the rear wheels could lock more quickly in an emergency stop than under normal circumstances.
Driving Your Mazda

**Warning/Indicator Lights and Beep Sounds**

▼ **Charging System Warning Light**

This warning light illuminates when the ignition is switched ON and turns off when the engine is started.

If the warning light illuminates while driving, it indicates a malfunction of the alternator or of the charging system. Drive to the side of the road and park off the right-of-way. Consult an Authorized Mazda Dealer.

**CAUTION**

*Do not continue driving when the charging system warning light is illuminated because the engine could stop unexpectedly.*

▼ **Engine Oil Pressure Warning Light**

This warning light illuminates when the ignition is switched ON and turns off when the engine is started.

This warning light indicates low engine oil pressure.

▼ **Check Engine Light**

If the light illuminates while driving:
1. Drive to the side of the road and park off the right-of-way on level ground.
2. Turn off the engine and wait 5 minutes for the oil to drain back into the oil pan.
3. Inspect the engine oil level (page 8-20). If it's low, add the appropriate amount of engine oil while being careful not to overfill.
4. Start the engine and check the warning light.

If the light remains illuminated even after you add oil, stop the engine immediately and have your vehicle towed to an Authorized Mazda Dealer.

**CAUTION**

*Do not run the engine if the oil pressure is low. It could result in extensive engine damage.*
The check engine light may illuminate in the following cases:
- The fuel tank level being very low or approaching empty.
- The engine's electrical system has a problem.
- The emission control system has a problem.
- The fuel-filler cap is missing or not tightened securely.

If the check engine light remains on or flashes continuously, do not drive at high speeds and consult an Authorized Mazda Dealer as soon as possible.

**Powertrain Malfunction/Reduced Power Warning Light**

This warning light illuminates for a few seconds when the ignition is switched ON.

If this light illuminates while driving, the vehicle may have a problem. It is important to note the driving conditions when the light illuminated and consult an Authorized Mazda Dealer.

The powertrain malfunction/reduced power warning light may illuminate in the following cases:
- The engine's electrical system has a problem.
- The emission control system has a problem.
- The brake switch has a problem.

If the powertrain malfunction/reduced power warning light remains on, do not drive at high speeds and consult an Authorized Mazda Dealer as soon as possible.

**Air Bag/Front Seat Belt Pretensioner System Warning Light**

If the air bag/front seat belt pretensioner system is working properly, the warning light illuminates when the ignition is switched ON or after the engine is cranked. The warning light turns off after a specified period of time.

A system malfunction is indicated if the warning light constantly flashes, constantly illuminates or does not illuminate at all when the ignition is switched ON. If any of these occur, consult an Authorized Mazda Dealer as soon as possible. The system may not work in an accident.

**WARNING**

*Never tamper with the air bag/pretensioner systems and always have an Authorized Mazda Dealer perform all servicing and repairs:*

*Self-servicing or tampering with the systems is dangerous. An air bag/pretensioner could accidentally activate or become disabled causing serious injury or death.*
Driving Your Mazda

Warning/Indicator Lights and Beep Sounds

**Low Fuel Warning Light**

This warning light in the fuel gauge signals that the fuel tank will soon be empty. Refuel as soon as possible.

**Check Fuel Cap Warning Light**

This warning light illuminates for a few seconds when the ignition is switched ON.

If the check fuel cap warning light illuminates while driving, the fuel-filler cap may not be installed properly. Stop the engine and reinstall the fuel-filler cap. Refer to the fuel-filler cap on page 3-48.

**Seat Belt Warning Light/Beep**

The seat belt warning light illuminates and a beep sound will be heard if the driver's seat belt is not fastened when the ignition is switched ON.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Result</th>
</tr>
</thead>
<tbody>
<tr>
<td>The driver's seat belt is not fastened when the ignition is switched ON.</td>
<td>The warning light flashes and a beep sound will be heard for about 6 seconds.</td>
</tr>
<tr>
<td>The driver's seat belt is fastened while the warning light and the beep sound are activated.</td>
<td>The warning light turns off and the beep sound stops.</td>
</tr>
<tr>
<td>The driver's seat belt is fastened before the ignition is switched ON.</td>
<td>The warning light will not illuminate and the beep sound will not be heard.</td>
</tr>
</tbody>
</table>

**Belt reminder**

**NOTE**

Consult an Authorized Mazda Dealer to deactivate or restore the belt reminder. Though the belt reminder can be deactivated, doing so will defeat the purpose of the system to warn the driver and the front passenger in the event that their seat belts are not fastened. For the safety of the driver and front passenger, Mazda recommends not deactivating the belt reminder.
Driver seated/Front passenger not seated
The belt reminder is a supplemental warning to the seat belt warning function. If the driver's seat belt is not fastened when the ignition is switched ON, the warning light/beep operates to give you further reminders according to the chart below.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Vehicle speed</th>

</tbody>
</table>

○: Fastened
×: Unfastened
●: Illuminated
♫: Flashing
♩: Beep

Placing heavy items on the front passenger seat may cause the front passenger seat belt warning function to operate depending on the weight of the item.

Once the beep sound is heard, it continues sounding even if the vehicle speed lowers to 20 km/h (12 mph) or less until the seatbelt is fastened or the beep sound period has passed.

NOTE

- To allow the front passenger seat weight sensor to function properly, do not place and sit on an additional seat cushion on the front passenger seat. The sensor may not function properly because the additional seat cushion could cause sensor interference.
- When a small child sits on the front passenger seat, it is possible that neither the warning light nor the warning beep operate.
Driving Your Mazda

Warning/Indicator Lights and Beep Sounds

▼ Door-Ajar Warning Light

This warning light illuminates when any door or liftgate is not securely closed. Close the door or liftgate securely before driving the vehicle.

▼ Low Washer Fluid Level Warning Light

This warning light indicates that little washer fluid remains. Add fluid (page 8-24).

▼ Automatic Transaxle Warning Light

This warning light stays on for a few seconds when the ignition is switched ON. The light illuminates when the transaxle has a problem.

⚠ CAUTION

If the automatic transaxle warning light illuminates, the transaxle has an electrical problem. Continuing to drive your Mazda in this condition could cause damage to your transaxle. Consult an Authorized Mazda Dealer as soon as possible.

▼ AWD Warning Light (AWD)

This warning light stays on for a few seconds when the ignition is switched ON. Thereafter, the warning light will illuminate or flash under the following conditions:
- Illuminates when there is an abnormality with the AWD system.
- Flashes when the differential oil temperature is abnormally high.
- Flashes when there are continually large differences between front and rear wheel rotation, such as when trying to pull away from an icy surface, or when trying to extricate the vehicle from mud, sand or similar conditions.

If the AWD warning light illuminates:
If the AWD warning light illuminates, contact an Authorized Mazda Dealer.

5-52 *Some models.
If the AWD warning light flashes:
Park the vehicle in a safe place. After a few moments, if the warning light stops flashing, you can resume driving. If the light does not stop flashing, contact an Authorized Mazda Dealer.

⚠️ WARNING
*Never spin a wheel that is off the ground:*
Spinning a wheel that is off the ground as a result of the vehicle being stuck or in a ditch is dangerous. The drive assembly could be seriously damaged which could lead to an accident or could even lead to overheating, oil leakage, and a fire.

▼ Tire Pressure Monitoring System (TPMS) Warning Light*

This warning light illuminates for a few seconds when the ignition is switched ON.

Thereafter, the warning light illuminates and a beep is heard when tire pressure is too low in one or more tires, and flashes when there is a system malfunction.

⚠️ WARNING
If the tire pressure monitoring system warning light illuminates or flashes, or the tire pressure warning beep sound is heard, decrease vehicle speed immediately and avoid sudden maneuvering and braking:
If the tire pressure monitoring system warning light illuminates or flashes, or the tire pressure warning beep sound is heard, it is dangerous to drive the vehicle at high speeds, or perform sudden maneuvering or braking. Vehicle drivability could worsen and result in an accident.
To determine if you have a slow leak or a flat, pull over to a safe position where you can check the visual condition of the tire and determine if you have enough air to proceed to a place where air may be added and the system monitored again by an Authorized Mazda Dealer or a tire repair station.

Do not ignore the TPMS Warning Light:
Ignoring the TPMS warning light is dangerous, even if you know why it is illuminated. Have the problem taken care of as soon as possible before it develops into a more serious situation that could lead to tire failure and a dangerous accident.

Warning light illuminates/Warning beep sounds
When the warning light illuminates, and the warning beep sound is heard (about 3 seconds), tire pressure is too low in one or more tires.

*Some models. 5-53
Adjust the tire pressure to the correct tire pressure. Refer to the specification charts (page 10-6).

**CAUTION**

When replacing/repairing the tires or wheels or both, have the work done by an Authorized Mazda Dealer, or the tire pressure sensors may be damaged.

**NOTE**

- Perform tire pressure adjustment when the tires are cold. Tire pressure will vary according to the tire temperature, therefore let the vehicle stand for 1 hour or only drive it 1.6 km (1 mile) or less before adjusting the tire pressures. When pressure is adjusted on hot tires to the cold inflation pressure, the TPMS warning light/beep may turn on after the tires cool and pressure drops below specification.

Also, an illuminated TPMS warning light, resulting from the tire air pressure dropping due to cold ambient temperature, may turn off if the ambient temperature rises. In this case, it will also be necessary to adjust the tire air pressures. If the TPMS warning light illuminates due to a drop in tire air pressure, make sure to check and adjust the tire air pressures.

- After adjusting the tire air pressures, it may require some time for the TPMS warning light to turn off. If the TPMS warning light remains illuminated, drive the vehicle at a speed of at least 25 km/h (16 mph) for 10 minutes, and then verify that it turns off.

- Tires lose air naturally over time and the TPMS cannot tell if the tires are getting too soft over time or you have a flat. However, when you find one low tire in a set of four - that is an indication of trouble; you should have someone drive the vehicle slowly forward so you can inspect any low tire for cuts and any metal objects sticking through tread or sidewall. Put a few drops of water in the valve stem to see if it bubbles indicating a bad valve. Leaks need to be addressed by more than simply refilling the trouble tire as leaks are dangerous - take it to an Authorized Mazda Dealer which has all the equipment to fix tires, TPMS systems and order the best replacement tire for your vehicle.
If the warning light illuminates again even after the tire pressures are adjusted, there may be a tire puncture. Replace the punctured tire with the temporary spare tire (page 7-8).

**NOTE**
A tire pressure sensor is not installed to the temporary spare tire. The warning light will flash continuously while the temporary spare tire is being used.

**Warning light flashes**
When the warning light flashes, there may be a system malfunction. Consult an Authorized Mazda Dealer.

▼**KEY Warning Light (Red)/KEY Indicator Light (Green) (with Advanced Key)**

**KEY**

This indicator has two colors.

**KEY Warning Light (Red)**

**When illuminated**
- When the ignition is switched ON, it illuminates momentarily and then goes out.
- If any malfunction occurs in the advanced keyless system, it illuminates continuously.

**WARNING**

Do not drive the vehicle with the KEY warning light illuminated:
If the KEY warning light remains illuminated, do not continue to drive using the advanced key system. Park the vehicle in a safe place and use the auxiliary key to continue driving the vehicle. Have the vehicle inspected at an Authorized Mazda Dealer as soon as possible.

**When flashing**
- Under the following conditions, the KEY warning light (red) flashes to inform the driver that the start knob will not rotate to the ACC position even if it is pushed in from the OFF/LOCK position.
  - The advanced key battery is dead.
  - The advanced key is not within operational range.
  - The advanced key is placed in areas where it is difficult for the system to detect the signal (page 3-7).
  - A key from another manufacturer similar to the advanced key is in the operational range.
Driving Your Mazda

Warning/Indicator Lights and Beep Sounds

- Under the following conditions, the KEY warning light (red) will flash continuously when the start knob has not been returned to the OFF/LOCK position to notify the driver that the advanced key has been removed from the vehicle. It will stop flashing when the advanced key is back inside the vehicle.
  - The start knob has not been returned to the OFF/LOCK position, the driver's door is open, and the advanced key is removed from the vehicle.
  - The start knob has not been returned to the OFF/LOCK position and all the doors are closed after removing the advanced key from the vehicle.

**NOTE**
The flashing KEY warning light (red) and the beep sound operate simultaneously (page 3-20).

**KEY Indicator Light (Green)**

- **When illuminated**
  When the start knob is pushed in from the OFF/LOCK position, the system confirms that the correct advanced key is inside the vehicle, the KEY indicator light (green) illuminates, and the start knob can be turned to the ACC position (page 3-10).

- **When flashing**
  When the advanced key battery power is low, the KEY indicator light flashes for 30 seconds after the start knob is turned from the ON position to the ACC or OFF/LOCK position. Replace with a new battery before the advanced key becomes unusable (page 3-7).

**NOTE**
The advanced key can be set so that the KEY indicator light (green) does not flash even if the battery power is low. Refer to Personalization Features on page 10-8.

▼ Security Indicator Light

This indicator light starts flashing every 2 seconds when the ignition is switched from ON to ACC and the immobilizer system is armed.

The light stops flashing when the ignition is switched ON with the correct ignition key.
At this time, the immobilizer system is disarmed and the light illuminates for about 3 seconds and then turns off.

If the engine does not start with the correct ignition key, and the security indicator light keeps illuminating or flashing, the system may have a malfunction. Consult an Authorized Mazda Dealer.
Headlight High-Beam Indicator Light

This light indicates one of two things:
- The high-beam headlights are on.
- The turn signal lever is in the flash-to-pass position.

Shift Position Indicator Light

This indicates the selected shift position when the ignition is switched ON.

Gear position indicator

When the shift lever is in the D or M position, the numeral for the selected gear displays.

TCS/DSC/RSC Indicator Light

This indicator light stays on for a few seconds when the ignition is switched ON. If the TCS or DSC/RSC is operating, the indicator light flashes.

If the light stays on, the TCS, DSC/RSC or the brake assist system may have a malfunction and they may not operate correctly. Take your vehicle to an Authorized Mazda Dealer.

NOTE
- In addition to the indicator light flashing, a slight lugging sound will come from the engine. This indicates that the TCS is operating properly.
- On slippery surfaces, such as fresh snow, it will be impossible to achieve high rpm when the TCS is on.
Driving Your Mazda

Warning/Indicator Lights and Beep Sounds

▼TCS OFF Indicator Light

![TCS OFF](image)

This indicator light stays on for a few seconds when the ignition is switched ON. It also illuminates when the TCS OFF switch is pressed and TCS is switched off. Refer to TCS OFF Switch on page 5-25. If the light remains illuminated and the TCS is not switched off, take your vehicle to an Authorized Mazda Dealer. The dynamic stability control may have a malfunction.

**NOTE**
If the TCS/DSC indicator light and the TCS OFF indicator light remain illuminated even after switching the ignition from ON to OFF, and back to ON, attempt the procedure again. If this still does not resolve the issue, consult an Authorized Mazda Dealer.

▼Cruise Main Indicator Light (Amber)/Cruise Set Indicator Light (Green)

![Cruise Main Indicator Light](image)

The indicator light illuminates amber when the ON switch is pressed and the cruise control system is activated.

**Cruise Main Indicator Light (Amber)**
The indicator light illuminates green when a cruising speed has been set.

▼BSM OFF Indicator Light *

![BSM OFF](image)

This indicator light illuminates for a few seconds when the ignition is switched ON.

The BSM OFF indicator light illuminates when the BSM system is turned off by pressing the BSM OFF switch. The indicator light flashes if the BSM system has a malfunction. Consult an Authorized Mazda Dealer.

**NOTE**
If the vehicle is driven on a road with less traffic and few vehicles that the radar sensors can detect, the system may pause (The BSM OFF indicator light in the instrument panel flashes). However, it does not indicate a malfunction.

*Cruise Main Indicator Light (Amber)*
The indicator light illuminates green when a cruising speed has been set.

*Cruise Set Indicator Light (Green)*

The indicator light has two colors.

*Some models.*

Warning/Indicator Lights and Beep Sounds

▶ Lights-On Indicator Light

This indicator light illuminates when the exterior lights and dashboard illumination are on.

▶ Turn Signal/Hazard Warning Indicator Lights

When operating the turn signal lights, the left or right turn signal indicator light flashes to indicate which turn signal light is operating (page 5-67).

When operating the hazard warning lights, both turn signal indicator lights flash (page 5-76).

NOTE
If an indicator light remains illuminated (does not flash) or if it flashes abnormally, one of the turn signal bulbs may be burned out.

Beep Sounds

▶ Air Bag/Front Seat Belt Pretensioner System Warning Beep

If a malfunction is detected in the air bag/front seat belt pretensioner systems and the warning light, a warning beep sound will be heard for about 5 seconds every minute.

The air bag and seat belt pretensioner system warning beep sound will continue to be heard for approximately 35 minutes. Have your vehicle inspected at an Authorized Mazda Dealer as soon as possible.

⚠️ WARNING

Do not drive the vehicle with the air bag/front seat belt pretensioner system warning beep sounding:

Driving the vehicle with the air bag/front seat belt pretensioner system warning beep sounding is dangerous. In a collision, the air bags and the front seat belt pretensioner system will not deploy and this could result in death or serious injury. Contact an Authorized Mazda Dealer to have the vehicle inspected as soon as possible.
Driving Your Mazda

Warning/Indicator Lights and Beep Sounds

▼ Seat Belt Warning Beep
If the driver's seat belt is not fastened when the ignition is switched ON, a beep sound will be heard for about 6 seconds. If the driver's seat belt is not fastened and the vehicle is driven at a speed faster than about 20 km/h (12 mph), a beep sound will be heard again for a specified period of time. Refer to Seat Belt Warning Light/Beep on page 5-50.

▼ Ignition Key Reminder
If the ignition is switched off or the ignition is switched to ACC with the key inserted, a continuous beep sound will be heard when the driver's door is opened.

▼ Lights-On Reminder *
If lights are on and the key is removed from the ignition switch, a continuous beep sound will be heard when the driver's door is opened.

NOTE
When the advanced keyless function is used and the start knob is in the ACC position, the Start Knob Not in Lock Warning Beep (page 3-18) overrides the lights-on reminder.

▼ Parking Brake Reminder
If the parking brake has not been completely released and the vehicle is driven at about 5 km/h (3 mph) or faster, a continuous beep sound will be heard to notify the driver that the parking brake has not been released.

▼ Tire Inflation Pressure Warning Beep *
The warning beep sound will be heard for about 3 seconds when there is any abnormality in tire inflation pressures (page 5-28).

▼ Advanced Keyless Warning (with Advanced Key)
Warning indicators for the advanced key, such as “the advanced key removed from vehicle warning”, use a beep sound and warning/indicator lights in the instrument cluster. Refer to Warning and Beep Sounds on page 3-18.
Headlights

Turn the headlight switch to turn the headlights, other exterior lights and dashboard illumination on or off.

**NOTE**
- To prevent discharging the battery, do not leave the lights on while the engine is off unless safety requires them.
- If the light switch is left on, the lights will automatically switch off (if equipped) approximately 30 seconds after switching the ignition to ACC or switching the ignition off.

**Without AUTO position**

</tr>
</tbody>
</table>

When the headlight switch is in the AUTO position and the ignition is switched ON, the light sensor senses the surrounding lightness or darkness and automatically turns the headlights, other exterior lights and dashboard illumination on or off (see chart above).

⚠️ CAUTION

- Do not shade the light sensor by adhering a sticker or a label on the windshield. Otherwise the light sensor will not operate correctly.

- The light sensor also works as a rain sensor for the auto-wiper control. Keep hands and scrapers clear of the windshield when the wiper lever is in the AUTO position and the ignition is switched ON as fingers could be pinched or the wipers and wiper blades damaged when the wipers activate automatically. If you are going to clean the windshield, be sure the wipers are turned off completely — this is particularly important when clearing ice and snow — when it is particularly tempting to leave the engine running.
**NOTE**

- The headlights, other exterior lights and dashboard illumination may not turn off immediately even if the surrounding area becomes well-lit because the light sensor determines that it is nighttime if the surrounding area is continuously dark for several minutes such as inside long tunnels, traffic jams inside tunnels, or in indoor parking lots.  
  In this case, the light turns off if the light switch is turned to the OFF position.
- The dashboard illumination can be adjusted by rotating the knob in the instrument cluster. Also, the day/night mode can be changed by pressing the knob. To adjust the brightness of the dashboard illumination: Refer to Dashboard Illumination on page 5-42.
- The sensitivity of the AUTO lights may be changed by an Authorized Mazda Dealer.

**Xenon fusion headlight bulbs**

The low-beam bulbs of the headlights have xenon fusion bulbs that produce a bright white beam over a wide area.

**WARNING**

*Do not replace the xenon fusion bulbs yourself*

Replacing the xenon fusion bulbs yourself is dangerous. Because the xenon fusion bulbs require high voltage, you could receive an electric shock if the bulbs are handled incorrectly. Consult an Authorized Mazda Dealer when the replacement is necessary.

**NOTE**

If the headlights flicker, or the brightness weakens, the bulb-life may be depleted and a replacement is necessary. Consult an Authorized Mazda Dealer.

▼ **Lights-On Reminder**

If lights are on and the key is removed from the ignition switch, a continuous beep sound will be heard when the driver's door is opened.

**NOTE**

When the advanced keyless function is used and the start knob is in the ACC position, the Start Knob Not in Lock Warning Beep (page 3-18) overrides the lights-on reminder.

▼ **Headlight High-Low Beam**

Press the lever forward to turn on the high beams.

Pull the lever back to its original position for the low beams.
Switches and Controls

Flashing the Headlights

To flash the headlights, pull the lever fully towards you (the headlight switch does not need to be on). The lever will return to the normal position when released.

**Daytime Running Lights (Canada)**

In Canada, vehicles must be driven with the headlights on during daytime operation.

For that reason, the daytime running lights automatically turn on when the ignition is switched ON.

**NOTE**

*The Daytime Running Lights turn off when the parking brake is applied.*
**Turn and Lane-Change Signals**

**Turn Signals**

Move the signal lever down (for a left turn) or up (for a right turn) to the stop position. The signal will self-cancel after the turn is completed.

If the indicator light continues to flash after a turn, manually return the lever to its original position.

*(Type A)*

![Diagram of turn signals](image1)

*(Type B)*

![Diagram of turn signals](image2)

**Lane-change signals**

Move the lever slightly toward the direction of the change—until the indicator flashes—and hold it there. It will return to the off position when released.

**NOTE**

*If an indicator light stays on without flashing or if it flashes abnormally, one of the turn signal bulbs may be burned out.*

Green indicators on the dashboard show which signal is working.
Fog Lights *

Use this switch to turn on the fog lights. They help you to see as well as to be seen.

To turn the fog lights on, rotate the fog light switch to the □ position. The headlight switch must be in the position before turning on the fog lights.

Type A

Fog light switch

OFF

□

Type B

Fog light switch

□

OFF

To turn them off, rotate the fog light switch to the OFF position or turn the headlight switch to the □ (Type A)/ (Type B) position.

NOTE

• The fog lights will turn off when the headlights are set at high beam.
• (With auto-light control) If the fog light switch is in the ON position and the headlight switch is in the AUTO position, the fog lights will turn on when the headlights, the exterior lights and dashboard illumination turn automatically.

*Some models.
Windshield Wipers and Washer

The ignition must be switched ON.

**WARNING**

*Use only windshield washer fluid or plain water in the reservoir:*
- Using radiator antifreeze as washer fluid is dangerous. If sprayed on the windshield, it will dirty the windshield, affect your visibility, and could result in an accident.

*Only use windshield washer fluid mixed with anti-freeze protection in freezing weather conditions:*
- Using windshield washer fluid without anti-freeze protection in freezing weather conditions is dangerous as it could freeze on the windshield and block your vision which could cause an accident. In addition, make sure the windshield is sufficiently warmed using the defroster before spraying the washer fluid.

**NOTE**

Because heavy ice and snow can jam the wiper blades, the wiper motor is protected from motor breakdown, overheating and possible fire by a circuit breaker. This mechanism will automatically stop operation of the blades, but only for about 5 minutes. If this happens, turn off the wiper switch and park off the right-of-way, and remove the snow and ice.

After 5 minutes, turn on the switch and the blades should operate normally. If they do not resume functioning, consult an Authorized Mazda Dealer as soon as possible. Drive to the side of the road and park off the right-of-way. Wait until the weather clears before trying to drive with the wipers inoperative.

▼ Windshield Wipers

Turn the wipers on by pressing the lever up or down.

With INT position

1. OFF
2. ↓
3. ↑
4. ↓
Switches and Controls

### Variable-speed intermittent wipers

Set the lever to the intermittent position and choose the interval timing by rotating the ring.

### AUTO (Auto-wiper control)

When the wiper lever is in the AUTO position, the rain sensor senses the amount of rainfall on the windshield and turns the wipers on or off automatically (off—intermittent—low speed—high speed).

The sensitivity of the rain sensor can be adjusted by turning the switch on the wiper lever. From the center position (normal), rotate the switch downward for higher sensitivity (faster response) or rotate it upward for less sensitivity (slower response).
Switches and Controls

Type A

Higher sensitivity

Switch

Center position

Less sensitivity

CAUTION

Do not shade the rain sensor by adhering a sticker or a label on the windshield. Otherwise the rain sensor will not operate correctly.

Type B

Less sensitivity

Switch

Center position

Higher sensitivity
When the wiper lever is in the AUTO position and the ignition is switched ON, the wipers may move automatically in the following cases:

- If the windshield above the rain sensor is touched or wiped with a cloth.
- If the windshield is struck with a hand or other object from either outside or inside the vehicle.

Keep hands and scrapers clear of the windshield when the wiper lever is in the AUTO position and the ignition is switched ON as fingers could be pinched or the wipers and wiper blades damaged when the wipers activate automatically.

If you are going to clean the windshield, be sure the wipers are turned off completely—this is particularly important when clearing ice and snow—when it is most likely that the engine is left running.

NOTE

- Switching the auto-wiper lever from the OFF to the AUTO position while driving at a vehicle speed of 4 km/h (2 mph) or higher (or after driving the vehicle) activates the windshield wipers once, after which they operate according to the rainfall amount.
- The auto-wiper control may not operate when the rain sensor temperature is about -10 °C (14 °F) or lower, or about 85 °C (185 °F) or higher.
- If the windshield is coated with water repellent, the rain sensor may not be able to sense the amount of rainfall correctly and auto-wiper control may not operate properly.
- If dirt or foreign matter (Such as ice or matter containing salt water) adheres to the windshield above the rain sensor or if the windshield is iced, it could cause the wipers to move automatically. However, if the wipers cannot remove this ice, dirt or foreign matter, the auto-wiper control will stop operation. In this case, set the wiper lever to the low speed position or high speed position for manual operation, or remove the ice, dirt or foreign matter by hand to restore the auto-wiper operation.
- If the auto-wiper lever is left in the AUTO position, the wipers could operate automatically from the effect of strong light sources, electromagnetic waves, or infrared light because the rain sensor uses an optical sensor. It is recommended that the auto-wiper lever be switched to the OFF position other than when driving the vehicle under rainy conditions.
Windshield Washer

Pull the lever toward you and hold it to spray washer fluid.

NOTE
With the wiper lever in the OFF or intermittent position/AUTO position, the wipers will operate continuously until the lever is released.

If the washer does not work, inspect the fluid level (page 8-24). If it's normal, consult an Authorized Mazda Dealer.

Rear Window Wiper and Washer

The ignition must be switched ON.

Rear Window Wiper

Type A

Turn the wiper on by turning the rear wiper/washer switch.

ON — Normal
INT — Intermittent
Driving Your Mazda

Switches and Controls

▼Rear Window Washer
To spray washer fluid, turn the rear wiper/washer switch to the \( \) position. After the switch is released, the washer will stop. If the washer does not work, inspect the fluid level (page 8-24). If it's normal and the washer still does not work, consult an Authorized Mazda Dealer.

Rear Window Defroster
The rear window defroster clears frost, fog, and thin ice from the rear window.

The ignition must be switched ON.

Press the switch to turn on the rear window defroster. The rear window defroster operates for about 15 minutes and turns off automatically. The indicator light illuminates during operation. The defroster operation can be confirmed by the indicator in the display.

To turn off the rear window defroster before the 15 minutes has elapsed, press the switch again.

![Indicator light](image)

**CAUTION**
Do not use sharp instruments or window cleaners with abrasives to clean the inside of the rear window surface. They may damage the defroster grid inside the window.

**NOTE**
This defroster is not designed for melting snow. If there is an accumulation of snow on the rear window, remove it before using the defroster.
Driving Your Mazda

Switches and Controls

▼ Mirror Defroster *

To turn on the mirror defrosters, switch the ignition ON and press the rear window defroster switch (page 5-74).

Horn

To sound the horn, press the mark on the steering wheel.

* Some models. 5-75
Hazard Warning Flasher

The hazard warning lights should always be used when you stop on or near a roadway in an emergency.

The hazard warning lights warn other drivers that your vehicle is a traffic hazard and that they must take extreme caution when near it.

Depress the hazard warning flasher and all the turn signals will flash.

NOTE
- The turn signals do not work when the hazard warning lights are on.
- Check local regulations about the use of hazard warning lights while the vehicle is being towed to verify that it is not in violation of the law.

HomeLink Wireless Control System*

NOTE
HomeLink and HomeLink house are registered trademarks of Johnson Controls.

The HomeLink system replaces up to 3 hand-held transmitters with a single built-in component in the auto-dimming mirror. Pressing the HomeLink button on the auto-dimming mirror activates garage doors, gates and other devices surrounding your home.

*Some models.
**WARNING**

Do not use the HomeLink system with any garage door opener that lacks the safety stop and reverse feature:

Using the HomeLink system with any garage door opener that lacks the safety stop and reverse feature as required by federal safety standards is dangerous. (This includes garage doors manufactured before April 1, 1982.)

Using these garage door openers can increase the risk of serious injury or death. For further information, contact HomeLink at 1-800-355-3515 or www.homelink.com or your Authorized Mazda Dealer.

Always check the areas surrounding garage doors and gates for people or obstructions before programming or during operation of the HomeLink system:

Programming or operating the HomeLink system without verifying the safety of areas surrounding garage doors and gates is dangerous and could result in an unexpected accident and serious injury if someone were to be hit.

**CAUTION**

HomeLink has been tested and complies with FCC and Industry Canada rules. Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the device.

**NOTE**

FCC ID: NZLOBIHL3
CANADA:4112A-OBIHL3
This device complies with FCC rules part 15. Operation is subject to the following conditions:

1. This device may not cause any harmful interference and
2. This device must accept any interference that may be received including interference that may cause undesired operation.

The programming will not be erased even if the battery is disconnected.

*Pre-programming the HomeLink System*

It is recommended that a new battery be placed in the hand-held transmitter of the device being programmed to HomeLink for quicker training and accurate transmission of the radio-frequency signal.

- Verify that there is a remote control transmitter available for the device you would like to program.
- Disconnect the power to the device.

*Programming the HomeLink System*

When programming a garage door opener or a gate, disconnect the power to these devices before performing programming, as continuous operation of the devices could damage the motor.
The HomeLink system provides 3 buttons which can be individually selected and programmed using the transmitters for current, on-market devices as follows:

1. Press and hold the two outer HomeLink buttons (buttons one and three) — releasing only when the indicator light begins to flash (after 20 seconds). Do not hold the buttons for longer than 30 seconds and do not repeat step 1 to program a second and/or third hand-held transmitter to the remaining two HomeLink buttons.

2. Position the end of your hand-held transmitter 2.5—7.5 cm (1—3 inches) away from the HomeLink button you wish to program while keeping the indicator light in view.

3. Simultaneously press and hold both the chosen HomeLink and hand-held transmitter buttons. Do not release the buttons until step 4 has been completed.

**NOTE**
Some gate operators and garage door openers may require you to replace this Programming Step 3 with procedures noted in the “Gate Operator/Canadian Programming” section.

4. After the HomeLink indicator light changes from a slow to a rapidly blinking light, release both the HomeLink and hand-held transmitter buttons.

**NOTE**
If the HomeLink indicator light does not change to a rapidly blinking light, contact HomeLink at www.homelink.com or call 1-800-355-3515 for assistance.

5. Press and hold the just-trained HomeLink button and observe the indicator light.

If the indicator light stays on constantly, programming is complete and your device should activate when the HomeLink button is pressed and released.

**NOTE**
To program the remaining two HomeLink buttons, begin with “Programming” — step 2. Do not repeat step 1.

If the indicator light blinks rapidly for two seconds and then turns to a constant light, continue with “Programming” steps 6—8 to complete the programming of a rolling code equipped device (most commonly a garage door opener).

6. At the garage door opener receiver (motor-head unit) in the garage, locate the “learn” or “smart” button. This can usually be found where the hanging antenna wire is attached to the motor-head unit.

7. Firmly press and release the “learn” or “smart” button. (The name and color of the button may vary by manufacturer.)

**NOTE**
There are 30 seconds in which to initiate step 8.

8. Return to the vehicle and firmly press, hold for two seconds and release the programmed HomeLink button. Repeat the “press/hold/release” sequence a second time, and, depending on the brand of the garage door opener (or other rolling code equipped device), repeat this sequence a third time to complete the programming process.
HomeLink should now activate your rolling code equipped device.

**NOTE**

To program the remaining two HomeLink buttons, begin with “Programming” — step 2. Do not repeat step 1.

For questions or comments, please contact HomeLink at [www.homelink.com](http://www.homelink.com) or 1-800-355-3515.

**Gate operator/Canadian Programming**

Canadian radio-frequency laws require transmitter signals to “time-out” (or quit) after several seconds of transmission — which may not be long enough for HomeLink to pick up the signal during programming. Similar to this Canadian law, some U.S. gate operators are designed to “time-out” in the same manner.

If you live in Canada or you are having difficulties programming a gate operator by using the “Programming” procedures (regardless of where you live), replace “Programming HomeLink” step 3 with the following:

**NOTE**

If programming a garage door opener or gate operator, it is advised to unplug the device during the “cycling” process to prevent possible overheating.

Continue to press and hold the HomeLink button while you press and release — every two seconds (“cycle”) your hand-held transmitter until the frequency signal has successfully been accepted by HomeLink. (The indicator light will flash slowly and then rapidly.) Proceed with “Programming” step 4 to complete.

**Operating the HomeLink System**

Press the programmed HomeLink button to operate a programmed device. The code will continue being transmitted for a maximum of 20 seconds.

**Reprogramming the HomeLink system**

To program a device to HomeLink using a HomeLink button previously trained, follow these steps:

1. Press and hold the desired HomeLink button. **DO NOT** release the button.

2. The indicator light will begin to flash after 20 seconds. Without releasing the HomeLink button, proceed with “Programming” - step 2.

**Erasing Programmed HomeLink Buttons**

To erase the existing programming from all three operating channels, press and hold the two outside buttons (extView,  ) on the auto-dimming mirror until the HomeLink indicator light begins to flash after approximately 20 seconds. Verify that the programming has been erased when you resell the vehicle.

Operating Tips

▼ Operating the Climate Control System
Operate the climate control system with the engine running.

**NOTE**
To prevent the battery from being discharged, do not leave the fan control dial on for a long period of time with the ignition switched ON when the engine is not running.

▼ Clearing the Air Inlet
Clear all obstructions such as leaves, snow and ice from the hood and the air inlet in the cowl grille to improve the system efficiency.

▼ Foggy Windows
The windows may fog up easily in humid weather. Use the climate control system to defog the windows.

To help defog the windows, operate the air conditioner to dehumidify the air.

**NOTE**
The air conditioner may be used along with the heater to dehumidify the air.

▼ Outside/Recirculated Air Position
Use the outside air position in normal conditions. The recirculated air position should be used only when driving on dusty roads or for quick cooling of the interior.

▼ Parking in Direct Sunlight
If the vehicle has been parked in direct sunlight during hot weather, open the windows to let warm air escape, then run the climate control system.

▼ Not Using for a Long Period
Run the air conditioner about 10 minutes at least once a month to keep internal parts lubricated.

▼ Check the Refrigerant before the Weather Gets Hot
Have the air conditioner checked before the weather gets hot. Lack of refrigerant may make the air conditioner less efficient. Consult an Authorized Mazda Dealer for refrigerant inspection.

The air conditioner is filled with HFC134a (R134a), a refrigerant that will not damage the ozone layer.
If the air conditioner is low on refrigerant or has a malfunction, consult an Authorized Mazda Dealer.

▼ Replacement of the Cabin Air Filter
If your vehicle is equipped with an air filter for the air conditioner, it is necessary to change the filter periodically as indicated in scheduled maintenance (page 8-3). Consult an Authorized Mazda Dealer for replacement of the cabin air filter.

\textbf{Sunlight/Temperature Sensor}

The fully automatic air conditioner function measures inside and outside temperatures, and the intensity of direct sunlight. It then sets temperatures inside the passenger compartment accordingly.

\textbf{CAUTION}

\emph{Do not obstruct either sensor, otherwise the automatic air conditioner will not operate properly.}
Interior Comfort

Climate Control System

Vent Operation (Front)

▼ Adjusting the Vents

Directing airflow
You can direct air flow by moving the adjustment knob.

Opening/closing vents
The two outside vents can be opened and closed with wheel.

NOTE
When using the air conditioner, mist may come out from the vents. This is not a sign of trouble but a result of humid air being suddenly cooled.

OFF switch

Passenger temperature control dial
DUAL switch

Rear window defroster switch
Mode selector switch

A/C switch
OUTSIDE (Ambient temperature) switch
Control Switches

**AUTO switch**

By pressing the AUTO switch, the following functions will be automatically controlled in accordance with the selected set temperature:
- Airflow temperature
- Amount of airflow
- Selection of airflow mode
- Outside/Recirculated air selection
- Air conditioner operation

**NOTE**

**AUTO switch indicator light**
- When on, it indicates AUTO operation, and the system will function automatically.
- If any of the following dials or switches are operated while in AUTO control, the AUTO switch indicator turns off:
  - Mode selector switch
  - Fan control dial
  - Windshield defroster switch

The functions for dials and switches other than those operated in the above continue to operate in AUTO control.

**OFF switch**

Pressing the OFF switch shuts off the climate control system.

**Temperature control dial**

This dial controls temperature. Turn it clockwise for hot and counterclockwise for cold.
- When the DUAL switch is off:
  Turn the driver temperature control dial to control the temperature.
- When the DUAL switch is on:
  Turn the driver or front passenger temperature control dial to control the temperature.

**NOTE**

The system changes to the individual operation mode (DUAL switch indicator light illuminated) by turning the front passenger temperature control dial even when the DUAL switch is off, which allows individual control of the set temperature for the driver and front passenger.

**Fan control dial**

The fan has seven speeds. The selected speed will be displayed.
Mode selector switch

The desired airflow mode can be selected (page 6-5).

**NOTE**
- With the airflow mode set to the position and the temperature control dial set at a medium temperature, heated air is directed to the feet and a comparably lower air temperature will flow through the central, left and right vents.
- To set the air vent to , press the windshield defroster switch.
- In the position, the air conditioner is automatically turned on and the mode is automatically selected to defrost the windshield. In the position, the mode cannot be changed to the mode.

A/C switch

Pressing the A/C switch while the AUTO switch is turned on will turn off the air conditioning (cooling/dehumidifying functions). The air conditioning can be turned on and off by pressing the A/C switch while the fan control dial is on.

**NOTE**
- The air conditioning operates when the A/C switch is pressed even if the fan is off.
- The air conditioner may not function when the outside temperature approaches 0 °C (32 °F). (Indicator light remains on even when system is off.)

Air intake selector

Outside or recirculated air positions can be selected. Press the switch to select outside/recirculated air positions.

**Recirculated air position (indicator light illuminated)**
Use this position when going through tunnels, driving in congested traffic (high engine exhaust areas) or when quick cooling is desired.

**Outside air position (indicator light turned off)**
Use this position for normal conditions and defogging.

**WARNING**

Do not use the position in cold or rainy weather:
Using the position in cold or rainy weather is dangerous as it will cause the windows to fog up. Your vision will be hampered, which could lead to a serious accident.

6-8
**OUTSIDE (Ambient Temperature) switch**

Press the OUTSIDE switch to display the ambient temperature.

**NOTE**
- The displayed ambient temperature may vary from the actual ambient temperature depending on the surrounding area and vehicle conditions.
- Press the OUTSIDE switch for three seconds or longer to switch the display from Fahrenheit to Centigrade or vice versa.
- Press the OUTSIDE switch again to switch the display from ambient temperature to the temperature set for the air conditioner.

**DUAL switch**

Use the DUAL switch to change the mode between the individual operation (driver and passenger) and interconnection (simultaneous) modes.

**Individual operation mode (indicator light illuminated)**
The set temperature can be controlled individually for the driver and front passenger.

**Interconnection mode (indicator light turned off)**
The set temperature for the driver and front passenger is controlled simultaneously.

**NOTE**
- The set temperature for the front passenger changes to that of the driver while in the interconnected mode.
- DUAL is displayed on the information display while in the individual operation mode.
- The system changes to the interconnection mode automatically if the windshield defroster switch is pressed. The system will not change to the individual operation mode by pressing the DUAL switch or turning the front passenger temperature control dial.

**Windshield defroster switch**

Press the switch to defrost the windshield and front door windows.
**NOTE**

In the position, the air conditioner is automatically turned on and the mode is automatically selected to defrost the windshield. In the position, the mode cannot be changed to the mode.

**Operation of Automatic Air Conditioning**

1. Press the AUTO switch. Selection of the airflow mode, air intake selector and amount of airflow will be automatically controlled.

2. Use the temperature control dial to select a desired temperature. Press the DUAL switch or turn the front passenger temperature control dial to control the set temperature individually for the driver and front passenger.

To turn off the system, press the OFF switch.

**NOTE**

- Setting the temperature to the maximum high or low will not provide the desired temperature at a faster rate.
- When selecting heat, the system will restrict airflow until it has warmed to prevent cold air from blowing out of the vents.

**Windshield Defrosting and Defogging**

Press the windshield defroster switch. In this position, the position is automatically selected, and the air conditioner automatically turns on. The air conditioner will directly dehumidify the air to the front windshield and side windows (page 6-5). Airflow amount will be increased.

**WARNING**

*Set the temperature control to the hot or warm position when defogging (position):*

Using the position with the temperature control set to the cold position is dangerous as it will cause the outside of the windshield to fog up. Your vision will be hampered, which could lead to a serious accident.
NOTE

- Press the windshield defroster switch to change the mode to the interconnection mode automatically. The system does not change to the individual operation mode by pressing the DUAL switch or turning the front passenger temperature control dial.
- Use the temperature control dial to increase the air flow temperature and defog the windshield more quickly.
Adjusting the Vents

Directing airflow
You can direct air flow by moving the adjustment knob.

NOTE
When using the air conditioner, mist may come out from the vents. This is not a sign of trouble but a result of humid air being suddenly cooled.
Selecting the Airflow Mode

For vehicles with rear full-auto air conditioning, the airflow mode can be selected according to the purpose of use.

Instrument panel Vents

Floor Vents

Instrument panel and Floor Vents
Control Switches

**Rear switch**
Press the rear switch to operate the rear air conditioning.
The indicator illuminates to indicate that the rear air conditioning is operating.

**AUTO switch**
By pressing the AUTO switch the following functions will be automatically controlled in accordance with the set temperature:
- Airflow temperature
Interior Comfort

Climate Control System

- Amount of airflow
- Selection of airflow mode

**OFF switch**

Pressing the OFF switch shuts off the climate control system.

**Temperature control switch**

This switch controls temperature. Press ▲ for hot and ▼ for cold.

**Fan control switch**

The fan has five speeds.

**Mode selector switch**

The desired airflow mode can be selected (page 6-13).

▼**Operation of Automatic Air Conditioning**

**Operation from front seats**

1. Turn the front air conditioning on.
2. Press the rear switch. The rear air conditioning operates.

3. Selection of the airflow mode, airflow amount and temperature will be automatically controlled to the same temperature setting as the front air conditioner for the driver's side.
NOTE
• If the AUTO switch is pressed while the front A/C switch is off, the rear air conditioning operates only to circulate air.
• Setting the temperature to the maximum high or low will not provide the desired temperature at a faster rate.
• When selecting heat, the system will restrict airflow until it has warmed to prevent cold air from blowing out of the vents.
• When the rear air conditioner is controlled to the same temperature setting as the front air conditioner for the driver’s side, “SYNC” is displayed on the rear screen.

Operation from rear seats
1. Turn the front air conditioning on.
2. Press the AUTO switch. The selection of the airflow mode and airflow amount will be automatically controlled.
3. Use the temperature control switch to set the desired temperature.
4. To turn off the system, press the OFF switch.
Antenna

**AM/FM Radio Antenna**

The antenna is printed onto the window glass.

**CAUTION**

*When washing the inside of the window which has an antenna, use a soft cloth dampened in lukewarm water, gently wiping the antenna lines. Use of glass cleaning products could damage the antenna.*

**Satellite Radio Antenna** *

The satellite radio antenna receives SIRIUS signals.

---

Operating Tips for Audio System

**WARNING**

*Do not adjust the audio control switches while driving the vehicle:*

Adjusting the audio while driving the vehicle is dangerous as it could distract your attention from the vehicle operation which could lead to a serious accident. Always adjust the audio while the vehicle is stopped. Even if the audio control switches are equipped on the steering wheel, learn to use the switches without looking down at them so that you can keep your maximum attention on the road while driving the vehicle.

**CAUTION**

➢ *For the purposes of safe driving, adjust the audio volume to a level that allows you to hear sounds outside of the vehicle including car horns and particularly emergency vehicle sirens.*

➢ *Do not install non-genuine speakers since their vibration may affect the Dynamic Stability Control (DSC)/Roll Stability Control (RSC) sensors.*

**NOTE**

- To prevent the battery from being discharged, do not leave the audio system on for a long period of time when the engine is not running.
- If a cellular phone or CB radio is used in or near the vehicle, it could cause noise to occur from the audio system, however, this does not indicate that the system has been damaged.

*Some models.*
Radio Reception

AM characteristics
AM signals bend around such things as buildings or mountains and bounce off the ionosphere. Therefore, they can reach longer distances than FM signals. Because of this, two stations may sometimes be picked up on the same frequency at the same time.

FM characteristics
An FM broadcast range is usually about 40—50 km (25—30 miles) from the source. Because of extra coding needed to break the sound into two channels, stereo FM has even less range than monaural (non-stereo) FM.

Signals from an FM transmitter are similar to beams of light because they do not bend around corners, but they do reflect. Unlike AM signals, FM signals cannot travel beyond the horizon. Therefore, FM stations cannot be received at the great distances possible with AM reception.

Atmospheric conditions can also affect FM reception. High humidity will cause poor reception. However, cloudy days may provide better reception than clear days.

Multipath noise
Since FM signals can be reflected by obstructions, it is possible to receive both the direct signal and the reflected signal at the same time. This causes a slight delay in reception and may be heard as a broken sound or a distortion. This problem may also be encountered when in close proximity to the transmitter.
Flutter/Skip noise
Signals from an FM transmitter move in straight lines and become weak in valleys between tall buildings, mountains, and other obstacles. When a vehicle passes through such an area, the reception conditions may change suddenly, resulting in annoying noise.

Weak signal noise
In suburban areas, broadcast signals become weak because of distance from the transmitter. Reception in such fringe areas is characterized by sound breakup.

Strong signal noise
This occurs very close to a transmitter tower. The broadcast signals are extremely strong, so the result is noise and sound breakup at the radio receiver.

Station drift noise
When a vehicle reaches the area of two strong stations broadcasting at similar frequencies, the original station may be temporarily lost and the second station picked up. At this time there will be some noise from this disturbance.
Operating Tips for CD Player/In-Dash CD Changer

Condensation phenomenon
Immediately after turning on the heater when the vehicle is cold, the CD or optical components (prism and lens) in the CD player/In-dash CD changer may become clouded with condensation. At this time, the CD will eject immediately when placed in the unit. A clouded CD can be corrected simply by wiping it with a soft cloth. Clouded optical components will clear naturally in about an hour. Wait for normal operation to return before attempting to use the unit.

Handling the CD player/In-dash CD changer
The following precautions should be observed.

• Do not spill any liquid on the audio system.

• Do not insert any objects, other than CDs, into the slot.

• The CD revolves at high speed within the unit. Defective (cracked or badly bent) CDs should never be used.

• Do not use non-conventional discs such as heart-shaped, octagonal discs, etc. The disc may not eject resulting in a malfunction.

• If the memory portion of the CD is transparent or translucent, do not use the disc.

Transparent
A new CD may have rough edges on its inner and outer perimeters. If a disc with rough edges is used, proper setting will not be possible and the CD player/In-dash CD changer will not play the CD. In addition, the disc may not eject resulting in a malfunction. Remove the rough edges in advance by using a ball-point pen or pencil as shown below. To remove the rough edges, rub the side of the pen or pencil against the inner and outer perimeter of the CD.

When driving over uneven surfaces, the sound may jump.

The CD player/In-dash CD changer has been designed to play CDs bearing the identification logo as shown below. No other discs can be played.

Use discs that have been legitimately produced. If illegally-copied discs such as pirated discs are used, the system may not operate properly.

Be sure never to touch the signal surface when handling the CDs. Pick up a CD by grasping the outer edge or the edge of the hole and the outer edge.

Do not stick paper or tape on the CD. Avoid scratching the reverse side (the side without a label). The disc may not eject resulting in a malfunction.

Dust, finger smudges, and dirt can decrease the amount of light reflected from the signal surface, thus affecting sound quality. If the CD should become soiled, gently wipe it with a soft cloth from the center of the CD to the edge.
Interior Comfort

Audio System

- Do not use record sprays, antistatic agents, or household spray cleaners. Volatile chemicals such as benzine and thinner can also damage the surface of the CD and must not be used. Anything that can damage, warp, or fog plastic should never be used to clean CDs.
- Insert discs one by one. If two discs are inserted at the same time, the system may not operate properly.
- The CD player/In-dash CD changer ejects the CD if the CD is inserted upside down. Also dirty and/or defective CDs may be ejected.
- Do not insert cleaning discs in the CD player/In-dash CD changer.
- Do not insert any disc with a peel-off seal affixed to it.
- This unit may not be able to play certain CD-R/CD-RWs made using a computer or music CD recorder due to disc characteristics, scratches, smudges, dirt, etc., or due to dust or condensation on the lens inside the unit.
- Storing CDs in the vehicle exposed to direct sunlight or high temperature may damage the CD-R/CD-RWs, and make them unplayable.
- CD-R/CD-RW exceeding 700 MB cannot be played.
- This unit may not be able to play certain discs made using a computer due to the application (writing software) setting used. (For details, consult the store where the application was purchased.)
- It is possible that certain text data, such as titles, recorded on a CD-R/CD-RW may not be displayed when musical data (CD-DA) is playing.
- The period from when a CD-RW is inserted to when it begins playing is longer than a normal CD or CD-R.
- Completely read the instruction manual and cautions for CD-R/CD-RWs.
- Do not use discs with cellophane tape adhering, partially peeled off labels, or adhesive material exuding from the edges of the CD label. Also, do not use discs with a commercially-available CD-R label affixed. The disc may not eject resulting in a malfunction.

▼ Operating tips for MP3

NOTE
Supply of this product only conveys a license for private, non-commercial use and does not convey a license nor imply any right to use this product in any commercial (i.e. revenue-generating) real time broadcasting (terrestrial, satellite, cable and/or any other media), broadcasting/streaming via the Internet, intranets and/or other networks or in other electronic content distribution systems, such as pay-audio or audio-on-demand applications. An independent license for such use is required. For details, please visit http://www.mp3licensing.com.

- This audio system handles MP3 files that have been recorded on CD-R/CD-RW/CD-ROMs. Discs that have been recorded using the following formats can be played:
  - ISO 9660 level 1
  - ISO 9660 level 2
  - Joliet extended format
  - Romeo extended format
- This unit handles MP3 files conforming to the MP3 format containing both header frames and data frames.
- This unit can play multi-session recorded discs that have up to 40 sessions.
This unit can play MP3s with sampling frequencies of 16/22.05/24/32/44.1/48 kHz.

This unit can play MP3 files that have been recorded in bit rates of 8 kbps to 320 kbps. Nonetheless, to insure enjoyment of music with consistent sound quality, it is recommended to use discs that have been recorded at a bit rate of 128 kbps or more.

If a disc has both music data (CD-DA) and MP3 files, playback of the two file types differs depending on how the disc was recorded.

Packet written discs cannot be played on this unit.

This unit does not play CDs recorded using MP3i (MP3 interactive), MP3 PRO and RIFF MP3 formats.

**About folders and files**

- The order of hierarchy for MP3 files and folders during playback or other functions is from shallow to deep. The arrangement and playing order of a recorded disc containing MP3 files is as follows:
  - **File number**
    A numerical file number is assigned to each file in a folder in the order of hierarchy from shallow to deep.
  - **Folder number**
    A numerical folder number is assigned to each folder in the order of hierarchy from shallow to deep.

**NOTE**

Folders and tracks (files) within the same hierarchy play in the order they were written to the disc depending on the write software.

- The folder order is automatically assigned and this order cannot be optionally set.
- Any folder without an MP3 file will be ignored. (It will be skipped and the folder number will not be displayed.)
- MP3 files not conforming to the MP3 format containing both header frames and data frames will be skipped and not played.
- This unit will play MP3 files that have up to eight levels. However, the more levels a disc has, the longer it will take to initially start playing. It is recommended to record discs with two levels or less.
- A single disc with up to 512 files can be played and a single folder with up to 255 files can be played.
- When naming an MP3 file, be sure to add an MP3 file extension (.mp3) after the file name.
The maximum number of characters that can be used for file names is as follows. However, this unit will only display up to 32 characters, including the file extension (.mp3).

| ISO9660 level 1 | 12 |
| ISO9660 level 2 | 31 |
| Joliet extended format | 64 |
| Romeo extended format | 128 |

* English one-byte characters (capitalized only) and underscore “_” are available.

**CAUTION**

This unit can only play MP3 files that have an MP3 file extension (.mp3) attached. Do not attach an MP3 file extension to any other type file as it could cause noise to be emitted or a malfunction in the unit.

**About ID3 Tag display**

- This unit can only display ID3 Tag album, track and artist names that have been input using Ver.1.0/1.1/2.2/2.3 formats. Any other data that may have been input cannot be displayed.
- This unit can only display English (including numerals) one-byte characters. Use only English (including numerals) one-byte characters when inputting ID3 tags. Two-byte characters and some special symbols cannot be displayed.

**Specialized glossary**

**MP3**

Abbreviation for “MPEG Audio Layer 3”. A technical standard for audio compression as decided by an ISO (International Organization for Standardization) MPEG working group. Use of MP3 allows for audio data to be compressed to approximately a tenth of the source data size.

**ISO 9660**

An international standard for logical formatting of CD-ROM files and folders. It is divided into three separate levels based on differences in file naming procedures, data configuration and other characteristics.

**Multi-session**

A session is the complete amount of data recorded from the beginning to the end of a single period of CD-ROM, CD-R/CD-RW data recording. Multi-session refers to the existence of data from two or more sessions on a single disc.

**Sampling**

Refers to the process of encoding analog audio data at regular intervals and converting it to digital data. The sampling rate refers to the number of times a sample is taken in one second and is expressed in Hz units. Increasing the sampling rate improves the sound quality but also increases the data size.
**Bit rate**

Refers to the volume of data per second, expressed in bps (bits per second). Generally, the larger the number of the transfer bit rate when compressing an MP3 file, the more information regarding musical reproduction it carries, and therefore the better the sound quality.

**Packet writing**

A general term for the method, similar to that used for floppy discs or hard drives, of recording the required file in a single increment on a CD-R and similar.

**ID3 Tag**

ID3 tag is a method for storing information related to the music in an MP3 file. Information such as track, artist and album name can be stored. This content can be freely edited using ID3 editing function software.

**VBR**

Abbreviation for Variable Bit Rate. While CBR (Constant Bit Rate) is generally used, VBR varies the bit rate for audio compression according to compression conditions and this allows for compression with preference given to sound quality.

**Operating Tips for WMA**

WMA is short for Windows Media Audio and is the audio compression format used by Microsoft. Audio data can be created and stored at a higher compression ratio than MP3.

* Microsoft and Windows Media are registered trademarks of Microsoft Corporation U.S. in the United States and other countries.

**Playable WMA file specification**

CD-R and CD-RW including WMA files can be played with this unit. Discs which conform to the following formats can be played.

Playable WMA files are as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Content</th>
</tr>
</thead>
<tbody>
<tr>
<td>Specification</td>
<td>Windows Media Audio Version 7.0, 8.0, 9.0</td>
</tr>
<tr>
<td>Sampling frequency</td>
<td>Bit rate</td>
</tr>
<tr>
<td></td>
<td>32kHz. . . . . . . 32, 40, 48 kbps</td>
</tr>
<tr>
<td></td>
<td>44.1kHz . . . . . . 32, 48, 64, 80, 96, 128, 160, 192, 256, 320 kbps</td>
</tr>
<tr>
<td></td>
<td>48kHz. . . . . . . 64, 96, 128, 160, 192 kbps</td>
</tr>
<tr>
<td>VBR (Variable Bit Rate)</td>
<td>Supported</td>
</tr>
<tr>
<td>Channel mode</td>
<td>Stereo/Monaural</td>
</tr>
<tr>
<td>WMA tag</td>
<td>Title, artist name, album name</td>
</tr>
</tbody>
</table>

**CAUTION**

This unit plays files with the (.wma) file extension as a WMA file. Do not use the WMA file extension for files other than WMA files. It may cause noise or a malfunction.

- In a WMA file, the track name, artist name and album name are recorded with data called “WMA-Tag”, and the information can be displayed.
- WMA files which do not comply with the specific standard may not be played correctly or its file and folder name may not be displayed correctly.
- The file extension may not be provided depending on the computer operating system, version, software, or settings. In this case, add the file extension “.wma” to the end of the file name, and then write the disc.
Types of the Audio Set

Audio Set (Type A) ................................................................................................ page 6-29

Audio Set (Type B) ................................................................................................ page 6-39
MEMO
Audio information is displayed on the information display.

The \( \text{Hi} \) buttons are only functional if the vehicle is equipped with the separately purchased SIRIUS digital satellite radio unit (U.S.A. and Canada).

Power/Volume/Sound Controls ................................................................. page 6-30
Operating the Radio ............................................................................. page 6-32
Operating the Compact Disc (CD) Player ............................................. page 6-34
Operating the Auxiliary jack ................................................................. page 6-37
Error Indications .................................................................................. page 6-38
Power ON/OFF
Switch the ignition to ACC or ON.
Press the power/volume dial to turn the audio system on.
Press the power/volume dial again to turn the audio system off.

NOTE
To prevent the battery from being discharged, do not leave the audio system on for a long period of time when the engine is not running.

Volume adjustment
To adjust the volume, turn the power/volume dial.

Turn the power/volume dial to the right to increase volume, to the left to decrease it.

Audio sound adjustment
1. Press the audio control dial to select the function. The selected function will be indicated.

*1 Depending on the mode selected, the indication changes.
*2 Depending on the model, this function may not be available.
*3 The function may appear on the display but is only adjustable in the European market models.

2. Turn the audio control dial to adjust the selected functions as follows:

<table>
<thead>
<tr>
<th>Indication</th>
<th>Turn Left</th>
<th>Turn Right</th>
</tr>
</thead>
<tbody>
<tr>
<td>ALC</td>
<td>Select mode</td>
<td></td>
</tr>
<tr>
<td>BASS</td>
<td>Decrease bass</td>
<td>Increase bass</td>
</tr>
<tr>
<td>TREB</td>
<td>Decrease treble</td>
<td>Increase treble</td>
</tr>
<tr>
<td>FADE</td>
<td>Shift the sound to the front</td>
<td>Shift the sound to the rear</td>
</tr>
<tr>
<td>BAL</td>
<td>Shift the sound to the left</td>
<td>Shift the sound to the right</td>
</tr>
<tr>
<td>BEEP</td>
<td>Off</td>
<td>On</td>
</tr>
<tr>
<td>ILLM EFT</td>
<td>Off</td>
<td>On</td>
</tr>
<tr>
<td>12Hr</td>
<td>12Hr (Flashing)</td>
<td>24Hr (Flashing)</td>
</tr>
</tbody>
</table>

* The function may appear on the display but is only adjustable in the European market models.

**NOTE**
About 5 seconds after selecting any mode, the volume function will be automatically selected. To reset bass, treble, fade, and balance, press the audio control dial for 2 seconds. The unit will beep and “CLEAR” will be displayed.

**Automatic Level Control (ALC)**
The automatic level control (ALC) is a feature that automatically adjusts audio volume and sound quality according to the vehicle speed. The volume increases in accordance with the increase in vehicle speed, and decreases as vehicle speed decreases.

Select the desired ALC mode.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Volume change</th>
</tr>
</thead>
<tbody>
<tr>
<td>ALC OFF</td>
<td>No change</td>
</tr>
<tr>
<td>ALC LEVEL1</td>
<td>Minimum</td>
</tr>
<tr>
<td>ALC LEVEL2</td>
<td>Medium</td>
</tr>
<tr>
<td>ALC LEVEL3</td>
<td>Maximum</td>
</tr>
</tbody>
</table>

Turn the audio control dial to select ALC OFF or ALC LEVEL1—3 modes. The selected mode will be indicated.

**BEEP setting**
The beep-sound when operating the audio system can be set on or off.

**ILLM EFT setting (Illumination setting during operation)**
The audio system illumination during operation can be set on or off.

**Time adjustment**
Rotating the audio control dial switches the display between 12 and 24-hour clock time (page 6-191).
Operating the Radio

Radio ON
Press a band selector button (FM/AM) to turn the radio on.

Band selection
Successively pressing the band selector button (FM/AM) switches the bands as follows: FM1 → FM2 → AM.

The selected mode will be indicated. If FM stereo is being received, “ST” will be displayed.

NOTE
If the FM broadcast signal becomes weak, reception automatically changes from STEREO to MONO for reduced noise, and the “ST” indicator will go out.

Tuning
The radio has the following tuning methods: Manual, Seek, Scan, Preset channel, and Auto memory tuning. The easiest way to tune stations is to set them on preset channels.

NOTE
If the power supply is interrupted (fuse blows or the battery is disconnected), the preset channels will be erased.

Manual tuning
Turning the manual tuning dial will change the frequency higher or lower.

Seek tuning
Pressing the seek tuning button (↑, ↓) will cause the tuner to seek a higher or lower frequency automatically.
NOTE
If you continue to press and hold the button, the frequency will continue changing without stopping.

Scan tuning
Press the scan button (SCAN) to automatically sample strong stations. Scanning stops at each station for about 5 seconds. To hold a station, press the scan button (SCAN) again during this interval.

Preset channel tuning
The 6 preset channels can be used to store 6 AM and 12 FM stations.
1. To set a channel first select AM, FM1, or FM2. Tune to the desired station.
2. Depress a channel preset button for about 2 seconds until a beep sound is heard. The preset channel number and station frequency will be displayed. The station is now held in the memory.
3. Repeat this operation for the other stations and bands you want to store. To tune one in the memory, select AM, FM1, or FM2 and then press its channel preset button. The station frequency and the channel number will be displayed.

NOTE
If the power supply is interrupted (fuse blows or the battery is disconnected), the preset channels will be erased.

Auto memory tuning
This is especially useful when driving in an area where the local stations are not known. Additional AM/FM stations can be stored without disturbing the previously set channels.

Press and hold the auto memory button (AUTO-M) for about 2 seconds until a beep sound is heard; the system will automatically scan and temporarily store up to 6 stations with the strongest frequencies in each selected band in that area.

After scanning is completed, the station with the strongest frequency will be tuned and its frequency displayed. Press and release the auto memory button (AUTO-M) to recall stations from the auto-stored stations. One stored station will be selected each time; its frequency and channel number will be displayed.

NOTE
If no stations can be tuned after scanning operations, “A” will be displayed.
Operating the Compact Disc (CD) Player

Type | Playable data
--- | ---
Music/MP3 CD player | • Music data (CD-DA)
                           • MP3 file

**NOTE**
If a disc has both music data (CD-DA) and MP3 files, playback of the two file types differs depending on how the disc was recorded.

Inserting the CD
Insert the CD into the slot, label-side up. The auto-loading mechanism will set the CD and begin play.

**NOTE**
There will be a short lapse before play begins while the player reads the digital signals on the CD.

Ejecting the CD
Press the CD eject button (🔄) to eject the CD.

Playback
Press the CD play button (_CD) to start play when a CD is in the unit. If a CD is not in the unit when the CD play button (_CD) is pressed, “NO DISC” will flash on and off.

**NOTE**
When the load button (eload) is pressed, the CD will load and play even if the CD eject button (🔄) had been previously pressed.
**Fast-forward/Reverse**
Press and hold the fast-forward button (▶) to advance through a track at high speed.
Press and hold the reverse button (▼) to reverse through a track at high speed.

**Track search**
Press the track up button (▲) once to skip forward to the beginning of the next track.
Press the track down button (▼) once to skip back to the beginning of the current track.

**Folder search (during MP3 CD playback)**
To change to the previous folder, press the folder down button (▼), or press the folder up button (▲) to advance to the next folder.

**Music scan**

**During music CD playback**
This function scans the titles on a CD and plays 10 seconds of each song to aid you in finding a song you want to listen to.

**During MP3 CD playback**
This function scans the titles in a folder currently being played and plays 10 seconds of each song to aid you in finding a song you want to listen to.

Press the scan button (SCAN) during playback to start the scan play operation (the track number will flash).
Press the scan button (SCAN) again to cancel scan playback.

**NOTE**
If the unit is left in scan, normal playback will resume where scan was selected.

**Repeat playback**

**During music CD playback**
1. Press the repeat button (RPT) during playback to play the current track repeatedly. “RPT” is displayed.
2. Press the button again to cancel the repeat playback.

**During MP3 CD playback**

**(Track repeat)**
1. Press the repeat button (RPT) during playback to play the current track repeatedly. “TRACK RPT” is displayed.
2. To cancel the repeat playback, press the button again after 3 seconds.

**(Folder repeat)**
1. Press the repeat button (RPT) during playback, and then press the button again within 3 seconds to play the tracks in the current folder repeatedly. “FOLDER RPT” is displayed.
2. Press the button again to cancel the repeat playback.

**Random playback**
Tracks are randomly selected and played.

**During music CD playback**
1. Press the random button (RDM) during playback to play the tracks on the CD randomly. “RDM” is displayed.
2. Press the button again to cancel the random playback.
**Interior Comfort**

**Audio System**

**During MP3 CD playback**

*(Folder random)*

1. Press the random button (RDM) during playback to play the tracks in the folder randomly. \"FOLDER RDM\" is displayed.

2. To cancel the random playback, press the button again after 3 seconds.

*(CD random)*

1. Press the random button (RDM) during playback, and then press the button again within 3 seconds to play the tracks on the CD randomly. \"DISC RDM\" is displayed.

2. Press the button again to cancel the random playback.

**Switching the display**

Each time the display button (DISP) is pressed during playback, the display will switch in the following order.

**Music CD**

- Track number/Elapsed time
- Track name
- Album name
- Artist name

**MP3 CD**

- File number/Elapsed time display
- Folder number/File number
- File name
- Folder name
- Album name (ID3 Tag)
- Song name (ID3 Tag)
- Artist name (ID3 Tag)

**NOTE**

- The information viewable in the display is only CD information (such as artist name, song title) which has been recorded to the CD.
- The system can only display one-byte alphabetic characters. If two-byte or other types of characters have been recorded to the CD, they may not display correctly.

**Display scroll**

Only 8 characters (File name) or 12 characters (Except file name) can be displayed at one time. To display the rest of the characters of a long title, turn the display feed dial (TEXT) to the right. Hidden titles can be scrolled into the display one character at a time.
NOTE
The displayable number of characters is limited. If the number of characters, including the file extension (.mp3), exceeds 32 characters, it may not be fully displayed.

Message display
If “CHECK CD” is displayed, it means that there is some CD malfunction. Check the CD for damage, dirt, or smudges, and then properly reinsert. If the message appears again, take the unit to an Authorized Mazda Dealer for service.

▼ Operating the Auxiliary jack
You can connect portable audio units, such as an MP3 player or similar products on the market, to the auxiliary jack to listen to music or audio over the vehicle's speakers. Refer to Auxiliary Input (page 6-68).
Error Indications

If you see an error indication on the display, find the cause in the chart. If you cannot clear the error indication, take the vehicle to an Authorized Mazda Dealer.

Audio System

**Centerpoint® on**

Press selection button 6.

**Centerpoint® off**

Press selection button 2.

**NOTE**

- Centerpoint® operates optimally with a 2-channel stereo CD. MP3 audio files can be played, however, MP3 audio files encoded with high compression may result in poor sound quality.
- Centerpoint® is available for 2-channel stereo audio except for AM radio/FM radio/SIRIUS digital satellite radio/AUX/BT audio.

* Centerpoint® is a registered trademark of Bose Corporation.

**Rear Seat Surround (Rear Entertainment System-equipped model)**

The rear seat-optimized function allows passengers to optimize the audio output to the rear for a more pleasurable acoustic field when selecting the 5.1-channel sound mode.

Rear Seat Surround can be set on or off.

**NOTE**

Rear seat-optimized is only effective if a CD or a DVD inserted in the Rear Entertainment System main unit is 5.1 Dolby Digital/DTS audio.

**Rear Seat Surround on**

Press selection button 7.

**Rear Seat Surround off**

Press selection button 3.

**Surround Volume**

**Surround Volume up**

Press selection button 6.

**Surround Volume down**

Press selection button 2.

**NOTE**

Surround Volume adjustment is available if Centerpoint® or Rear Seat Surround is on.
Operating the Radio

Radio ON
Press a band selector button (FM/AM) to turn the radio on.

Band selection
Successively pressing the band selector button (FM/AM) switches the bands as follows: FM1 → FM2 → AM.

The selected mode will be indicated. If FM stereo is being received, “ST” will be displayed.

NOTE
If the FM broadcast signal becomes weak, reception automatically changes from STEREO to MONO for reduced noise, and the “ST” indicator will no longer display.

Tuning
The radio has the following tuning methods: Manual, Seek, Scan, Preset channel, and Auto memory tuning. The easiest way to tune stations is to set them on preset channels.

NOTE
If the power supply is interrupted (fuse blows or the battery is disconnected), the preset channels will be erased.

Manual tuning
Turning the manual tuning dial will change the frequency higher or lower.

Seek tuning
Pressing the seek tuning button (▲, ▼) will cause the tuner to seek a higher or lower frequency automatically.
**NOTE**  
If you continue to press and hold the seek tuning button (↑, ↓), the frequency will continue changing without stopping.

**Scan tuning**  
Press the scan button (SCAN) to automatically sample stations with the strongest frequencies. Scanning stops at each station for about five seconds. To hold a station, press the scan button (SCAN) again during this interval.

**Preset channel tuning**  
The six preset channels can be used to store six AM and twelve FM stations.

1. To set a channel, first select AM, FM1, or FM2. Tune to the desired station.
2. Press and hold selection button 2, 3, 4, 6, 7, or 8. The station frequency will be displayed. The station is now held in the memory.
3. Repeat this operation for the other stations and bands you want to store. To tune into one stored in the memory, select AM, FM1, or FM2 and then press its selection button. The station frequency will be displayed.

**NOTE**  
If the power supply is interrupted (fuse blows or the battery is disconnected), the preset channels will be erased.

**Auto memory tuning**  
This is especially useful when driving in an area where the local stations are unknown. Additional AM/FM stations can be stored without disturbing the previously set channels.  

Press and hold the auto memory button (AUTO-M). The system will automatically scan and temporarily store up to six stations with the strongest frequencies in each selected band in that area.

After scanning is completed, the radio tunes into the station with the strongest frequency, and its frequency is displayed. Press the auto memory button (AUTO-M) to recall stations from the auto-stored stations. One stored station will be selected each time, and its frequency will be displayed.

**NOTE**  
- If any of the following operations is performed, auto-memory mode is cleared and the normal display appears.
  - Band selector button (FM/AM) is pressed
  - Manual tuning dial is turned
  - Seek tuning button (↑, ↓) is pressed
  - Return button (RETURN) is pressed
- If the radio is unable to tune into any station after the scanning operation is completed, "No Channel" will be displayed.

**Mute**  
Press the mute button (MUTE) once to mute the audio. Press it again to resume audio output.

**Radio Data System (RDS)**  
**Radio text information display**  
A maximum of 64 characters of radio text information sent from a broadcasting station is displayed in the audio display.

Press selection button 5.
NOTE
If any of the following operations is performed, the radio text information display is cleared and the normal display appears.

- Return button (RETURN) is pressed
- Band selector button (FM/AM) is pressed
- Manual tuning dial is turned
- Seek tuning button (▲, ▼) is pressed
Operating the Satellite Radio

![Diagram of audio system controls](image-url)
NOTE
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Increase the separation between the equipment and tuner.
- Connect the equipment into an outlet on a circuit different from that to which the tuner is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**What is satellite radio?**
With over 130 channels, SIRIUS Satellite Radio brings you more of what you love. Get 69 channels of 100% commercial-free music, plus all your favorite sports, news, talk and entertainment. Everything worth listening to is now on SIRIUS.

**100% Commercial-free Music**—With music from every genre, artist-dedicated channels, live performances and more, SIRIUS is the home of 100% commercial-free music.

**Live Sports Play-by-Play & Expert Talk**—Hear every NFL game, every NASCAR® race and college sports coverage from over 150 schools. Plus 24/7 sports talk with channels like SIRIUS NFL Radio, SIRIUS NASCAR Radio and more.

**Exclusive Entertainment and Talk**—The biggest names, compelling talk, hilarious comedy. Hear Howard Stern, Martha Stewart, Jamie Foxx, Blue Collar Comedy, Playboy Radio, political talk and more.

**World-class News**—Stay informed with FOX, CNN, CNBC, NPR®®, BBC and more. Plus local traffic and weather.

**Family & Kids**—Entertain the entire family with Radio Disney, Kids Place Live, Laugh USA and more.

Sign up for SIRIUS Radio today! For more information, visit www.sirius.com. Satellite radio can be subscribed to and received in the United States (Except Alaska and Hawaii) and Canada.

**How to Activate Satellite Radio**
You must call SIRIUS to activate your service. Activation is free and takes only a few minutes.
SIRIUS service uses an ID code to identify your radio. This code is needed to activate SIRIUS service, and report any problems.

To activate your SIRIUS radio tuner, call a SIRIUS customer service specialist at 1-888-539-7474 or you can visit SIRIUS online at www.sirius.com.

Please have the following information ready:
- SIRIUS ID (12-digit electronic serial no., or ESN*)
- Valid credit card information (may not be required at initial sign-up)

Be sure you are parked outside with a clear view of open sky, you will be instructed to turn on your radio (in SIRIUS mode and tuned to channel 184). Activation typically takes only 2—5 minutes.

* ESN: Electronic Serial Number

**SIRIUS operation**

All operations of the satellite radio are conducted by means of the audio unit.

**SIRIUS radio mode selection**

When the SIRIUS button (SIRIUS) is pressed during ACC ON, it will play the last SIRIUS channel in use before the mode was switched over to another mode or the power was turned off.

When the SIRIUS button (SIRIUS) is pressed in a mode other than the SIRIUS mode, the last channel in use will be received. Every time the SIRIUS button (SIRIUS) is pressed, the bank changes in the order shown below.

![Bank Change](#)

**NOTE**

SIRIUS1, SIRIUS2 and SIRIUS3: six stations can be stored in each bank for convenient access to your favorite stations.

**Operation in the initial state**

It may take some time to start up the equipment when it is in the initial state, when there is a change in the user's subscription condition, or when the SIRIUS channel map is changed.
“Updating channels XXX% complete” is displayed when the SIRIUS channel map is changed. If the “Updating channels XXX% complete” display is not available, “Updating channels” is displayed. If the unit is initialized or the user contract content is changed, “Updating channels. Subscription Updated.” is displayed. Updating could take as long as a few minutes depending on the geographical area. When the unit is in an initialized state, channel 184 is displayed after the display indicates “Updating channels XXX% complete”. If the SIRIUS channel map or the user contract content is changed, the channel prior to the change is displayed after “Updating channels XXX% complete” is displayed. After the initialization display, it may take as long as ten seconds or more to receive channel 184.

NOTE
Do not perform the following operation while “Updating” is displayed. Otherwise, the updating procedure will be canceled.
- Turning off the audio power
- Switching to other modes
- Switching the ignition off

When the SIRIUS mode is switched to another mode, or when the power is turned off, the present channel which is being received is stored as the last channel.

Channel selection
Turning the manual tuning dial allows you to select the desired receiving channel.

Channel up
Turn the manual tuning dial clockwise.

Channel down
Turn the manual tuning dial counterclockwise.

Unsubscribed channel
When a selected station has not been subscribed to, the display indicates the following:
“Call 888-539-7474”
“To Subscribe”

NOTE
When the subscription contract is canceled, all of the channels including channel 184 appear as unsubscribed.

Invalid channel
When a selected channel is not broadcasting, “Invalid” is displayed.

NOTE
If the last channel selected has become unavailable because of a channel update the above indication is displayed until any button is pressed.

Preset channel programming
1. Turn the manual tuning dial and select the desired channel.
2. Press and hold selection button 2, 3, 4, 6, 7, or 8.

NOTE
Six stations can be stored in each bank, SIRIUS1, SIRIUS2 and SIRIUS3 for convenient access to your favorite stations.

Preset channel call-up
Press selection button 2, 3, 4, 6, 7, or 8.

NOTE
In the initial setting, all channels are preset to 184.

Category change
Press the category button (▲, ▼) and select the desired category.
Category up
Press the category up button (▲).

Category down
Press the category down button (▼).
Every time the category up button (▲) is pressed, the category is changed over in the order shown below.
At this time, the lowest (smallest-number) channel within the category indicated is received.
When the highest (or lowest) category is reached, the category is changed over in the order shown below.
Highest category → Lowest category → XXX category

Category set (Category lock)
Press selection button 1 to lock the category of the channel being received. Press selection button 1 again to clear the lock.

NOTE
A category can be set only when a channel which belongs to a category is being received.

Channel selection within a category
To select a radio station in a set category, turn the manual tuning dial.

NOTE
• The channel number needs to be indicated in the display to use the manual tuning dial for this function.
• To select a radio station other than one in a set category, turn the manual tuning dial.

Scan tuning
Press the scan button (SCAN) to automatically sample stations. Scanning stops at each station for about five seconds. To hold a station, press the scan button (SCAN) again during this interval.

NOTE
• Unsubscribed channels, invalid channels, parental lock channels and channel 0 are not subject to the scan, therefore these channels will skip automatically.
• If a category is set, scan channels in the category. If a category is not set, scan all channels.

Channel number, channel name, category name, artist name, song titles and information display
The information regarding the channel which is currently being received is displayed.

NOTE
• If the entire title cannot be displayed, “...” is added at the end to the part of the title which can be displayed.
• If a channel other than a parental-locked channel is received, channel name, category name, artist name, song title, and information are displayed.

(Channel number display)
The channel number for the channel currently being received is displayed.

(Channel name display)
The channel name for the channel currently being received is displayed.

A channel name may have a full title and an abbreviated title. In this case, the full title is displayed. If the channel only has an abbreviated title, it is displayed.

If there is no channel name, “No Ch Name” is displayed.

(Category name display)
The category name for the channel currently being received is displayed.
A category name may have a full title and an abbreviated title. In this case, the full title is displayed. If the category only has an abbreviated title, it is displayed.

If there is no category name, “No Category” is displayed.

(Artist name display)
The artist name for the channel currently being received is displayed.

If there is no artist name, “No Artist” is displayed.

(Song title display)
The song title for the channel currently being received is displayed.

If there is no song title, “No Song” is displayed.

(Information display)
The information for the channel currently being received is displayed.

If there is no information, “No Information” is displayed.

Display scroll
If each title cannot be fully displayed at one time, press the text button (TEXT) to display the rest of the characters. If the last character of the title is displayed, press the text button (TEXT) to return the beginning of the title.

Instant replay
This function allows you to rewind and replay the program that you were previously or are currently listening to.
Press the Play/Pause button (▶❚❚). When the seek tuning button (▼) is pressed, playback starts from the beginning of the current program. When the seek tuning button (▼) is pressed twice, playback starts from the beginning of the previous program.

Press and hold the seek tuning button (▼) to reverse the program while the button is being pressed.
When the seek tuning button (▲) is pressed, playback starts from the beginning of the next program.
When the seek tuning button (▲) is pressed while the last program is being played, the instant replay mode is canceled.
Press and hold the seek tuning button (▲) to fast-forward the program while the button is being pressed. When pressing and holding the button until the end of the program, the instant replay mode is canceled.
When the Play/Pause button (▶❚❚) is pressed again, playback is paused, or playback starts if it has been paused.

Instant replay (PAUSE)
If the Play/Pause button (▶❚❚) is pressed while the instant replay mode is off, instant replay mode is turned on in a paused condition (PAUSE). Press the Play/Pause button (▶❚❚) again to resume playback from the point at which it was paused.

Displaying the SIRIUS ID (ESN)
Method 1
Turn the manual tuning dial and select channel 0 to display the twelve-digit Electronic Serial Number (ESN) for the SIRIUS tuner.

Method 2
1. Press selection button 5 to display the settings screen.
2. Press selection button 5 again to display the twelve-digit Electronic Serial Number (ESN) for the SIRIUS tuner.
(If the SIRIUS ID (ESN) for the tuner does not display)
If “ESN Fail” is displayed, contact an Authorized Mazda Dealer.

**Parental lock**
Parental lock, parental unlock, parental lock ID change, and parental lock ID reset can be set.

**NOTE**
- Press the return button (RETURN) during all the settings to return to the previous display.
- Turn the manual tuning dial during the ID code or master code input to select “CLR”, and then press the enter button (ENTER) to delete an input number.
- If there is no input for ten seconds during the ID code or master code input, the system returns to the settings screen.
- If only a four-digit ID code or master code is input, “OK” can be selected.
- If the registered ID code has been forgotten, reset the code in “Parental-lock ID reset” to [0000].

**Parental lock**
If a channel is locked, the channel is muted.

**(Channel locking)**
1. Turn the manual tuning dial to select the desired channel.

**(Registered ID code input preparation)**
2. Press selection button 5 to display the settings screen.
3. Press selection button 1 to display the parental lock settings screen.
4. “Enter Pin” and “- - - -” are displayed, and input of the registered ID code is possible.

**(Registered ID code input)**
5. Turn the manual tuning dial to select a number and press the enter button (ENTER) to input the number.

**(Registered ID code input confirmation)**
6. After inputting the four digits, turn the manual tuning dial and select “OK”, and then press the enter button (ENTER) to confirm the four digits.

7. If the four digits match the registered ID code, “Parental lock” appears and mute is turned on.
If they do not match the registered ID code, “Error” appears and then the display returns to “- - - -”.

**Parental unlock**
Channels locked using the parental lock function can be unlocked.

**(Channel unlocking)**
1. Select a channel to be unlocked by turning the manual tuning dial.

**(Registered ID code input preparation)**
2. Press selection button 5 to display the settings screen.
3. Press selection button 2 to display the parental unlock screen.
4. “Enter Pin” and “- - - -” are displayed, and input of the registered ID code is possible.

**(Registered ID code input)**
5. Turn the manual tuning dial to select a number and press the enter button (ENTER) to input the number.
(Registered ID code input confirmation)

6. After inputting the four digits, turn the manual tuning dial and select “OK”, and then press the enter button (ENTER) to confirm the four digits.

7. If the four digits match the registered ID code, “Parental unlock” appears and mute is canceled. If they do not match the registered ID code, “Error” appears and then the display returns to “----”.

Parental-lock ID change

When changing the ID code, the new ID code is input after the previous one is input first.

(Registered ID code input preparation)

1. Press selection button 5 to display the settings screen.

2. Press selection button 3 to display the ID code change screen.

3. “Enter Pin” and “----” are displayed, and input of the registered ID code is possible.

(Registered ID code input)

4. Turn the manual tuning dial to select a number and press the enter button (ENTER) to input the number.

(Registered ID code input confirmation)

5. After inputting the four digits, turn the manual tuning dial and select “OK”, and then press the enter button (ENTER) to confirm the four digits.

6. If the four digits match the registered ID code, “Enter Pin” and “----” are displayed.

   If they do not match the registered ID code, “Error” appears and then the display returns to “----”.

(New ID code input)

7. Turn the manual tuning dial to select a number and press the enter button (ENTER) to input the number.

(New ID code input confirmation)

8. After inputting the four digits, turn the manual tuning dial and select “OK”, and then press the enter button (ENTER) to confirm the four digits.

9. “Pin Changed” appears to indicate that the new ID code input has been completed.

10. The display returns to its normal display.

NOTE

Channels locked before changing the ID code remain after changing the ID code. To unlock a channel, input the changed ID code.

Parental-lock ID reset

If the registered ID code has been forgotten, reset the ID code to the default [0000] code.

(Master code input preparation)

1. Press selection button 5 to display the settings screen.

2. Press selection button 4 to display the ID code initial screen.

3. “Enter Pin” and “----” are displayed, and input of the registered ID code is possible.

6-57
(Master code input)

4. Turn the manual tuning dial to select a number and then press the enter button (ENTER) to input the number.

NOTE

Master code:
The Master Code is used to initialize or re-initialize the ID code in the event that the code is not set to [0000] and/or the personalized ID code is not known. The initialization process resets the ID code to [0000]. The master code can potentially defeat the intent of the security of the parental lock if it is located by persons not authorized by the owner to access certain channels.

SIRIUS Satellite Radio Master Code: [0913]

(Master code input confirmation)

5. After inputting the four digits, turn the manual tuning dial and select “OK”, and then press the enter button (ENTER) to confirm the four digits.

6. If the four digits match the master code, “Pin Cleared” appears. If they do not match the master code, “Error” appears and the display returns to “----”.

7. The ID code returns to the default [0000] code.
Operating the In-Dash CD Changer

Normal CD insertion
1. Press the load button (LOAD).
2. When “Please Insert a Disc” is displayed, insert the CD.

Inserting CDs into desired tray number
1. Press and hold the load button (LOAD).
2. Press the selection button for the desired tray number while “Please Wait” is displayed.
3. When “Please Insert a Disc” is displayed, insert the CD.

NOTE
The CD cannot be inserted to the desired tray number if the number is already occupied.

NOTE
If a disc has both music data (CD-DA) and MP3/WMA files, playback of the two or three file types differs depending on how the disc was recorded.

Inserting the CD
The CD must be label-side up when inserting. The auto-loading mechanism will set the CD and begin play.

NOTE
The CD will begin playback automatically after insertion. A CD cannot be inserted while the display reads “Please Wait”. There will be a short lapse before play begins while the player reads the digital signals on the CD.

6-60
Multiple CD insertion

1. Press and hold the load button (LOAD).
2. Press the load button (LOAD) again. When “Please Insert a Disc” is displayed, insert the CD.
3. When “Please Insert a Disc” is displayed again, insert the next CD.

NOTE
The first-inserted CD will be played automatically when:
- No other CD is inserted within 15 seconds after “Please Insert a Disc” is displayed.
- The CD trays are full.

Ejecting CDs

Normal ejection

1. Press the CD eject button (△). “Disc Ejecting” will be displayed.
2. Remove the CD.

NOTE
When the CD is ejected during play, the next CD will be played automatically.

Ejecting CDs from desired tray number

1. Press and hold the CD eject button (△).
2. Press the selection button for the desired tray number while “Disc Ejecting” is displayed.
3. Remove the CD.

Multiple CD ejection

1. Press and hold the CD eject button (△).
2. Press the CD eject button (△) again.

NOTE
If the button is not pressed and about five seconds have elapsed while “Disc Ejecting” is displaying, CDs are automatically ejected.

3. Remove the CD, then the next CD will be ejected.

NOTE
- CDs will be ejected starting from the one in the tray with the lowest number.
- All CDs in the trays will be ejected continuously.
- CDs can be ejected when the ignition is switched off. Press and hold the CD eject button (△) to eject all CDs.

Playback

Press the CD play button (CD/AUX) to start play when a CD is in the unit. If the CD play button (CD/AUX) is pressed when a CD is not inserted and an external device is not connected, “No Disc” is displayed.

All of the following information is displayed during playback.

Music CD
The track number, elapsed time, album name, artist name, and song name are displayed.

MP3/WMA CD
The folder number, track number, elapsed time, folder name, album name, artist name, and song name are displayed.
NOTE
If the entire title cannot be displayed, “...” is added at the end to the part of the title which can be displayed.
If title information is not available, “NO TITLE” is displayed.
If there are any undisplayable characters in the title, “- - - - - - - ” is displayed.
Some CDs cannot display information.

Pause
Press the Play/Pause button (►II ). Press the button again to resume playback.

Fast-forward/Reverse
Fast-forward
Press and hold the track up button (▲ ).
Reverse
Press and hold the track down button (▼ ).

Track search
Track up
Press the track up button (▲ ) or turn the file dial clockwise.

Track down
Press the track down button (▼ ) or turn the file dial counterclockwise.

Disc search
Press the selection button for the desired tray number.

Folder search (during MP3/WMA CD playback)
Folder up
Press the folder up button (▲ ).
Folder down
Press the folder down button (▼ ).

NOTE
Press and hold the (▲ ) or (▼ ) button to continuously move up or down through the folders.

Music scan
During music CD playback
This function scans the titles on a CD and plays ten seconds of each song to aid you in finding a song you want to listen to.

During MP3/WMA CD playback
This function scans the titles in a folder currently being played and plays ten seconds of each song to aid you in finding a song you want to listen to.

Press the scan button (SCAN ) during playback to start the scan play operation. Press the scan button (SCAN ) again to cancel scan playback.

NOTE
If the unit is left in scan, normal playback will resume where scan was selected.

Repeat playback
During playback
During music CD playback
1. Press selection button 1 during playback to play the current track repeatedly. “Repeat Track” is displayed.
2. Press selection button 1 again to cancel the repeat playback.

During MP3/WMA CD playback
(Track repeat)
1. Press selection button 1 during playback to play the current track repeatedly. “Repeat Track” is displayed.
2. Press selection button 1 twice to cancel the repeat playback.

(Folder repeat)
1. Press selection button 1 twice during playback to play the tracks in the current folder repeatedly. “Repeat Folder” is displayed.
2. Press selection button 1 again to cancel the repeat playback.

Random playback
Tracks are randomly selected and played.

During music CD playback
1. Press selection button 5 during playback to play the tracks in the CD randomly. “Random Disc” is displayed.
2. Press selection button 5 again to cancel the random playback.

During MP3/WMA CD playback
(Folder random)
1. Press selection button 5 during playback to play the tracks in the folder randomly. “Random Folder” is displayed.
2. Press selection button 5 twice to cancel the random playback.

(All random)
1. Press selection button 5 twice during playback to play the tracks on the CD randomly. “Random All” is displayed.
2. Press selection button 5 again to cancel the random playback.

Display scroll
If each title cannot be fully displayed at one time, press the text button (TEXT) to display the rest of the characters.

If the last character of the title is displayed, press the text button (TEXT) to return the beginning of the title.

Message display
If “Check Disc” is displayed, it means that there is a CD malfunction. Check the CD for damage, dirt, or smudges, and then properly reinsert. If the message appears again, take the unit to an Authorized Mazda Dealer for service.

▼ Operating the Auxiliary Jack
You can connect portable audio units or similar products on the market to the auxiliary jack to listen to music or audio over the vehicle's speakers, refer to Auxiliary Input (page 6-68).
Error Indications

If you see an error indication on the display, find the cause in the chart. If you cannot clear the error indication, take the vehicle to an Authorized Mazda Dealer.

<table>
<thead>
<tr>
<th>Indication</th>
<th>Cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Acquiring Signal</td>
<td>Depending on the surrounding conditions (such as large trees, buildings, or tunnels) and special weather conditions, SIRIUS radio reception may be diminished or temporarily interrupted.</td>
<td>Improve reception by moving away from possible obstructions. If the error indication continues to display, consult an Authorized Mazda Dealer.</td>
</tr>
<tr>
<td>Antenna Fail</td>
<td>Satellite radio antenna malfunction</td>
<td>Check the satellite radio antenna, antenna cable and DLP antenna connector. If the error indication continues to display, consult an Authorized Mazda Dealer.</td>
</tr>
<tr>
<td>Check Disc</td>
<td>CD is inserted upside down</td>
<td>Insert the CD properly. If the error indication continues to display, consult an Authorized Mazda Dealer.</td>
</tr>
<tr>
<td></td>
<td>CD is defective</td>
<td>Insert another CD properly. If the error indication continues to display, consult an Authorized Mazda Dealer.</td>
</tr>
</tbody>
</table>

**NOTE**

If a broken DLP* unit is replaced with a new unit, cancel the license for the broken unit and make sure to carry out new registration for the replaced unit. If the license for the broken unit is not canceled, you will be charged a reception fee for both units.

* DLP: Down Link Processor (SATELLITE RADIO Module)
Audio Control Switch Operation

When the audio unit is turned on, operation of the audio unit from the steering wheel is possible.

**NOTE**
Because the audio unit will be turned off under the following conditions, the switches will be inoperable.
- When the ignition is switched off.
- When the power button on the audio unit is pressed and the audio unit is turned off.
- When the CD being played is ejected and the audio unit is turned off.

Without Bluetooth Hands-Free and navigation system

With Bluetooth Hands-Free only/Bluetooth Hands-Free and navigation system

Use the talk button, pick-up button, and hang-up button for navigation system sound operation. For details, refer to the separate manual “NAVIGATION SYSTEM Owner's Manual”.

**NOTE**
- The talk button, pick-up button, and hang-up button are operable with the audio unit turned off.
- Mazda has installed this system to prevent distraction while driving the vehicle and using audio controls on the dashboard. Always make safe driving your first priority.

▼ Adjusting the Volume

To increase the volume, press up the volume switch.

To decrease the volume, press down the volume switch.
Interior Comfort

Audio System

Without Bluetooth Hands-Free and navigation system

With Bluetooth Hands-Free only/Bluetooth Hands-Free and navigation system

▼Changing the Source

(Type A)
Press the mode switch (MODE) to change the audio source (FM1 radio → FM2 radio → AM radio → CD player → AUX → cyclical).

(Type B)
Press the mode switch (MODE) to change the audio source (FM1 radio → FM2 radio → AM radio → CD changer → SIRIUS1 → SIRIUS2 → SIRIUS3 → AUX → (RSES) → BT audio → cyclical).

Without Bluetooth Hands-Free and navigation system

With Bluetooth Hands-Free only/Bluetooth Hands-Free and navigation system
NOTE
CD, CD changer, RSES, SIRIUS digital satellite radio, and BT audio modes cannot be selected in the following cases:
- RSES, SIRIUS digital satellite radio unit, or BT audio unit is not equipped on the audio system.
- CD has not been inserted.

The AUX mode is locked out unless you connect a commercially available portable audio unit (such as an MP3 player) to the auxiliary jack. Connect a portable audio unit or similar product on the market to the auxiliary jack to listen to music or audio over the vehicle's speakers. Change the audio source to AUX mode (page 6-68).

▼ Seek Switch

Without Bluetooth Hands-Free and navigation system

With Bluetooth Hands-Free only/Bluetooth Hands-Free and navigation system

When listening to the radio or SIRIUS digital satellite radio
Press the seek switch up or down. The radio switches to the next/previous stored station in the order that it was stored (1—6).

(Radio)
Press and hold the seek switch in the up or down position to seek all usable stations at a higher or lower frequency whether programmed or not.

(SIRIUS digital satellite radio)
Press and hold the seek switch in the up or down position to seek all usable stations at a higher or lower channel whether programmed or not.

When playing a CD or BT audio
Press up the seek switch to skip to the next track.
Press down the seek switch to repeat the current track.
Press and hold the seek switch in the up or down position to continuously switch the tracks up or down.
Mute Switch *

Press the mute switch (╳) once to mute audio, press it again to resume audio output.

**NOTE**
If the ignition is switched off with the audio muted, the mute will be canceled. Therefore, when the engine is restarted, the audio is not muted. To mute the audio again, press the mute switch (╳).

Without Bluetooth Hands-Free and navigation system

---

**AUX Mode (Auxiliary input)**

You can connect portable audio units, such as an MP3 player or similar products on the market, to the auxiliary jack to listen to music or audio over the vehicle's speakers.

**WARNING**

*Do not adjust the portable audio unit or a similar product while driving the vehicle:*

Adjusting the portable audio unit or a similar product while driving the vehicle is dangerous as it could distract your attention from the vehicle operation which could lead to a serious accident. Always adjust the portable audio unit or a similar product while the vehicle is stopped.
CAUTION

- Close the lid when the auxiliary jack is not in use to prevent foreign objects and liquids from penetrating the auxiliary jack.
- Depending on the portable audio device, noise may occur when using the device with it connected to the accessory socket equipped on the vehicle. (If noise occurs, do not use the accessory socket.)

NOTE

- Before using the auxiliary jack, read the manufacturer’s instructions for the product being connected.
- Use a commercially-available, non-impedance (3.5 ø) stereo mini plug for connecting the portable audio unit to the auxiliary jack. Before using the auxiliary jack, read the manufacturer’s instructions for connecting a portable audio unit to the auxiliary jack.
- To prevent discharging of the battery, do not use the auxiliary input for long periods with the engine off or idling.
- Noise may occur depending on the product connected to the auxiliary jack.
- With regard to connecting a portable audio or similar device to a power source, use the battery for the device, not the accessory socket.

Connecting the auxiliary jack

1. Open the console lid.

2. Pass the connection plug cord through the cutout of the console and insert the plug into the auxiliary jack.

WARNING

Do not allow the connection plug cord to get tangled with the parking brake or the shift lever:

Allowing the plug cord to become tangled with the parking brake or the shift lever is dangerous as it could interfere with driving, resulting in an accident.

CAUTION

Do not place objects or apply force to the auxiliary jack with the plug connected.

NOTE

- Insert the plug to the auxiliary jack securely.
- Insert or remove the plug with the plug perpendicular to the auxiliary jack hole.
- Insert or remove the plug by holding its base.

To listen to a portable audio unit

1. Switch the ignition to ACC or ON.
2. Press the power/volume dial to turn the audio system on.
Interior Comfort

Audio System

3. (Type A)
Press the AUX button (AUX) of the audio unit or the mode switch (MODE) of the audio control switches on the steering wheel to change to the AUX mode.

(Type B)
Press the AUX button (CD/AUX) of the audio unit or the mode switch (MODE) of the audio control switches on the steering wheel to change to the AUX mode.

Audio Unit

Audio Control Switches

NOTE
• Set the volume of the portable audio unit to the maximum within the range that the sound does not become distorted, then adjust the volume using the power/volume dial of the audio unit or the up/down switch of the audio control switch.
• Audio adjustments other than audio volume can only be done using the portable audio device.
• If the connection plug is pulled out from the auxiliary jack while in AUX mode, noise may occur.
Safety Certification

This CD player is made and tested to meet exacting safety standards. It meets FCC requirements and complies with safety performance standards of the U.S. Department of Health and Human Services.

**CAUTION**

- This CD player should not be adjusted or repaired by anyone except qualified service personnel.
  
  If servicing is required, contact an Authorized Mazda Dealer.

- Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous laser exposure. Never operate the CD player with the top case of the unit removed.

- Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate this equipment.

**NOTE**

For CD player section:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**NOTE**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
Interior Comfort

Rear Entertainment System

**Rear Entertainment System Outline**

The Rear Entertainment System has a 9.0-inch wide LCD, as well as DVD video, DVD audio, video CD, audio CD, and MP3/WMA CD playback functions. Moreover, the system is equipped with input terminals for video picture and audio sound, and AV equipment such as a video game player or a video camera can be connected and displayed on the monitor screen.

*Some models.*
Proper Operation of Rear Entertainment System

For safe driving, read the following warnings and cautions before starting operation, and use the system properly.

**WARNING**

- **Do not disassemble or modify this unit.**
  It may cause an accident, fire, or electrical shock.
- **Do not use if there is a malfunction condition such as no screen image or sound.**
  It may cause an accident, fire, or electrical shock. Follow the procedures in "Symptoms and Actions" (page 6-122) and if the problem is not resolved, consult an Authorized Mazda Dealer.
- **Do not use if some problem has occurred.**
  If any problem occurs, such as a foreign material penetration, spilled liquid, smoking from internal burning, or other abnormal smells, stop operation immediately and consult an Authorized Mazda Dealer. If operation is continued, it may cause an accident, fire, or electrical shock.
- **Lower the volume to minimum before turning off the power.**
  If the volume is set high, loud sound will be produced when turning on the power, causing auditory problems or an accident.
- **Adjust the volume while driving so that ambient sound can be heard.**
  If the volume is too high and ambient sound cannot be heard while driving, driving operation could be obstructed causing an accident.
- **Do not leave the remote controller and the headphones unstowed.**
  If the remote controller and the headphone are not stowed, they could fall under the brake pedal during a sudden stop or while turning, which could obstruct driving operation and cause an accident.

**CAUTION**

- **Do not put foreign material into the disc slot.**
  It may cause a fire or malfunction.
- **Do not clean plastic finished parts with solvent such as benzene or thinner.**
  The parts may deform causing a fire or malfunction.

</tbody>
</table>

- Playback control function supported.
- 8 cm (3in) or 12 cm (5in) size
- MP3 recorded type.

---

*1: Audio is not produced by the headphones when DTS audio is selected. Listen to DTS audio over the vehicle’s speakers.
*2: Stereo playback is produced.
*3: Audio is not produced from the headphones. Listen to this audio from the speakers.

**Unplayable discs**

- Discs not bearing the logo mark indicated in the above table.
- Discs not including “1” or “ALL” in region code.
- Discs recorded in other than NTSC (e.g. PAL or SECAM).
Interior Comfort

Rear Entertainment System

- DVD-ROM, DVD-RAM, DVD+RW, CD-ROM, CDV, CD-G, CVD, VSD, SVCD, SACD, photo CDs, non-conventional discs (e.g. heart-shaped), and partially transparent discs.
- Discs recorded in CD-TEXT format.
- HD DVD and Blu-ray discs

Handling of discs

- Do not use non-conventional discs such as heart-shaped, octagonal discs, or discs with a memory portion that is transparent or translucent. The unit could be damaged.

When driving over uneven surfaces, the sound may jump.
- Be sure never to touch the signal surface when handling the discs. Pick up the discs by grasping the outer edge or the edge of the hole and the outer edge.
- Do not write on or attach labels, stickers or similar to discs.
- Defective (cracked or badly bent) discs should never be used.
- A new disc may have rough edges on its inner and outer perimeters. If a disc with rough edges is used, proper setting will not be possible and the unit will not play the disc. Remove the rough edges in advance by using a ball-point pen or pencil as shown below. To remove the rough edges, rub the side of the pen or pencil against the inner and outer perimeter of the discs.
Disc cleaning
Do not use record sprays, antistatic agents, or household spray cleaners. Volatile chemicals such as benzine and thinner can also damage the surface of the disc and must not be used. Anything that can damage, warp or fog plastic should never be used to clean discs.

Condensation
Immediately after turning on the heater when the vehicle is cold, the disc or optical components (prism and lens) in the unit may become clouded with condensation. At this time, the disc will eject immediately when placed in the unit. A clouded disc can be corrected simply by wiping it with a soft cloth. Clouded optical components will clear naturally in about an hour. Wait for normal operation to return before attempting to use the unit.

Operating tips for DVD video
Region code
The playback restriction area is set in a DVD video. The playback restriction area is indicated by a region code, and a DVD video can be played only in its indicated area. The region code for U.S.A. and Canada are “1”. DVD videos bearing region code including “1” or “ALL” on the package or the instruction manual can be played by this unit. The region code setting for this unit has been set to “1”.
DVD videos bearing any of the following logos on the package or instruction manual can be played.

![Logo 1](image1.png)
![Logo 2](image2.png)
![Logo 3](image3.png)
![Logo 4](image4.png)
![Logo 5](image5.png)

ALL
**Playable DISC specification**

CD-R and CD-RW including MP3/WMA files can be played with this unit. Discs which conform to the following formats can be played.

<table>
<thead>
<tr>
<th>Name</th>

</tr>
</tbody>
</table>

* English one-byte characters (capitalized only) and underbar “_” are available.

MP3

**CAUTION**

*This unit plays files with the (.mp3) file extension as a MP3 file. Do not use the MP3 file extension for files other than MP3 files. It may cause noise or a malfunction.*

- In a MP3 file, the track name, artist name, album name and category name are recorded with data called “ID3-Tag”, and the information can be displayed on the monitor.
- MP3 files which do not comply with the specific standard may not be played correctly or its file and folder name may not be displayed correctly.
- The file extension may not be provided depending on the computer operating system, version, software, or settings. In this case, add the file extension “.mp3” to the end of the file name, and then write the disc.

Playlist

This unit can play playlist files. Playlist is a function that allows free setting of the playback order of MP3 files. The file extension of a playlist file in which the order of playback is recorded is “.m3u” or “.pls”.

Operating tips for WMA

WMA is short for Windows Media Audio and is the audio compression format used by Microsoft.
Audio data can be created and stored at a higher compression ratio than MP3.
*Microsoft and Window Media are registered trademarks of Microsoft Corporation U.S. in the United States and other countries.*
Playable WMA file specification

CD-R and CD-RW including WMA files can be played with this unit. Discs which conform to the following formats can be played.

Playable WMA files are as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Content</th>
</tr>
</thead>
<tbody>
<tr>
<td>Specification</td>
<td>Windows Media Audio Version 7.0</td>
</tr>
<tr>
<td>Sampling frequency</td>
<td>Bit rate</td>

</tr>
</tbody>
</table>

WMA

This unit plays files with the (.wma) file extension as a WMA file. Do not use the WMA file extension for files other than WMA files. It may cause noise or a malfunction.

- In a WMA file, the track name, artist name, album name and category name are recorded with data called “WMA-Tag”, and the information can be displayed on the monitor.
- WMA files which do not comply with the specific standard may not be played correctly or its file and folder name may not be displayed correctly.
- The file extension may not be provided depending on the computer operating system, version, software, or settings. In this case, add the file extension “.wma” to the end of the file name, and then write the disc.

Operating tips for Dolby

Manufactured under license from Dolby Laboratories. “Dolby”, “MLP Lossless”, and the double-D symbol are trademarks of Dolby Laboratories.
Operating tips for dts

“DTS” and “DTS Digital Surround” are registered trademarks of Digital Theater Systems, Inc.

Operation Tips for Headphones

To listen to audio other than from the speakers of the Rear Entertainment System, it is necessary to use the wireless headphones that are included.

- Volume dial
- Power indicator
- Arm
- L (left) side
- R (right) side
- Infrared receiver
Before Operation

**Display Opening/Closing**

- **CAUTION**
  - Close the display while the Rear Entertainment System is not in use. If the display is left open, a passenger could be injured by hitting the display, or the display could be damaged.
  - Do not press the monitor screen while opening the display. It may cause a malfunction.

**Opening the display**

Press the monitor screen release knob and open the display until it is in the lock position.

**Closing the display**

Close and press the display until a clicking sound can be heard.

**Disc Insertion/Ejection**

- **CAUTION**
  - If the signal surface of a disc is touched, it could cause the sound to skip. Pick up a disc by grasping the edge of the hole and the outer edge.

**NOTE**

- When no disc is inserted, “No Disc” is displayed on the monitor.
Inserting the disc
Insert the disc into the disc slot with the label-side up.

CAUTION
Insert the disc with its label-side (decorated side) facing upward. If the disc is inserted upside-down, it may cause a malfunction.

NOTE
If a disc is inserted while the Rear Entertainment System is turned off but the display is open, and when the ignition is switched to ACC or ON, the system automatically turns on and starts playback.

Ejecting the disc
Press the eject button to eject the disc.

NOTE
- When the eject button is pressed, the disc is ejected halfway.
- A disc can be ejected with the Rear Entertainment System turned off.

▼ Picture Adjustment
The brightness (BRIGHT), color adjustment (TINT), color density (COLOR), and contrast (CONTRAST) of the screen can be adjusted.

Press the picture adjust button (PICTURE) on the remote controller to change to the picture adjustment mode. The picture mode changes in the order of BRIGHT → TINT → COLOR → CONTRAST → OFF each time the button is pressed in this mode.

Press the picture adjust button (▲) or (▼), positioned to top/bottom of the picture adjustment mode button (PICTURE), to adjust each picture mode.

NOTE
- If the picture adjustment mode is on and no operation has been done for about 5 seconds, the mode is canceled automatically.
- If the picture is no longer adjustable by pressing the picture adjust button (▲) or (▼), it indicates that the adjustment value has reached the maximum/minimum value.

Adjusting the brightness
1. Press the picture adjustment mode button (PICTURE) and select the BRIGHT mode.

2. Press the picture adjust button (▲) or (▼) to adjust.
   - Picture adjust button (▲): Brighten
Interior Comfort

Rear Entertainment System

Adjusting the color adjustment
1. Press the picture adjustment mode button (PICTURE) and select the TINT mode.
2. Press the picture adjust button (△) or (□) to adjust.
   • Picture adjust button (△): Green
   • Picture adjust button (□): Red

Adjusting the color density
1. Press the picture adjustment mode button (PICTURE) and select the COLOR mode.
2. Press the picture adjust button (△) or (□) to adjust.
   • Picture adjust button (△): Darken

Adjusting the contrast (definition)
1. Press the picture adjustment mode button (PICTURE) and select the CONTRAST mode.
2. Press the picture adjust button (△) or (□) to adjust.
   • Picture adjust button (△): Higher
   • Picture adjust button (□): Lower

▼ Screen Size Setting
The size of the screen can be changed. Press the DISPLAY MODE button to set the desired screen size.
The screen size changes in the order of Full → Normal → Wide → Cinema each time the button is pressed.

6-87
Interior Comfort

Rear Entertainment System

**Full screen**
Image is displayed on the full screen.

* A 16:9 screen ratio image is shown in the above figure.

**Normal screen**
A 4:3 screen ratio image is the standard display, and black bands appear on each side of the screen.

* A 16:9 screen ratio image is scaled to a 4:3 screen ratio.

**Wide screen**
The center part of the image is compressed toward the center, and the surrounding area is enlarged toward the edge.

* A 16:9 screen ratio image is shown in the above figure.

**Cinema screen**
The image is enlarged upward and downward. A 4:3 and 16:9 screen ratio image are displayed with the upper/lower part of the image cut off.

* A 16:9 screen ratio image is shown in the above figure.

**NOTE**
Because images are enlarged lengthwise for display, a horizontal streak may be seen, however, it does not indicate a malfunction.

* A 16:9 screen ratio image is shown in the above figure.

**NOTE**
The display varies depending on the style of the image recorded on the disc.
Refer to the following table and set the screen size.

<table>
<thead>
<tr>
<th>Image style</th>
<th>Recommendation</th>
</tr>
</thead>
<tbody>
<tr>
<td>4:3</td>
<td>Normal or wide screen</td>
</tr>
<tr>
<td>16:9</td>
<td>Full screen</td>
</tr>
<tr>
<td>Letter box</td>
<td>Full or cinema screen</td>
</tr>
</tbody>
</table>

**Display Off**

Only sound, without image, can be played.
Press and hold the DISPLAY button (DISPLAY) on the remote controller. “DISPLAY OFF” is displayed, and then image turns off.
Press any button on the remote controller to display the image.
Remote Controller

Operate the Rear Entertainment System with the remote controller except for disc insertion/ejection.

**CAUTION**

*Do not apply excessive force to the remote controller or get it wet. Also, do not leave the remote controller in a place exposed to direct sunlight or high temperature. It could cause a malfunction.*

**NOTE**

Operate the remote controller with it pointed to the disc slot of the unit. Signals may not be received depending of the angle.

Maintenance

Stow the remote controller in its case and put it in the seatback pocket of a front seat.
Place the remote controller into its case properly in the direction shown in the figure and stow it in the front seatback pocket.

**NOTE**

If the remote controller is placed in the incorrect direction, abnormal noise or an operation error could result.

Using the remote controller

A battery has already been installed in the remote controller.
Remove the electrical leak-protection insulation sheet before using the remote controller.

Replacing the battery

If the buttons on the remote controller are inoperable, or the operation range becomes narrow or unsteady, the battery may be dead.
Replace the battery using the following procedure.
Battery: CR2025 LITHIUM or equivalent (1)

1. Press the battery case tab in the direction indicated by the arrow using your thumbnail, and pull out the battery case.

2. Remove the old battery and install a new one with the plus pole pointed up.

3. Press the battery case tab in the direction of the arrow until a click sound is heard.

NOTE
*If the remote controller is inoperable even after the batteries are replaced, consult an Authorized Mazda Dealer.*

---

**CAUTION**

- Install the battery with the correct pole pointing in the correct direction. Battery leakage could occur if they are not installed correctly.
- When replacing the batteries, be careful not to bend the electrical terminals or get oil on them. Also, be careful not to get dirt in the remote controller as it could be damaged.
Sound Output

▼ Sound Output from Vehicle Speakers

**Vehicles with audio system**

Change the audio system to the Rear Entertainment System mode. Sound/Music being played by the Rear Entertainment System can be heard from the vehicle speakers. For audio operation, refer to “Audio System” (page 6-17).

Press the AUX button (CD/AUX) on the audio unit or the mode switch (MODE) of the audio control switches on the steering wheel. “AUX” is displayed on the display and the audio system changes to Rear Entertainment System sound. Adjust the volume with the dial on the audio unit.

**Vehicles with navigation system**

Change the navigation system to the Rear Entertainment System mode. Sound/Music being played by the Rear Entertainment System can be heard from the vehicle speakers. For navigation system operation, refer to the separate manual “NAVIGATION SYSTEM”.

Press the SOURCE button (SOURCE), select the AUX2 mode. “RSES” is displayed on the information display and it changes to the Rear Entertainment System sound. Adjust the volume with the dial on the navigation unit.

▼ Using the Headphone Speakers

**CAUTION**

- For safety reasons, the driver should never wear the headphones while driving. Not being able to hear sound outside of the vehicle could result in a serious accident.
- Use the headphones with the volume set at moderate level. Listening at an excessive volume level for extended periods of time will have an adverse effect on your hearing ability.
- If the headphone arms are spread excessively is could result in damage.
- Do not apply excessive force to the headphones or get them wet. Also, do not leave the headphones in a place exposed to direct sunlight or high temperature. It could cause a malfunction.
**NOTE**

- To listen to audio other than from the speakers of the rear entertainment system, it is necessary to use the wireless headphones that are included. For headphone specification, refer to “Operation Tips for Headphones” (page 6-81).
- When the headphones are not in use, turn them off.
- DTS formatted sound cannot be generated through the headphones. Use the vehicle’s speakers.
- If there is no sound produced from a signal for 3 minutes or longer after the headphone power is turned on, or there is no signal reception, the headphone power turns off automatically.
- If the headphones are continuously used for 4 hours or more after the sound signal is received, the headphone power turns off automatically.

The acceptable range for signals (infrared rays) from the Rear Entertainment System is as follows:

A wireless headphone can be used in any position on the rear seats, however, the sound may skip under the following conditions because the acceptable range varies or the signals are blocked.
- When affected by intense light such as direct sunshine.
Rear Entertainment System

- When the wireless headphone receiver does not point to the Rear Entertainment System transmitter.
- When the signal is blocked by an obstruction such as the seat.

Re replacing the battery

1. Remove the screw using a coin or equivalent, and remove the cover. Remove the batteries.

2. Insert two AAA-size batteries. Match the + polarity of the batteries with the + and − marks in the battery case.

3. Install the cover.

4. Install the screw.

NOTE

Battery life (reference)
Manganese batteries: About 20 hours
Alkaline batteries: About 40 hours
The battery life is indicated as a reference and does not provide any guarantees. The battery life varies depending on usage conditions (volume, surrounding environment).
CAUTION

- If the battery power is depleted the headphones will not operate properly. If any of the following occurs, replace the batteries.
  - The power indicator does not illuminate even when the power is turned on.
  - Noise is mixed with the sound.
  - The reception range narrows.
  - Periodically inspect the batteries for leakage.
- If the headphones are not to be used for an extended period, remove the batteries.
- Be careful not to allow the battery case screw to become loose.
- Install the batteries with the (+)/(−) poles correctly positioned. Battery leakage could occur if they are not installed correctly.
- When replacing the batteries, be careful not to bend the electrical terminals or get oil on them.
- Be careful not to allow dirt to get into the headphones as it could damage them. The following points regarding the battery must be observed.

If the batteries are not handled properly, it could result in a headphone malfunction.

- Do not use rechargeable batteries.
- When replacing the batteries, replace both batteries at the same time. Do not use a new battery and an old battery, or the different types of battery.
Rear Entertainment System Functions

**Mode**
The Rear Entertainment System has Disc and AUX modes.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Function</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disc mode</td>
<td>DVD video, video CD, DVD audio, and audio CD can be played.</td>

<td>AV equipment with output terminals for image and sound, such as a video game player and a video camera, can be used.</td>
<td>6-110</td>
</tr>
</tbody>
</table>

* Auxiliary terminals in which AV equipment can be connected are equipped. Refer to Auxiliary terminals and accessory socket on page 6-110.

**Mode change**
Press the SOURCE button. The mode changes between Disc and AUX.

Disc mode → AUX mode
("DISC" is displayed.) ("AUX" is displayed.)
Interior Comfort

Rear Entertainment System

DVD video, DVD audio, Video CD, Audio CD and MP3/WMA CD Playback (Disc Mode)

DVD video, DVD audio, Video CD, Audio CD, and MP3/WMA CD can be played in the Disc mode.

⚠️ CAUTION

*For safe driving, adjust the volume while driving so that ambient sound can be heard.*

**NOTE**

- Do not use the Rear Entertainment System for a long period with the engine off. The vehicle battery could run down.
- To listen to the Rear Entertainment System sound from the vehicle speakers, change the audio or navigation system sound to the Rear Entertainment System sound. Refer to Sound on page 6-91.
- To listen to audio other than from the speakers of the rear entertainment system, it is necessary to use the wireless headphones that are included. For headphone specification, refer to "Operation Tips for Headphones" (page 6-81).
- The cooling fan of this unit may activate if the temperature of the unit is high, however, this does not indicate a malfunction.

▼ Basic Operation

**Power ON/OFF**

**Turning on the power**

The Rear Entertainment System automatically turns on when any of the following operations are done with the ignition switched to ACC or ON.
- The display is open and a disc is inserted.
- The POWER button on the remote controller is pressed.

**Turning off**

The Rear Entertainment System turns off when any of the following operations are done.
- The POWER button on the remote controller is pressed.
- The ignition is switched off.
- The display is closed.

**Playback**

The top menu or disc menu may be displayed on the monitor screen when a disc is played. From these menus, the disc functions can be performed. Refer to Top menu and disc menu on page 6-99.

**NOTE**

- For some discs, the top menu or disc menu may be displayed automatically after playback.
- Refer to the instruction manual attached to the disc for the top menu or disc menu.

**When no disc is inserted**

1. Switch the ignition to ACC or ON.
2. Insert the disc into the disc slot. After the disc is inserted, the playback starts.
CAUTION
Insert the disc with its label-side (decorated side) facing upward. If the disc is inserted upside-down, it may cause a malfunction.

When a disc has been inserted
1. Switch the ignition to ACC or ON.
2. Turn on the Rear Entertainment System.
3. Press the PLAY button to start playback.

NOTE
If the Rear Entertainment System has been turned off during a previous playback, playback automatically resumes when the system is turned on.

Stopping the playback
Press the STOP button to stop the playback.
To resume the playback, press the PLAY button.

Resume playback function
The Rear Entertainment System stores the position where the playback has been stopped using the resume playback function.
Press the PLAY button to resume the playback from the position previously stopped.

NOTE
If the RETURN button is pressed after the playback has been stopped, the resume playback function is canceled. Once the resume playback function is canceled, the playback starts from the first chapter (DVD video)/track (video CD, audio CD, DVD audio, or MP3/WMA CD) when the PLAY button is pressed.

Pausing the playback
Press the PAUSE button to pause the playback.
Press the PAUSE or PLAY button to resume the playback.

Fast-forward/Reverse
Fast-forward
Image and sound is fast-forwarded while the FWD button (►►) is pressed.

Reverse
Image and sound is reversed while the REW button (◄◄) is pressed.

Slow playback (DVD video and video CD)
Press the SLOW button to slow the playback.
Press the SLOW or PLAY button to return to normal playback speed.

NOTE
• Slow playback is not available for audio CD, DVD audio and MP3/WMA CD.
• The unit is muted while in slow playback.

Skipping the chapter/track
Chapter (DVD video) or track (video CD, DVD audio, audio CD, and MP3/WMA CD) can be skipped (changed).

Fast-forward skip
Press the NEXT button (►►) to skip to the next chapter/track.

Reverse skip
Press the PREV button (◄◄) to return to the beginning of the current chapter/track.
NOTE
To return to the beginning of the previous chapter/track, press the PREV button (◄) again within 2 seconds after the button is pressed.

Skipping to desired chapter/track
The playback can be started from the desired chapter (DVD video)/track (video CD, DVD audio and audio CD) by entering the chapter/track number.

1. Enter the chapter/track number using the number keys (0 to 9) while the disc is being played.
2. Press the ENTER button to start the playback from the selected chapter/track.
   Example: when selecting chapter/track number “10”
   1. Press the number key (1).
   2. Press the number key (0).
   3. Press the ENTER button.

NOTE
• If a chapter/track number not in the disc is input, the last chapter/track is played.
• Refer to the instruction manual attached to the disc for chapter/track numbers.

Skipping to desired title/group
The playback can be started from the desired title/group by entering the title/group number.

1. Enter the title/group number using the number keys (0 to 9) while the playback is stopped.
2. Press the ENTER button to start the playback from the selected title.
   Example: When selecting title number “2”
   1. Press the number key (2).
   2. Press the ENTER button.

NOTE
• If a chapter/track number not in the disc is input, the last title/group is played.
• Refer to the instruction manual attached to the disc for the title/group numbers.

Bonus group playback
1. Press the number button (0) while a disc is not being played.
   If the disc has a bonus group*, the display shows as follows.

   Bonus Group

2. Press the ENTER button to change the display to the password input screen, then enter the password.
   For the password, see the instruction manual attached to the disc.

   Please input a 4-digit password.
   * * * *
   Set : [ENTER]
   Cancel : [RETURN]

* Bonus group means the 'Bonus tracks' originally recorded in the disc.
Assist Functions (DVD video, DVD audio, video CD and audio CD)

Top menu and disc menu

NOTE
Operation may vary or cannot be performed depending on the disc. Refer to the instruction manual attached to the disc.

Top menu
Multiple titles may have been recorded on some discs. For these DVD discs, the desired title can be selected in the top menu.

Disc menu
The unique functions of each DVD disc are recorded as the menu. This is referred to as the disc menu. Various menu related images and sound are recorded in the disc menu.

Displaying/selecting top menu/disc menu

1. To display the top menu on the screen, press the MENU button while the disc is not being played. To display the disc menu on the screen, press the MENU button during playback.

2. Move the cursor to the desired menu by operating the select button up/down or left/right.

3. Press the ENTER button to operate the selected menu.

4. To return to playback, press the MENU button or the STOP button, then the PLAY button.

Function menu
In the function menu, the following items can be selected/operated while in playback.

1. Language (sound and subtitle) selection (DVD video and DVD audio)
2. Subtitle ON/OFF (DVD video)
3. Display angle change (DVD video and DVD audio)
4. Sound output balance adjustment (Video CD)
5. Repeat/random playback (Video CD, DVD audio and audio CD)
Video CD/audio CD function menu

NOTE

• In the function menu, the title/group number, chapter/track number, and playback elapsed time cannot be selected/changed.

• Settings set in the function menu are available only for the current disc. Settings set in the initial setting function menu are available for the Rear Entertainment System unit itself so that the settings remain after the disc is changed. Refer to Initial setting function on page 6-105.

Displaying the function menu

Press the DISPLAY button while in playback to display the function menu on the monitor screen.

Press the DISPLAY button again to cancel.

NOTE

For audio CD, the function menu is automatically displayed when playback is started.

Language (sound and subtitles) selection (DVD video and DVD audio)

Sound and subtitles can be changed to the desired language.

NOTE

Available languages varies depending on the DVD disc.

1. Press the DISPLAY button to display the function menu.

2. Move the cursor and select the sound select mode or subtitle select mode by operating the select button to the left or right.

3. Move the cursor and select the desired language by operating the select button up or down.

4. Press the DISPLAY button to finish the function menu.

Subtitle ON/OFF (DVD video)

Subtitle on/off can be set.

1. Press the DISPLAY button to display the function menu.
2. Move the cursor to the subtitle ON/OFF mode by operating the select button to the left or right.

3. Select ON to display the subtitles, or OFF to hide them by operating the select button up or down.

4. Press the DISPLAY button to finish the function menu.

Display angle change (DVD video and DVD audio)
The image can be displayed at the desired angle.

**NOTE**
- Display angle change is not available for discs other than multi-angle recorded DVD discs. Refer to the instruction manual attached to the disc for details.
- The available angles vary depending on the disc.

1. Press the DISPLAY button to display the function menu.

2. Move the cursor to the display angle change mode by operating the select button to the left or right.

3. Move the cursor and select the desired angle by operating the select button up or down.

4. Press the DISPLAY button to finish the function menu.

Sound output balance adjustment (Video CD)
1. Press the DISPLAY button during the video CD playback to display the function menu.

2. Move the cursor to the sound output balance adjustment mode by operating the select button to the left or right.
Interior Comfort

Rear Entertainment System

3. Set the sound output to the desired balance by operating the select button up or down.

Press the button and the settings changes in the order of L+R →L →R. The sound balance changes according to the setting.

L: Audio recorded in the audio output channel from the left is output.
R: Audio recorded in the audio output channel from the right is output.
L + R: Audio recorded in the audio output channel from the left/right is output.

4. Press the DISPLAY button to finish the function menu.

Repeat/random playback (Video CD, DVD audio and audio CD)

Tracks can be played repeatedly or randomly.

1. Press the DISPLAY button while in the playback to display the function menu on the monitor screen.

2. Move the cursor to the repeat/random playback mode by operating the select button to the left or right.

3. Select the desired mode by operating the select button up or down.

(1) During DVD audio:
Each time the button is pressed, the mode changes in the order of 1 — NON — RPF — NOF — RND — RNF — ALL — 1.
ALL: Repeats all tracks.
1: Repeats the current track.
RPF: Repeats all tracks in the current group
NOF: Stops playback after all tracks in the current group are played.
RND: Randomly selects and plays a track from all tracks.
RNF: Randomly selects and plays a track from the current group.
(2) During video CD and audio CD
Each time the button is pressed, the mode changes in the order of 1 — NON — RND — ALL — 1.
ALL: Repeats all tracks. (Returns to the beginning of the disc after all tracks are played.)
1: Repeats the current track.
NON: Stops playback after all tracks in the disc are played.
RND: Randomly plays a track.

4. Press the DISPLAY button to finish the function menu.

NOTE
The function menu is displayed during audio CD playback and it cannot be canceled by pressing the DISPLAY button during playback.

▼ Assist Functions (MP3/WMA CD)

Folders and files
The order of MP3/WMA file playback is as follows:
• A folder number is assigned to each folder on a disc.
For example, the folder numbers for folders (1), (3), and (5) in the figure are not displayed because they do not contain MP3/WMA files.

Folders and files in a hierarchy are played in the order that they are recorded on the disc by the writing software.

Up to 255 files in 8 hierarchies can be played.

The loading time may be longer depending on the disc.

Folder/File information display window

Display mode

1. Move the cursor to the display mode by operating the select button to the left or right.

2. Change the display mode by operating the select button up or down.

Changing the display mode

Function menu

If MP3/WMA files are to be played, operate the select button and move the cursor to select the playback file, playback mode, and display mode.

Changing the playback mode

1. Move the cursor to the playback mode by operating the select button to the left or right.
2. Change the display mode by operating the select button up or down.

<table>
<thead>
<tr>
<th>Display</th>
<th>Playback mode</th>
</tr>

</tr>
<tr>
<td>RNF</td>
<td>Files in the current folder are played randomly.</td>
</tr>
</tbody>
</table>

**NOTE**
If RND or RNF is selected during a playlist playback, files on the playlist are played randomly. Refer to Playlist File Playback on page 6-104.

### Selection file

#### While in FOLDER display mode

1. Move the cursor to the folder/file information display window by operating the select button to the left or right.
2. Move the cursor to the desired folder/file by operating the select button up or down.
3. Press the ENTER button to play the selected file or to move to the selected folder.

**NOTE**
To return to an upper hierarchy, move the cursor to the "PARENT FOLDER" and press the ENTER button.

#### While in TREEIDX display mode

1. Move the cursor to the folder/file information display window by operating the select button to the left or right.
2. Move the cursor to the folder where the desired file is located by operating the select button up or down.
3. Press the ENTER button. Playback starts from the first track in the selected folder.

**NOTE**
- ‘’ mark is attached to a folder if the folder has a playable MP3/WMA file.
- If a disc including a playlist is being played, the playlist file can be selected.

### Playlist file playback

Playlist files can be played using the following procedure:

1. Set the display mode to the TREEIDX mode. Refer to Changing the display mode on page 6-102.
2. Move the cursor to the PLAYLIST by operating the select button.
3. Press the ENTER button to change the display from TREEIDX to PLSTIDX.
4. Move the cursor to the desired playlist file by operating the select button up or down.
5. Press the ENTER button. Playback starts in the order programmed in the playlist file.

**NOTE**
The loading time after pressing the ENTER button may be longer depending on the disc.
**Initial Setting Function**

The settings set in the initial setting function remain after the unit is turned off or the disc is changed.

The following items can be set in the initial setting.

- **Lang**: Sound and subtitle setting
- **Rating**: Parental lock setting
- **Mark**: On-Screen Mark, Angle Mark and Mode Priority settings
- **Audio**: Audio DRC setting
- **Aspect**: Not available

**Displaying/selecting the initial setting function menu**

1. Press the SET UP button while the disc is not being played to display the initial setting function menu on the monitor screen.

**NOTE**
- The initial setting can be performed with no disc inserted.
- After setting the initial setting, the playback starts from the first chapter/track.

2. Move the cursor to the desired menu by operating the select button up/down or left/right.

3. Press the ENTER button. The selected menu is highlighted to indicate that the menu is selected.

4. Select the item to be set by operating the select button up or down.

---

**Interior Comfort**

**Rear Entertainment System**

---

6-105
5. Press the ENTER button. The highlighted color returns to the previous color to indicate that the selected item is set.

6. To finish the function menu on the monitor display, press the SET UP, MENU, or STOP button.

**Lang (Language)**

Sound and subtitles can be changed to the desired language.

**Menu language**: Language used for top menu/disc menu

**Sound language**: Language used for movie sound (voice)

**Subtitle language**: Language used for subtitles

**Changing to a language other than English and Japanese**

**NOTE**

- Languages other than English and Japanese can be set by entering the language code in the language code list. Refer to Language code list on page 6-114.
- If the selected language is not recorded in the disc, the language is not available.

1. Move the cursor to “Other” by operating the select button up or down.

2. Press the ENTER button, and then operate the select button to the right.

3. Enter the desired language code by pressing the number keys (0 to 9) or operating the select button up or down.

4. Press the ENTER button to set the language of the entered language code.

**NOTE**

If “English” or “Japanese” is selected afterward, the previously entered language code is cleared.

**Rating**

If the disc has a parental lock code, viewing can be restricted. Also, the setting can be protected by a password to prevent someone changing the setting.
Viewing can be restricted by setting the parent lock level. For example, if the level is set to 6, level 7 or higher viewing is locked and cannot be played.

**NOTE**
- Parent lock is not available depending on the disc.
- The initial password setting (when purchased) is “0000”.

**Rating change**: Parent lock level setting
**Country change**: Setting for the country where the disc is being played.
**Password change**: Registered password changes

### Changing the Rating setting

1. Enter the password by pressing the number keys (0 to 9) or operating the select button up or down.

![Password Entry Screen]

2. Press the ENTER button. If the password is confirmed, the Rating change mode is displayed.

**NOTE**
The setting cannot be changed without the correct password. Note down the password so you don't forget it.

3. Select the desired parent lock level and press the ENTER button to set.
Country change

NOTE
It is necessary to set the country code because the parent lock level is different depending on the country. When using the unit in U.S.A., set the country code to “3018”. The parent lock function is disabled without the country code setting (page 6-116).

1. Enter the password by pressing the number keys (0 to 9) or operating the select button up or down.

2. Press the ENTER button. If the password is confirmed, the password change mode is displayed.

NOTE
The setting cannot be changed without the correct password. Note down the password so you don’t forget it.

3. Enter the country code by pressing the number keys (0 to 9) or operating the select button up or down.

4. Press the ENTER button to set the country of the entered country code.

Changing the password

1. Enter the password by pressing the number keys (0 to 9) or operating the select button up or down.

2. Press the ENTER button. If the password is confirmed, the password change mode is displayed.

NOTE
The setting cannot be changed without the correct password. Note down the password so you don’t forget it.
3. Enter the new password by pressing the number keys (0 to 9) or operating the select button up or down.

4. Press the ENTER button to set the new password.

Mark
The DVD video playback status and angle display on/off, and priority of the inserted discs can be set.

<table>
<thead>
<tr>
<th>On-Screen</th>
<th>Mark</th>
<th>Audio</th>
<th>Aspect</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Off</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Angle Mark</th>
<th>On</th>
<th>Off</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Mode Priority</th>
<th>MP3</th>
<th>Video</th>
<th>CD</th>
</tr>
</thead>
</table>

On-Screen Mark
Select ON to display, OFF not to display the DVD video playback status on the upper right corner of the screen.

When the screen display is on, the following marks are displayed on the upper right corner of the screen (in Disc mode).

<table>
<thead>
<tr>
<th>Mark</th>
<th>Condition</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Playback</td>
</tr>
<tr>
<td>R</td>
<td>Stop (Resume standby)</td>
</tr>
<tr>
<td></td>
<td>Pause</td>
</tr>
<tr>
<td></td>
<td>Fast-forward</td>
</tr>
<tr>
<td></td>
<td>Reverse</td>
</tr>
</tbody>
</table>

Angle display
The camera mark display when multi-angle can be performed.
NOTE

- The display angle change is not available for discs other than multi-angle recorded DVD discs. Refer to the instruction manual accompanying the disc for details.
- The screen size and angle can be changed when On-Screen Mark and Angle Mark is off.

Mode Priority
The priority of the inserted discs (CD-R/CD-RW) can be selected.

Audio

Digital Output
Not used with this unit.

Audio DRC
The audio dynamic range can be adjusted to reduce the difference between the maximum and minimum audio output. Audio compression of the DVD video playback can be selected or deselected during playback using the following modes:

<table>
<thead>
<tr>
<th>Mode</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>NONE</td>
<td>Playback with normal volume</td>
</tr>
<tr>
<td>LINE</td>
<td>Lower volume is increased to reduce difference in volume range.</td>
</tr>
<tr>
<td>RF</td>
<td>Use when it is still difficult to hear sound while using LINE. Sound quality is reduced while using RF.</td>
</tr>
</tbody>
</table>

NOTE
Only sound output from the headphones is available.

Auxiliary Input (AUX mode)

In AUX mode, AV equipment such as a video game player or a video camera can be used by connecting the image and sound cables to the auxiliary terminals.

NOTE
- Before operating, read the instruction manual accompanying the AV equipment to be used.
- To listen to the Rear Entertainment System sound from the vehicle speakers, change the audio or navigation system sound to the Rear Entertainment System sound. Refer to Sound on page 6-91.
- To listen to audio other than from the speakers of the rear entertainment system, it is necessary to use the wireless headphones that are included. For headphone specification, refer to “Operation Tips for Headphones” (page 6-81).
- The cooling fan for this unit may activate if the temperature of the unit is high, however, this does not indicate a malfunction.

Auxiliary Terminals and Power Outlet
The auxiliary terminals and power outlet are positioned as shown in the figure.
Auxiliary terminals
The auxiliary terminals consist of one image input terminal and two sound input terminals (for left and right).
- Image input terminal: Yellow
- Sound input (Right) terminal: Red
- Sound input (Left) terminal: White
To use, open the cover.

CAUTION
Close the cover when the terminals are not in use. If foreign material penetrates, or liquid is spilled on it, it may cause a malfunction.

NOTE
- For monaural equipment (with one sound output terminal), connect the terminal to the sound input terminal (White). The sound is output from the speaker to which the terminal has been connected.
- Noise may occur depending on the connected equipment.

Power Outlet
The power outlet can be used as a power supply for electrical devices when the ignition is switched to ACC or ON.
Only use AC 115 V electrical appliances requiring no greater than 100 W
Open the cover to use the power outlet.

WARNING
- Never use medical instruments with the power outlet.
- Follow the cautions below to prevent electrical shock.
  - Do not plug accessories into the power outlet or unplug them with wet hands.
  - Do not put anything other than plugs into the outlet.
  - Do not disassemble the outlet.

CAUTION
- Always close the cover when not in use. If foreign objects or liquid penetrate the outlet, it may cause a malfunction.
- Do not use electrical appliances that exceed the prescribed power capacity. It may cause a malfunction.

NOTE
To prevent discharging of the battery, do not use the auxiliary input for long periods with the engine off or idling.

Plug-in
1. Open the cover.
2. Lightly insert the plug and turn the outlet 90 degrees, then insert it fully.

Unplug
1. Pull the plug out.
2. Close the cover.
NOTE
The following electrical appliances may not operate even if their electrical capacity is 100 W or less.
- Appliances requiring large amounts of power for activation (such as cathode-ray tube televisions, refrigerators with a compressor, electrical pumps, and electrical tools)
- Appliances with a power supply frequency switch function (such as clocks and audio)
- Appliances for precise data processing (such as measurement equipment)
Some electrical appliances other than the above may not operate.
The protection circuit may operate and the power supply may be stopped to prevent battery depletion.
When using an electrical appliance for data processing such as a personal computer, back up the data frequently.
The power outlet (AC115V) cannot be used in the following cases:
- Battery power is weak
- Appliances with a capacity of 100 W or more are used
- Cabin temperature is extremely hot
Noise may occur during radio or television operation depending on the electrical appliance being used.

▼ Using AV Equipment

CAUTION
For safe driving, adjust the volume while driving so that ambient sound can be heard.

NOTE
Before operating, read the instruction manual accompanying the AV equipment to be used.

1. Switch the ignition off.
2. If a power supply is necessary, connect the outlet to the power outlet. Refer to Power outlet on page 6-110.
3. Connect the image cable and sound cables to the input terminals.

4. Switch the ignition to ACC or ON.
5. Press the SOURCE button and select the AUX mode. Refer to Mode on page 6-95.

6. Operate the equipment following the instruction manual accompanying the equipment.

Error Message

- **Message**

**Disc mode error message**
Use of Non-supported Disc
An error message is displayed if a non-supported DVD-ROM disc, a non-supported disc format or a disc (PAL, other) with a different image signal encoding is read.

**Incorrect region code**
An error message is displayed if a disc other than one with region code 1 or including region 1 is inserted.

**High temperature malfunction**
If the temperature surrounding the DVD player area exceeds 88°C (190°F), the DVD player operation is stopped to protect the unit. When the temperature decreases to 70°C (158°F) or less, the protective circuit function is cleared and the operation is restored.

- **If the disc content cannot be read:**
An error message is displayed if the disc cannot be read due to scratches or the content cannot be read.
System errors (Common to each mode)

Power malfunction
An error message is displayed if the power supply to the rear entertainment system drops (About 9.5 V or less), and the power is turned off. The power is restored when the power supply to the rear entertainment system is 10 V or more.

High temperature malfunction
If the temperature around the LCD area exceeds 95°C (203°F), the power supply is turned off to protect the LCD. When the temperature around the LCD area is 85°C (185°F) or less, the protective circuit function is cleared and the operation is restored.
Symptoms and Actions

If any malfunction is suspected, verify the following before requesting a repair. If the problem cannot be solved after performing the procedure, have the system inspected at an Authorized Mazda Dealer. Some functions are not available depending on the disc. Read the instruction manual attached to the disc before operating.

What is Bluetooth Audio?

Bluetooth audio outline

By programming portable audio devices equipped with the Bluetooth communication function to the vehicle's Bluetooth unit, you can listen to music or audio recorded on these audio devices from the vehicle's speakers. Bluetooth audio devices do not need to be plugged into the auxiliary jack. After programming, operate the audio system's control panel to play/stop the music or audio.

CAUTION

➢ Always program audio devices to the Bluetooth audio system while the vehicle is stopped.
Because only specified Bluetooth audio devices can be used, consult an Authorized Mazda Dealer when purchasing or changing devices. Bluetooth audio devices which correspond to specified Bluetooth versions and profiles can be Bluetooth-connected to the vehicle's Bluetooth unit. However, even among these devices are ones which cannot be Bluetooth-connected or have limited functionality. Each device to be used with the vehicle's Bluetooth unit needs to be checked individually for compatibility. Consult an Authorized Mazda Dealer concerning device compatibility.

U.S.A.
Phone: 800-430-0153
Web: www.MazdaUSA.com/bluetooth

Canada
Phone: 800-430-0153
Web: www.mazdahandsfree.ca

A2DP is a profile which transmits only audio to the Bluetooth unit. If your Bluetooth audio device corresponds only to A2DP, but not AVRCP, you cannot operate it using the control panel of the vehicle's audio system. In this case, the Bluetooth audio device can be operated by controlling the device itself, the same as when a portable audio system without the Bluetooth communication function is connected to the AUX terminal.

Yes: Available
No: Not available

NOTE
- The system may not operate normally depending on the Bluetooth audio device.
- To make sure that your Bluetooth audio device is Ver. 1.0 or 1.3, refer to the Owner's Manual for the Bluetooth audio device.

Applicable Bluetooth specification
Ver. 2.0 or higher

Audio profile
- A2DP (Advanced Audio Distribution Profile) Ver. 1.0
- AVRCP (Audio/Video Remote Control Profile) Ver. 1.0/1.3

Bluetooth®
Bluetooth is the registered trademark of Bluetooth SIG, Inc.

**NOTE**
- It may not be possible to play a Bluetooth audio device if it is placed in a location where transmission is compromised, such as inside a metal container or the trunk. Move the Bluetooth audio device to a location where transmission is possible.
- The battery consumption of Bluetooth audio devices is higher while Bluetooth-connected.
- If a non-Bluetooth device is to be used, a commercially-available Bluetooth adapter is required. When playing an audio device with a Bluetooth adapter installed, programming of the audio device may not be possible or audio may not be heard from the vehicle speakers if the connection of the adapter and the device is poor. If this happens, check whether the Bluetooth adapter is properly connected.

▼ Bluetooth Audio Preparation

**Bluetooth audio device set-up**
Bluetooth audio programming, changes, deletions, and display of programmed device information can be performed.

**Bluetooth audio device programming**
Any Bluetooth audio device must be programmed to the vehicle's Bluetooth unit before it can be listened to over the vehicle's speakers. A maximum of seven devices including Bluetooth audio devices and hands-free mobile phones can be programmed to one vehicle.

**NOTE**
- Always perform Bluetooth audio device programming while the vehicle is stopped.
- Programming cannot be performed while the vehicle is moving. If you attempt to perform programming while the vehicle is moving, “Pairing prohibited” is displayed.
- A total of seven devices can be programmed to one vehicle. If you require an additional device to be programmed to a vehicle with seven devices already programmed, delete one of the programmed devices before programming the latest one.
- If a Bluetooth device has already been programmed to the vehicle as a hands-free mobile phone, it does not need to be programmed again when using the device as a Bluetooth audio device. Conversely, it does not need to be programmed again as a hands-free mobile phone if it has already been programmed as a Bluetooth audio device.
- Look around to be sure other likely Bluetooth audio devices are not in range when you start to program. If in doubt, move your car to another location. The transmission range of a Bluetooth audio device is about 10 m (32 ft). Therefore, if there is another Bluetooth audio device within a 10 m (32 ft) radius of the vehicle, the device may be identified and programmed instead.
- Device registration can also be done using voice recognition (page 6-138).

Concerning the operation of a Bluetooth audio device itself, refer to its instruction manual. Some Bluetooth audio devices have PIN codes (four digits). Refer to the audio device's instruction manual because the programming procedure differs depending on whether it has a PIN code or not.
Programming a Bluetooth audio device which has a PIN code (four digits)

1. Press selection button 2 to display the Bluetooth audio setting menu screen.
2. Press selection button 2 again to display the pairing program screen.
3. “Enter Pin:0000” and “Rotate/Press TUNE dial to change code. Select “OK” when complete.” are displayed for input of the PIN code.
4. Turn the manual tuning dial to select the specified number for the Bluetooth audio device and press the enter button (ENTER) to input the number.

**NOTE**
Some devices accept only a particular pairing code (Usually, “0000” or “1234”). If pairing cannot be completed, refer to the owner’s manual of your mobile device, and try those numbers if necessary.

5. After inputting the four digits, turn the manual tuning dial and select “OK”, and then press the enter button (ENTER) to set the four digits and display “Pairing is in progress. Please start pairing procedure on your Bluetooth device. Use the PIN “xxxx.”.”

**NOTE**
Press the return button (RETURN) to return to the pairing program screen.

6. Operate the Bluetooth audio device and set it to the program mode while “Pairing is in progress. Please start pairing procedure on your Bluetooth device. Use the PIN “xxxx.”.” is displayed.

7. When the pairing programming is completed, a “▶” symbol and “Pairing complete” are displayed, and then the display returns to the normal display. If an error occurs during program pairing, “Error” is displayed and the display returns to the pairing program screen.

**NOTE**
Some Bluetooth audio devices need a certain amount of time before the “▶” symbol is displayed.

Programming a Bluetooth audio device which does not have a PIN code (four digits)

1. Press selection button 2 to display the Bluetooth audio setting menu screen.
2. Press selection button 2 again to display the pairing program screen.
3. “Enter Pin:0000” and “Rotate/Press TUNE dial to change code. Select “OK” when complete.” are displayed for input of the PIN code.
4. Turn the manual tuning dial and select “OK”, and then press the enter button (ENTER) to set the four digits and display “Pairing is in progress. Please start pairing procedure on your Bluetooth device. Use the PIN “0000.”.”

**NOTE**
Press the return button (RETURN) to return to the pairing program screen.
5. Operate the Bluetooth audio device and set it to the program mode while “Pairing is in progress. Please start pairing procedure on your Bluetooth device. Use the PIN “0000”. “ is displayed.

6. The Bluetooth audio device will request input of a PIN code. Input “0000”.

7. When the pairing programming is completed, a “.VALUE” symbol and “Pairing complete” are displayed, and then it returns to the normal display. If an error occurs during program pairing, “Error” is displayed and the display returns to the pairing program screen.

**NOTE**
- If pairing cannot be completed, try “1234” instead. Refer to the owner’s manual of your mobile device for the right PIN code.
- Some Bluetooth audio devices need a certain amount of time before the “VALUE” symbol is displayed.

**Changing the link to a Bluetooth audio device**
If several devices have been programmed, the Bluetooth unit links the device last programmed. If you would like to link a different programmed device, it is necessary to change the link. The order of device priority after the link has been changed is maintained even when the ignition is switched off.

**NOTE**
- If a hands-free type mobile phone has been the most recently programmed device, the Bluetooth unit links this device. If you would like to use a Bluetooth audio type device which has been previously programmed to the Bluetooth unit, the link must be changed to this device.
- If the device name cannot be displayed, “...” is added at the end to the part of the title which can be displayed.

**Changing the link to only a Bluetooth audio device**

1. Press selection button 2 to display the Bluetooth audio setting menu screen.

2. Press selection button 3 to display the link change screen and the current pairing programming device name.

3. Press selection button 1, 2, 3, 4, 5, 6, or 7 to select the name of the device you would like to change. The “VALUE” symbol disappears, and the device name and “Connection is in progress.” are displayed.

**NOTE**
Press the return button (RETURN ) to return to the link change screen.

4. When the link change is completed, a “VALUE” symbol and “Link Changed” are displayed, and then it returns to the normal display. If an error occurs while trying to link a device, “Error” is displayed and the display returns to the link change screen.
NOTE
- Some Bluetooth audio devices need a certain amount of time before the “♪” symbol is displayed.
- If a link change error occurs, check the programming status of the Bluetooth audio device and the location of the device in the vehicle (not in the trunk or a metal-type box), and then try the link operation again.

Changing the link to a Bluetooth Hands-Free and Bluetooth audio device

1. Press selection button 2 to display the Bluetooth audio setting menu screen.
2. Press selection button 3 to display the link change screen and the current pairing programming device name.
3. Press selection button 1, 2, 3, 4, 5, 6, or 7 to select the name of the device you would like to change.
4. The device name and “Please Select Device” are displayed.
5. Press selection button 3 to select “Audio”. The “♪” symbol disappears, and then “Connection is in progress.” is displayed.

NOTE
Press the return button (RETURN ) to return to the link change screen.

6. When the link change is completed, a “♪” symbol and “Link Changed” are displayed, and then it returns to the normal display.
   If an error occurs while trying to change the link, “Error” is displayed, and then it returns to the link change screen.

NOTE
- Some Bluetooth audio devices need a certain amount of time before the “♪” symbol is displayed.
- If a link change error occurs, check the programming status of the Bluetooth audio device and the location of the device in the vehicle (not in the trunk or a metal-type box), and then try the link operation again.

Deleting the link to a Bluetooth audio device

NOTE
If the device name and Bluetooth address cannot be displayed, “...” is added at the end to the part of the title which can be displayed.

1. Press selection button 2 to display the Bluetooth audio setting menu screen.
2. Press selection button 4 to display the pair link deletion screen and the current pairing programming device name.
3. Press selection button 1, 2, 3, 4, 5, 6, or 7 to select the name of the device you would like to delete.
4. The link delete confirmation screen is displayed, and then “Delete select device?”,” the device name, and the Bluetooth address are displayed.
5. Press selection button 1 to delete the selected device.

NOTE
Press the return button (RETURN ) to return to the previous display.
6. When the link deletion is completed, “Deleted” is displayed, and then it returns to the normal display.
If an error occurs while trying to delete the link, “Error” is displayed, and then it returns to the link deletion screen.

**NOTE**
If a device is deleted while it is being linked, linking to other devices will not be possible.

**Bluetooth audio device information display**
1. Press selection button 2 to display the Bluetooth audio setting menu screen.
2. Press selection button 6 to display the device information display screen.
If the device information is available, the device name and Bluetooth address are displayed, and then it returns to the Bluetooth audio setting menu screen.
If the device information is not available, “Failed to obtain device information.” is displayed, and then it returns to the Bluetooth audio setting menu screen.

**NOTE**
If the device name and Bluetooth address cannot be displayed, “...” is added at the end to the part of the title which can be displayed.

**▼How to Use the Bluetooth Audio System**

**Switching to Bluetooth audio mode**
To listen to music or voice audio recorded to a Bluetooth audio device, switch to the Bluetooth audio mode to operate the audio device using the audio system control panel.
Any Bluetooth audio device must be programmed to the vehicle's Bluetooth unit before it can be used. (Refer to “Bluetooth audio device programming”)
1. Switch the ignition to ACC or ON.
2. Turn on the Bluetooth audio device's power.
   Make sure that the “♪” symbol is displayed in the audio unit screen.
   The symbol is not displayed if an unprogrammed Bluetooth audio device is being used or the vehicle's Bluetooth unit has a malfunction.

**NOTE**
Some Bluetooth audio devices need a certain amount of time before the “♪” symbol is displayed.

3. Press the AUX button (CD/AUX) to switch the Bluetooth audio mode.
4. The audio recorded to the Bluetooth audio device begins playback.
NOTE

- If the Bluetooth audio device does not begin playback, press the Play/Pause button (▶).  
- If the mode is switched from Bluetooth audio mode to another mode (radio mode), audio playback from the Bluetooth audio device stops.
- If a call is received on a hands-free mobile phone during playback from the Bluetooth audio device, the playback is stopped. Playback from the Bluetooth audio device resumes after the call ends.

Playback

Press the AUX button (CD/AUX) to switch the Bluetooth audio mode and start playback.

NOTE

- If the Bluetooth audio device does not begin playback, press the Play/Pause button (▶).  

If the current device is lower than AVRCP Ver. 1.3:

“Bluetooth-Audio” is displayed.

If the current device is AVRCP Ver. 1.3:

“Bluetooth-Audio”, track number, elapsed time, album name, artist name, and song name are displayed.

NOTE

- If the entire title cannot be displayed, “...” is added at the end to the part of the title which can be displayed.
- If title information is not available, “NO TITLE” is displayed.
- If there are any undisplayable characters in the title, “--------” is displayed.

Pause

Press the Play/Pause button (▶).  
Press the button again to resume playback.

File (track) search

File (track) up

Press the track up button (▲) or turn the file dial clockwise.

File (track) down

Press the track down button (▼) or turn the file dial counterclockwise.

Fast-forward/Reverse (only AVRCP Ver. 1.3)

Fast-forward

Press and hold the track up button (▲).

Reverse

Press and hold the track down button (▼).

Display scroll

If each title cannot be fully displayed at one time, press the text button (TEXT) to display the rest of the characters.

If the last character of the title is displayed, press the text button (TEXT) to return the beginning of the title.
Bluetooth Hands-Free

What is Bluetooth Hands-Free?

Bluetooth Hands-Free Outline
By connecting a Bluetooth equipped device (Mobile phone) to the hands-free unit equipped on the vehicle, making and receiving calls are possible using the talk button, pick-up button and hang-up button located on the steering wheel, and saying the voice commands.

WARNING
Perform phonebook registration related operations while the vehicle is parked:
Performing phonebook registration while driving the vehicle could be a distraction to your driving and result in an accident. In addition, a mistake in performing the phonebook operation could result in the loss of important data.

Bluetooth equipped device (Mobile phone)
A Bluetooth equipped device (Mobile phone) communicates with the hands-free unit equipped on the vehicle using radio transmission (Bluetooth). For example, if the device (Mobile phone) is placed in a coat pocket, the phone calls can be made through your mobile service without taking out and handling the device (Mobile phone).

CAUTION
The types of devices (Mobile phone) which can be connected to the hands-free unit are limited. Therefore, before purchasing or changing your device (Mobile phone) model, consult Mazda Bluetooth Hands-Free Customer Service or visit www.MazdaUSA.com/bluetooth for a complete list of compatible phones. Devices (Mobile phone) which can be connected to the hands-free system need to be compliant with Bluetooth specifications and the appropriate profile. However, even among these Bluetooth devices (Mobile phone) are some which will not connect with your Mazda or will have limited function. Therefore, consult Mazda Bluetooth Hands-Free Customer Service for information regarding device (Mobile phone) compatibility:
- U.S.A.
  Phone: 800-430-0153
  Web: www.MazdaUSA.com/bluetooth
- Canada
  Phone: 800-430-0153
  Web: www.mazdahandsfree.ca

Applicable Bluetooth specification
Ver. 2.0 or higher

Response profile
- HFP (Hands Free Profile) Ver. 1.5
- DUN (Dial-up Networking Profile) Ver. 1.1

(Type B/Navigation system)
- PBAP (Phone Book Access Profile) Ver. 1.0
- A2DP (Advanced Audio Distribution Profile) Ver. 1.0
- AVRCP (Audio/Video Remote Control Profile) Ver. 1.0/1.3

* Some models. 6-133
Bluetooth Hands-Free (Voice Recognition)

- OPP (Object Push Profile) Ver. 1.1

Bluetooth is the registered trademark of Bluetooth SIG. Inc.

**NOTE**
- The Bluetooth Hands-Free system is operable several seconds after the ignition is switched to ACC or ON (requires less than 15 seconds).
- If the ignition is switched off during a hands-free call, the line is transferred to the device (Mobile phone) automatically.
- If the device (Mobile phone) is in a location where radio reception is difficult such as a metal container or in the trunk, the call may not be connected using Bluetooth. If communication is not possible, change the location of the device (Mobile phone).

**Component Parts**
Bluetooth Hands-Free consists of the following items:
- Talk button
- Pick-up button
- Hang-up button
- Information display (Type A/Navigation system)
- Microphone
- Audio unit/Navigation system

**Talk button, Pick-Up button and Hang-Up button**
Basic functions of Bluetooth Hands-Free can be used for such things as making calls or hanging up using the talk button, pick-up button and hang-up button on the steering wheel.

**Talk button operations**
A short press or a long press of the talk button is used to operate the system as follows:
- Short press (Press the button less than 0.7 sec.)
- Long press (Press the button 0.7 sec. or more.)
Information display (Type A/Navigation system)
When available, the information display shows telephone numbers, Bluetooth Hands-Free messages, and operation status.

Microphone
The microphone is used for speaking voice commands or exchanging conversation.

Voice
To prevent the deterioration in voice recognition rate and voice quality, the following points must be observed:
- It is not necessary to face the microphone or approach it. Speak the voice commands while maintaining a safe driving position.
- Close the windows and/or the moonroof to reduce loud noises from outside the vehicle, or turn down the airflow of the climate control system while Bluetooth Hands-Free is being used. Voice recognition may not function correctly or voice quality may deteriorate under the following conditions.
  - A passenger is speaking.
  - Driving with the window and/or the moonroof open.
  - Driving on bumpy roads.
  - Noise outside of the vehicle is loud. (Construction sites, inside tunnels, excess oncoming traffic, or heavy rain.)
  - Operation noise from turn signals, wipers, or the horn is heard.
  - A/C airflow is strong or wind is blowing on the microphone.
  - There is noise coming from cargo loaded in the vehicle.
- Voice commands may not be recognized depending on the voice. If the voice commands are not recognized correctly, repeat the commands in a louder voice, at a natural pace, as if speaking to another person.
- Dialects or different wording other than hands-free prompts cannot be recognized by voice recognition. Speak in the wording specified by the voice commands.

Audio unit/Navigation system
The audio unit or navigation system is used for adjusting the volume.
NOTE
If the voice recognition performance is not satisfactory, refer to “Voice Recognition Learning Function (Speaker Enrollment)” (page 6-159).

Please be aware that the voice recognition may still make an error despite following the above points.

▼ Function Restrictions While Using Bluetooth Hands-Free
Some functions are limited while Bluetooth Hands-Free is being used. They include:
- Beep sound and voice guidance related to the audio unit and navigation system are not heard.
- Beep sound related to the A/C operation is not heard.
- The navigation system's voice recognition command does not function.

▼ How to Use This Section
Descriptions in the text are as follows:
Say: Voice commands to be spoken by you.
Prompt: Voice guidance output from the speaker.

NOTE
Say voice commands after the beep sound [Beep] is heard.

Example) 
Say: [Beep] “Dial”
Prompt: “Number, please”
Say: [Beep] “XXXXXXXXXXX (Ex. “555-1234”) (Telephone number)”

Bluetooth Hands-Free Activation
Method
Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

NOTE
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

The hands-free system is activated. Functions of the hands-free telephone, such as making and receiving calls, can be used after the activation. (For details on the telephone functions, refer to “Basic Bluetooth Hands-Free Operation” or “Convenient Use of the Hands-Free System”.)

NOTE
For vehicles with a navigation system, the system operates by speaking the voice recognition command of the navigation system after pressing the talk button with a short press. For voice recognition details with the navigation system, refer to the separate “NAVIGATION SYSTEM Owner’s Manual”.

Tutorial
The tutorial explains how to use Bluetooth Hands-Free.
To activate the tutorial, do the following:

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).
NOTE
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

3. Follow the prompts to receive the appropriate voice guidance instructions.

▼ Useful Commands at Anytime, Convenient Operations

Help function use
The help function informs the user of all the available voice commands under the current conditions.

1. Press the talk button with a short press.

3. Follow the prompts to receive the appropriate voice guidance instructions.

Cancel
The Bluetooth Hands-Free system transitions to standby status if the following operation is performed while the system is activating. Press the hang-up button, or the talk button with a long press.

Returning to previous operation (Type B/Navigation system)
This command is for returning to the previous operation while in the voice recognition mode.
Say: [Beep] “Go Back”

Voice guidance interrupt operation
Voice guidance can be skipped by pressing the talk button with a short press while it is being heard. A new voice input command can then be spoken by the user.

Voice recognition mode cancel
If you want to cancel the voice recognition mode during a call, the voice recognition mode can be canceled without having to end the call. Press the talk button with a long press.
Basic Bluetooth Hands-Free Operation

Bluetooth Hands-Free Preparation

Language setting

The available languages are English, Spanish, and Canadian French. If the language setting is changed, all of the voice guidance and voice input commands are done in the selected language.

NOTE

- If the language setting is changed, device registration is maintained.
  Phonebook records are not cleared, but each language has a separate phonebook.
  Therefore, entries created in one language will need to be re-entered in the phonebook of the new language.
- Do these steps before you start driving.
  These less used functions are too distracting to undertake while driving until you are fully familiar with the system.

Method 1

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

NOTE

For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. Say: [Beep] “Setup”

3. (Type A)
   Prompt: “Select one of the following: Pairing options, confirmation prompts, select phone, language or passcode.”

   (Type B/Navigation system)
   Prompt: “Select one of the following: Pairing options, confirmation prompts, language, passcode, select phone or select music player.”

5. Prompt: “Select a language: English, French, or Spanish.”

NOTE

Other language settings can also be made while in the current setting by saying the name of the language in the native pronunciation.

7. Prompt: “French (Desired language) selected. Is this correct?”

   (Spoken in the newly selected language).

Method 2

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

NOTE

For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

6-138
2. **Say:** [Beep] “French” (Say the desired language: “English”, “French”, or “Spanish”). (Change the desired language by saying the language name.)

**NOTE**
Other language settings can also be made while in the current setting by saying the name of the language in the native pronunciation.

3. **Prompt:** “Would you like to change the language to French (Desired language)?”

4. **Say:** [Beep] “Yes”

5. **Prompt:** “Please wait. Switching to French phonebook. French selected.” (Spoken in the newly selected language).

**Pairing code setting (Type B/Navigation system)**

The 4-digit pairing code setting for registration of your cell phone (pairing) can be set beforehand.

**NOTE**
The initial setting value is “0000”.

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

**NOTE**
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. **Say:** [Beep] “Setup”

3. **Prompt:** “Select one of the following: Pairing options, confirmation prompts, language, passcode, select phone or select music player.”

4. **Say:** [Beep] “Pairing options”

5. **Prompt:** “Available options are: Pair, Edit, Delete, List, or Set Pairing Code.”

6. **Say:** [Beep] “Set pairing code”

7. **Prompt:** “Your current pairing code is XXXX. Do you want to change it to a different pairing code?”

8. **Say:** [Beep] “Yes”

9. **Prompt:** “Please say a 4-digit pairing code.”

10. **Say:** [Beep] “YYYY”

11. **Prompt:** “YYYY is this correct?”

12. **Say:** [Beep] “Yes” or “No”

14. **Prompt:** “Your new pairing code is YYYY. Use this pairing code when pairing devices to the Hands free system. Do you want to pair a device now?”

15. **Say:** [Beep] “Yes” or “No”

16. If “Yes”, the system switches to the device registration mode. If “No”, the system returns to standby status.

**Device programming (Pairing)**

To use Bluetooth Hands-Free, the device equipped with Bluetooth has to be programmed to the hands-free unit using the following procedure.
Bluetooth Hands-Free (Voice Recognition)

(Type A)
Up to seven Bluetooth equipped mobile telephones can be programmed to the vehicle.

(Type B/Navigation system)
A maximum of seven devices including hands-free mobile phones and Bluetooth audio devices can be programmed to one vehicle.

NOTE
- A device can be programmed only when the vehicle is parked. If the vehicle starts to move, the pairing procedure will end. Programming is dangerous while driving - pair up your device before you start driving. Park the car in a safe place before programming.
- (Type B/Navigation system)
  If a Bluetooth device has already been programmed to the vehicle as a Bluetooth audio device, it does not need to be programmed again when using the device as a hands-free mobile phone. Conversely, it does not need to be programmed again as a Bluetooth audio device if it has already been programmed as a hands-free mobile phone.
  - Since the communication range of a Bluetooth equipped device is about 10 meters (32 ft), if a device is placed within a 10-meter (32 ft) radius of the vehicle, it may be detected/programmed unintentionally while another device is being programmed.

(Type A)
1. Activate the Bluetooth application of the device.

NOTE
For the operation of the device, refer to its instruction manual.

2. Press the pick-up button or talk button with a short press.
4. Prompt: “Select one of the following: Pairing options, confirmation prompts, select phone, language or passcode.”
5. Say: [Beep] “Pairing options”
6. Prompt: “Select one of the following: Pair, edit, delete, or list.”
7. Say: [Beep] “Pair”
8. Prompt: “Please say a 4-digit pairing code.”
9. Say: [Beep] “XXXX” (Speak an arbitrary 4-digit pairing code. This can be any combination of 4 numbers.)

NOTE
- Some devices accept only a particular pairing code (Usually, “0000” or “1234”). If pairing cannot be completed, refer to the owner’s manual of your mobile device, and try those numbers if necessary.
- Record the code as it will be used to program your device in Step 16.

10. Prompt: “Pairing code XXXX (4-digit number). Is this correct?”
11. Say: [Beep] “Yes” or “No”
12. If “Yes”, go to Step 13.
   If “No”, the procedure returns to Step 8.
13. Prompt: “Start pairing procedure on the device. See the device manual for instructions.”
14. Using the device, perform a search for the Bluetooth device (Peripheral device).
NOTE
For the operation of the device, refer to its instruction manual.

15. Select “Mazda” from the device list searched by the device.

16. Input the 4-digit pairing code set in Step 9 to the device.

17. **Prompt:** “Please say the name of the device after the beep.”

18. **Say:** [Beep] “XXXX - - -” (Speak a “device tag”, an arbitrary name for the device.)
   Example: “Stan's device.”

**NOTE**
Speak a programmed “device tag” within 10 seconds.
If more than two devices are to be programmed, they cannot be programmed with the same or similar “device tag”.

19. **Prompt:** “Adding XXXXXXX - - -” (Ex. “Stan's device”) (Device tag). Is this correct?”

20. **Say:** [Beep] “Yes”

21. **Prompt:** “Pairing complete”

**Type B/Navigation System**

1. Activate the Bluetooth application of the device.

**NOTE**
For the operation of the device, refer to its instruction manual.

2. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

**NOTE**
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

3. **Say:** [Beep] “Setup”

4. **Prompt:** “Select one of the following: Pairing options, confirmation prompts, language, passcode, select phone or select music player.”

5. **Say:** [Beep] “Pairing options”

6. **Prompt:** “Available options are: Pair, Edit, Delete, List, or Set Pairing Code.”

7. **Say:** [Beep] “Pair”

8. **Prompt:** “Start the pairing process on your Bluetooth device. Your pairing code is 0000 (XXXX). Input this code on your Bluetooth device when prompted on the device. See device manual for instructions.”

9. Using the device, perform a search for the Bluetooth device (Peripheral device).

**NOTE**
For the operation of the device, refer to its instruction manual.

10. Select “Mazda” from the device list searched by the device.

11. Input the 4-digit pairing code to the device.

12. **Prompt:** “Please say the name of the device after the beep.”

13. **Say:** [Beep] “XXXX - - -” (Speak a “device tag”, an arbitrary name for the device.)
   Example: “Stan's device.”
NOTE
Speak a programmed “device tag” within 10 seconds.
If more than two devices are to be programmed, they cannot be programmed with the same or similar “device tag”.

14. Prompt: “XXXXXX - - - (Ex. “Stan’s device”) (Device tag). Is this correct?”
15. Say: [Beep] “Yes”
16. Prompt: “Pairing complete”
After a device is registered, the system automatically identifies the device. By activating Bluetooth Hands-Free again, or by activating Bluetooth Hands-Free first after switching the ignition from OFF to ACC, the system reads out a voice guidance, “XXXXXX - - - (Ex. “Stan’s device”) (Device tag) is connected”.

NOTE
• (Type B/Navigation system)
  Device registration can also be done by operating the audio unit or panel buttons on the navigation unit. Refer to “Bluetooth Audio Preparation” (page 6-127) (For audio unit) or the separate manual “NAVIGATION SYSTEM Owner’s Manual” (For navigation unit).
• Depending on the device, the registration status may be lost after a certain period of time. If this occurs, repeat the entire process from Step 1.

▼Making a Call Using a Telephone Number

NOTE
Practice this while parked until you are confident you can do it while driving in a non-taxing road situation. If you are not completely comfortable, make all calls from a safe parking position, and move out only when fully under control and you can devote your eyes and mind to driving.

(Type A)
1. Press the pick-up button or talk button with a short press.
3. Prompt: “Number, please”
4. Say: [Beep] “XXXXXXXXXX (Ex. “555-1234”) (Telephone number)”
5. Prompt: “Dialing XXXXXXXX (Ex. “555-1234”) (Telephone number) is this correct?”
6. Say: [Beep] “Yes” or “No”.
7. When “Yes” is spoken, the procedure proceeds to Step 8.
   When “No” is spoken, the procedure returns to Step 3.
8. Prompt: “Dialing”

(Type B/Navigation system)
1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

NOTE
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

6-142
Bluetooth Hands-Free (Voice Recognition)

3. Prompt: “Number, please”

4. Say: [Beep] “XXXXXXXXXXX (Telephone number)”

5. Prompt: “XXXXXXXXXXX. (Telephone number) After the beep, continue to add numbers, or say Go-Back to re-enter the last entered numbers, or press the Pick-Up button to execute dialing.”

6. (Dialing)
   Press the pick-up button or say “Dial”, then go to Step 7.
   (Adding/inputting telephone number)
   Say, “XXXX” (desired telephone number), then go to Step 5.
   (Telephone number correction)
   Say, “Go Back”. The prompt replies, “Go Back. The last entered numbers have been removed.” Then go back to Step 3.

7. Prompt: “Dialing”

**NOTE**
The “Dial” command and a telephone number can be combined.
Ex. In Step 2, say, “Dial 123-4567”, then, Steps 3 and 4 can be skipped.

▼Receiving an Incoming Call

1. Prompt: “Incoming call, press the pickup button to answer”.

2. To accept the call, press the pick-up button.
   To reject the call, press the hang-up button.

▼Hanging Up a Call

Press the hang-up button during the call. A beep sound will confirm that call is ended.

▼Volume Adjustment

The power/volume dial of the audio unit or the navigation system is used to adjust the volume. Turn the dial to the right to increase volume, to the left to decrease it.
NOTE

- The volume can also be adjusted using the volume button on the steering wheel.
- The music volume of the audio unit and the navigation system cannot be adjusted while Bluetooth Hands-Free is being used.

Convenient Use of the Hands-Free System

Phonebook Usage

Phonebook registration

Phone numbers can be registered to the Bluetooth Hands-Free phonebook.

NOTE

Do this function only when parked. It is too distracting to attempt while driving and you may make too many errors to be effective.

(Type A)

1. Press the pick-up button or talk button with a short press.

2. Say: [Beep] “Phonebook”

3. Prompt: “Select one of the following: New entry, edit, list names, delete, erase all or import contact.”

5. Prompt: “Name please.”

6. Say: [Beep] “XXXXX... (Ex. “Mary's phone”)” (Say a voice tag for the name registered.)

7. Prompt: “Adding XXXXX... (Ex. “Mary's phone”) (Registered voice tag). Is this correct?”

9. Prompt: “Home, Work, Mobile, or Other?”

10. Say: [Beep] “Mobile” (Say “Home”, “Work”, “Mobile”, or “Other”, for the desired location to be registered.)

11. Prompt: “Mobile (Location to be registered). Is this correct?”
Bluetooth Hands-Free (Voice Recognition)

13. Prompt: “Number, please.”
14. Say: [Beep] “XXXXXXXXXXX” (Ex. “555-1234”) (Say the phone number to be registered.)
15. Prompt: “XXXXXXXXXXX” (Ex. “555-1234”) (Phone number registration). Is this correct?”
17. Prompt: “Number saved. Would you like to add another number for this entry?”
18. Say: [Beep] “Yes” or “No”.
19. If “Yes”, an additional phone number registration can be made for the same entry.
   If “No”, the procedure proceeds to Step 20.
20. Prompt: “Returning to main menu.”

(Type B/Navigation system)

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

NOTE
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. Say: [Beep] “Phonebook”
3. Prompt: “Select one of the following: New entry, edit, list names, delete, erase all or import contact.”
5. Prompt: “Name please.”

6. Say: [Beep] “XXXXX… (Ex. “Mary's phone”)” (Say a voice tag for the name registered.)
7. Prompt: “Adding XXXXX... (Ex. “Mary's phone”) (Registered voice tag). Is this correct?”
9. Prompt: “Home, Work, Mobile, or Other?”
10. Say: [Beep] “Mobile” (Say “Home”, “Work”, “Mobile”, or “Other”, for the desired location to be registered.)
11. Prompt: “Mobile (Location to be registered). Is this correct?”
13. Prompt: “Number, please.”
14. Say: [Beep] “XXXXXXXXXXX” (Say the phone number to be registered.)
15. Prompt: “XXXXXXXXXXX” (Phone number registration). After the beep, continue to add numbers, or say Go-Back to re-enter the last entered numbers, or press the Pick-Up button to save the number.”
16. (Registration) Press the pick-up button or say “Enter”, then go to Step 17.
   (Adding/inputting telephone number) Say, “XXXXX” (desired telephone number), then go to Step 15.
   (Telephone number correction) Say, “Go Back”. The prompt replies, “Go Back. The last entered numbers have been removed.”. Then go back to Step 13.
17. **Prompt:** “Number saved. Would you like to add another number for this entry?”

18. **Say:** [Beep] “Yes” or “No”.

19. If “Yes”, an additional phone number registration can be made for the same entry.
   If “No”, the system returns to standby status.

**Import contact**

Phonebook data from your device (Mobile phone) can be sent and registered to your Bluetooth Hands-Free phonebook using Bluetooth.

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

**NOTE**

*For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.*

2. **Say:** [Beep] “Phonebook”

3. **Prompt:** “Select one of the following: New entry, edit, list names, delete, erase all or import contact.”

4. **Say:** [Beep] “Import contact”

5. **(Type A)**
   **Prompt:** “Ready to receive a contact from the phone. Only a home, a work, and a mobile number can be imported.”
   **(Type B/Navigation system)**
   **Prompt:** “The hands free System is ready to receive a contact from a phone. Only a home, a work, and a mobile number can be imported. This process requires operation of a mobile phone. Refer to the phone’s manual for more information.”

6. Device (Mobile phone) operation:
   Select one entry from the phonebook and send it using Bluetooth.

7. **Prompt:** “X (Number of locations which include data) numbers have been imported. What name would you like to use for these numbers?”

8. **Say:** [Beep] “XXXXX… (Ex. “Mary’s phone”)” (Say a voice tag for the name registered.)

9. **Prompt:** “Adding XXXXX… (Ex. “Mary’s phone”) (Voice tag). Is this correct?”

10. **Say:** [Beep] “Yes”

11. **Prompt:** “Number saved. Would you like to import another contact?”

12. **Say:** [Beep] “Yes” or “No”

13. If “Yes”, the procedure proceeds to Step 5.
   If “No”, the system returns to standby status.

**Making calls using the phonebook**

Telephone calls can be made by saying the name of a person (voice tag) whose phone number has been registered in Bluetooth Hands-Free in advance.
Bluetooth Hands-Free (Voice Recognition)

For the phonebook setting method, refer to (page 6-150).

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

**NOTE**
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. Say: [Beep] “Call”

3. **Prompt:** “Name please.”

4. **Say:** [Beep] “XXXXX... (Ex. “John's phone”)” (Say a voice tag registered in the phonebook.)

5. **Prompt:** “Calling XXXXX... (Ex. “John's phone”) XXXX (Ex. “at home”). Is this correct?” (Voice tag and phone number location registered in phonebook).

6. **Say:** [Beep] “Yes”

7. **Prompt:** “Dialing”

**NOTE**
The “Call” command and the voice tag can be combined.
Ex. In Step 2, say, “Call John's phone”, then, Steps 3 and 4 can be skipped.

**Redialing Function**
Redialing the number of the person previously dialed using the phone is possible.

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

**NOTE**
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. **Say:** [Beep] “Redial”

3. **Prompt:** “Dialing”

**Emergency Calls**
A call can be made to the emergency phone number (911) using the voice input command.

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

**NOTE**
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. **Say:** [Beep] “Emergency”

3. - USA/Canada vehicles - **Prompt:** “Dialing “911”, is this correct?”

4. **Say:** [Beep] “Yes”

5. **Prompt:** “Dialing”
Refusing an Incoming Call
For incoming call refusal, refer to “Receiving an incoming call” (page 6-143).

Mute
The microphone can be muted during a call.
1. Press the talk button with a short press.
2. Say: [Beep] “Mute”
3. Prompt: “Microphone muted”

Canceling mute
1. Press the talk button with a short press.
2. Say: [Beep] “Mute off”
3. Prompt: “Microphone unmuted”

Transferring a Call
Transferring a call from Hands-Free to a device (Mobile phone)
Communication between the hands-free unit and a device (Mobile phone) is canceled, and the line can be switched to a standard call using a device (Mobile phone).
1. Press the talk button with a short press.
3. Prompt: “Transferred call to phone”

Transferring a call from a device (Mobile phone) to Hands-Free
Communication between devices (Mobile phone) can be switched to Bluetooth Hands-Free.
1. Press the talk button with a short press.
3. Prompt: “Transferred call to Hands Free system”

Multi-Call Functions
Call waiting
A call can be interrupted to receive an incoming call from a third party.

Call interrupt
A call can be switched to a new incoming call.

Method 1
1. Press the pick-up button.
2. Prompt: “Swapping calls.”

Method 2
1. Press the talk button with a short press.
2. Say: [Beep] “Swap calls”
3. Prompt: “Swapping calls”

NOTE
- To refuse an incoming call, press the hang-up button.
- After receiving a new incoming call, the previous call is placed on hold.

Switching calls
Switching back to the previous call can also be done.

Method 1
1. Press the pick-up button.
2. Prompt: “Swapping calls.”

Method 2
1. Press the talk button with a short press.
2. Say: [Beep] “Swap calls”
3. Prompt: “Swapping calls”
Bluetooth Hands-Free (Voice Recognition)

Three-way call function
1. Press the talk button with a short press.
2. Say: [Beep] “Join calls”
3. Prompt: “Joining calls”

Making a call using a telephone number
(Type A)
1. Press the talk button with a short press.
3. Prompt: “Number, please”
4. Say: [Beep] “XXXXXXXXXXX (Ex. “555-1234”) (Telephone number)”
5. Prompt: “Dialing XXXXXXXXXXX (Ex. “555-1234”) (Telephone number) is this correct?”
6. Say: [Beep] “Yes” or “No”.
7. When “Yes” is spoken, the procedure proceeds to Step 8.
When “No” is spoken, the procedure returns to Step 3.
8. Prompt: “Dialing”

(Type B/Navigation system)
1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).
3. Prompt: “Number, please”
4. Say: [Beep] “XXXXXXXXXXX (Telephone number)”

5. Prompt: “XXXXXXXXXXX.
(Telephone number) After the beep, continue to add numbers, or say Go-Back to re-enter the last entered numbers, or press the Pick-Up button to execute dialing.”

6. (Dialing)
Press the pick-up button or say “Dial”, then go to Step 7.

(Dialing/putting telephone number)
Say, “XXX” (desired telephone number), then go to Step 5.

(Telephone number correction)
Say, “Go Back”. The prompt replies, “Go Back. The last entered numbers have been removed.”. Then go back to Step 3.

7. Prompt: “Dialing”

Making calls using the phonebook
1. Press the talk button with a short press.
2. Say: [Beep] “Call”
3. Prompt: “Name please.”
4. Say: [Beep] “XXXX... (Ex. “John's phone”)” (Say a voice tag registered in the phonebook.)
5. Prompt: “Calling XXXX... (Ex. “John's phone”) XXXX (Ex. “at home”). Is this correct?” (Voice tag and phone number location registered in phonebook).

7. Prompt: “Dialing”

Redialing function
1. Press the talk button with a short press.
2. Say: [Beep] “Redial”
3. **Prompt:** “Dialing”

**Ending the current call**
Press the hang-up button during the call.

**Phonebook Settings**

**Editing phonebook**
The data registered to the Bluetooth Hands-Free phonebook can be edited.

**NOTE**
Do this function only when parked. It is too distracting to attempt while driving and you may make too many errors to be effective.

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

2. **Say:** [Beep] “Phonebook”

3. **Prompt:** “Select one of the following: New entry, edit, list names, delete, erase all or import contact.”

4. **Say:** [Beep] “Edit”

5. **Prompt:** “Please say the name of the entry you would like to edit or say, “List names”.”

6. **Say:** [Beep] “XXXXX... (Ex. “Mary's phone”)” (Say the voice tag for the registered name to be edited in the phonebook.)

7. **Prompt:** “Home, Work, Mobile, or Other?”

8. **Say:** [Beep] “Home” (Say the registered location to be edited: “Home”, “Work”, “Mobile”, or “Other”).

9. **Prompt:** “XXXXX... (Ex. “Mary's phone”)” (Registered voice tag) XXXX (Ex. “Home”) (Registered location). Is this correct?”

10. **Say:** [Beep] “Yes”

11. **Prompt:** “The current number is X X X X X X X X X X X X (Ex. “555-1234”) (Currently registered number). New number, please.”

**NOTE**
If there was no previous phone number registered to a location (Ex. “Work”), the prompt will only read out “Number, please”.

12. **Say:** [Beep] “XXXXX X X X X X X X X X X X X X X X X X X (Ex. “555-5678”)” (Say the new phone number to be registered.)

13. **Prompt:** “XXXXX X X X X X X X X X X X X X X X X X X (Ex. “555-5678”)” (The new phone number to be registered). Is this correct?”

14. **Say:** [Beep] “Yes”

15. **Prompt:** “Number changed, returning to main menu.”

**Phonebook data deletion**

**Erasing individual phonebook data**
Individual data registered to the Bluetooth Hands-Free phonebook can be cleared.

**NOTE**
Do this function only when parked. It is too distracting to attempt while driving and you may make too many errors to be effective.
Bluetooth Hands-Free (Voice Recognition)

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

**NOTE**
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. Say: [Beep] “Phonebook”

3. Prompt: “Select one of the following: New entry, edit, list names, delete, erase all or import contact.”

5. Prompt: “Please say the name of the entry you would like to delete or say, “List names”.”

6. Say: [Beep] “XXXXX... (Ex. “John's phone”)” (Say the registered voice tag to be deleted from the phonebook.)

7. Prompt: “Deleting Xxxxx... (Ex. “John's phone”) (Registered voice tag) Home (Registered location). Is this correct?”

9. Prompt: “XXXXX... (Ex. “John's phone”) (Registered voice tag) Home (Registered location) deleted.”

**Complete deletion of the phonebook data**
All data registered to the Bluetooth Hands-Free phonebook can be erased.

**NOTE**
Do this function only when parked. It is too distracting to attempt while driving and you may make too many errors to be effective.

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

**NOTE**
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. Say: [Beep] “Phonebook”

3. Prompt: “Select one of the following: New entry, edit, list names, delete, erase all or import contact.”

5. Prompt: “Are you sure you want to erase everything from your Hands Free system phonebook?”

7. Prompt: “You are about to delete everything from your Hands Free system phonebook. Do you want to continue?”

9. Prompt: “Please wait, erasing the Hands Free system phonebook.”

**Read-out of names registered to the Bluetooth Hands-Free phonebook**
Bluetooth Hands-Free can read out the list of names registered to its phonebook.

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).
NOTE
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. Say: [Beep] “Phonebook”

3. Prompt: “Select one of the following: New entry, edit, list names, delete, erase all or import contact.”

5. Prompt: “XXXXX..., XXXXX..., XXXXX... (Ex. “John's phone”, Mary's phone, Bill's phone)” (Voice guidance reads out the voice tags registered to the phonebook.)
Press the talk button with a short press during the read-out at the desired name, and then say one of the following voice commands to execute it.
- “Continue”: Continues the list read-out.
- “Call”: Calls the registered phonebook data when the talk button is short-pressed.
- “Edit”: Edits the registered phonebook data when the talk button is short-pressed.
- “Delete”: Deletes the registered phonebook data when the talk button is short-pressed.
- “Previous”: Returns to the previous phonebook data in read-out when the talk button is short-pressed.

6. Prompt: “End of list, would you like to start from the beginning?”

7. Say: [Beep] “No”

▼DTMF (Dual Tone Multi-Frequency Signal) Transmission
This function is used when transmitting DTMF via the user's voice. The receiver of a DTMF transmission is generally a home telephone answering machine or a company's automated guidance call center (When you send tone signals back according to the voice guidance recording).

1. Press the talk button with a short press.

2. Say: [Beep] “XXXX... send” (Say DTMF code)

3. Prompt: “Sending XXXX... (DTMF code)”
Hands-Free Setting

Device registration
For the registration of a Bluetooth equipped device to Bluetooth Hands-Free, refer to “Bluetooth Hands-Free Preparation” (page 6-138).

Registered device read-out
Bluetooth Hands-Free can read-out the devices registered to its system.

NOTE
Do this function only when parked. It is too distracting to attempt while driving and you may make too many errors to be effective.

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

NOTE
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. Say: [Beep] “Setup”

3. (Type A)
Prompt: “Select one of the following: Pairing options, confirmation prompts, select phone, language or passcode.”

5. (Type A)
Prompt: “Select one of the following: Pair, edit, delete, or list.”

(Type B/Navigation system)
Prompt: “Available options are: Pair, Edit, Delete, List, or Set Pairing Code.”

7. Prompt: “XXXXX..., XXXXX..., XXXXX... (Ex. Device A, device B, device C)” (The voice guidance reads out the device tags registered to the hands-free system.)

Press the talk button with a short press during the read-out at the desired device, and then say one of the following voice commands to execute it.

- “Select phone”: Selects device (Mobile phone) when the talk button is short-pressed.

- (Type B/Navigation system)
“Select music player”: Selects device (Music player) when the talk button is short-pressed.

- “Edit”: Edits device when the talk button is short-pressed.

- “Continue”: Continues the list read-out.

- “Delete”: Deletes the registered device when the talk button is short-pressed.

- “Previous”: Returns to the previous device in read-out when the talk button is short-pressed.

8. Prompt: “End of list, would you like to start from the beginning?”

Device selection
If several devices have been programmed, the Bluetooth unit links the device last connected. If you would like to link a different programmed device, it is necessary to change the link. The order of device priority after the link has been changed is maintained even when the ignition is switched off.

(Type A)

Hands-free phone
1. Press the pick-up button or talk button with a short press.
2. Say: [Beep] “Setup”
3. Prompt: “Select one of the following: Pairing options, confirmation prompts, select phone, language or passcode.”
5. Prompt: “Please say the name of the device you would like to select. Available devices are XXXXX... (Ex. device A), XXXXX... (Ex. device B), XXXXX... (Ex. device C). Which device please?”
7. Prompt: “XXXXX... (Ex. Device B). Is this correct?”
8. Say: [Beep] “Yes” or “No”
9. If “Yes”, go to Step 10. If “No”, the procedure returns to Step 5.
10. Prompt: “XXXXX... (Ex. Device B) selected.”

Music player
1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

NOTE
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. Say: [Beep] “Setup”
3. Prompt: “Select one of the following: Pairing options, confirmation prompts, language, passcode, select phone or select music player.”
5. Prompt: “Please say the name of the device you would like to select. Available devices are XXXXX... (Ex. device A), XXXXX... (Ex. device B), XXXXX... (Ex. device C). Which device please?”
7. Prompt: “XXXXX... (Ex. Device B). Is this correct?”
8. Say: [Beep] “Yes” or “No”
9. If “Yes”, go to Step 10. If “No”, the procedure returns to Step 5.
10. Prompt: “XXXXX... (Ex. Device B) selected.”

(Type B/Navigation system)

Hands-free phone
1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

NOTE
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

6-154
2. **Say:** [Beep] “Setup”  

3. **Prompt:** “Select one of the following: Pairing options, confirmation prompts, language, passcode, select phone or select music player.”  

4. **Say:** [Beep] “Select music player”  

5. **Prompt:** “Please say the name of the device you would like to select. Available devices are XXXXX... (Ex. device A), XXXXX... (Ex. device B), XXXXX... (Ex. device C). Which device please?”  

6. **Say:** [Beep] “XXXXX... (Ex. Device B)”  

7. **Prompt:** “XXXXX... (Ex. Device B). Is this correct?”  

8. **Say:** [Beep] “Yes” or “No”  

9. If “Yes”, go to Step 10. If “No”, the procedure returns to Step 5.  

10. **Prompt:** “XXXXX... (Ex. Device B) selected.”  

**NOTE**  
*(Type B)*  
Device (Music player) selection can also be done by operating the panel button (page 6-127).  

**Registered device (Mobile phone) deletion**  
Registered devices (Mobile phone) can be deleted individually or collectively.  

**NOTE**  
*Do this function only when parked. It is too distracting to attempt while driving and you may make too many errors to be effective.*  

**Type A**  
1. Press the pick-up button or talk button with a short press.  

2. **Say:** [Beep] “Setup”  

3. **Prompt:** “Select one of the following: Pairing options, confirmation prompts, select phone, language or passcode.”  

4. **Say:** [Beep] “Pairing options”  

5. **Prompt:** “Select one of the following: Pair, edit, delete, or list.”  

**NOTE**  
*A registered device (Mobile phone) can be deleted using the registration list.*  

6. **Say:** [Beep] “Delete”  

7. **Prompt:** “Please say 1 for XXXXX... (Ex. device A), 2 for XXXXX... (Ex. device B...).” (The device tag of the registered device is read out by the HFP.)  

8. **Say:** [Beep] “X” (Say the number of the device to be deleted.)  

**NOTE**  
*Say “All” to delete all devices (Mobile phone).*  

9. **Prompt:** “Deleting XXXXX... (Ex. device B...)” (Registered device tag). Is this correct?”  

10. **Say:** [Beep] “Yes”  

11. **Prompt:** “Deleted”  

**Type B/Navigation system**  
1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).
NOTE
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. Say: [Beep] “Setup”

3. Prompt: “Select one of the following: Pairing options, confirmation prompts, language, passcode, select phone or select music player.”

5. Prompt: “Available options are: Pair, Edit, Delete, List, or Set Pairing Code.”

NOTE
A registered device (Mobile phone) can be deleted using the registration list.

7. Prompt: “Please say the name of the device you would like to delete. Available devices are XXXXX... (Ex. device A), XXXXX... (Ex. device B), XXXXX... (Ex. device C), or all. Which device please?”

8. Say: [Beep] “X” (Say the number of the device to be deleted.)

NOTE
Say “All” to delete all devices (Mobile phone).

9. Prompt: “Deleting XXXXX... (Ex. device B...) (Registered device tag). Is this correct?”

10. Say: [Beep] “Yes”

11. Prompt: “Deleted”

Registered device editing
(Type A)
1. Press the pick-up button or talk button with a short press.

2. Say: [Beep] “Setup”

3. Prompt: “Select one of the following: Pairing options, confirmation prompts, select phone, language or passcode.”

5. Prompt: “Select one of the following: Pair, edit, delete, or list.”

7. Prompt: “Please say 1 for XXXXX... (Ex. device A), 2 for XXXXX... (Ex. device B...), which device please?”

(The device tag of the registered device is read out by the HFP.)

8. Say: [Beep] “X” (Say the number of the device to be edited.)

9. Prompt: “New name please?”

10. Say: [Beep] “XXXX... (Ex. device C)” (Speak a “device tag”, an arbitrary name for the device.)

11. Prompt: “XXXX... (Ex. device C) (Device tag), is this correct?”

13. Prompt: “New name saved, returning to main menu.”

(Type B/Navigation system)
1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).
**NOTE**
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. Say: [Beep] “Setup”

3. Prompt: “Select one of the following: Pairing options, confirmation prompts, language, passcode, select phone or select music player.”

5. Prompt: “Available options are: Pair, Edit, Delete, List, or Set Pairing Code.”

7. Prompt: “Please say the name of the device you would like to edit. Available devices are XXXXX... (Ex. device A), XXXXX... (Ex. device B), XXXXXXX... (Ex. device C). Which device please?”

8. Say: [Beep] “X” (Say the number of the device to be edited.)

9. Prompt: “New name please?”

10. Say: [Beep] “XXXX... (Ex. device C)” (Speak a “device tag”, an arbitrary name for the device.)

11. Prompt: “XXXXX... (Ex. device C) (Device tag), is this correct?”

13. Prompt: “New name saved.”

**Security Setting**

If a passcode is set, the system cannot be activated unless the passcode is input.

**NOTE**
Do this function only when parked. It is too distracting to attempt while driving and you may make too many errors to be effective.

**Passcode setting**

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

**NOTE**
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. Say: [Beep] “Setup”

3. (Type A) Prompt: “Select one of the following: Pairing options, confirmation prompts, select phone, language or passcode.”

   (Type B/Navigation system) Prompt: “Select one of the following: Pairing options, confirmation prompts, language, passcode, select phone or select music player.”

4. Say: [Beep] “Passcode”

5. Prompt: “Passcode is disabled. Would you like to enable it?”

7. Prompt: “Please say a 4-digit passcode. Remember this passcode. It will be required to use this system.”

8. Say: [Beep] “XXXX” (Say a desired 4-digit passcode, “PCode”.)
9. **Prompt:** “Passcode XXXX (Passcode, PCode). Is this correct?”

10. **Say:** [Beep] “Yes”

11. **Prompt:** “Passcode is enabled.”

### Using Bluetooth Hands-Free with a passcode

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

### NOTE

*For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.*

2. **Prompt:** “Hands-Free system is locked. State the passcode to continue.”

3. **Say:** [Beep] “XXXX” (Say the set passcode “PCode”.)

4. If the correct passcode is input, voice guidance “XXXXXX... (Ex. “Mary's device) (Device tag) is connected” is announced.

   If the passcode is incorrect, voice guidance “XXXX (4-digit passcode, Pcode) incorrect passcode, please try again” is announced.

### Canceling the passcode

### NOTE

*Do this function only when parked. It is too distracting to attempt while driving and you may make too many errors to be effective.*

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

### NOTE

*For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.*

2. **Say:** [Beep] “Setup”

3. **(Type A)**

   **Prompt:** “Select one of the following: Pairing options, confirmation prompts, select phone, language or passcode.”

   **(Type B/Navigation system)**

   **Prompt:** “Select one of the following: Pairing options, confirmation prompts, language, passcode, select phone or select music player.”

4. **Say:** [Beep] “Passcode”

5. **Prompt:** “Passcode is enabled. Would you like to disable it?”

6. **Say:** [Beep] “Yes”

7. **Prompt:** “Passcode is disabled.”

### Confirmation Prompts

The confirmation prompt confirms the command content to the user before advancing to the operation requested by the user. When this function is turned on, the system reads out the voice input command previously received and confirms whether the command is correct before advancing to the command execution.

When the confirmation prompt function is turned on:

(Ex. “Calling John's device. Is this correct?”)
When the confirmation prompt function is turned off:
(Ex. “Calling John's device.”)

**NOTE**
If the confirmation prompt function is turned off when making an emergency call, the system reads out and confirms the command before executing it.

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

**NOTE**
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. Say: [Beep] “Setup”

3. (Type A)
   **Prompt:** “Select one of the following: Pairing options, confirmation prompts, select phone, language or passcode.”

   (Type B/Navigation system)
   **Prompt:** “Select one of the following: Pairing options, confirmation prompts, language, passcode, select phone or select music player.”

5. **Prompt:** “Confirmation prompts are on/off. Would you like to turn confirmation prompts off/on?”

7. **Prompt:** “Confirmation prompts are off/on.”

**Voice Recognition Learning Function (Speaker Enrollment)**

The voice recognition learning function enables voice recognition appropriate to the characteristics of the user's voice. If the recognition of the voice input commands to the system is not adequate, this function can largely improve the system's voice recognition of the user. If your voice can be recognized sufficiently without using this function, you may not realize the added benefit of the function. To register your voice, the voice input command list must be read out. Read out the list when the vehicle is parked. Perform the registration in as quiet a place as possible (page 6-135). The registration must be performed completely. The required time is a few minutes. The user needs to be seated in the driver's seat with the voice input command list for voice recognition learning open to the page indicated below.

When voice recognition learning is done for the first time

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

**NOTE**
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

Interior Comfort

Bluetooh Hands-Free (Voice Recognition)

3. **Prompt:** “This operation must be performed in a quiet environment while the vehicle is stopped. See the owner's manual for the list of required training phrases. Press and release the talk button when you are ready to begin. Press the hangup button to cancel at any time.”

4. Press the talk button with a short press.

5. The voice guidance reads out the voice input command number (refer to the voice input command list for voice recognition learning). (Ex. “Please read phrase 1”)

6. **Say:** [Beep] “0123456789” (Say the voice input command for voice recognition learning (1 to 8) according to the voice guidance.)

7. **Prompt:** “Speaker enrollment is complete.”

**NOTE**
If an error occurred in the voice recognition learning, re-learning can be done by pressing the talk button with a short press.

**Voice recognition re-learning**
If voice recognition learning has already been done.

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

**NOTE**
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. **Say:** [Beep] “Voice training”

3. **Prompt:** “Enrollment is enabled/disabled. Would you like to disable/enable or retrain?”

4. **Say:** [Beep] “Retrain”

5. **Prompt:** “This operation must be performed in a quiet environment while the vehicle is stopped. See the owner's manual for the list of required training phrases. Press and release the talk button when you are ready to begin. Press the hangup button to cancel at any time.”

6. Press the talk button with a short press.

7. The voice guidance reads out the voice input command number (refer to the voice input command list for voice recognition learning). (Ex. “Please read phrase 1”)

8. **Say:** [Beep] “0123456789” (Say the voice input command for voice recognition learning (1 to 8) according to the voice guidance.)

9. **Prompt:** “Speaker enrollment is complete.”

**NOTE**
If an error occurred in the voice recognition learning, re-learning can be done by pressing the talk button with a short press.

**Voice input command list for voice recognition learning**
When reading out, the following points must be observed:
- Read out the numbers one at a time correctly and naturally.
Bluetooth Hands-Free (Voice Recognition)

(For example, “1234” must be read out “one, two, three, four”, not “twelve, thirty four”.)

- Do not read out parentheses. “(” and hyphens “-” are used for separating numbers in a phone number.

Ex. “(888) 555-1212” must be spoken “Eight, eight, eight, five, five, five, one, two, one, two.”

**NOTE**
- The applicable phrase appears in the display.
- After user voice registration is completed, voice guidance “Speaker enrollment is complete” is announced.

**Voice recognition learning on/off**

1. Press the pick-up button (with/without navigation system) or talk button with a short press (without navigation system) or a long press (with navigation system).

**NOTE**
For vehicles with the navigation system, you can also press the talk button with a short press and say: [Beep] “Telephone” or “Phone”.

2. **Say:** [Beep] “Voice training”

3. **Prompt:** “Enrollment is enabled/disabled. Would you like to disable/enable or retrain?”

4. **Say:** [Beep] “Disable” or “Enable”

5. When “Disable” is spoken, the voice recognition learning is turned off. When “Enable” is spoken, the voice recognition learning is turned on.

6. **Prompt:** “Speaker Enrollment is disabled/enabled.”
Bluetooth Hands-Free (Voice Recognition)

When Bluetooth Hands-Free Cannot be Used

Bluetooth Hands-Free cannot be used under the following conditions:

- The device is outside of the communication area.
- The device has a malfunction.
- The device is not connected to the hands-free unit equipped on the vehicle.
- The device's battery is weak.
- The device is turned off.
- The device is placed where radio reception is difficult.
- The ignition is switched off.

Safety Certification

FCC ID: CB2MBLUEC09 IC:279B-MBLUEC09

This device complies with Part 15 of the FCC Rules and with RSS-210 of Industry Canada. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

WARNING

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The term “IC: ” before the radio certification number only signifies that Industry Canada technical specifications were met.

The antenna used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provided with installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

**What is Bluetooth Hands-Free?**

**Bluetooth Hands-Free Outline**

By connecting a Bluetooth equipped device (Mobile phone) to the hands-free unit equipped on the vehicle, making and receiving calls are possible using the audio unit, and the pick-up and hang-up buttons located on the steering wheel.

**WARNING**

Perform phonebook registration related operations while the vehicle is parked: Performing phonebook registration while driving the vehicle could be a distraction to your driving and result in an accident. In addition, a mistake in performing the phonebook operation could result in the loss of important data.

**Bluetooth equipped device (Mobile phone)**

A Bluetooth equipped device (Mobile phone) communicates with the hands-free unit equipped on the vehicle using radio transmission (Bluetooth). For example, if the device (Mobile phone) is placed in a coat pocket, the phone calls can be made through your mobile service without taking out and handling the device (Mobile phone).
CAUTION

The types of devices (Mobile phone) which can be connected to the hands-free unit are limited. Therefore, before purchasing or changing your device (Mobile phone) model, consult Mazda Bluetooth Hands-Free Customer Service or visit www.MazdaUSA.com/bluetooth for a complete list of compatible phones. Devices (Mobile phone) which can be connected to the hands-free system need to be compliant with Bluetooth specifications and the appropriate profile. However, even among these Bluetooth devices (Mobile phone) are some which will not connect with your Mazda or will have limited function. Therefore, consult Mazda Bluetooth Hands-Free Customer Service for information regarding device (Mobile phone) compatibility:

- U.S.A.
  Phone: 800-430-0153
  Web: www.MazdaUSA.com/bluetooth
- Canada
  Phone: 800-430-0153
  Web: www.mazdahandsfree.ca

Applicable Bluetooth specification
Ver. 2.0 or higher
Response profile
- HFP (Hands Free Profile) Ver. 1.5
- DUN (Dial-up Networking Profile) Ver. 1.1
- PBAP (Phone Book Access Profile) Ver. 1.0
- A2DP (Advanced Audio Distribution Profile) Ver. 1.0
- AVRCP (Audio/Video Remote Control Profile) Ver. 1.0/1.3

Bluetooth is the registered trademark of Bluetooth SIG. Inc.

NOTE
- The Bluetooth Hands-Free system is operable several seconds after the ignition is switched to ACC or ON (requires less than 15 seconds).
- If the ignition is switched off during a hands-free call, the line is transferred to the device (Mobile phone) automatically.
- If the device (Mobile phone) is in a location where radio reception is difficult such as a metal container or in the trunk, the call may not be connected using Bluetooth. If communication is not possible, change the location of the device (Mobile phone).

Component Parts
Bluetooth Hands-Free consists of the following items:
- Audio unit
- Pick-up button
- Hang-up button

Audio unit
The audio unit can be used for Bluetooth Hands-Free activation, making calls, hanging up, device programming, device selection, device deletion, device information display, import contact, and volume adjustment.

**Pick-up button and Hang-up button**

Basic functions of Bluetooth Hands-Free can be used for such things as making calls or hanging up using the pick-up button and hang-up button on the steering wheel.

**How to Use This Section**

**Bluetooth Hands-Free activation method**

Press the phone button (PHONE).

The hands-free system is activated. Functions of the hands-free telephone, such as making and receiving calls, can be used after the activation. (For details on the telephone functions, refer to “Basic Bluetooth Hands-Free Operation” or “Convenient Use of the Hands-Free System”.)

---

**Basic Bluetooth Hands-Free Operation**

**Bluetooth Hands-Free Preparation**

**Device programming (Pairing)**

To use Bluetooth Hands-Free, the device equipped with Bluetooth has to be programmed to the hands-free unit using the following procedure.

A maximum of seven devices including hands-free mobile phones and Bluetooth audio devices can be programmed to one vehicle.
NOTE

- A device can be programmed only when the vehicle is parked. If the vehicle starts to move, the pairing procedure will end. Programming is dangerous while driving - pair up your device before you start driving. Park the car in a safe place before programming.
- A total of seven devices can be programmed to one vehicle. If you require an additional device to be programmed to a vehicle with seven devices already programmed, delete one of the programmed devices before programming the latest one.
- If a Bluetooth device has already been programmed to the vehicle as a Bluetooth audio device, it does not need to be programmed again when using the device as a hands-free mobile phone. Conversely, it does not need to be programmed again as a Bluetooth audio device if it has already been programmed as a hands-free mobile phone.
- Since the communication range of a Bluetooth equipped device is about 10 meters (32 ft), if a device is placed within a 10-meter (32 ft) radius of the vehicle, it may be detected/programmed unintentionally while another device is being programmed.
- Device registration can also be done by operating the audio unit. Refer to “Bluetooth Audio Preparation” (page 6-127).
- Device registration can also be done using voice recognition (page 6-138).
- Depending on the device, the registration status may be lost after a certain period of time. If this occurs, repeat the entire process from Step 1.

Programming a Bluetooth Hands-Free device which has a PIN code (four digits)

1. Press selection button 6 to display the Bluetooth Hands-Free setting menu screen.
2. Press selection button 2 to display the pairing program screen.
3. “Enter Pin:0000” and “Rotate/Press TUNE dial to change code. Select “OK” when complete.” are displayed for input of the PIN code.
4. Turn the manual tuning dial to select the specified number for the Bluetooth Hands-Free device and press the enter button (ENTER ) to input the number.

NOTE

- Some devices accept only a particular pairing code (Usually, “0000” or “1234”).
- If pairing cannot be completed, refer to the owner's manual of your mobile device, and try those numbers if necessary.

5. After inputting the four digits, turn the manual tuning dial and select “OK”, and then press the enter button (ENTER ) to set the four digits and display “Pairing is in progress. Please start pairing procedure on your Bluetooth device. Use the PIN “xxxx”.”.

NOTE

Press the return button (RETURN ) to return to the pairing program screen.
6. Operate the Bluetooth Hands-Free device while
   “Pairing is in progress. Please start
   pairing procedure on your Bluetooth
   device. Use the PIN “xxxx”.” is
   displayed and set it to the program
   mode.

7. When the pairing programming is
   completed, a “communications” symbol and
   “Pairing complete” are displayed, and
   then the display returns to the normal
   display.
   If an error occurs during program
   pairing, “Error” is displayed and the
   display returns to the pairing program
   screen.

Programming a Bluetooth Hands-Free
device which does not have a PIN code
(four digits)

1. Press selection button 6 to display the
   Bluetooth Hands-Free setting menu
   screen.

2. Press selection button 2 to display the
   pairing program screen.

3. “Enter Pin:0000” and
   “Rotate/Press TUNE dial to change
code. Select “OK” when complete.” are
   displayed for input of the PIN code.

4. Turn the manual tuning dial and select
   “OK”, and then press the enter button
   (ENTER) to set the four digits and display
   “Pairing is in progress. Please start
   pairing procedure on your Bluetooth
   device. Use the PIN “0000”.”.

   NOTE
   Press the return button (RETURN) to return
to the pairing program screen.

5. Operate the Bluetooth Hands-Free
device while
   “Pairing is in progress. Please start
   pairing procedure on your Bluetooth
   device. Use the PIN “0000”.” is
   displayed and set it to the program
   mode.

6. The Bluetooth Hands-Free device will
   request input of a PIN code. Input
   “0000”.

7. When the pairing programming is
   completed, a “communications” symbol and
   “Pairing complete” are displayed, and
   then the display returns to the normal
   display.
   If an error occurs during program
   pairing, “Error” is displayed and the
   display returns to the pairing program
   screen.

NOTE
If pairing cannot be completed, try “1234”
instead. Refer to the owner’s manual of your
mobile device for the right PIN code.

Making a Call Using a Telephone
Number

NOTE
Practice this while parked until you are
confident you can do it while driving in a non-
taxing road situation. If you are not completely
comfortable, make all calls from a safe
parking position, and move out only when fully
under control and you can devote your eyes
and mind to driving.
1. Turn the manual tuning dial to select a number and then press the enter button (ENTER) to input the number.

2. After inputting the telephone number, press selection button 1 or the pick-up button of the audio control switch to make a call.

▼ Receiving an Incoming Call

Receiving an incoming call
Press selection button 1 or the pick-up button of the audio control switch.

Refusing an incoming call
Press selection button 5 or the hang-up button of the audio control switch.

▼ Hanging Up a Call

Press selection button 5 or the hang-up button of the audio control switch during a call.

▼ Volume Adjustment

The power/volume dial of the audio unit is used to adjust the volume.

Increasing volume
Turn the power/volume dial clockwise.

Decreasing volume
Turn the power/volume dial counterclockwise.

NOTE
- The volume can be adjusted using the volume switch of the audio control switch.
- The music volume of the audio unit cannot be adjusted while Bluetooth Hands-Free is being used.

 Convenient Use of the Hands-Free System

▼ Phonebook Usage

NOTE
Do this function only when parked. It is too distracting to attempt while driving and you may make too many errors to be effective.

Import contact
Phonebook data from your device (Mobile phone) can be sent and registered to your Bluetooth Hands-Free phonebook using Bluetooth.

NOTE
When the import begins, the previous phonebook data is deleted. The previous phonebook data remains deleted even if the operation is canceled during the import.

1. Press selection button 7 to display the Bluetooth Hands-Free phonebook import screen.
   “It takes time to import.” is displayed.

2. Press selection button 1 and select “Start” to start import.
   “Importing” is displayed.

NOTE
If you want to cancel the import, press selection button 2 and select “Cancel”. The phonebook data being imported is deleted.

3. When import is completed, the Bluetooth Hands-Free phonebook screen is displayed.

Phonebook data deletion
1. Press selection button 7 to display the Bluetooth Hands-Free phonebook import screen.
   “It takes time to import.” is displayed.
Interior Comfort

Bluetooth Hands-Free (Panel Operation)

2. Press selection button 1 and select “Start” to start import. “Importing” is displayed.

3. Before the import is completed, press selection button 2 and select “Cancel”. The phonebook data is deleted, and the screen returns to the normal display after “Importing has been cancelled.” is displayed.

Making calls using the phonebook

1. Press selection button 2 to display the Bluetooth Hands-Free phonebook screen.

2. Turn the manual tuning dial to select a list and then press the enter button (ENTER ) to display the Bluetooth Hands-Free phonebook screen containing the detailed information recorded.

NOTE
Press each selection button to display the alphabetical sequence for the selection button selected.
- Each time the selection button is pressed a letter is displayed in alphabetical order. (Ex. selection button 1: A → B → C → A)
- Each time selection button 8 is pressed, the display shows the last four letters of the alphabet (W, X, Y, Z), followed by symbols, and then numerals.

3. Press selection button 5 to display “Voice Tag will be recorded in phonebook. After completion, this Voice Tag will be available with “Call” command.”.

NOTE
- Descriptions in the text are as follows:
  - Say: Voice commands to be spoken by you.
  - Prompt: Voice guidance output from the speaker.
  - Say voice commands after the beep sound [Beep] is heard.

4. Prompt:
“Adding a voice tag allows you to access a contact using the CALL command. After the beep, say the name you would like to use for this contact.”

NOTE
If you want to cancel a voice tag registration, press selection button 1.
5. **Say:** [Beep] XXXXX... (Ex. “Mary's phone”)” (Say a voice tag for the name registered.)

6. **Prompt:**
   “Adding XXXXX... (Ex. “Mary's phone”)” (Registered voice tag). Is this correct?”

7. **Say:** [Beep] “Yes”

8. When a voice tag registration is completed, the display returns to the Hands-Free phonebook screen.

**▼ Mute**

The microphone can be muted during a call.

Press selection button 3.

**▼ Transferring a Call**

Transferring a call from Hands-Free to a device (Mobile phone)

Press selection button 2.

**▼ Outgoing Call Records**

A maximum of six outgoing call records are displayed. Making phone calls using the outgoing call record or deleting one or all outgoing call records is possible.

**Making a call using the outgoing call record**

1. Press selection button 3 to display the outgoing call record screen.

2. Press the desired selection button of the outgoing call record.
   The content of the outgoing call record is displayed.

3. Press selection button 1 or the pick-up button of the audio control switch to make a call.

**Deleting one outgoing call record**

1. Press selection button 3 to display the outgoing call record screen.

2. Press the desired selection button of the outgoing call record.
   The content of the outgoing call record is displayed.

3. Press selection button 2 to display “Delete recent outgoing call?”.

4. Press selection button 1 to delete the outgoing call record.

**NOTE**

Press the return button (RETURN) to return to the previous display.

**Deleting all the outgoing call records**

1. Press selection button 3 to display the outgoing call record screen.

2. Press selection button 5 to display “Delete all recent outgoing calls?”.

3. Press selection button 1 to delete all outgoing call records.

**NOTE**

Press the return button (RETURN) to return to the previous display.

**▼ Incoming Call Records**

A maximum of six incoming call records are displayed. Making phone calls using the incoming call record or deleting one or all incoming call records is possible.

**Making a call using the incoming call record**

1. Press selection button 3 to display the incoming call record screen.

2. Press the desired selection button of the incoming call record.
   The content of the incoming call record is displayed.

3. Press selection button 1 or the pick-up button of the audio control switch to make a call.

**Deleting one incoming call record**

1. Press selection button 3 to display the incoming call record screen.

2. Press the desired selection button of the incoming call record.
   The content of the incoming call record is displayed.

3. Press selection button 2 to display “Delete recent incoming call?”.

4. Press selection button 1 to delete the incoming call record.

**NOTE**

Press the return button (RETURN) to return to the previous display.

6-171
**Making a call using the incoming call record**

1. Press selection button 4 to display the incoming call record screen.
2. Press the desired selection button of the incoming call record.
   The content of the incoming call record is displayed.
3. Press selection button 1 or the pick-up button of the audio control switch to make a call.

**Deleting one incoming call record**

1. Press selection button 4 to display the incoming call record screen.
2. Press the desired selection button of the incoming call record.
   The content of the incoming call record is displayed.
3. Press selection button 2 to display “Delete recent incoming call?”.
4. Press selection button 1 to delete the incoming call record.

**NOTE**

Press the return button (RETURN) to return to the previous display.

**Deleting all the incoming call records**

1. Press selection button 4 to display the incoming call record screen.
2. Press selection button 5 to display “Delete all recent incoming calls?”.
3. Press selection button 1 to delete all the incoming call records.

**NOTE**

Press the return button (RETURN) to return to the previous display.

**DTMF (Dual Tone Multi-Frequency Signal) Transmission**

This function is used when transmitting DTMF via the audio control panel's manual tuning dial. The receiver of a DTMF transmission is generally a home telephone answering machine or a company’s automated guidance call center.

1. Press selection button 4 after connecting to a home device or service to display the tone transmission screen.
2. Turn the manual tuning dial to select a number or symbol and then press the enter button (ENTER) to transmit the code.

**NOTE**

If the DTMF code has two or more digits or symbols, each one must be transmitted individually.
Hands-Free Setting

Device registration

For the registration of a Bluetooth equipped device to Bluetooth Hands-Free, refer to “Bluetooth Hands-Free Preparation” (page 6-166).

Device selection

If several devices have been programmed, the Bluetooth unit links the device last programmed. If you would like to link a different programmed device, it is necessary to change the link. The order of device priority after the link has been changed is maintained even when the ignition is switched off.

NOTE

If the device name cannot be displayed, “...” is added at the end to the part of the title which can be displayed.

Changing the link to only a Bluetooth Hands-Free device

1. Press selection button 6 to display the Bluetooth Hands-Free setting menu screen.

2. Press selection button 3 to display the link change screen and the current pairing programming device name.

3. Press selection button 1, 2, 3, 4, 5, 6, or 7 to select the name of the device you would like to change. The “” symbol disappears, and the device name and “Connection is in progress.” are displayed.

NOTE

Press the return button (RETURN) to return to the link change screen.

4. When the link change is completed, a “ ” symbol and “Link Changed” are displayed, and then it returns to the normal display. If an error occurs while trying to link a device, “Error” is displayed and the display returns to the link change screen.

NOTE

If a link error occurs, check the programming status of the Bluetooth Hands-Free device and the location of the device in the vehicle (not in the trunk or a metal-type box), and then try the link operation again.

Changing the link to a Bluetooth Hands-Free and Bluetooth audio device

1. Press selection button 6 to display the Bluetooth Hands-Free setting menu screen.

2. Press selection button 3 to display the link change screen and the present pairing programming device name.

3. Press selection button 1, 2, 3, 4, 5, 6, or 7 to select the name of the device you would like to change.

4. The device name and “Please Select Device” are displayed.

5. Press selection button 2 to select “Phone”. The “ ” symbol disappears, and then “Connection is in progress.” is displayed.

NOTE

Press the return button (RETURN) to return to the link change screen.
6. When the link change is completed, a "[ ]" symbol and “Link Changed” are displayed, and then it returns to the normal display. If an error occurs while trying to change the link, “Error” is displayed, and then it returns to the link change screen.

**NOTE**
- If a link error occurs, check the programming status of the Bluetooth Hands-Free device and the location of the device in the vehicle (not in the trunk or a metal-type box), and then try the link operation again.
- Device (Music player) selection can also be done by operating the panel button (page 6-127).

**Registered device (Mobile phone) deletion**

An individually registered device can be cleared.

**NOTE**
- Do this function only when parked. It is too distracting to attempt while driving and you may make too many errors to be effective.
- If the device name and Bluetooth address cannot be displayed, “…” is added at the end to the part of the title which can be displayed.

1. Press selection button 6 to display the Bluetooth Hands-Free setting menu screen.
2. Press selection button 4 to display the pair link deletion screen and the current pairing programming device name.
3. Press selection button 1, 2, 3, 4, 5, 6, or 7 to select the name of the device you would like to change.

4. The link delete confirmation screen is displayed, and then “Delete select device?” the device name, and the Bluetooth address are displayed.
5. Press selection button 1 to delete the selected device.

**NOTE**
- Press the return button (RETURN ) to return to the previous display.

6. When the link deletion is completed, “Deleted” is displayed, and then it returns to the normal display. If an error occurs while trying to delete the link, “Error” is displayed, and then it returns to the link deletion screen.

**NOTE**
- If a device is deleted while it is being linked, linking to other devices will not be possible.

**Bluetooth Hands-Free device information display**

1. Press selection button 6 to display the Bluetooth Hands-Free setting menu screen.
2. Press selection button 6 to display the device information display screen. If the device information is available, the device name and Bluetooth address are displayed, and then it returns to the Bluetooth Hands-Free setting menu screen. If the device information is not available, “Failed to obtain device information.” is displayed, and then it returns to the Bluetooth Hands-Free setting menu screen.
NOTE
If the device name and Bluetooth address cannot be displayed, “...” is added at the end to the part of the title which can be displayed.

When Bluetooth Hands-Free Cannot be Used

Bluetooth Hands-Free cannot be used under the following conditions:

- The device is outside of the communication area.
- The device has a malfunction.
- The device is not connected to the hands-free unit equipped on the vehicle.
- The device's battery is weak.
- The device is turned off.
- The device is placed where radio reception is difficult.
- The ignition is switched off.
Interior Comfort

Bluetooth Hands-Free (Panel Operation)

Safety Certification

FCC ID: CB2MBLUEC09 IC:279B-MBLUEC09
This device complies with Part 15 of the FCC Rules and with RSS-210 of Industry Canada. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

![WARNING]

Changes or modifications not expressively approved by the party responsible for compliance could void the user's authority to operate the equipment.

The term “IC: ” before the radio certification number only signifies that Industry Canada technical specifications were met.
The antenna used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provided with installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

Mazda Bluetooth Hands-Free Customer Service

- U.S.A.
  Phone: 800-430-0153 (Toll-free)
  www.MazdaUSA.com/bluetooth
- Canada
  Phone: 800-430-0153 (Toll-free)
  www.mazdahandsfree.ca
Rear View Monitor

The rear view monitor is a visual assist system when reversing the vehicle that provides images from the rear of the vehicle.

**WARNING**

The rear view monitor is only a visual assist device when reversing the vehicle. The images on the screen may be different from the actual conditions. Always drive carefully confirming the safety of the rear and the surrounding conditions by looking directly with your eyes. Reversing the vehicle by only looking at the screen may cause an accident or a collision with an object.

**CAUTION**

- Do not use the rear view monitor under the following conditions: Using the rear view monitor under the following conditions is dangerous and could result in injury or vehicle damage or both.
  - Icy or snow-covered roads.
  - Tire chains or a temporary spare tire is installed.
  - The liftgate is not fully closed.
  - The vehicle is on a road incline.
- When the display is cold, images may course across the monitor or the screen and may be dimmer than usual, which could cause difficulty in confirming the surrounding conditions of the vehicle. Always drive carefully confirming the safety of the rear and the surrounding conditions by looking directly with your eyes.
- Do not apply excessive force to the camera. The camera position and angle may deviate.
- Do not disassemble, modify, or remove it as it may no longer be waterproof.
- The camera cover is made of plastic. Do not apply degreasing agents, organic solvents, wax, or glass coating agents to the camera cover. If any are spilled on the cover, wipe off with a soft cloth immediately.
- Do not rub the cover excessively, or polish it using an abrasive compound or a hard brush. The cover may be damaged affecting the image.

*Some models.*
NOTE

- If water, snow, or mud is stuck on the camera lens, wipe it off using a soft cloth. If it cannot be wiped off, use a mild detergent.
- If the camera temperature changes rapidly, such as by pouring hot water on it under cold temperature conditions, the rear view monitor may not operate correctly.
- When replacing the tires, consult an Authorized Mazda Dealer. Replacing the tires could result in deviation of the guide lines which appear on the display.
- If the vehicle's front, side, or rear has been involved in a collision, the alignment of the rear view parking camera (location, installation angle) may have deviated. Always consult an Authorized Mazda Dealer to have the vehicle inspected.

(Navigation system)

- The screen may not change to the camera image while the navigation system is being activated immediately after the vehicle battery has been connected. If this occurs, activate the rear-view monitor camera again soon after the navigation system.

▼ Rear View Parking Camera Location

![Rear View Parking Camera](image)

▼ Switching to the Rear View Monitor Display

Shift the shift lever to R with the ignition switched ON to switch the display to the rear view monitor display.

NOTE

When the shift lever is shifted from R to another shift lever position, the screen returns to the previous display.
Displayable Range on the Screen

The images on the screen may be different from the actual conditions.

NOTE

- The displayable range varies depending on the vehicle and road conditions.
- The displayable range is limited. Objects under the bumper or around the bumper ends cannot be displayed.
- The distance appearing in the displayed image is different from the actual distance because the rear view parking camera is equipped with a specific lens.
- Some optionally installed vehicle accessories may be picked up by the camera. Do not install any optional parts that can interfere with the camera view, such as illuminating parts or parts made of reflective material.
- It may be difficult to see the display under the following conditions, however, it does not indicate a malfunction.
  - In darkened areas.
  - When the temperature around the lens is high/low.
  - When the camera is wet such as on a rainy day or during periods of high humidity.
  - When foreign material such as mud is stuck around the camera.
  - When the camera lens reflects sunlight or headlight beams.
- Image display may be delayed if the temperature around the camera is low.
Viewing the Display

Guide lines which indicate the width of the vehicle (green) are displayed on the screen as a reference to the approximate width of the vehicle in comparison to the width of the parking space you are about to back into.

Use this display view for parking your vehicle in a parking space or garage.

a) Vehicle width guide lines (green)
   Guide lines serve as a reference to the approximate width of the vehicle.

b) Distance guide lines
   These guide lines indicate the approximate distance to a point measured from the vehicle's rear (from the end of the bumper).

The red and yellow lines indicate the points about 50 cm (red) and 1 meter (yellow) from the rear bumper (at the center point of each of the lines).

**CAUTION**

The guide lines on the screen are fixed lines. They are not synced to the driver's turning of the steering wheel. Always be careful and check the area to the vehicle's rear and the surrounding area directly with your eyes while backing up.
Rear View Monitor Operation

The operation of the rear view monitor when reversing the vehicle varies depending on the traffic, road, and vehicle conditions. The amount of steering and the timing also varies depending on conditions, so confirm the surrounding conditions directly with your eyes and steer the vehicle in accordance with the conditions. Be well aware of the above cautions prior to using the rear view monitor.

**NOTE**

Images displayed on the monitor from the rear view parking camera are reversed images (mirror images).

1. Shift the shift lever to R to switch the display to the rear view monitor display.
2. Confirming the surrounding conditions, reverse the vehicle.

3. After your vehicle begins entering the parking space, continue backing up slowly so that the distance between the vehicle width lines and the sides of the parking space on the left and right are roughly equal.

4. Continue to adjust the steering wheel until the vehicle width guide lines are parallel to the left and right sides of the parking space.
5. Once they are parallel, straighten the wheels and back your vehicle slowly into the parking space. Continue checking the vehicle's surroundings and then stop the vehicle in the best possible position. (If the parking space has division lines, check whether the vehicle width guide lines are parallel to them.)

6. When the shift lever is shifted from R to another shift lever position, the screen returns to the previous display.
NOTE

Because there may be a difference between the displayed image, such as indicated below, and the actual conditions when parking, always verify the safety at the rear of the vehicle and the surrounding area directly with your eyes.

- In the image of the parking space (or garage) displayed below, even though the back end and distance guide lines appear parallel in the monitor, they may not actually be parallel on the ground.
- When parking in a space with a division line on only one side of the parking space, the division line and the vehicle width guide line may appear parallel on the monitor, but they may not actually be parallel on the ground.

Check surroundings for safety
Interior Comfort
Rear View Monitor

▼ Variance Between Actual Road Conditions and Displayed Image

Some variance occurs between the actual road and the displayed road. Such variance in distance perspective could lead to an accident. Note the following conditions that may cause a variance in distance perspective.

When the vehicle is tilted due to the weight of passengers and load
When the vehicle rear is lowered, the object displayed on the screen appears farther than the actual distance.
When there is a steep grade behind the vehicle
When there is a steep upgrade (downgrade) behind the vehicle, the object displayed on the screen appears farther (downgrade: closer) than the actual distance.

![Diagram illustrating the difference between A: distance between the vehicle and object on the screen, and B: actual distance between the vehicle and object.]

A: Distance between the vehicle and object displayed on the screen.
B: Actual distance between the vehicle and object.
Three-dimensional object on vehicle rear
Because the distance guide lines are displayed based on a flat surface, the distance to the three-dimensional object displayed on the screen is different from the actual distance.

![Screen display](image)

Sensed distance on screen $A > B > C$

![Actual condition](image)

(Actual distance) $B > C = A$

**Image Quality Adjustment**
Image quality adjustment can be done while the shift lever is in reverse (R) and the rear view monitor is displayed. For detailed information, refer to the audio section or the screen adjustment related information in the “NAVIGATION SYSTEM Owner's Manual”.
While the shift lever is in reverse (R), always check the vehicle's surroundings adequately before performing the image quality adjustment.
Sunvisors

When you need a sunvisor, lower it for use in front or swing it to the side.

Side Extension Sunvisors

The visor extender extends the sunvisor's range of sun shading. To use, pull it out.

CAUTION

When moving the sunvisor, retract the visor extender to its original position. Otherwise, the visor extender could hit the rearview mirror.

Vanity Mirrors

To use the vanity mirror, lower the sunvisor. The vanity mirror light will illuminate when you open the cover.
Interior Comfort

Interior Equipment

Interior Lights

▼ Illuminated Entry System

When the illuminated entry system operates, the overhead light (switch is in the DOOR position) and the courtesy lights turn on for:
- About 30 seconds after the driver's door is unlocked and the ignition is switched off (with the ignition key removed).
- About 15 seconds after all doors are closed.

(With Advanced key)
About 5 seconds after all doors are closed when the advanced key is outside of the vehicle.
- About 15 seconds after the ignition is switched off (with the ignition key removed) with all doors closed.

The light also turns off when:
- The ignition is switched ON and all doors are closed.
- The driver's door is locked.

NOTE

Battery saver
If any door is left opened, the light turns off after about 30 minutes to save the battery. The light turns on again when the ignition is switched ON, or when any door is opened after all doors have been closed.

▼ Overhead Lights

When the center/rear overhead light switch is in the DOOR position, the center/rear overhead light can be turned on or off using the front overhead light switch.

Interior Comfort

Interior Equipment

Information Display

The information display has the following functions:

- Clock
- Ambient Temperature Display (Outside Temperature Display)
- Climate Control Display
- Audio Display
- Trip Computer
- Bluetooth Hands-Free Display

* Refer to Bluetooth Hands-Free on page 6-133.
Clock

NOTE
Without navigation system (Type A)
When the trip computer is displayed, press the CLOCK button to change the display to the time.

With navigation system, Without navigation system (Type B)
When the trip computer is displayed, press the INFO button consecutively until the time is displayed.

When the ignition is switched to ACC or ON, the time is displayed.

2. Adjust the time using the time setting buttons (H, M). The hours advance while the time setting button (H) is pressed. The minutes advance while the time setting button (M) is pressed.

With navigation system
Refer to the separate manual “NAVIGATION SYSTEM”.

NOTE
Minutes and seconds are adjusted by the GPS, however, it is necessary to adjust hours under the following conditions:
- Driving across different time zones
- Daylight saving time start and end

Ambient Temperature Display

When the ignition is switched ON, press the OUTSIDE switch (page 6-6) to display the ambient temperature.
NOTE

- Under the following conditions, the ambient temperature display may differ from the actual ambient temperature depending on the surroundings and vehicle conditions:
  - Significantly cold or hot temperatures.
  - Sudden changes in ambient temperature.
  - The vehicle is parked.
  - The vehicle is driven at low speeds.
- Press the OUTSIDE switch for a few seconds or more to switch the display from Fahrenheit to Centigrade or vice versa.
- Press the OUTSIDE switch again to switch the display from ambient temperature to the temperature set for the air conditioner.

Climate Control Display

The climate control system status is displayed. To operate the climate control system, refer to “Climate Control System” (page 6-2).

Audio Display*

The audio system status is displayed. To operate the audio system, refer to “Audio System” (page 6-17).

Trip Computer

The trip computer can display the following:
- The current fuel economy.
- The average fuel economy.
- The approximate distance you can travel on the available fuel.
- The average vehicle speed.

Switch the ignition ON.
Press the INFO switch to change the display mode.

NOTE

When the time is being displayed, press the INFO switch to change the display to the trip computer.

If you have any problems with your trip computer, consult an Authorized Mazda Dealer.

Current fuel economy mode

This mode displays the current fuel economy by calculating the amount of fuel consumption and the distance traveled.

Current fuel economy will be calculated and displayed every 2 seconds.

When this mode is selected, CONSUM CUR will be displayed.

U.S.A.

CONSUM CUR

mpg

22.4
When you’ve slowed to about 5 km/h (3 mph), - - - L/100 km (- - - mpg) will be displayed.

**Average fuel economy mode**
This mode displays the average fuel economy by calculating the total fuel consumption and the total traveled distance since purchasing the vehicle, reconnecting the battery after disconnection, or resetting the data. The average fuel economy is calculated and displayed every minute.

When this mode is selected, CONSUM AV will be displayed.

**Distance-to-empty mode**
This mode displays the approximate distance you can travel on the remaining fuel based on the fuel economy.

The distance-to-empty will be calculated and displayed every second.

When this mode is selected, REMNG will be displayed.
Even though the distance-to-empty display may indicate a sufficient amount of remaining mileage before refueling is required, refuel as soon as possible if the fuel gauge needle nears E or the low fuel warning light illuminates.

The display won’t change unless you add more than approximately 20 L (5.3 gal) of fuel.

**Average vehicle speed mode**

This mode displays the average vehicle speed by calculating the distance and the time traveled since connecting the battery or resetting the data. Average vehicle speed will be calculated and displayed every 10 seconds.

When this mode is selected, AV will be displayed.

To clear the data being displayed, press the INFO switch for more than 1.5 second. After pressing the INFO switch, - - km/h (- - mile/h) will be displayed for about 1 minute before the vehicle speed is recalculated and displayed.
Cup Holder

⚠️ WARNING

Never use a cup holder to hold hot liquids while the vehicle is moving:
Using a cup holder to hold hot liquids while the vehicle is moving is dangerous. If the contents spill, you could be scalded.

Do not put anything other than cups or drink cans in cup holders:
Putting objects other than cups or drink cans in a cup holder is dangerous.
During sudden braking or maneuvering, occupants could be hit and injured, or objects could be thrown around the vehicle, causing interference with the driver and the possibility of an accident. Only use a cup holder for cups or drink cans.

⚠️ CAUTION

To reduce the possibility of injury in an accident or a sudden stop, keep cup holders closed when not in use.

▼ Front

To use the cup holder, push the release button.

To fit small items in the cup holder, remove the flexible divider.
Interior Comfort

Interior Equipment

▼Rear

Second-row seat
Cup holders are located in the armrest.

Third-row seat
Cup holders are located in the third-row seat side trims.

Right-side

Left-side *

6-196 *Some models.
Bottle Holder

Bottle holders are on the inside of the doors.

CAUTION
Do not use the bottle holders for containers without caps. The contents may spill when the door is opened or closed.

Storage Compartments

WARNING
Keep storage boxes closed when driving:
Driving with the storage boxes open is dangerous. To reduce the possibility of injury in an accident or a sudden stop, keep the storage boxes closed when driving.

CAUTION
Do not leave lighters or eyeglasses in the storage boxes while parked under the sun. A lighter could explode or the plastic material in eyeglasses could deform and crack from high temperature.

▼ Overhead Console

This console box is designed to store accessories.
Push and release to open.
Interior Comfort

Interior Equipment

**Coin Box**
To open, press the release catch down and pull the lid downward.

**Glove Compartment**
To open the glove compartment, pull the latch toward you.
Insert the key (auxiliary key*) and turn it clockwise to lock, counterclockwise to unlock.
* Advanced key equipped vehicle

To close the glove compartment, firmly press in the center of the glove compartment lid.

**Center Console**
To open, push the button.

**Armrest Box***
To open, pull the release catch.

**Cargo Securing Loops**

> WARNING

Make sure luggage and cargo are secured before driving:
Not securing cargo while driving is dangerous as it could move or be crushed during sudden braking or a collision and cause injury.

*Some models.
Use the loops in the luggage compartment to secure cargo with a rope or net. The tensile strength of the loops is 196 N (20 kgf, 44 lbf). Do not apply excessive force to the loops as it will damage them.

1. Lift the trunk board.

2. Secure the trunk board using the straps on the third-row seatbacks.

**Cargo Sub-Compartment**

**Center cargo sub-compartment**

- Lift the trunk board.

**Side cargo sub-compartment**

- Open the cover

- Some models.

**Shopping Bag Hook**

The shopping bag hook can be used for hanging shopping bags.

---

**CAUTION**

Do not hang excessive weight on the shopping bag hook as it could be damaged.
Interior Comfort

Interior Equipment

▼ Rear Coat Hooks

**WARNING**

*Never hang heavy or sharp objects on the assist grips and coat hooks:*

Hanging heavy or sharp-ended objects such as a coat hanger from the assist grips or coat hooks is dangerous as they can fly off and hit an occupant in the cabin if a curtain air bag was to deploy, which could result in serious injury or death.

Always hang clothes on the coat hooks and the assist grips without hangers.

▼ Luggage Compartment

Golf bags can be carried in the luggage compartment.

To carry two golf bags, use the following procedure:

1. Put one golf bag in the luggage compartment with its top pointing to the left.
2. Put the other golf bag on top of the first bag with its top pointing to the right.

**NOTE**

- Some golf bags cannot fit depending on their size.
- Golf bags up to nine inches in diameter can be carried.
Accessory Sockets

Only use genuine Mazda accessories or the equivalent requiring no greater than 120 W (DC 12 V, 10 A).

Front
The ignition must be switched to ACC or ON.

Center/Rear
The accessory sockets can be used regardless of whether the ignition is on or off.

Center
Interior Comfort

Interior Equipment

**CAUTION**

- To prevent accessory socket damage or electrical failure, pay attention to the following:
- Do not use accessories that require more than 120 W (DC 12 V, 10 A).
- Do not use accessories that are not genuine Mazda accessories or the equivalent.
- Close the cover when the accessory socket is not in use to prevent foreign objects and liquids from getting into the accessory socket.
- Correctly insert the plug into the accessory socket.
- Noise may occur on the audio playback depending on the device connected to the accessory socket.
- Depending on the device connected to the accessory socket, the vehicle's electrical system may be affected, which could cause the warning light to illuminate. Disconnect the connected device and make sure that the problem is resolved. If the problem is resolved, disconnect the device from the socket and switch the ignition off. If the problem is not resolved, consult an Authorized Mazda Dealer.

**NOTE**

To prevent discharging of the battery, do not use the socket for long periods with the engine off or idling.

---

**Power Outlet**

The power outlet is positioned as shown in the figure.

For more details, refer to “Auxiliary terminals and power outlet” (page 6-110).

In Case of an Emergency

Parking in an Emergency

The hazard warning lights should always be used when you stop on or near a roadway in an emergency.

The hazard warning lights warn other drivers that your vehicle is a traffic hazard and that they must take extreme caution when near it.

Depress the hazard warning flasher and all the turn signals will flash.

**NOTE**
- The turn signals do not work when the hazard warning lights are on.
- Check local regulations about the use of hazard warning lights while the vehicle is being towed to verify that it is not in violation of the law.
Spare Tire and Tool Storage

Spare tire and tools are stored in the locations illustrated in the diagram.
In Case of an Emergency

Flat Tire

▼ Jack

To remove the jack
1. Open the cargo sub-compartment.
2. Remove the cover.
3. Turn the wing bolt and jack screw counterclockwise.

To secure the jack
1. Insert the wing bolt into the jack with the jack screw pointing right and turn the wing bolt clockwise to temporarily tighten it.
2. Turn the jack screw in the direction shown in the figure.
3. Turn the wing bolt completely to secure the jack.

NOTE
If the jack is not completely secured, it could rattle while driving. Make sure the jack screw is sufficiently tightened.

Maintenance
- Always keep the jack clean.
- Make sure the moving parts are kept free from dirt or rust.
- Make sure the screw thread is adequately lubricated.
Spare Tire

Your Mazda has a temporary spare tire. The temporary spare tire is lighter and smaller than a conventional tire, and is designed only for emergency use and should be used only for VERY short periods. Temporary spare tires should NEVER be used for long drives or extended periods.

WARNING

Do not install the temporary spare tire in place of the front wheels (driving wheels):

Driving with the temporary spare tire on one of the front driving wheels is dangerous. Especially on ice or snow. Handling will be affected. You could lose control of the vehicle and have an accident. Move a regular tire to the front wheel and install the temporary spare tire to the rear.

CAUTION

- When using the temporary spare tire, driving stability may decrease compared to when using only the conventional tire. Drive carefully.
- To avoid damage to the temporary spare tire or to the vehicle, observe the following precautions:
  - Do not exceed 80 km/h (50 mph).
  - Avoid driving over obstacles. Also, do not drive through an automatic car wash. This tire's diameter is smaller than a conventional tire, so the ground clearance is reduced about 25 mm (1 in).
  - Do not use a tire chain on this tire because it will not fit properly.
  - Do not use your temporary spare tire on any other vehicle; it has been designed only for your Mazda.
  - Use only one temporary spare tire on your vehicle at the same time.

NOTE

(With Tire Pressure Monitoring System)

A tire pressure sensor is not installed to the temporary spare tire. The warning light will flash continuously while the temporary spare tire is being used (page 5-30).

To remove the spare tire

1. Have everyone get out of the vehicle and away from the vehicle and traffic.
2. Open the cargo sub-compartment. Refer to Cargo Sub-Compartment on page 6-199.
In Case of an Emergency

Flat Tire

3. Remove the cover.

4. Attach the socket to the spare tire carrier bolt, the jack lever to the socket, and the lug wrench to the opposite end of the jack lever.

5. Slowly turn the lug wrench counterclockwise until the spare tire reaches the ground and the cable becomes loose.

**CAUTION**

*Do not loosen the cable too much as this may cause damage to the spare tire carrier.*

6. Rotate the small lever on top of the retaining plate and pull the retaining plate out from the center hole of the tire.
NOTE
A flat tire which has been removed from the vehicle for repair cannot be carried in the spare tire carrier. Secure the flat tire with the flat tire belt in the cargo sub-compartment (page 7-12).

7. If the temporary spare tire is not reinstalled in the spare tire carrier, tighten the spare tire carrier bolt completely to wind up the spare tire carrier cable.

WARNING
Always tighten the spare tire carrier bolt completely tight and make sure the spare tire is locked in the highest position:
A loose spare tire carrier bolt is dangerous. The cable could be cut causing the spare tire to fall off. This could result in someone being seriously injured or even killed. Use a lug wrench to tighten the carrier bolt and make sure to tighten it until a click sound is heard.

To secure the spare tire
1. Place the tire with the outer side facing upward, rotate the small lever on top of the retaining plate and slide the retaining plate through the center hole of the tire. Rotate the small lever into place.

NOTE
Secure the spare tire as shown below.

2. Raise the spare tire slowly in reverse order of removal.
In Case of an Emergency

Flat Tire

**WARNING**

*Place the specialized temporary spare tire in the spare tire carrier correctly:*

Placing the specialized temporary spare tire in the spare tire carrier wrong side up or using any tire other than the small temporary spare tire designed for use with this vehicle is dangerous. It will result in poor attachment and insufficient ground clearance in the spare tire carrier and the danger of the tire falling off. This could result in someone being badly injured or even killed.

Always tighten the spare tire carrier bolt completely tight and make sure the spare tire is locked in the highest position:

A loose spare tire carrier bolt is dangerous. The cable could be cut causing the spare tire to fall off. This could result in someone being seriously injured or even killed. Use a lug wrench to tighten the carrier bolt and make sure to tighten it until a click sound is heard.

**CAUTION**

If you hear rattling from the spare tire carrier while the vehicle is moving, the spare tire carrier cable may be cut.

Have it repaired at an Authorized Mazda Dealer as soon as possible.

**Changing a Flat Tire**

**NOTE**

If the following occurs while driving, it could indicate a flat tire.

- Steering becomes difficult.
- The vehicle begins to vibrate excessively.
- The vehicle pulls in one direction.

If you have a flat tire, drive slowly to a level spot that is well off the road and out of the way of traffic to change the tire. Stopping in traffic or on the shoulder of a busy road is dangerous.

**WARNING**

Be sure to follow the directions for changing a tire:

Changing a tire is dangerous if not done properly. The vehicle can slip off the jack and seriously injure someone. No person should place any portion of their body under a vehicle that is supported by a jack.

Never allow anyone inside a vehicle supported by a jack:

Allowing someone to remain in a vehicle supported by a jack is dangerous. The occupant could cause the vehicle to fall resulting in serious injury.

**CAUTION**

*(With Tire Pressure Monitoring System)*

The wheels equipped on your Mazda are specially designed for installation of the tire pressure sensors. Do not use non-genuine wheels, otherwise it may not be possible to install the tire pressure sensors.
NOTE

- Make sure the jack is well lubricated before using it.

(With Tire Pressure Monitoring System)
- Be sure to register the tire pressure sensor ID signal code whenever tires or wheels are changed (page 5-32).

1. Park on a level surface off the right-of-way and firmly set the parking brake.
2. Shift into Park (P) and turn off the engine.
3. Turn on the hazard warning flasher.
4. Have everyone get out of the vehicle and away from the vehicle and traffic.
5. Remove the jack, tool, and spare tire (page 7-3).
6. Block the wheel diagonally opposite the flat tire. When blocking a wheel, place a tire block both in front and behind the tire.

NOTE

When blocking a tire, use rocks or wood blocks of sufficient size if possible to hold the tire in place.

▼ Removing a Flat Tire

1. Loosen the lug nuts by turning them counterclockwise one turn each, but do not remove any lug nuts until the tire has been raised off the ground.

2. Place the jack on the ground.
3. Turn the jack screw in the direction shown in the figure and adjust the jack head so that it is close to the jack-up position.
In Case of an Emergency

Flat Tire

4. Place the jack under the jack-up position closest to the tire being changed with the jack head squarely under the jack-up point.

![Jacking position]

5. Continue raising the jack head gradually by rotating the screw with your hand until the jack head is inserted into the jack-up position.

![Tire blocks]

---

**WARNING**

Use only the front and rear jacking positions recommended in this manual:

Attempting to jack the vehicle in positions other than those recommended in this manual is dangerous. The vehicle could slip off the jack and seriously injure or even kill someone. Use only the front and rear jacking positions recommended in this manual.

Do not jack up the vehicle in a position other than the designated jack-up position or place any objects on or under the jack:

Jacking up the vehicle in a position other than the designated jack-up position or placing objects on or under the jack is dangerous as it could deform the vehicle body or the vehicle could fall off the jack resulting in an accident.

Use only the jack provided with your Mazda:

Using a jack that is not designed for your Mazda is dangerous. The vehicle could slip off the jack and seriously injure someone.

Never place objects under the jack:

Jacking the vehicle with an object under the jack is dangerous. The jack could slip and someone could be seriously injured by the jack or the falling vehicle.
6. Insert the jack lever and attach the lug wrench to tire jack.

7. Turn the lug wrench clockwise and raise the vehicle high enough so that the spare tire can be installed. Before removing the lug nuts, make sure your Mazda is firmly in position and that it cannot slip or move.

![Diagram of a tire jack and tire]

**WARNING**

Do not jack up the vehicle higher than is necessary:

Jacking up the vehicle higher than is necessary is dangerous as it could destabilize the vehicle resulting in an accident.

Do not start the engine or shake the vehicle while it is jacked up:

Starting the engine or shaking the vehicle while it is jacked up is dangerous as it could cause the vehicle to fall off the jack resulting in an accident.

Never go under the vehicle while it is jacked up:

Going under the vehicle while it is jacked up is dangerous as it could result in death or serious injury if the vehicle were to fall off the jack.

8. Remove the lug nuts by turning them counterclockwise; then remove the wheel and center cap.
In Case of an Emergency

Flat Tire

▼ Locking Lug Nuts *

If your vehicle has optional antitheft wheel lug nuts, one on each wheel will lock the tires and you must use a special key to unlock them. This key is attached to the lug wrench and is stored with the spare tire. Register them with the lock manufacturer by filling out the card provided in the glove box and mailing it in the accompanying envelope. If you lose this key, consult an Authorized Mazda Dealer or use the lock manufacturer's order form, which is with the registration card.

To remove an antitheft lug nut

1. Obtain the key for the antitheft lug nut.
2. Place the key on top of the nut, and be sure to hold the key square to it. If you hold the key at an angle, you may damage both key and nut. Don't use a power impact wrench.
3. Place the lug wrench on top of the key and apply pressure. Turn the wrench counterclockwise.

To install the nut

1. Place the key on top of the nut, and be sure to hold the key square to it. If you hold the key at an angle, you may damage both key and nut. Don't use a power impact wrench.
2. Place the lug wrench on top of the key, apply pressure, and turn it clockwise.

▼ Mounting the Spare Tire

1. Remove dirt and grime from the mounting surfaces of the wheel and hub, including the hub bolts, with a cloth.

WARNING

Make sure the mounting surfaces of the wheel, hub and lug nuts are clean before changing or replacing tires:

When changing or replacing a tire, not removing dirt and grime from the mounting surfaces of the wheel, hub and hub bolts is dangerous. The lug nuts could loosen while driving and cause the tire to come off, resulting in an accident.

2. Mount the spare tire.

* Some models.
3. Install the lug nuts with the beveled edge inward; tighten them by hand.

**WARNING**
Do not apply oil or grease to lug nuts and bolts and do not tighten the lug nuts beyond the recommended tightening torque:
Applying oil or grease to lug nuts and bolts is dangerous. The lug nuts could loosen while driving and cause the tire to come off, resulting in an accident. In addition, lug nuts and bolts could be damaged if tightened more than necessary.

4. Turn the lug wrench counterclockwise and lower the vehicle. Use the lug wrench to tighten the nuts in the order shown.

If you are unsure of how tight the nuts should be, have them inspected at an Authorized Mazda Dealer.

<table>
<thead>
<tr>
<th>Nut tightening torque</th>
</tr>
</thead>
<tbody>
<tr>
<td>N·m (kgf·m, ft·lbf)</td>
</tr>
<tr>
<td>107.8—147.0</td>
</tr>
<tr>
<td>(11.0—14.9, 79.6—108.4)</td>
</tr>
</tbody>
</table>

**WARNING**
Always securely and correctly tighten the lug nuts:
Improperly or loosely tightened lug nuts are dangerous. The wheel could wobble or come off. This could result in loss of vehicle control and cause a serious accident.

Be sure to reinstall the same nuts you removed or replace them with metric nuts of the same configuration:
Because the wheel studs and lug nuts on your Mazda have metric threads, using a non-metric nut is dangerous. On a metric stud, it would not secure the wheel and would damage the stud, which could cause the wheel to slip off and cause an accident.

5. Open the cargo sub-compartment.
Refer to Cargo Sub-Compartment on page 6-199.

6. Remove the cover.
In Case of an Emergency

**Flat Tire**

7. Remove the belt for securing the flat tire.
8. Return the third-row seatback to its original position. Refer to Fold the Third-Row Seat on page 2-14.
9. Remove the tire blocks and store the tools and jack.
10. Place the flat tire in the cargo sub-compartment.
11. Thread the belt through the wheel as shown in the figure, then attach the belt clips to the attachment loop.
12. Pull the belt end to secure the flat tire.

**NOTE**
Attach location *1 of the belt to the attachment loop on the right.
13. Check the tire inflation pressure. Refer to the specification charts on page 10-6.

14. Have the flat tire repaired or replaced as soon as possible.

⚠️ **WARNING**

*Do not drive with any tires that have incorrect air pressure:*

Driving on tires with incorrect air pressure is dangerous. Tires with incorrect pressure could affect handling and result in an accident. When you check the regular tires' air pressure, check the spare tire, too.

**NOTE**

*(With Tire Pressure Monitoring System)*

A tire pressure sensor is not installed to the temporary spare tire. The warning light will flash continuously while the temporary spare tire is being used (page 5-30).

**NOTE**

To prevent the jack and tool from rattling, store them properly.
In Case of an Emergency

Overheating

If the temperature gauge indicates overheating, the vehicle loses power, or you hear a loud knocking or pinging noise, the engine is probably too hot.

**WARNING**

Switch the ignition to off and make sure the fan is not running before attempting to work near the cooling fan:

Working near the cooling fan when it is running is dangerous. The fan could continue running indefinitely even if the engine has stopped and the engine compartment temperature is high. You could be hit by the fan and seriously injured.

Do not remove either cooling system caps when the engine and radiator are hot:

When the engine and radiator are hot, scalding coolant and steam may shoot out under pressure and cause serious injury.

Open the hood ONLY after steam is no longer escaping from the engine:

Steam from an overheated engine is dangerous. The escaping steam could seriously burn you.

If the temperature gauge indicates overheating:

1. Drive safely to the side of the road and park off the right-of-way.
2. Shift into park (P).
3. Apply the parking brake.
4. Turn off the air conditioner.
5. Check whether coolant or steam is escaping from under the hood or from the engine compartment.

If steam is coming from the engine compartment:

Do not go near the front of the vehicle. Stop the engine. Wait until the steam dissipates, then open the hood and start the engine.

If neither coolant nor steam is escaping:

Open the hood and idle the engine until it cools.

**CAUTION**

If the cooling fan does not operate while the engine is running, the engine temperature will increase. Stop the engine and call an Authorized Mazda Dealer.

6. Make sure the cooling fan is operating, then turn off the engine after the temperature has decreased.
7. When cool, check the coolant reservoir level. If it’s low, look for coolant leaks from the radiator and hoses.

7-16
If you find a leak or other damage, or if coolant is still leaking:
Stop the engine and call an Authorized Mazda Dealer.

If you find no problems, the engine is cool, and no leaks are obvious:
Carefully add coolant as required (page 8-21).

**CAUTION**
*If the engine continues to overheat or frequently overheats, have the cooling system inspected. The engine could be seriously damaged unless repairs are made. Consult an Authorized Mazda Dealer.*
**Jump-Starting**

Jump-starting is dangerous if done incorrectly. So follow the procedure carefully. If you feel unsure about jump-starting, we strongly recommend that you have a competent service technician do the work.

**WARNING**

Follow These Precautions Carefully:
To ensure safe and correct handling of the battery, read the following precautions carefully before using the battery or inspecting it.

Always wear eye protection when working near the battery:
Working without eye protection is dangerous. Battery fluid contains SULFURIC ACID which could cause blindness if splashed into your eyes. Also, hydrogen gas produced during normal battery operation, could ignite and cause the battery to explode.

Wear eye protection and protective gloves to prevent contact with battery fluid:
Spilled battery fluid is dangerous. Battery fluid contains SULFURIC ACID which could cause serious injuries if it gets in eyes, skin or clothing. If this happens, immediately flush your eyes with water for 15 minutes or wash your skin thoroughly and get medical attention.

Always keep batteries out of the reach of children:
Allowing children to play near batteries is dangerous. Battery fluid could cause serious injuries if it gets in the eyes or on the skin.

Do not allow the positive (+) terminal to contact any other metal object that could cause sparks:
Flames and sparks near open battery cells are dangerous. Hydrogen gas, produced during normal battery operation, could ignite and cause the battery to explode. An exploding battery can cause serious burns and injuries. When working near a battery, do not allow metal tools to contact the positive (+) or negative (−) terminal of the battery.
Keep all flames, including cigarettes, and sparks away from open battery cells: Flames and sparks near open battery cells are dangerous. Hydrogen gas, produced during normal battery operation, could ignite and cause the battery to explode. An exploding battery can cause serious burns and injuries.

Do not jump-start a frozen battery or one with a low fluid level: Jump-starting a frozen battery or one with a low fluid level is dangerous. It may rupture or explode, causing serious injury.

Connect the negative cable to a good ground point away from the battery: Connecting the end of the second jumper cable to the negative (−) terminal of the discharged battery is dangerous. A spark could cause the gas around the battery to explode and injure someone.

Route the jumper cables away from parts that will be moving: Connecting a jumper cable near or to moving parts (cooling fans, belts) is dangerous. The cable could get caught when the engine starts and cause serious injury.

**CAUTION**

Use only a 12 V booster system. You can damage a 12 V starter, ignition system, and other electrical parts beyond repair with a 24 V power supply (two 12 V batteries in series or a 24 V motor generator set).
In Case of an Emergency

Emergency Starting

1. Make sure the booster battery is 12 V and that its negative terminal is grounded.

2. If the booster battery is in another vehicle, don't allow both vehicles to touch. Turn off the engine of the vehicle with the booster battery and all unnecessary electrical loads in both vehicles.

3. Connect the jumper cables in the exact sequence as in the illustration.
   - Connect one end of a cable to the positive terminal on the discharged battery (1).
   - Attach the other end to the positive terminal on the booster battery (2).
   - Connect one end of the other cable to the negative terminal of the booster battery (3).
   - Connect the other end to the ground point indicated in the illustration away from the discharged battery (4).

4. Start the engine of the booster vehicle and run it a few minutes. Then start the engine of the other vehicle.

5. When finished, carefully disconnect the cables in the reverse order described in the illustration.

Push-Starting

Do not push-start your Mazda.

NOTE
You can't start a vehicle with an automatic transaxle by pushing it.
**Towing Description**

We recommend that towing be done only by an Authorized Mazda Dealer or a commercial tow-truck service.

Proper lifting and towing are necessary to prevent damage to the vehicle. Particularly when towing an AWD vehicle, where all the wheels are connected to the drive train, proper transporting of the vehicle is absolutely essential to avoid damaging the drive system. Government and local laws must be followed.

![Wheel dollies](image)

A towed 2WD vehicle should have its drive wheels (front wheels) off the ground. If excessive damage or other conditions prevent this, use wheel dollies.

When towing a 2WD vehicle with the rear wheels on the ground, release the parking brake.

A towed AWD vehicle must have all its wheels off the ground.

---

**CAUTION**

*Do not tow the vehicle pointed backward with driving wheels on the ground. This may cause internal damage to the transaxle.*

![No backward towing](image)

**CAUTION**

*Do not tow with sling-type equipment. This could damage your vehicle. Use wheel-lift or flatbed equipment.*

![No sling towing](image)
WARNING
Always tow a AWD vehicle with all four wheels off the ground:
Towing a AWD vehicle with either the front or rear wheels on the ground is dangerous as the drive train could be damaged, or the vehicle could trail away from the tow truck and cause an accident. If the drive train has been damaged, transport the vehicle on a flat bed truck.

CAUTION
Do not use the front and rear tiedown eyelets for towing the vehicle.
They have been designed only for securing the vehicle to a transport vessel during shipping.
Using the eyelets for any other purpose could result in the vehicle being damaged.

Tiedown Hooks

1. Remove the tiedown eyelet and the lug wrench from the trunk (page 7-3).
2. Wrap a flathead screwdriver or similar tool with a soft cloth to prevent damage to a painted bumper, and open the cap located on the front or rear bumper.
   Remove the front bumper cap by pulling it from the position shown in the figure.

Front
**CAUTION**
- Do not use excessive force as it may damage the cap or scratch the painted bumper surface.
- The rear bumper cover cannot be removed completely. Attempting to forcefully remove the rear bumper cover could result in it being damaged.

**NOTE**
Remove the front bumper cover completely and store it so as not to lose it.

3. Securely install the tiedown eyelet using the lug wrench.

4. Hook the tying rope to the tiedown eyelet.
In Case of an Emergency

Emergency Towing

⚠️ CAUTION

If the tiedown eyelet is not securely tightened, it may loosen or disengage from the bumper when tying down the vehicle. Make sure that the tiedown eyelet is securely tightened to the bumper.

Recreational Towing

An example of “recreational towing” is towing your vehicle behind a motorhome. The transaxle is not designed for towing this vehicle on all 4 wheels. When doing recreational towing refer to “Towing Description” (page 7-21) and “Tiedown Hooks” (page 7-22) and carefully follow the instructions.

Maintenance and Care

Introduction

Be extremely careful and prevent injury to yourself and others or damage to your vehicle when using this manual for inspection and maintenance.

If you are unsure about any procedure it describes, we strongly urge you to have a reliable and qualified service shop perform the work, preferably an Authorized Mazda Dealer.

Factory-trained Mazda technicians and genuine Mazda parts are best for your vehicle. Without this expertise and the parts that have been designed and made especially for your Mazda, inadequate, incomplete, and insufficient servicing may result in problems. This could lead to vehicle damage or an accident and injuries.

For expert advice and quality service, consult an Authorized Mazda Dealer.

The owner should retain evidence that proper maintenance has been performed as prescribed.

Claims against the warranty resulting from lack of maintenance, as opposed to defective materials or authorized Mazda workmanship, will not be honored.

Any auto repair shop using parts equivalent to your Mazda’s original equipment may perform maintenance. But we recommend that it always be done by an Authorized Mazda Dealer using genuine Mazda parts.
Scheduled Maintenance (USA, Canada, and Puerto Rico)

Follow Schedule 1 if the vehicle is operated mainly where none of the following conditions apply.
- Repeated short-distance driving
- Driving in dusty conditions
- Driving with extended use of brakes
- Driving in areas where salt or other corrosive materials are used
- Driving on rough or muddy roads
- Extended periods of idling or low-speed operation
- Driving for long periods in cold temperatures or extremely humid climates
- Driving in extremely hot conditions
- Driving in mountainous conditions continually

If any do apply, follow Schedule 2 (Canada and Puerto Rico residents follow Schedule 2).

**NOTE**
After the prescribed period, continue to follow the described maintenance at the recommended intervals.

Maintenance and Care

Scheduled Maintenance

Scheduled Maintenance (Mexico)

Follow Schedule 1 if the vehicle is operated mainly where none of the following conditions apply.

- Repeated short-distance driving
- Driving in dusty conditions
- Driving with extended use of brakes
- Driving in areas where salt or other corrosive materials are used
- Driving on rough or muddy roads
- Extended periods of idling or low-speed operation
- Driving for long periods in cold temperatures or extremely humid climates
- Driving in extremely hot conditions
- Driving in mountainous conditions continually

If any do apply, follow Schedule 2.

NOTE
After the prescribed period, continue to follow the described maintenance at the recommended intervals.

Owner Maintenance Schedule

The owner or a qualified service technician should make these vehicle inspections at the indicated intervals to ensure safe and dependable operation.

Bring any problem to the attention of an Authorized Mazda Dealer or qualified service technician as soon as possible.

▼ When Refueling

- Brake fluid level (page 8-23)
- Engine coolant level (page 8-21)
- Engine oil level (page 8-20)
- Washer fluid level (page 8-24)

▼ At Least Monthly

Tire inflation pressures (page 8-32)

▼ At Least Twice a Year (For Example, Every Spring and Fall)

- Power steering fluid level (page 8-24)
You can do the following scheduled maintenance items if you have some mechanical ability and a few basic tools and if you closely follow the directions in this manual.
- Engine coolant (page 8-21)
- Engine oil (page 8-19)
Owner Maintenance Precautions

Improper or incomplete service may result in problems. This section gives instructions only for items that are easy to perform.

As explained in the Introduction (page 8-2), several procedures can be done only by a qualified service technician with special tools.

Improper owner maintenance during the warranty period may affect warranty coverage. For details, read the separate Mazda Warranty statement provided with the vehicle. If you're unsure about any servicing or maintenance procedure, have it done by an Authorized Mazda Dealer.

There are strict environmental laws regarding the disposal of waste oil and fluids. Please dispose of your waste properly and with due regard to the environment.

We recommend that you entrust the oil and fluid changes of your vehicle to an Authorized Mazda Dealer.

**WARNING**

Do not perform maintenance work if you lack sufficient knowledge and experience or the proper tools and equipment to do the work. Have maintenance work done by a qualified technician:

- Performing maintenance work on a vehicle is dangerous if not done properly. You can be seriously injured while performing some maintenance procedures.

If you must run the engine while working under the hood, make certain that you remove all jewelry (especially rings, bracelets, watches, and necklaces) and all neckties, scarves, and similar loose clothing before getting near the engine or cooling fan which may turn on unexpectedly:

- Working under the hood with the engine running is dangerous. It becomes even more dangerous when you wear jewelry or loose clothing.

- Either can become entangled in moving parts and result in injury.

Switch the ignition to off and make sure the fan is not running before attempting to work near the cooling fan:

- Working near the cooling fan when it is running is dangerous. The fan could continue running indefinitely even if the engine has stopped and the engine compartment temperature is high. You could be hit by the fan and seriously injured.

Do not leave items in the engine compartment:

- After you have finished checking or doing servicing in the engine compartment, do not forget and leave items such as tools or rags in the engine compartment. Tools or other items left in the engine compartment could cause engine damage or a fire leading to an unexpected accident.
Engine Compartment Overview

- Engine coolant reservoir
- Brake fluid reservoir
- Power steering fluid reservoir
- Battery
- Fuse block
- Windscreen washer fluid reservoir
- Relay box
- Engine oil dipstick
- Engine oil-filler cap
**Engine Oil**

**NOTE**
Changing the engine oil should be done by an Authorized Mazda Dealer.

Mazda recommends Mazda Genuine Parts and Castrol (U.S.A and Mexico). For optimal engine performance, there are certain types of engine oils and filters suitable for your vehicle. Please consult an Authorized Mazda Dealer.

**Recommended Oil**

Use SAE 5W-20 engine oil.
Oil container labels provide important information.
A chief contribution this type of oil makes to fuel economy is reducing the amount of fuel necessary to overcome engine friction.

**U.S.A. and CANADA**

Only use oils “Certified For Gasoline Engines” by the American Petroleum Institute (API). An oil with this trademark symbol conforms to the current engine and emission system protection standards and fuel economy requirements of the International Lubricant Standardization and Approval Committee (ILSAC), comprised of U.S. and Japanese automobile manufacturers.

**Except U.S.A. and CANADA**

![Certified For Gasoline Engines (ILSAC)](image1)

![API Service SM SAE 5W-20 Energy Conservation](image2)

![Certified For Gasoline Engines (ILSAC)](image3)
Maintenance and Care

Owner Maintenance

The quality designation SM, or ILSAC must be on the label.

CAUTION

Do not add engine oil over MAX. This may cause engine damage.

6. Make sure the O-ring on the dipstick is positioned properly before reinserting the dipstick.

▼ Inspecting Engine Oil Level

1. Be sure the vehicle is on a level surface.

2. Warm up the engine to normal operating temperature.

3. Turn it off and wait at least 5 minutes for the oil to return to the oil pan.

4. Pull out the dipstick, wipe it clean, and reinsert it fully.

5. Pull it out again and examine the level. The level is normal if it is between MIN and MAX. If it is below MIN, add oil to raise the level within the hatching zone.
Inspect the antifreeze protection and coolant level in the coolant reservoir at least once a year—at the beginning of the winter season—and before traveling where temperatures may drop below freezing.

Inspect the condition and connections of all cooling system and heater hoses. Replace any that are swollen or deteriorated.

The coolant should be at full in the radiator and between the F and L marks on the coolant reservoir when the engine is cool.

If it is at or near L, add enough coolant to the coolant reservoir to provide freezing and corrosion protection and to bring the level to F.

Securely tighten the coolant reservoir tank cap after adding coolant.

**NOTE**
Changing the coolant should be done by an Authorized Mazda Dealer.
Maintenance and Care
Owner Maintenance

**CAUTION**

- Radiator coolant will damage paint. Rinse it off quickly if spilled.
- Use only soft (demineralized) water in the coolant mixture. Water that contains minerals will cut down on the coolant's effectiveness.
- Do not add only water. Always add a proper coolant mixture.
- The engine has aluminum parts and must be protected by an ethylene-glycol-based coolant to prevent corrosion and freezing.
- DO NOT USE coolants Containing Alcohol, methanol, Borate or Silicate. These coolants could damage the cooling system.
- DO NOT MIX alcohol or methanol with the coolant. This could damage the cooling system.
- Do not use a solution that contains more than 60% antifreeze. This would reduce effectiveness.

**NOTE**
If the "FL22" mark is shown on or near the cooling system cap, it is recommended to use Mazda Genuine FL22 engine coolant (page 8-3).

If the coolant reservoir is empty or new coolant is required frequently, consult an Authorized Mazda Dealer.
Brake Fluid

▼ Inspecting Brake Fluid Level

Inspect the fluid level in the reservoir regularly. It should be kept at MAX. The level normally drops with accumulated distance, a condition associated with wear of brake linings. If it is excessively low, have the brake system inspected by an Authorized Mazda Dealer.

▼ Adding Brake Fluid

⚠ WARNING

Be careful not to spill brake fluid on yourself or on the engine:

Spilled brake fluid is dangerous. If it gets in your eyes, they could be seriously injured. If this happens, immediately flush your eyes with water and get medical attention. Brake fluid spilled on a hot engine could cause a fire.

If the brake fluid level is low, have the brakes inspected:

Low brake fluid levels are dangerous. Low levels could signal brake lining wear or a brake system leak. Your brakes could fail and cause an accident.

If the fluid level is low, add fluid until it reaches MAX. Before adding fluid, thoroughly clean the area around the cap.

⚠ CAUTION

- Brake fluid will damage painted surfaces. If brake fluid does get on a painted surface, wash it off with water immediately.
- Using nonspecified brake fluids (page 10-4) will damage the system. Mixing different fluids will also damage it. If the brake system frequently requires new fluid, consult an Authorized Mazda Dealer.
Power Steering Fluid

▼ Inspecting Power Steering Fluid Level

**CAUTION**

To avoid damage to the power steering pump, don’t operate the vehicle for long periods when the power steering fluid level is low.

**NOTE**

Use specified power steering fluid (page 10-4).

Inspect the fluid level in the reservoir at each engine oil change with the engine off and cold. Add fluid if necessary; it does not require periodic changing.

The level must be kept between MAX and MIN.

Visually examine the lines and hoses for leaks and damage.

If new fluid is required frequently, consult an Authorized Mazda Dealer.

Washer Fluid

▼ Inspecting Washer Fluid Level

**WARNING**

Use only windshield washer fluid or plain water in the reservoir:

Using radiator antifreeze as washer fluid is dangerous. If sprayed on the windshield, it will dirty the windshield, affect your visibility, and could result in an accident.

Using Washer Fluid Without Anti-freeze Protection in Cold Weather:

Operating your vehicle in temperatures below 4 degrees C (40 degrees F) using washer fluid without anti-freeze protection is dangerous as it could cause impaired windshield vision and result in an accident. In cold weather, always use washer fluid with anti-freeze protection.

**NOTE**

State or local regulations may restrict the use of volatile organic compounds (VOCs), which are commonly used as anti-freeze agents in washer fluid. A washer fluid with limited VOC content should be used only if it provides adequate freeze resistance for all regions and climates in which the vehicle will be operated.
Inspect fluid level in the washer fluid reservoir; add fluid if necessary.

Use plain water if washer fluid is unavailable. But use only washer fluid in cold weather to prevent it from freezing.

**NOTE**
*Front and rear washer fluid is supplied from the same reservoir.*

---

**Body Lubrication**

All moving points of the body, such as door and hood hinges and locks, should be lubricated each time the engine oil is changed. Use a nonfreezing lubricant on locks during cold weather.

Make sure the hood's secondary latch keeps the hood from opening when the primary latch is released.
Wiper Blades

CAUTION

- Hot waxes applied by automatic car washers have been known to affect the wiper's ability to clean windows.
- To prevent damage to the wiper blades, do not use gasoline, kerosene, paint thinner, or other solvents on or near them.
- When the wiper lever is in the AUTO position and the ignition is switched ON, the wipers may move automatically in the following cases:
  - If the windshield above the rain sensor is touched.
  - If the windshield above the rain sensor is wiped with a cloth.
  - If the windshield is struck with a hand or other object.
  - If the rain sensor is struck with a hand or other object from inside the vehicle.
Be careful not to pinch hands or fingers as it may cause injury, or damage the wipers. When washing or servicing your Mazda, make sure the wiper lever is in the OFF position.

Contamination of either the windshield or the blades with foreign matter can reduce wiper effectiveness. Common sources are insects, tree sap, and hot wax treatments used by some commercial car washes.

If the blades are not wiping properly, clean the window and blades with a good cleaner or mild detergent; then rinse thoroughly with clean water. Repeat if necessary.

Replacing Windshield Wiper Blades

When the wipers no longer clean well, the blades are probably worn or cracked. Replace them.

CAUTION

To prevent damage to the wiper arms and other components, don't try to sweep the wiper arm by hand.

NOTE

To prevent damage to the wiper arm blades when raising both the driver and passenger side wiper arms, raise the driver side wiper arm first. Conversely, when setting down the wiper arms, set the passenger side wiper arm down first.

1. Raise the wiper arm.
2. Open the clip and slide the blade assembly in the direction of the arrow.
3. Wrap a flathead screwdriver or similar tool with a soft cloth to prevent damage to the clip.

NOTE

Using a soft cloth-wrapped flathead screwdriver.
4. Tilt the blade assembly and remove it from the arm.

5. Pull down the blade rubber and slide it out of blade holder.

6. Remove the metal stiffeners from each blade rubber and install them in the new blade.

**CAUTION**

To prevent damage to the windshield let the wiper arm down easily, don’t let it slap down on the windshield.

**CAUTION**

- Don’t bend or discard the stiffeners. You need to use them again.
- If the metal stiffeners are switched, the blade’s wiping efficiency could be reduced. So don’t use the driver’s side metal stiffeners on the passenger’s side, or vice versa.
- Be sure to reinstall the metal stiffeners in the new blade rubber so that the curve is the same as it was in the old blade rubber.
# Maintenance and Care

## Owner Maintenance

7. Carefully insert the new blade rubber. Then install the blade assembly in the reverse order of removal.

2. Firmly rotate the wiper blade to the right until it unlocks, then remove the blade.

### ▼ Replacing Rear Window Wiper Blade

When the wiper no longer cleans well, the blade is probably worn or cracked. Replace it.

**CAUTION**

To prevent damage to the wiper arm and other components, don’t try to sweep the wiper arm by hand.

1. Remove the cover and raise the wiper arm.

**CAUTION**

To prevent damage to the rear window let the wiper arm down easily, don’t let it slap down on the rear window.

3. Pull down the blade rubber and slide it out of the blade holder.
4. Remove the metal stiffeners from each blade rubber and install them in the new blade.

⚠️ CAUTION

*Don't bend or discard the stiffeners. You need to use them again.*

5. Carefully insert the new blade rubber. Then install the blade assembly in the reverse order of removal.
Battery

**WARNING**

Wash hands after handling the battery and related accessories:
- Battery posts, terminals and related accessories contain lead and lead compounds, chemicals known to the State of California to cause cancer and reproductive harm.

Read the following precautions carefully before using the battery or inspecting to ensure safe and correct handling:

Always wear eye protection when working near the battery:
- Working without eye protection is dangerous. Battery fluid contains SULFURIC ACID which could cause blindness if splashed into your eyes. Also, hydrogen gas produced during normal battery operation, could ignite and cause the battery to explode.

Wear eye protection and protective gloves to prevent contact with battery fluid:
- Spilled battery fluid is dangerous. Battery fluid contains SULFURIC ACID which could cause serious injuries if it gets in eyes, or on the skin or clothing. If this happens, immediately flush your eyes with water for 15 minutes or wash your skin thoroughly and get medical attention.

Always keep batteries out of the reach of children:
- Allowing children to play near batteries is dangerous. Battery fluid could cause serious injuries if it gets in the eyes or on the skin.

Keep flames and sparks away from open battery cells and do not allow metal tools to contact the positive (+) or negative (−) terminal of the battery when working near a battery. Do not allow the positive (+) terminal to contact the vehicle body:
- Flames and sparks near open battery cells are dangerous. Hydrogen gas, produced during normal battery operation, could ignite and cause the battery to explode. An exploding battery can cause serious burns and injuries. Keep all flames including cigarettes and sparks away from open battery cells.
Keep all flames, including cigarettes, and sparks away from open battery cells: Flames and sparks near open battery cells are dangerous. Hydrogen gas, produced during normal battery operation, could ignite and cause the battery to explode. An exploding battery can cause serious burns and injuries.

Battery Maintenance

To get the best service from a battery:
- Keep it securely mounted.
- Keep the top clean and dry.
- Keep terminals and connections clean, tight, and coated with petroleum jelly or terminal grease.
- Rinse off spilled electrolyte immediately with a solution of water and baking soda.
- If the vehicle will not be used for an extended time, disconnect the battery cables.
Maintenance and Care

Owner Maintenance

**Tires**

For reasons of proper performance, safety, and better fuel economy, always maintain recommended tire inflation pressures and stay within the recommended load limits and weight distribution.

⚠️ **WARNING**

**Using Different Tire Types:**

Driving your vehicle with different types of tires is dangerous. It could cause poor handling and poor braking, leading to loss of control. Except for the limited use of the temporary spare tire, use only the same type tires (radial, bias-belted, bias-type) on all four wheels.

**Using Wrong-Sized Tires:**

Using any other tire size than what is specified for your Mazda (page 10-6) is dangerous. It could seriously affect ride, handling, ground clearance, tire clearance, and speedometer calibration. This could cause you to have an accident. Use only tires that are the correct size specified for your Mazda.

▼ **Tire Inflation Pressure**

⚠️ **WARNING**

Always inflate the tires to the correct pressure:

- Overinflation or underinflation of tires is dangerous. Adverse handling or unexpected tire failure could result in a serious accident.
- Refer to specification charts on page 10-6.

**Use only a Mazda-genuine tire valve cap:**

Use of a non-genuine part is dangerous as the correct tire air pressure cannot be maintained if the tire valve becomes damaged. If the vehicle is driven under this condition, the tire air pressure will decrease which could result in a serious accident. Do not use any part for the tire valve cap that is not a Mazda-genuine part.
The Tire Pressure Monitoring System* does not alleviate the need to check the tire condition every day, including whether the tires all look inflated properly. Inspect all tire pressure monthly (including the spare) when the tires are cold. Maintain recommended pressures for the best ride, handling, and minimum tire wear. When checking the tire pressures, use of a digital tire pressure gauge is recommended.

Refer to the specification charts (page 10-6).

**NOTE**
- Always check tire pressure when tires are cold.
- Warm tires normally exceed recommended pressures. Don't release air from warm tires to adjust the pressure.
- Underinflation can cause reduced fuel economy, uneven and accelerated tire wear, and poor sealing of the tire bead, which will deform the wheel and cause separation of tire from rim.
- Overinflation can produce a harsh ride, uneven and accelerated tire wear, and a greater possibility of damage from road hazards.

Keep your tire pressure at the correct levels. If one frequently needs inflating, have it inspected.

**Tire Rotation**

**WARNING**

Rotate tires periodically:
Irregular tire wear is dangerous. To equalize tread wear for maintaining good performance in handling and braking, rotate the tires according to the scheduled maintenance charts. Refer to Scheduled Maintenance on page 8-3.

*Some models.* 8-33
During rotation, inspect them for correct balance.

Do not include (TEMPORARY USE ONLY) spare tire in rotation.

Also, inspect them for uneven wear and damage. Abnormal wear is usually caused by one or a combination of the following:

- Incorrect tire pressure
- Improper wheel alignment
- Out-of-balance wheel
- Severe braking

After rotation, inflate all tire pressures to specification (page 10-6) and inspect the lug nuts for tightness.

\[\text{CAUTION}\]

Rotate unidirectional tires and radial tires that have an asymmetrical tread pattern or studs only from front to rear, not from side to side. Tire performance will be reduced if rotated from side to side.

\[\text{WARNING}\]

Always use tires that are in good condition:
- Driving with worn tires is dangerous. Reduced braking, steering, and traction could result in an accident.

Replace all four tires at the same time:
- Replacing just one tire is dangerous. It could cause poor handling and poor braking resulting in loss of vehicle control. Mazda strongly recommends that you replace all four tires at the same time.

\[\text{CAUTION}\]

(With Tire Pressure Monitoring System)
- When replacing/repairing the tires or wheels or both, have the work done by an Authorized Mazda Dealer, or the tire pressure sensors may be damaged.

\[\text{NOTE}\]

(With Tire Pressure Monitoring System)
- When tires with steel wire reinforcement in the sidewalls are used, the system may not function correctly even with a genuine wheel. Refer to System Error Activation on page 5-32.
- Be sure to install the tire pressure sensors whenever tires or wheels are replaced. Refer to Tires and Wheels on page 5-32.
If a tire wears evenly, a wear indicator will appear as a solid band across the tread. Replace the tire when this happens.

![Tread wear indicator]

New tread | Worn tread

You should replace the tire before the band crosses the entire tread.

**NOTE**
Tires degrade over time, even when they are not being used on the road. It is recommended that tires generally be replaced when they are 6 years or older. Heat caused by hot climates or frequent high loading conditions can accelerate the aging process. You should replace the spare tire when you replace the other road tires due to the aging of the spare tire. The period in which the tire was manufactured (both week and year) is indicated by a 4-digit number. Refer to The tire labeling on page 9-24.

**Temporary Spare Tire**
Inspect the temporary spare tire at least monthly to make sure it's properly inflated and stored.

**NOTE**
The temporary spare tire condition gradually deteriorates even if it has not been used.

The temporary spare tire is easier to handle because of its construction which is lighter and smaller than a conventional tire. This tire should be used only for an emergency and only for a short distance.

Use the temporary spare tire only until the conventional tire is repaired, which should be as soon as possible.

(Except Mexico)
Maintain its pressure at 420 kPa (4.2 kgf/cm² or bar, 60 psi).

(Mexico)
Maintain its pressure at 250 kPa (2.5 kgf/cm² or bar, 36 psi).

**CAUTION**
- Do not use your temporary spare tire rim with a snow tire or a conventional tire. Neither will properly fit and could damage both tire and rim.
- The temporary spare tire has a tread life of less than 5,000 km. The tread life may be shorter depending on driving conditions.
- The temporary spare tire is for limited use, however, if the tread wear solid-band indicator appears, replace the tire with the same type of temporary spare (page 8-34).
NOTE
Tires degrade over time, even when they are not being used on the road. It is recommended that tires generally be replaced when they are 6 years or older. Heat caused by hot climates or frequent high loading conditions can accelerate the aging process. You should replace the spare tire when you replace the other road tires due to the aging of the spare tire. The period in which the tire was manufactured (both week and year) is indicated by a 4-digit number. Refer to The tire labeling on page 9-24.

Replacing a Wheel

WARNING
Always use wheels of the correct size on your vehicle:
Using a wrong-sized wheel is dangerous. Braking and handling could be affected, leading to loss of control and an accident.

CAUTION
➤ A wrong-sized wheel may adversely affect:
➤ Tire fit
➤ Wheel and bearing life
➤ Ground clearance
➤ Snow-chain clearance
➤ Speedometer calibration
➤ Headlight aim
➤ Bumper height
➤ Tire Pressure Monitoring System
➤ (With Tire Pressure Monitoring System)
➤ When replacing/repairing the tires or wheels or both, have the work done by an Authorized Mazda Dealer, or the tire pressure sensors may be damaged.
➤ The wheels equipped on your Mazda are specially designed for installation of the tire pressure sensors. Do not use non-genuine wheels, otherwise it may not be possible to install the tire pressure sensors.

NOTE
Be sure to install the tire pressure sensors whenever tires or wheels are replaced. Refer to Tires and Wheels on page 5-32.

When replacing a wheel, make sure the new one is the same as the original factory wheel in diameter, rim width, and offset (inset/outset).

Proper tire balancing provides the best riding comfort and helps reduce tread wear. Out-of-balance tires can cause vibration and uneven wear, such as cupping and flat spots.
MEMO
Maintenance and Care

Owner Maintenance

Light Bulbs

- Overhead light (Center)
- Overhead light/Map lights (Front)
- Vanity mirror lights
- Parking lights
- Headlights (High beam)
- Fog lights
- High-mount brake light
- Luggage compartment light
- License plate lights
- Reverse lights
- Brake lights/Taillights
- Front side marker lights
- Front turn signal lights
- Headlights (Low beam)
- Courtesy lights
- Front side marker lights
- Rear side marker lights
- Rear turn signal lights

* Some models.
WARNING
Do not replace the xenon fusion bulbs yourself:
Replacing the xenon fusion bulbs yourself is dangerous. Because the xenon fusion bulbs require high voltage, you could receive an electric shock if the bulbs are handled incorrectly. Consult an Authorized Mazda Dealer when the replacement is necessary.

Never touch the glass portion of a halogen bulb with your bare hands and always wear eye protection when handling or working around the bulbs:
When a halogen bulb breaks, it is dangerous. These bulbs contain pressurized gas. If one is broken, it will explode and serious injuries could be caused by the flying glass. If the glass portion is touched with bare hands, body oil could cause the bulb to overheat and explode when lit.

Always keep halogen bulbs out of the reach of children:
Playing with a halogen bulb is dangerous. Serious injuries could be caused by dropping a halogen bulb or breaking it some other way.

Replacing Exterior Light Bulbs

Headlight bulb
High-beam bulb
1. Make sure the ignition is switched off, and the headlight switch is off.
2. Lift the hood.
3. Turn the cover counterclockwise and remove it.
4. Disconnect the electrical connector from the bulb by pulling the tab on the connector with your finger and pulling the connector downward.
5. Turn the socket and bulb assembly to remove it. Carefully remove the bulb from its socket in the reflector by gently pulling it straight backward out of the socket.

6. Install the new bulb in the reverse order of removal.

**NOTE**
- To replace the bulb, contact an Authorized Mazda Dealer
- If the halogen bulb is accidentally touched, it should be cleaned with rubbing alcohol before being used.
- Use the protective cover and carton of the replacement bulb to dispose of the old bulb promptly out of the reach of children.

**Low-beam bulb**

(Xenon fusion bulb) You cannot replace the low beam bulbs by yourself. The bulbs must be replaced at an Authorized Mazda Dealer.

(Halogen bulbs)

1. Make sure the headlight switch is off.
2. Lift the hood.
5. Disconnect the electrical connector from the bulb by pulling the tab on the connector with your finger and pulling the connector downward.

6. Turn the socket and bulb assembly to remove it. Carefully remove the bulb from its socket in the reflector by gently pulling it straight backward out of the socket.

7. Install the new bulb in the reverse order of removal.

8. Install the coolant reservoir. If you are unsure of how tight the bolts should be, have them inspected at an Authorized Mazda Dealer.

**NOTE**
- To replace the bulb, contact an Authorized Mazda Dealer
- If the halogen bulb is accidentally touched, it should be cleaned with rubbing alcohol before being used.
- Use the protective cover and carton of the replacement bulb to dispose of the old bulb promptly out of the reach of children.

**Parking lights**

1. Make sure the ignition is switched off, and the headlight switch is off.

2. Lift the hood.

3. Turn the cover counterclockwise and remove it.

4. Turn the socket and bulb assembly counterclockwise and remove it.

<table>

**Fog lights**

1. Make sure the headlight switch is off.

Some models.
2. Turn the screws counterclockwise and remove them.

3. Turn the screws and the center section of the plastic retainers counterclockwise and remove them, then remove the mudguard.

4. Disconnect the electrical connector from the bulb by pressing the tab on the connector with your finger and pulling the connector downward.

5. Turn the socket and bulb assembly counterclockwise and remove it. Carefully remove the bulb from its socket in the reflector by gently pulling it straight backward out of the socket.

6. Install the new bulb in the reverse order of removal.

**NOTE**
- To replace the bulb, contact an Authorized Mazda Dealer
- If the halogen bulb is accidentally touched, it should be cleaned with rubbing alcohol before being used.
- Use the protective cover and carton of the replacement bulb to dispose of the old bulb promptly out of the reach of children.

**Side turn signal lights**, **Brake lights**, **Taillights**, **High-mount brake light**

Due to the complexity and difficulty of the procedure, the LED bulbs must be replaced by an Authorized Mazda Dealer.

**NOTE**
LED bulb replacement is not possible because it is built into the unit. Replace the unit.

*Some models.* 8-43
Maintenance and Care

Owner Maintenance

**Rear turn signal lights, Rear side-marker light**

1. Turn the bolts counterclockwise and remove them.

2. Pull the unit rearward to remove it.

3. Turn the socket and bulb assembly counterclockwise and remove it.

4. Disconnect the bulb from the socket.

5. Install the new bulb in the reverse order of removal.
**Reverse lights**

1. Remove the cover.

2. Turn the socket and bulb assembly counterclockwise and remove it.

3. Disconnect the bulb from the socket.

4. Install the new bulb in the reverse order of removal.

**NOTE**
To replace the bulb, contact an Authorized Mazda Dealer.

**License plate lights**

1. Wrap a flathead screwdriver with a soft cloth to prevent damage to the lens and remove the lens by carefully prying on the edge of the lens with the flathead screwdriver.

2. Disconnect the bulb by pulling it out.

3. Install the new bulb in the reverse order of removal.

**Replacing Interior Light Bulbs**

- **Overhead light/Map lights (Front), Overhead light (Center, Rear), Luggage compartment light, Courtesy lights, Vanity mirror lights**

   1. Wrap a small flathead screwdriver with a soft cloth to prevent damage to the lens and remove the lens by carefully prying on the edge of the lens with the flathead screwdriver.

   2. Disconnect the bulb by pulling it out.

- **Overhead light/Map lights (Front)**

Fuses

Your vehicle's electrical system is protected by fuses.

If any lights, accessories, or controls don't work, inspect the appropriate circuit protector. If a fuse has blown, the inside element will be melted.

If the same fuse blows again, avoid using that system and consult an Authorized Mazda Dealer as soon as possible.

▼Fuse Replacement

Replacing fuses located behind the glove compartment

If an electrical system is inoperative, inspect the fuses located behind the glove compartment.

1. Make sure the ignition is switched off, and other switches are off.
2. Open the glove compartment.
3. Remove the cover.
4. Pull the fuse straight out with the fuse puller provided on the fuse block located in the engine compartment.
5. Inspect the fuse and replace it if it's blown.
6. Insert a new fuse of the same amperage rating, and make sure it fits tightly. If it does not fit tightly, have an expert install it. We recommend an Authorized Mazda Dealer. If you have no spare fuses, borrow one of the same rating from a circuit not essential to vehicle operation, such as the ROOM circuit.

**CAUTION**

Always replace a fuse with one of the same rating. Otherwise you may damage the electric system.

7. Reinstall the cover and make sure that it is securely installed.

**Replacing the fuses under the hood**

If the headlights or other electrical components do not work and the fuses in the cabin are normal, inspect the fuse block under the hood. If a fuse is blown, it must be replaced. Follow these steps:

1. Make sure the ignition is switched off, and other switches are off.
2. Remove the fuse block cover or the relay box cover.

3. If any fuse but the MAIN fuse is blown, replace it with a new one of the same amperage rating.

**WARNING**

Do not replace the main fuse by yourself. Have an Authorized Mazda Dealer perform the replacement:

Replacing the fuse by yourself is dangerous because the MAIN fuse is a high current fuse. Incorrect replacement could cause an electrical shock or a short circuit resulting in a fire.

4. Reinstall the cover and make sure that it is securely installed.

How to Minimize Environmental Paint Damage

The paintwork on your Mazda represents the latest technical developments in composition and methods of application.

Environmental hazards, however, can harm the paint's protective properties, if proper care is not taken.

Here are some examples of possible damage, with tips on how to prevent them.

▼ Etching Caused by Acid Rain or Industrial Fallout

Occurrence
Industrial pollutants and vehicle emissions drift into the air and mix with rain or dew to form acids. These acids can settle on a vehicle's finish. As the water evaporates, the acid becomes concentrated and can damage the finish. And the longer the acid remains on the surface, the greater the chance is for damage.

Prevention
It is necessary to wash and wax your vehicle to preserve its finish according to the instructions in this section. These steps should be taken immediately after you suspect that acid rain has settled on your vehicle's finish.

▼ Damage Caused by Bird Dropping, Insects, or Tree Sap

Occurrence
Bird droppings contain acids. If these aren't removed they can eat away the clear and color base coat of the vehicle's paintwork.

When insects stick to the paint surface and decompose, corrosive compounds form. These can erode the clear and color base coat of the vehicle's paintwork if they are not removed.

Tree sap will harden and adhere permanently to the paint finish. If you scratch the sap off while it is hard, some vehicle paint could come off with it.

Prevention
It is necessary to have your Mazda washed and waxed to preserve its finish according to the instructions in this section. This should be done as soon as possible.

Bird droppings can be removed with a soft sponge and water. If you are traveling and these are not available, a moistened tissue may also take care of the problem. The cleaned area should be waxed according to the instructions in this section.

Insects and tree sap are best removed with a soft sponge and water or a commercially available chemical cleaner.

Another method is to cover the affected area with dampened newspaper for one to two hours. After removing the newspaper, rinse off the loosened debris with water.
Water Marks

Occurrence
Rain, fog, dew, and even tap water can contain harmful minerals such as salt and lime. If moisture containing these minerals settles on the vehicle and evaporates, the minerals will concentrate and harden to form white rings. The rings can damage your vehicle's finish.

Prevention
It is necessary to wash and wax your vehicle to preserve its finish according to the instructions in this section. These steps should be taken immediately after you find water marks on your vehicle's finish.

Paint Chipping

Occurrence
Paint chipping occurs when gravel thrown in the air by another vehicle's tires hits your vehicle.

How to avoid paint chipping
Keeping a safe distance between you and the vehicle ahead reduces the chances of having your paint chipped by flying gravel.

NOTE
- The paint chipping zone varies with the speed of the vehicle. For example, when traveling at 90 km/h (56 mph), the paint chipping zone is 50 m (164 ft).
- In low temperatures a vehicle's finish hardens. This increases the chance of paint chipping.
- Chipped paint can lead to rust forming on your Mazda. Before this happens, repair the damage by using Mazda touch-up paint according to the instructions in this section. Failure to repair the affected area could lead to serious rusting and expensive repairs.
Maintenance and Care

Appearance Care

Exterior Care

Follow all label and container directions when using a chemical cleaner or polish. Read all warnings and cautions.

▼ Maintaining the Finish

Washing

CAUTION

- When the wiper lever is in the AUTO position and the ignition is switched ON, the wipers may move automatically in the following cases:
  - If the windshield above the rain sensor is touched or wiped with a cloth.
  - If the windshield is struck with a hand or other object from either outside or inside the vehicle.

Keep hands and scrapers clear of the windshield when the wiper lever is in the AUTO position and the ignition is switched ON as fingers could be pinched or the wipers and wiper blades damaged when the wipers activate automatically.

If you are going to clean the windshield, be sure the wipers are turned off completely—this is particularly important when clearing ice and snow—when it is most likely that the engine is left running.

Do not spray water in the engine compartment. Otherwise, it could result in engine-starting problems or damage to electrical parts.

To help protect the finish from rust and deterioration, wash your Mazda thoroughly and frequently, at least once a month, with lukewarm or cold water.

If the vehicle is washed improperly, the paint surface could be scratched. Here are some examples of how scratching could occur.

Scratches occur on the paint surface when:
- The vehicle is washed without first rinsing off dirt and other foreign matter.
- The vehicle is washed with a rough, dry, or dirty cloth.
- The vehicle is washed at a car wash that uses brushes that are dirty or too stiff.
- Cleansers or wax containing abrasives are used.

NOTE
- Mazda is not responsible for scratches caused by automatic car washes or improper washing.
- Scratches are more noticeable on vehicles with darker paint finishes.

To minimize scratches on the vehicle's paint finish:
- Rinse off any dirt or other foreign matter using lukewarm or cold water before washing.
- Use plenty of lukewarm or cold water and a soft cloth when washing the vehicle. Do not use a nylon cloth.
- Rub gently when washing or drying the vehicle.
- Take your vehicle only to a car wash that keeps its brushes well maintained.
- Do not use abrasive cleansers or wax that contain abrasives.
CAUTION

- Do not use steel wool, abrasive cleaners, or strong detergents containing highly alkaline or caustic agents on chrome-plated or anodized aluminum parts. This may damage the protective coating; also, cleaners and detergents may discolor or deteriorate the paint.
- To prevent damaging the antenna, remove it before entering a car wash facility or passing beneath a low overhead clearance.

Pay special attention to removing salt, dirt, mud, and other foreign material from the underside of the fenders, and make sure the drain holes in the lower edges of the doors and rocker panels are clean.

Insects, tar, tree sap, bird droppings, industrial fallout, and similar deposits can damage the finish if not removed immediately. When prompt washing with plain water is ineffective, use a mild soap made for use on vehicles.

Thoroughly rinse off all soap with lukewarm or cold water. Do not allow soap to dry on the finish.

After washing the vehicle, dry it with a clean chamois to prevent water spots from forming.

WARNING

Dry off brakes that have become wet by driving slowly, releasing the accelerator pedal and lightly applying the brakes several times until the brake performance returns to normal:

Driving with wet brakes is dangerous. Increased stopping distance or the vehicle pulling to one side when braking could result in a serious accident. Light braking will indicate whether the brakes have been affected.

When using a high water pressure car wash

High water temperature and high water pressure car washers are available depending on the type of car wash machine. If the car washer nozzle is put too close to the vehicle, the force of the spray could damage or deform the molding, affect the sealability of parts, and allow water to penetrate the interior. Keep a sufficient space (30 cm or more) between the nozzle and the vehicle. In addition, do not spend too much time spraying the same area of the vehicle, and be very careful when spraying between gaps in doors and around windows.

Waxing

Your vehicle needs to be waxed when water no longer beads on the finish. Always wash and dry the vehicle before waxing it. In addition to the vehicle body, wax the metal trim to maintain its luster.

1. Use wax which contains no abrasives. Waxes containing abrasive will remove paint and could damage bright metal parts.
2. Use a good grade of natural wax for metallic, mica, and solid colors.
3. When waxing, coat evenly with the sponge supplied or a soft cloth.
4. Wipe off the wax with a soft cloth.

**NOTE**
A spot remover to remove oil, tar, and similar materials will usually also take off the wax. Rewax these areas even if the rest of the vehicle does not need it.

**Repairing Damage to the Finish**
Deep scratches or chips on the finish should be repaired promptly. Exposed metal quickly rusts and can lead to major repairs.

**CAUTION**
If your Mazda is damaged and needs metal parts repaired or replaced, make sure the body shop applies anti-corrosion materials to all parts, both repaired and new. This will prevent them from rusting.

**Bright-Metal Maintenance**
- Use tar remover to remove road tar and insects. Never do this with a knife or similar tool.
- To prevent corrosion on bright-metal surfaces, apply wax or chrome preservative and rub it to a high luster.
- During cold weather or in coastal areas, cover bright-metal parts with a coating of wax or preservative heavier than usual. It would also help to coat them with noncorrosive petroleum jelly or some other protective compound.

**Underbody Maintenance**
Road chemicals and salt used for ice and snow removal and solvents used for dust control may collect on the underbody. If not removed, they will speed up rusting and deterioration of such underbody parts as fuel lines, frame, floor pan, and exhaust system, even though these parts may be coated with anti-corrosive material.

Thoroughly flush the underbody and wheel housings with lukewarm or cold water at the end of each winter. Try also to do this every month.

Pay special attention to these areas because they easily hide mud and dirt. It will do more harm than good to wet down the road grime without removing it.

The lower edges of doors, rocker panels, and frame members have drain holes that should not be clogged. Water trapped there will cause rusting.
WARNING

Dry wet brakes by driving very slowly and applying the brakes lightly until brake performance is normal:

Driving with wet brakes is dangerous. Increased stopping distance or the vehicle pulling to one side when braking could result in a serious accident. Light braking will indicate whether the brakes have been affected.

▼ Aluminum Wheel Maintenance

A protective coating is provided over the aluminum wheels. Special care is needed to protect this coating.

CAUTION

Do not use any detergent other than mild detergent. Before using any detergent, verify the ingredients. Otherwise, the product could discolor or stain the aluminum wheels.

NOTE

- Do not use a wire brush or any abrasive cleaner, polishing compound, or solvent on aluminum wheels. They may damage the coating.
- Always use a sponge or soft cloth to clean the wheels. Rinse the wheels thoroughly with lukewarm or cold water. Also, be sure to clean the wheels after driving on dusty or salted roads to help prevent corrosion.
- Avoid washing your vehicle in an automatic car wash that uses high-speed or hard brushes.
- If your aluminum wheels lose luster, wax the wheels.

(With Tire Pressure Monitoring System)

Check special requirements for Tire Pressure Monitoring System. Refer to Tires and Wheels on page 5-32.

▼ Plastic Part Maintenance

- When cleaning the plastic lenses of the lights, do not use gasoline, kerosene, rectified spirit, paint, thinner, highly acidic detergents, or strongly alkaline detergents. Otherwise, these chemical agents can discolor or damage the surfaces resulting in a significant loss in functionality. If plastic parts become inadvertently exposed to any of these chemical agents, flush with water immediately.
- If plastic parts such as the bumpers become inadvertently exposed to chemical agents or fluids such as gasoline, oil, engine coolant, or battery fluid, it could cause discoloration, staining, or paint peeling. Wipe off any such chemical agents or fluids using a soft cloth immediately.
Maintenance and Care

Appearance Care

- High water temperature and high water pressure car washers are available depending on the type of high pressure car washer device. If the car washer nozzle is put too close to the vehicle or aimed at one area for an extended period of time, it could deform plastic parts or damage the paint.
- Do not use wax containing compounds (polish). Otherwise, it could result in paint damage.
- In addition, do not use an electrical or air tool to apply wax. Otherwise, the frictional heat generated could result in deformation of plastic parts or paint damage.

Interior Care

Dashboard Precautions

Prevent caustic solutions such as perfume and cosmetic oils from contacting the dashboard. They'll damage and discolor it. If these solutions get on the dashboard, wipe them off immediately.

⚠️ CAUTION

Do not use glazing agents. Glazing agents contain ingredients which may cause discoloration, wrinkling, cracks and peeling.

Cleaning the Upholstery and Interior Trim

**Vinyl**

Remove dust and loose dirt from vinyl with a whisk broom or vacuum cleaner. Clean vinyl with a leather-and-vinyl cleaner.

**Leather**

Remove dust and sand first using a vacuum cleaner or other means, then wipe dirt off using a soft cloth with a leather cleaner or a soft cloth soaked in mild soap. Wipe off the remaining cleaner or soap using a cloth soaked in clean water and wrung out well. Remove moisture with a dry, soft cloth and allow the leather to further dry in a well-ventilated, shaded area. If the leather gets wet such as from rain, also remove moisture and dry it as soon as possible.
NOTE

- Because genuine leather is a natural material, its surface is not uniform and it may have natural scars, scratches, and wrinkles.
- To maintain the quality for as long as possible, periodical maintenance, about twice a year, is recommended.
- Sand and dust on the seat surface may damage the overcoat of the genuine leather surfaces and accelerate wear.
- Greasy soiling on genuine leather may cause molding and stains.
- Rubbing hard with a stiff brush or cloth may cause damage.
- Do not wipe the leather using alcohol, chlorine bleach, or organic solvents such as thinner, benzene, or gasoline. Otherwise, it may cause discoloration or stains.
- If the seats get wet, promptly remove moisture with a dry cloth. Remaining moisture on the surface may cause deterioration such as hardening and shrinkage.
- Exposure to direct sunlight for long periods may cause deterioration and shrinkage. When parking the car under direct sunlight for long periods, shade the interior using sunshades.
- Do not leave vinyl products on the seats for long periods as they may affect the leather quality and coloring. If the cabin temperature becomes hot, the vinyl may deteriorate and adhere to the genuine leather.

CAUTION

Use only recommended cleaners and procedures. Others may affect appearance and fire-resistance.

Piano black panel*

The following parts are fitted with panels that have been treated with a special coating that resists scratching.
- Center panel
- Steering wheel (partial)
- Door trim panel
When the panel needs to be cleaned, use a soft cloth to wipe off dirt from the surface.

NOTE
Scratches or nicks on the panels resulting from the use of a hard brush or cloth may not be repairable.

Cleaning the Lap/Shoulder Belt Webbing

Clean the webbing with a mild soap solution recommended for upholstery or carpets. Follow instructions. Don't bleach or dye the webbing; this may weaken it.

After cleaning the belts, thoroughly dry the belt webbing and make sure there is no remaining moisture before retracting them.

Fabric

Remove dust and loose dirt from fabric with a whisk broom or vacuum cleaner. Clean it with a mild soap solution good for upholstery and carpets. Remove fresh spots immediately with a fabric spot cleaner.

*Some models.

**WARNING**

*Have an Authorized Mazda Dealer replace damaged seat belts immediately:*

*Using damaged seat belts is dangerous. In a collision, damaged belts cannot provide adequate protection.*

▼ **Cleaning the Window Interiors**

If the windows become covered with an oily, greasy, or waxy film, clean them with glass cleaner. Follow the directions on the container.

**CAUTION**

- Do not scrape or scratch the inside of the window glass. It could damage the thermal filaments and the antenna lines.
- When washing the inside of the window glass, use a soft cloth dampened in lukewarm water, gently wiping the thermal filaments and the antenna lines. Use of glass cleaning products could damage the thermal filaments and the antenna lines.

Customer Assistance

Customer Assistance (U.S.A.)

Your complete and permanent satisfaction is our business. We are here to serve you. All Authorized Mazda Dealers have the knowledge and the tools to keep your Mazda vehicle in top condition.

If you have any questions or recommendations for improvement regarding the service of your Mazda vehicle or servicing by Mazda Dealer personnel, we recommend that you take the following steps:

**NOTE**
*If it becomes necessary to have the components or wiring system for the supplementary restraint system modified to accommodate a person with certain medical conditions in accordance with a certified physician, contact an Authorized Mazda Dealer.*

▼STEP 1: Contact Your Mazda Dealer

Discuss the matter with an Authorized Mazda Dealer. This is the quickest and best way to address the issue.
- If your concern has not been resolved by the CUSTOMER RELATIONS, SALES, SERVICE, or PARTS MANAGER, then please contact the GENERAL MANAGER of the dealership or the OWNER.
- If it becomes necessary to have the components or wiring system for the supplementary restraint system modified to accommodate a person with certain medical conditions in accordance with a certified physician, go to STEP2.

▼STEP 2: Contact Mazda North American Operations

If for any reason you feel the need for further assistance after contacting your dealership management or it becomes necessary to have the components or wiring system for the supplementary restraint system modified to accommodate a person with certain medical conditions in accordance with a certified physician, you can reach Mazda North American Operations by one of the following ways.

Log on: at www.mazdaUSA.com

Answers to many questions, including how to locate or contact a local Mazda dealership in the U.S., can be found here.

E-mail: click on “Contact Us” located on the “Inside Mazda” tab, or at the bottom of the page at www.mazdaUSA.com

By phone at: 1 (800) 222-5500
By letter at:
Attn: Customer Assistance
Mazda North American Operations
7755 Irvine Center Drive
Irvine, CA 92618-2922
P.O. Box 19734
Irvine, CA 92623-9734

In order to serve you efficiently and effectively, please help us by providing the following information:

1. Your name, address, and telephone number
2. Year and model of vehicle
3. Vehicle Identification Number (17 digits, noted on your registration or title or located on the upper driver's side corner of the dash)
4. Purchase date and current mileage
5. Your dealer's name and location
6. Your question(s)

If you live outside the U.S.A., please contact your nearest Mazda Distributor.

▼STEP 3: Contact Better Business Bureau (BBB)

Mazda North American Operations realizes that mutual agreement on some issues may not be possible. As a final step to ensure that your concerns are being fairly considered, Mazda North American Operations has agreed to participate in a dispute settlement program administered by the Better Business Bureau (BBB) system, at no cost to you the consumer.

BBB AUTO LINE works with consumers and the manufacturer in an attempt to reach a mutually acceptable resolution of any warranty related concerns. If the BBB is not able to facilitate a settlement they will provide an informal hearing before an arbitrator.

You are required to resort to BBB AUTO LINE before exercising rights or seeking remedies under the Federal Magnuson-Moss Warranty Act, 15 U.S.C. § 2301 et seq. To the extent permitted by the applicable state “Lemon Law”, you are also required to resort to BBB AUTO LINE before exercising any rights or seeking remedies under the “Lemon Law”. If you choose to seek remedies that are not created by the Magnuson-Moss Warranty Act or the applicable state “Lemon Law”, you are not required to first use BBB AUTO LINE.
Customer Assistance

The whole process normally takes 40 days or less. The arbitration decision is not binding on you or Mazda unless you accept the decision. For more information about BBB AUTO LINE, including current eligibility standards, please call 1-800-955-5100 or visit the BBB website at www.lemonlaw.bbb.org.

Being truly committed to customer satisfaction is more than a phrase with Mazda. We hope to satisfy every customer directly, but if there is ever a question about our decision, Mazda believes in providing a fast, fair and free method such as the BBB AUTO LINE to ensure Mazda delivers on our commitment to do the right thing for our customers!

▼ California Customers

2. If you have a problem arising under a Mazda written warranty, we encourage you to bring it to our attention. If we are unable to resolve it, you may file a claim with BBB AUTO LINE. Claims must be filed with BBB AUTO LINE within six (6) months after the expiration of the warranty.

3. To file a claim with BBB AUTO LINE, call 1-800-955-5100. There is no charge for the call.

4. In order to file a claim with BBB AUTO LINE, you will have to provide your name and address, the brand name and vehicle identification number (VIN) of your vehicle, and a statement of the nature of your problem or complaint. You will also be asked to provide: the approximate date of your acquisition of the vehicle, the vehicle's current mileage, the approximate date and mileage at the time any problem(s) were first brought to the attention of Mazda or one of our dealers, and a statement of the relief you are seeking.

5. BBB AUTO LINE staff may try to help resolve your dispute through mediation. If mediation is not successful, or if you do not wish to participate in mediation, claims within the program’s jurisdiction may be presented to an arbitrator at an informal hearing. The arbitrator's decision should ordinarily be issued within 40 days from the time your complaint is filed; there may be a delay of 7 days if you did not first contact Mazda about your problem, or a delay of up to 30 days if the arbitrator requests an inspection/report by an impartial technical expert or further investigation and report by BBB AUTO LINE.
6. You are required to use BBB AUTO LINE before asserting in court any rights or remedies conferred by California Civil Code Section 1793.22. You are also required to use BBB AUTO LINE before exercising rights or seeking remedies created by Title I of the Magnuson-Moss Warranty Act, 15 U.S.C. sec. 2301 et seq. If you choose to seek redress by pursuing rights and remedies not created by California Civil Code Section 1793.22 or Title I of the Magnuson-Moss Warranty Act, resort to BBB AUTO LINE is not required by those statutes.

7. California Civil Code Section 1793.2 (d) requires that, if Mazda or its representative is unable to repair a new motor vehicle to conform to the vehicle's applicable express warranty after a reasonable number of attempts, Mazda may be required to replace or repurchase the vehicle. California Civil Code Section 1793.22 (b) creates a presumption that Mazda has had a reasonable number of attempts to conform the vehicle to its applicable express warranties if, within 18 months from delivery to the buyer or 18,000 miles on the vehicle's odometer, whichever occurs first, one or more of the following occurs:

• The same nonconformity [a failure to conform to the written warranty that substantially impairs the use, value or safety of the vehicle] results in a condition that is likely to cause death or serious bodily injury if the vehicle is driven AND the nonconformity has been subject to repair two or more times by Mazda or its agents AND the buyer or lessee has directly notified Mazda of the need for the repair of the nonconformity; OR
• The same nonconformity has been subject to repair 4 or more times by Mazda or its agents AND the buyer has notified Mazda of the need for the repair of the nonconformity; OR
• The vehicle is out of service by reason of repair of nonconformities by Mazda or its agents for a cumulative total of more than 30 calendar days after delivery of the vehicle to the buyer.

NOTICE TO Mazda AS REQUIRED ABOVE SHALL BE SENT TO THE FOLLOWING ADDRESS:
Mazda North American Operations
7755 Irvine Center Drive
Irvine, CA 92618
ATTN: Customer Mediation

8. The following remedies may be sought in BBB AUTO LINE: repairs, reimbursement for money paid to repair a vehicle or other expenses incurred as result of a vehicle nonconformity, repurchase or replacement of your vehicle, and compensation for damages and remedies available under Mazda's written warranty or applicable law.

9. The following remedies may not be sought in BBB AUTO LINE: punitive or multiple damages, attorneys' fees, or consequential damages other than as provided in California Civil Code Section 1794 (a) and (b).
10. You may reject the decision issued by a BBB AUTO LINE arbitrator. If you reject the decision, you will be free to pursue further legal action. The arbitrator's decision and any findings will be admissible in a court action.

11. If you accept the arbitrator's decision, Mazda will be bound by the decision, and will comply with the decision within a reasonable time not to exceed 30 days after we receive notice of your acceptance of the decision.

12. Please call BBB AUTO LINE at 1-800-955-5100 for further details about the program.
Customer Assistance (Canada)

Satisfaction Review Process
Your complete and permanent satisfaction is of primary concern to Mazda. All Authorized Mazda Dealers have both the knowledge and tools to keep your Mazda in top condition. In our experience, any questions, problems, or complaints regarding the operation of your Mazda or any other general service transactions are most effectively resolved by your dealer. If the cause of your dissatisfaction cannot adequately be addressed by normal dealership procedures, we recommend that you take the following steps:

STEP 1: Contact the Mazda Dealer
Discuss the matter with a member of dealership management. If the Service Manager has already reviewed your concerns, contact the owner of the dealership or its General Manager.

STEP 2: Contact the Mazda Regional Office
If you feel that you still require assistance, ask the dealer Service Manager to arrange for you to meet the local Mazda Service Representative. If more expedient, contact Mazda Canada Inc. Regional Office nearest you for such arrangements. Regional Office address and phone numbers are shown (page 9-9).

STEP 3: Contact the Mazda Customer Relations Department
If still not substantially satisfied, contact the Customer Relations Department, Mazda Canada Inc., 55 Vogell Road, Richmond Hill, Ontario, L4B 3K5 Canada TEL: 1 (800) 263-4680.
Provide the Department with the following information:

1. Your name, address and telephone number
2. Year and model of vehicle
3. Vehicle Identification Number (VIN). Refer to the “Vehicle Identification Labels” page of section 10 of this manual for the location of the VIN.
4. Purchase date
5. Present odometer reading
6. Your dealer’s name and location
7. The nature of your problem and/or cause of dissatisfaction

The Department, in cooperation with the local Mazda Service Representative, will review the case to determine if everything possible has been done to ensure your satisfaction.
Please recognize that the resolution of service problems in most cases requires the use of your Mazda dealer's service facilities, personnel and equipment. We urge you to follow the above three steps in sequence for most effective results.

▼ Mediation/Arbitration Program

Occasionally a customer concern cannot be resolved through Mazda's Customer Satisfaction Program. If after exhausting the procedures in this manual your concern is still not resolved, you have another option.

Mazda Canada Inc. participates in an arbitration program administered by the Canadian Motor Vehicle Arbitration Plan (CAMVAP). CAMVAP will advise you about how your concern may be reviewed and resolved by an independent third party through binding arbitration.

Your complete satisfaction is the goal of Mazda Canada Inc. and our dealers. Mazda's participation in CAMVAP makes a valuable contribution to our achieving that goal. There is no charge for using CAMVAP. CAMVAP results are fast, fair and final as the award is binding on both you and Mazda Canada Inc.

▼ Canadian Motor Vehicle Arbitration Plan (CAMVAP)

If a specific item of concern arises, where a solution cannot be reached between an owner, Mazda, and/or one of its dealers (that all parties cannot agree upon), the owner may wish to use the services offered by the Canadian Motor Vehicle Arbitration Plan (CAMVAP).

CAMVAP uses the services of Provincial Administrators to assist consumers in scheduling and preparing for their arbitration hearings. However, before you can proceed with CAMVAP you must follow your Mazda dispute resolution process as outlined previously.
CAMVAP is fully implemented in all provinces and territories. Consumers wishing to obtain further information about the Program should contact the Provincial Administrator at 1 (800) 207-0685, or by contacting the Canadian Motor Vehicle Arbitration Plan Office at:

Canadian Motor Vehicle Arbitration Plan
235 Yorkland Boulevard, suite 300
North York, Ontario

Customer Assistance

Customer Assistance (Puerto Rico)

Your complete and permanent satisfaction is our business. That is why all Authorized Mazda Dealers have the knowledge and the tools to keep your Mazda vehicle in top condition.

If you have any questions or recommendations for improvement regarding the service of your Mazda vehicle or servicing by Mazda Dealer personnel, we recommend that you take the following steps:

▼STEP 1

Discuss the matter with an Authorized Mazda Dealer. This is the quickest and best way to address the issue. If your concern has not been resolved by the CUSTOMER RELATIONS, SALES, SERVICE, or PARTS MANAGER, then please contact the GENERAL MANAGER of the dealership or the OWNER.

▼STEP 2

If, after following STEP 1, you feel the need for further assistance, please contact your area's Mazda representative (Indicated on the next page).

Please help us by providing the following information:

1. Your name, address, and telephone number
2. Year and model of vehicle
3. Vehicle Identification Number (17 digits, noted on your registration or title or located on the upper driver's side corner of the dash)
4. Purchase date and current mileage
5. Your dealer's name and location
6. Your question(s)
Customer Assistance (Mexico)

Your complete and permanent satisfaction is our business. We are here to serve you. All Authorized Mazda Dealers have the knowledge and the tools to keep your Mazda vehicle in top condition.

If you have any questions or recommendations for improvement regarding the service of your Mazda vehicle or servicing by Mazda Dealer personnel, we recommend that you take the following steps:

▼ STEP 1: Contact Your Mazda Dealer

Discuss the matter with an Authorized Mazda Dealer. This is the quickest and best way to address the issue.

• If your concern has not been resolved by the CUSTOMER RELATIONS, SALES, SERVICE, or PARTS MANAGER, then please contact the GENERAL MANAGER of the dealership or the OWNER.

• If it becomes necessary to have the components or wiring system for the supplementary restraint system modified to accommodate a person with certain medical conditions in accordance with a certified physician, go to STEP2.

▼ STEP 2: Contact Mazda Motor de Mexico

If for any reason you feel the need for further assistance after contacting your dealership management and it becomes necessary to have the components or wiring system for the supplementary restraint system modified to accommodate a person with certain medical conditions in accordance with a certified physician, you can reach Mazda Motor de Mexico by one of the following ways.

Answers to many questions, including how to locate or contact a local Mazda dealership in Mexico, can be found here.

E-mail: click on “Contactanos” at the top of the page at www.MazdaMexico.com.mx

Warranties for Your Mazda

- New Vehicle Limited Warranty
- Distributor Major Component Limited Warranty (Canada only)
- Safety Restraint System Limited Warranty
- Anti-perforation Limited Warranty
- Federal Emission Control Warranty (U.S.A. only)
  - Emission Defect Warranty
  - Emission Performance Warranty
- California Emission Control Warranty (U.S.A. only)
- Emission Control Warranty (Canada only)
- Replacement Parts and Accessories Limited Warranty
- Tire Warranty

**NOTE**
Detailed warranty information is provided with your Mazda.
Government regulations in the United States and Canada require that automobiles meet specific emission regulations and safety standards. Therefore, vehicles built for use in the United States, its territories, and Canada may differ from those sold in other countries. The differences may make it difficult or even impossible for your vehicle to receive satisfactory servicing in other countries. We strongly recommend that you NOT take your Mazda outside these areas.

You may have these problems if you do:

- Recommended fuel may be unavailable. Any kind of leaded fuel or low-octane fuel will affect vehicle performance and damage the emission controls and engine.
- Proper repair facilities, tools, testing equipment, and replacement parts may not be available.

The Mazda warranty applies only to Mazda vehicles registered and normally operated in the United States, its territories, and Canada.
Outside the United States

Government regulations in the United States require that automobiles meet specific emission regulations and safety standards. Therefore, vehicles built for use in the United States may differ from those sold in other countries.

The differences may make it difficult or even impossible for your vehicle to receive satisfactory servicing in other countries. We strongly recommend that you NOT take your Mazda outside the United States. However, in the event that you are moving to Canada permanently, Mazda vehicles built for use in the United States could be eligible for exportation to Canada with specific vehicle modifications to comply with the Canadian Motor Vehicle Safety Standards (CMVSS).

NOTE
The above is applicable for a permanent import/export situation and not related to travelers on vacation.

You may have the following problems if you do take your vehicle outside of the United States:
- Recommended fuel may be unavailable. Any kind of leaded fuel or low-octane fuel will affect vehicle performance and damage the emission controls and engine.
- Proper repair facilities, tools, testing equipment, and replacement parts may not be available.

Please refer to your Manufacturer's Warranty Booklet for more information.
Government regulations in Canada require that automobiles meet specific emission regulations and safety regulations. Therefore, vehicles built for use in Canada may differ from those sold in other countries.

The differences may make it difficult or even impossible for your vehicle to receive satisfactory servicing in other countries. We strongly recommend that you NOT take your Mazda outside Canada. However, in the event that you are moving to the United States permanently, Mazda vehicles built for use in Canada could be eligible for exportation to the United States with specific vehicle modifications to comply with the United States Federal Motor Vehicle Safety Standards (FMVSS).

**NOTE**
The above is applicable for a permanent import/export situation and not related to travelers on vacation.

You may have the following problems if you do take your vehicle outside of Canada:
- Recommended fuel may be unavailable. Any kind of leaded fuel or low-octane fuel will affect vehicle performance and damage the emission controls and engine.
- Proper repair facilities, tools, testing equipment, and replacement parts may not be available.

Please refer to your Manufacturer's Warranty Booklet for more information.
Registering Your Vehicle in A Foreign Country (Except United States and Canada)

Registering your vehicle in a foreign country may be problematic depending on whether it meets the specific emission and safety standards of the country in which the vehicle will be driven. Consequently, your vehicle may require modifications at personal expense in order to meet the regulations.

In addition, you should be aware of the following issues:
- Satisfactory vehicle servicing may be difficult or impossible in another country.
- The fuel specified for your vehicle may be unavailable.
- Parts, servicing techniques, and tools necessary to maintain and repair your vehicle may be unavailable.
- There might not be an Authorized Mazda Dealer in the country you plan to take your vehicle.
- The Mazda warranty is valid only in certain countries.
Add-On Non-Genuine Parts and Accessories

Non-genuine parts and accessories for Mazda vehicles can be found in stores. These may fit your vehicle, but they are not approved by Mazda for use with Mazda vehicles. When you install non-genuine parts or accessories, they could affect your vehicle's performance or safety systems; the Mazda warranty doesn't cover this. Before you install any non-genuine parts or accessories, consult an Authorized Mazda Dealer.

⚠️ WARNING

Always consult an Authorized Mazda Dealer before you install non-genuine parts or accessories:

- Installation of non-genuine parts or accessories is dangerous. Improperly designed parts or accessories could seriously affect your vehicle’s performance or safety systems. This could cause you to have an accident or increase your chances of injuries in an accident.

Be very careful in choosing and installing add-on electrical equipment, such as mobile telephones, two-way radios, stereo systems, and car alarm systems:

- Incorrectly choosing or installing improper add-on equipment or choosing an improper installer is dangerous. Essential systems could be damaged, causing engine stalling, air-bag (SRS) activation, ABS/TCS/DSC inactivation, or a fire in the vehicle.

Mazda assumes no responsibility for death, injury, or expenses that may result from the installation of add-on non-genuine parts or accessories.
Cell Phones Warning

**WARNING**

Please comply with the legal regulations concerning the use of communication equipment in vehicles in your State or Province:

Use of any electrical devices such as cell phones, computers, portable radios, vehicle navigation or other devices by the driver while the vehicle is moving is dangerous. Dialing a number on a cell phone while driving also ties-up the driver’s hands. Use of these devices will cause the driver to be distracted and could lead to a serious accident. If a passenger is unable to use the device, pull off the right-of-way to a safe area before use. If use of a cell phone is necessary despite this warning, use a hands-free system to at least leave the hands free to drive the vehicle. Never use a cell phone or other electrical devices while the vehicle is moving and, instead, concentrate on the full-time job of driving.
Uniform Tire Quality Grading System (UTQGS)

This information relates to the tire grading system developed by the U.S. National Highway Traffic Safety Administration for grading tires by tread wear, traction, and temperature performance.

▶ Tread Wear

The tread wear grade is a comparative rating based on the wear rate of the tire when tested under controlled conditions on a specified government test course. For example, a tire graded 150 would wear one-and-a-half times as well on the government course as a tire graded 100.

The relative performance of tires depends upon the actual conditions of their use, however, and may depart significantly from the norm because of variations in driving habits, service practices and differences in road characteristics and climate.

▶ Traction-AA, A, B, C

The traction grades, from highest to lowest, are AA, A, B, and C. These grades represent the tire's ability to stop on wet pavement as measured under controlled conditions on specified government test surfaces of asphalt and concrete. A tire marked C may have poor traction performance.

⚠️ WARNING

The traction grade assigned to this tire is based on braking (straight ahead) traction tests and does not include acceleration cornering (turning), hydroplaning, or peak traction characteristics.

▶ Temperature-A, B, C

The temperature grades A (the highest), B, and C, represent the tire's resistance to the generation of heat and its ability to dissipate heat when tested under controlled conditions on a specified indoor laboratory test wheel. Sustained high temperature can cause the material of the tire to degenerate and reduce tire life, and excessive temperatures can lead to sudden tire failure.

Grade C corresponds to a level of performance which all passenger vehicle tires must meet under the Federal Motor Vehicle Safety Standard No. 109. Grades B and A represent higher levels of performance on the laboratory test wheel than the minimum required by law.
**WARNING**

*Keep your vehicle’s tires properly inflated and not overloaded:*

Driving with improperly inflated or overloaded tires is dangerous. Excessive speed, underinflation, or excessive loading, either separately or in combination, can cause heat buildup and possible tire failure. The temperature grade for this tire is established for a tire that is properly inflated and not overloaded.

These grades will be added to the sidewalls of passenger vehicle tires over the next several years according to a schedule established by the NHTSA and the tire manufacturers.

The grade of tires available as standard or optional equipment on Mazda vehicles may vary with respect to grade.

ALL PASSENGER VEHICLE TIRES MUST CONFORM TO THESE GRADES AND TO ALL OTHER FEDERAL TIRE-SAFETY REQUIREMENTS.

**Uniform Tire Quality Grading**

Quality grades can be found where applicable on the tire sidewall between tread shoulder and maximum section width.

For example:

**Treadwear 200 Traction AA Temperature A**

**UTQGS MARK (example)**
Customer Information and Reporting Safety Defects

Tire Information (except Canada)

Tire Labeling

Federal law requires tire manufacturers to place standardized information on the sidewall of all tires. This information identifies and describes the fundamental characteristics of the tire and also provides a tire identification number for safety standard certification and in case of a recall.

▼ Information on Passenger Vehicle Tires

Please refer to the sample below.

1. TIN: U.S. DOT tire identification number
2. Passenger car tire
3. Nominal width of tire in millimeters
4. Ratio of height to width (aspect ratio)
5. Radial
6. Run-flat tire
7. Rim diameter code
8. Load index & speed symbol
9. Severe snow conditions
10. Tire ply composition and materials used

9-24
11. Max. load rating

12. Tread wear, traction and temperature grades

13. Max. permissible inflation pressure

14. SAFETY WARNING

P215/65R15 95H is an example of a tire size and load index rating. Here is an explanation of the various components of that tire size and load index rating. Note that the tire size and load index rating may be different from the example.

P
Indicates a tire that may be installed on cars, SUVs, minivans and light trucks as designated by the Tire and Rim Association (T&RA).

NOTE
If your tire size does not begin with a letter this may mean it is designated by either ETRTO (European Tire and Rim Technical Organization) or JATMA (Japan Tire Manufacturing Association).

215
“215” is the nominal width of the tire in millimeters. This three-digit number gives the width in millimeters of the tire from sidewall edge to sidewall edge. In general, the larger the number, the wider the tire.

65
“65” is the aspect ratio. This two-digit number indicates the tire's ratio of height to width.

R
“R” is the tire construction symbol. R indicates “Radial ply construction”.

15
“15” is the wheel rim diameter in inches.

95
“95” is the Load Index. This two-or three-digit number indicates how much weight each tire can support.
H “H” is the speed rating. The speed rating denotes the maximum speed for which the use of the tire is rated.

<table>
<thead>
<tr>
<th>Letter Rating</th>
<th>Speed Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Q</td>
<td>99 mph</td>
</tr>
<tr>
<td>R</td>
<td>106 mph</td>
</tr>
<tr>
<td>S</td>
<td>112 mph</td>
</tr>
<tr>
<td>T</td>
<td>118 mph</td>
</tr>
<tr>
<td>U</td>
<td>124 mph</td>
</tr>
<tr>
<td>H</td>
<td>130 mph</td>
</tr>
<tr>
<td>V</td>
<td>149 mph</td>
</tr>
<tr>
<td>W</td>
<td>168 mph</td>
</tr>
<tr>
<td>Y</td>
<td>186 mph</td>
</tr>
</tbody>
</table>

* For tires with a maximum speed capability over 149 mph, tire manufacturers sometimes use the letters ZR. For tires with a maximum speed capability over 186 mph, tire manufacturers always use the letters ZR.

M+ S or M/S: Mud and Snow
AT: All Terrain.
AS: All Season. The “M+ S” or “M/S” indicates that the tire has some functional use in mud and snow.

U.S. DOT Tire Identification Number (TIN)
This begins with the letters “DOT” which indicates the tire meets all federal standards. The next two numbers or letters are the plant code where it was manufactured, and the last four numbers represent the week and year the tire was manufactured. For example, the numbers 457 means the 45th week of 1997. After 2000 the numbers go to four digits. For example, the number 2102 means the 21th week of 2002. The other numbers are marketing codes used at the manufacturer's discretion. This information is used to contact consumers if a tire defect requires a recall.

Tire Ply Composition and Materials Used
The number of plies indicates the number of layers of rubber-coated fabric in the tire. In general, the greater the number of plies, the more weight a tire can support. Tire manufacturers also must indicate the tire materials, which include steel, nylon, polyester, and other.

Maximum Load Rating
This number indicates the maximum load in kilograms and pounds that can be carried by the tire.

Maximum Permissible Inflation Pressure
This number is the greatest amount of air pressure that should ever be put in the tire under normal driving conditions.

9-26
Tread Wear, Traction and Temperature Grades

**Tread wear:** The tread wear grade is a comparative rating based on the wear rate of the tire when tested under controlled conditions on a specified government test course. For example, a tire graded 150 would wear one and one-half (1 1/2) times as well on the government course as a tire graded 100.

**Traction:** The traction grades, from highest to lowest are AA, A, B, and C. The grades represent the tire's ability to stop on wet pavement as measured under controlled conditions on specified government test surfaces of asphalt and concrete. A tire marked C may have poor traction performance.

**Temperature:** The temperature grades are A (the highest), B and C, representing the tire's resistance to the generation of heat and its ability to dissipate heat when tested under controlled conditions on a specified indoor laboratory test wheel.

**Snow Tires**

In some heavy snow areas, local governments may require true snow tires, those with very deeply cut tread. These tires should only be used in pairs or placed on all four wheels. Make sure you purchase snow tires that are the same size and construction type as the other tires on your vehicle.

**SAFETY WARNING**

The following safety warning appears on the tire's sidewall.

SERIOUS INJURY MAY RESULT FROM:

- EXPLOSION OF TIRE/RIM ASSEMBLY DUE TO IMPROPER MOUNTING-MATCH TIRE DIAMETER TO RIM DIAMETER; NEVER EXCEED 40 psi (275 kPa) TO SEAT BEADS-ONLY SPECIALLY TRAINED PERSONS SHOULD MOUNT TIRES.

- TIRE FAILURE DUE TO UNDER-INFLATION/OVERLOADING/DAMAGE-FOLLOW OWNER'S MANUAL AND PLACARD IN VEHICLE-FREQUENTLY CHECK INFLATION PRESSURE AND INSPECT FOR DAMAGE.
Information on Temporary Tires

Please refer to the sample below.

1. Temporary tires
2. Nominal width of tire in millimeters
3. Ratio of height to width (aspect ratio)
4. Diagonal
5. Rim diameter code
6. Load index & speed symbol

T115/70D 16 90M is an example of a tire size and load index rating. Here is an explanation of the various components of that tire size and load index rating. Note that the tire size and load index rating may be different from the example.

T
Indicates a tire that may be installed on cars, SUVs, minivans and light trucks as designated by the Tire and Rim Association (T&RA).

115
“115” is the nominal width of the tire in millimeters. This three-digit number gives the width in millimeters of the tire from sidewall edge to sidewall edge. In general, the larger the number, the wider the tire.
70
“70” is the aspect ratio. This two-digit number indicates the tire's ratio of height to width.

D
“D” is the tire construction symbol. D indicates “diagonal ply construction”.

16
“16” is the wheel rim diameter in inches.

90
“90” is the Load Index. This two-or three-digit number indicates how much weight each tire can support.

M
“M” is the speed rating. The speed rating denotes the maximum speed for which the use of the tire is rated.

</tbody>
</table>
Location of the Tire Label (Placard)

You will find the tire label containing tire inflation pressure by tire size and other important information on the driver's side B-pillar or on the edge of the driver's door frame.

SAMPLE

| TIRE AND LOADING INFORMATION RENSEIGNEMENTS SUR LES PNEUS ET LE CHARGEMENT |
| SEATING CAPACITY NOMBRE DE PLACES | TOTAL 5 | FRONT AVANT 2 | REAR ARRIÈRE 3 |

The combined weight of occupants and cargo should never exceed the weight capacity of the vehicle. Le poids total des occupants et du chargement ne doit jamais dépasser xxx kg or xxx lbs. *

| TIRE PNEU | SIZE DIMENSIONS | COLD TIRE PRESSURE PRESSION DES PNEUS À FROID |
| FRONT AVANT | P195/70R14 | 200 kPa, 29 psi |
| REAR ARRIÈRE | P195/70R14 | 200 kPa, 29 psi |
| SPARE DE SECOURS | T125/70D15 | 420 kPa, 60 psi |

▼ Recommended Tire Inflation Pressure

On the tire label you will find the recommended tire inflation pressure in both kPa and psi for the tires installed as original equipment on the vehicle. It is very important that the inflation pressure of the tires on your vehicle is maintained at the recommended pressure. You should check the tire pressure regularly to insure that the proper inflation pressure is maintained.

Refer to Tires on page 10-6.

NOTE

Tire pressures listed on the vehicle placard or tire information label indicate the recommended cold tire inflation pressure, measured when the tires are cold, after the vehicle has been parked for at least 3 hours. As you drive, the temperature in the tire warms up, increasing the tire pressure.
WARNING

Always check the tire inflation pressures on a regular basis according to the recommended tire inflation pressure on the tire label and in conjunction with the information in this owner's manual:

Driving your vehicle with under-inflated tires is dangerous. Under-inflation is the most common cause of failures in any kind of tire and may result in severe cracking, tread separation or “blowout”, with unexpected loss of vehicle control and increased risk of injury. Under-inflation increases sidewall flexing and rolling resistance, resulting in heat buildup and internal damage to the tire. It results in unnecessary tire stress, irregular wear, loss of control and accidents. A tire can lose up to half of its air pressure and not appear to be flat! It is impossible to determine whether or not tires are properly inflated just by looking at them.

\textbf{\textit{\textbullet\ } Checking Tire Pressure}

1. When you check the air pressure, make sure the tires are cold — meaning they are not hot from driving even a mile.

2. Remove the cap from the valve on one tire.

3. Firmly press a tire gauge onto the valve.

4. Add air to achieve recommended air pressure.

5. If you overfill the tire, release air by pushing on the metal stem in the center of the valve. Then recheck the pressure with your tire gauge.

6. Replace the valve cap.

7. Repeat with each tire, including the spare.

\textbf{NOTE}

Some spare tires require higher inflation pressure.

8. Visually inspect the tires to make sure there are no nails or other objects embedded that could poke a hole in the tire and cause an air leak.

9. Check the sidewalls to make sure there are no gouges, cuts, bulges, cracks or other irregularities.

\textbf{NOTE}

Warm tires normally exceed recommended pressures. Don't release air from warm tires to adjust the pressure.

Under-inflation can cause serious failures and accidents.

Over-inflation can produce a harsh ride and the greater possibility of damage from road hazards.
Glossary of Terms

Tire Placard: A label indicating the OE tire sizes, recommended inflation pressure, and the maximum weight the vehicle can carry.

Tire Identification Number (TIN): A number on the sidewall of each tire providing information about the tire brand and manufacturing plant, tire size, and date of manufacture.

Inflation Pressure: A measure of the amount of air in a tire.

kPa: Kilopascal, the metric unit for air pressure.

psi: Pounds per square inch, the English unit for air pressure.

B-pillar: The structural member at the side of the vehicle behind the front door.

Original Equipment (OE): Describes components originally equipped on the vehicle.

Vehicle Load Limit: The maximum value of the combination weight of occupants and cargo.

Bead Area of the Tire: Area of the tire next to the rim.

Sidewall Area of the Tire: Area between the bead area and the tread.

Tread Area of the Tire: Area on the perimeter of the tire that contacts the road when it's mounted on the vehicle.

Seating capacity means the total allowable number of vehicle occupants. Seating capacity is described on the tire label.

Production options weight is the combination weight of installed regular production options weighing over 2.3 kilograms in excess of the standard items which they replace, and not previously considered in the curb weight or accessory weight, including heavy duty brakes, ride levelers, roof rack, heavy duty battery, and special trim.

Rim is the metal support (wheel) for a tire or a tire and tube assembly upon which the tire beads are seated.
Tire Maintenance

Improper or inadequate vehicle maintenance can cause tires to wear abnormally. Here are some important maintenance points:

▼ Tire Inflation Pressure

Inspect all tire pressure monthly (including the spare) when the tires are cold. Maintain recommended pressures for the best ride, top handling, and minimum tire wear. Use the pressures specified on the vehicle tire information placard or tire label for optimum service.

▼ Tire Rotation

To equalize tread wear, rotate the tires every 12,000 km (7,500 miles) or sooner if irregular wear develops. During rotation, inspect them for correct balance.

Inspect the tires for uneven wear and damage. Abnormal wear is usually caused by one or a combination of the following:
- Incorrect tire pressure
- Improper wheel alignment
- Out-of-balance wheel
- Severe braking

After rotation, inflate all tire pressures to specification (page 10-6) and inspect the lug nuts for tightness.

⚠ CAUTION

Rotate unidirectional tires and radial tires that have an asymmetrical tread pattern or studs only from front to rear, not from side to side. Tire performance will be weakened if rotated from side to side.
Replacing a Tire

**WARNING**

*Always use tires that are in good condition:*

*Driving with worn tires is dangerous. Reduced braking, steering, and traction could result in an accident.*

If a tire wears evenly, a wear indicator will appear as a solid band across the tread. Replace the tire when this happens.

![Tread wear indicator](image)

New tread  |  Worn tread

You should replace the tire before the band crosses the entire tread.

**NOTE**

*Tires degrade over time, even when they are not being used on the road. It is recommended that tires generally be replaced when they are 6 years or older. Heat caused by hot climates or frequent high loading conditions can accelerate the aging process. You should replace the spare tire when you replace the other road tires due to the aging of the spare tire. The period in which the tire was manufactured (both week and year) is indicated by a 4-digit number. Refer to The tire labeling on page 9-24.*

Safety Practices

The way you drive has a great deal to do with your tire mileage and safety. So cultivate good driving habits for your own benefit.

- Observe posted speed limits
- Avoid fast starts, stops and turns
- Avoid potholes and objects on the road
- Do not run over curbs or hit the tire against the curb when parking
If you feel a sudden vibration or ride disturbance while driving or you suspect your tire or vehicle has been damaged, immediately reduce your speed. Drive with caution until you can safely pull off the road. Stop and inspect the tire for damage. If the tire is under-inflated or damaged, deflate it, remove the tire and rim and replace it with your spare tire. If you cannot detect a cause, have the vehicle towed to the nearest vehicle or tire dealer to have the vehicle inspected.
Vehicle Loading

This section will guide you in the proper loading of your vehicle and/or trailer, to keep your loaded vehicle weight within its design rating capability, with or without a trailer. Properly loading your vehicle will provide maximum return of vehicle design performance. Before loading your vehicle, familiarize yourself with the following terms for determining your vehicle's weight ratings, with or without a trailer, from the vehicle's Safety Certification Label and Tire and Load Information Label:

**WARNING**

Overloaded Vehicle:

Overloading a vehicle is dangerous. The results of overloading can have serious consequences in terms of passenger safety. Too much weight on a vehicle's suspension system can cause spring or shock absorber failure, brake failure, handling or steering problems, irregular tire wear, tire failure or other damage. Overloading makes a vehicle harder to drive and control. It also increases the distance required for stopping. In cases of serious overloading, brakes can fail completely, particularly on steep grades. The load a tire will carry safely is a combination of the size of the tire, its load range, and corresponding inflation pressure.

Never overload the vehicle and always observe the vehicle's weight ratings from the vehicle's Safety Certification and Tire and Load Information labels.

Base Curb Weight is the weight of the vehicle including a full tank of fuel and all standard equipment. It does not include passengers, cargo, or optional equipment.

Vehicle Curb Weight is the weight of your new vehicle when you picked it up from your dealer plus any aftermarket equipment.
Payload is the combination weight of cargo and passengers that the vehicle is designed to carry. The maximum payload for your vehicle can be found on the Tire and Load Information label on the driver's door frame or door pillar. Look for “THE COMBINATION WEIGHT OF OCCUPANTS AND CARGO SHOULD NEVER EXCEED XXX kg or XXX lbs” for your maximum payload. The payload listed on the tire label is the maximum payload for the vehicle as built by the assembly plant. If any aftermarket or dealer installed equipment has been installed on the vehicle, the weight of the equipment must be subtracted from the payload listed on the tire label in order to be accurate.

SAMPLE
Cargo Weight includes all weight added to the Base Curb Weight, including cargo and optional equipment. When towing, trailer tongue load or king pin weight is also part of cargo weight.

The cargo weight limit decreases depending on the number of vehicle occupants. The cargo weight limit can be calculated by subtracting the total weight of the vehicle occupants from the “combination weight of occupants and cargo should never exceed” value on the tire label.

Examples: Based on a single occupant weight of 68 kg (150 lbs), and a value of 385 kg (849 lbs) for the “combination weight of occupants and cargo should never exceed”:
The cargo weight limit with one occupant is 385 kg (849 lbs) – 68 kg (150 lbs) = 317 kg (699 lbs)
The cargo weight limit with two occupants is 385 kg (849 lbs) – (68 × 2) kg (150 × 2) lbs = 249 kg (549 lbs)
If the weight of the occupant increases, the cargo weight limit decreases by that much.

GAW (Gross Axle Weight) is the total weight placed on each axle (front and rear) - including vehicle curb weight and all payload.
GAWR (Gross Axle Weight Rating) is the maximum allowable weight that can be carried by a single axle (front or rear). These numbers are shown on the Safety Compliance Certification Label located on the driver's door frame or door pillar. The total load on each axle must never exceed its GAWR.

GVW (Gross Vehicle Weight) is the Vehicle Curb Weight + cargo + passengers.

GVWR (Gross Vehicle Weight Rating) is the maximum allowable weight of the fully loaded vehicle (including all options, equipment, passengers and cargo). The GVWR is shown on the Safety Compliance Certification Label located on the driver's door frame or door pillar. The GVW must never exceed the GVWR.
WARNING

Exceeding Axle Weight Rating Limits:

Exceeding the Safety Certification Label axle weight rating limits is dangerous and could result in death or serious injury as a result of substandard vehicle handling, performance, engine, transmission and/or structural damage, serious damage to the vehicle, or loss of control.

Always keep the vehicle within the axle weight rating limits.

Do not tow a trailer with this vehicle:

Towing a trailer with this vehicle is dangerous because it has not been designed to tow a trailer and doing so will affect the drive system which could result in vehicle damage.
GCW (Gross Combination Weight) is the weight of the loaded vehicle (GVW) plus the weight of the fully loaded trailer.

GCWR (Gross Combination Weight Rating) is the maximum allowable weight of the vehicle and the loaded trailer - including all cargo and passengers - that the vehicle can handle without risking damage. (Important: The towing vehicle's braking system is rated for operation at GVWR, not at GCWR. Separate functional brakes should be used for safe control of towed vehicles and for trailers weighing more than 1,500 lbs). The GCW must never exceed the GCWR.

Maximum Loaded Trailer Weight is the highest possible weight of a fully loaded trailer the vehicle can tow. It assumes a vehicle with only mandatory options, no cargo (internal or external), a tongue load of 10–15% (conventional trailer) or king pin weight of 15–25% (fifth-wheel trailer), and driver only (150 lbs). Consult your dealership (or the RV and Trailer Towing Guide provided by your dealership) for more detailed information.

Tongue Load or Fifth-Wheel King Pin Weight refers to the amount of the weight that a trailer pushes down on a trailer hitch.

Examples: For a 5000 lb conventional trailer, multiply 5000 by 0.10 and 0.15 to obtain a proper tongue load range of 500 to 750 lbs. For an 11,500 lb fifth-wheel trailer, multiply by 0.15 and 0.25 to obtain a proper king pin load range of 1,725 to 2,875 lbs.
Customer Information and Reporting Safety Defects

Tire Information (except Canada)

**WARNING**

**Exceeding GVWR or GAWR Specifications:**
Exceeding the GVWR or the GAWR specified on the certification label is dangerous. Exceeding any vehicle rating limitation could result in a serious accident, injury, or damage to the vehicle.

Do not use replacement tires with lower load carrying capacities than the originals because they may lower the vehicle's GVWR and GAWR limitations. Replacement tires with a higher limit than the originals do not increase the GVWR and GAWR limitations.

Never exceed the GVWR or the GAWR specified on the certification label.
Steps for Determining the Correct Load Limit:

Steps for Determining Correct Load Limit:

1. Locate the statement “The combined weight of occupants and cargo should never exceed XXX kg or XXX lbs” on your vehicle's placard.

2. Determine the combined weight of the driver and passengers that will be riding in your vehicle.

3. Subtract the combined weight of the driver and passengers from XXX kg or XXX lbs.

4. The resulting figure equals the available amount of cargo and luggage load capacity. For example, if the “XXX” amount equals 1400 lbs. and there will be five 150 lb passengers in your vehicle, the amount of available cargo and luggage load capacity is 650 lbs. (1400 – 750 (5 × 150) = 650 lbs.)

5. Determine the combined weight of luggage and cargo being loaded on the vehicle. That weight may not safely exceed the available cargo and luggage load capacity calculated in Step 4.

6. If your vehicle will be towing a trailer, the load from your trailer will be transferred to your vehicle. Consult this manual to determine how this reduces the available cargo and luggage load capacity of your vehicle.
Customer Information and Reporting Safety Defects

Reporting Safety Defects

**Reporting Safety Defects (U.S.A.)**

If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform the National Highway Traffic Safety Administration (NHTSA) in addition to notifying Mazda Motor Corporation (Your Mazda Importer/Distributor).

If NHTSA receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may order a recall and remedy campaign. However, NHTSA cannot become involved in individual problems between you, your dealer, or Mazda Motor Corporation (Your Mazda Importer/Distributor).

To contact NHTSA, you may call the Vehicle Safety Hotline toll-free at 1-888-327-4236 (TTY:1-800-424-9153) ; go to http://www.safercar.gov; or write to: Administrator, NHTSA, 1200 New Jersey Avenue, SE., Washington, DC, 20590. You can also obtain other information about motor vehicle safety from http://www.safercar.gov.

**NOTE**
If you live in the U.S.A., all correspondence to Mazda Motor Corporation should be forwarded to:

*Mazda North American Operations*
7755 Irvine Center Drive
Irvine, California 92618-2922

or

P.O. Box 19734
Irvine, CA 92623-9734

Customer Assistance Center or toll free at 1 (800) 222-5500

If you live outside of the U.S.A., please contact the nearest Mazda Distributor shown (page 9-13) in this booklet.
Reporting Safety Defects (Canada)

Canadian customers who wish to report a safety-related defect to Transport Canada, Defect Investigations and Recalls, may telephone the toll free hotline 1-800-333-0510, or contact Transport Canada by mail at: Transport Canada, ASFAD, Place de Ville Tower C, 330 Sparks Street, Ottawa ON K1A 0N5.

For additional road safety information, please visit the Road Safety website at: http://www.tc.gc.ca/roadsafety/menu.htm
Factory-authorized Mazda service publications are available for owners who wish to do some of their own maintenance and repair.

When requesting any of our publications through an Authorized Mazda Dealer, refer to the chart below.

If they do not have what you need in stock, they can order it for you.
